In no case has it failed to meet the approval of the consumer.
The SCIENTIFIC AMERICAN and MANUFACTURER'S JOURNAL, after testing this Oil, pronounce it **superior** to any other for Lubricating.—For sale **ONLY** by the Inventor
F. S. PEASE, 61 Main st., BUFFALO.
Reliable orders filled for any part of the United States or Europe.

Manhattan Oil Company,
Office, No. 16 Broadway, NEW YORK.
JAMES M. MOTLEY, Vice Pres't and Treasurer.
MANUFACTURERS OF
MASON'S SPERM OIL,
AND DEALERS IN
SPERM, WHALE, LARD AND OTHER OILS,
For Railroads, Steamers, Machinery and Burning.

Machinists' Lubricating OIL COMPANY,
No. 68 Courtlandt and 172 Washington Sts.,
NEW YORK,
ALEXANDER POPE, Treasurer.
MANUFACTURERS OF
WHITE METALLIC OIL,
AND DEALERS IN
SPERM, LARD, WHALE, AND OTHER OILS.

MORRIS, WHEELER & CO.,
SUCCESSORS TO
MORRIS & JONES & CO.,
IRON MERCHANTS,
MARKET AND SIXTEENTH STREETS,
PHILADELPHIA.
IRON AND STEEL
IN ALL THEIR VARIETIES.
BOILER PLATE, CAR AXLES,
BOILER RIVETS, RAILROAD IRON,
CUT NAILS and SPIKES, PIG IRON, etc.
Having the selling agency of a number of the Rolling Mills, Furnaces and Forges in this State, **orders for any description of IRON** can be executed.

IRON BOILER FLUES.
LAP-WELDED BOILER FLUES,
1¼ to 6 inches outside diameter, cut to definite length, 2 to 20 feet as required.
Wrought Iron Welded Tubes,
From ⅛ to 6 inches bore, with Screw and Socket Connections. T's, L's, Stops, Valves, Flanges, etc., etc.
MANUFACTURED AND FOR SALE BY
MORRIS, TASKER & CO.,
PASCAL IRON WORKS.
Established 1821.
WAREHOUSE—209 SOUTH THIRD STREET,
PHILADELPHIA.
STEPHEN MORRIS, CHAS. WHEELER.
THOS. T. TASKER, JR. STEPHEN P. M. TASKER.

R. T. EDWARDS,
261 PEARL STREET, NEW YORK,
MANUFACTURERS OF
WROUGHT, CAST AND GALVANIZED
PIPE,
AND EVERY DESCRIPTION OF
STEAM, GAS AND WATER FITTINGS,
Used by Engineers, Manufacturers, Steam and Gas Fitters, Plumbers, etc.
CAST IRON STREET MAINS,

Boiler Flues,	Steam Pumps,	Steam Valves,	Gas Cocks
Heater Coils,	Steam Gauges,	Steam Cocks,	Gas Metes
Steam Traps,	Steam Whistles,	Gauge Cocks,	Oil Cups.

Tongs, Pipe Wrenches, Pliers, Proving Pumps, Vices, etc.

New York and Erie R. R.

PASSENGER TRAINS leave, via Pavonia Ferry and Long Dock, from foot of Chambers street, as follows, viz:

7.00 A. M., EXPRESS, for Dunkirk and Buffalo, and principal intermediate stations.

8.00 A. M., MAIL, for Dunkirk, and intermediate stations. This Train remains over night at Elmira, and proceeds the next morning.

9.00 A. M., MILK, *daily*, for Otisville, and intermediate stations.

11.00 A. M., ACCOMMODATION, *daily*, for Port Jervis, and principal stations.

4.00 P. M., WAY, for Middletown, Newburg, and intermediate stations.

5.00 P. M., NIGHT EXPRESS, *daily*, for Dunkirk, Buffalo, Canandaigua, and principal stations. The Train of Saturday stops at all Mail Train stations, and runs only to Elmira.

6.00 P. M., ACCOMMODATION, for Hornellsville, and principal stations.

NATHANIEL MARSH, *Receiver*.
CHA'S MINOT, *Gen. Sup't.*

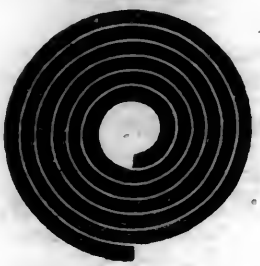
THE METALLIC CAR SPRING COMPANY

OF NEW YORK,

OFFICE, 54 WILLIAM STREET, NEW YORK,

SOLE MANUFACTURERS OF

CONICAL VOLUTE STEEL



AND

COMBINATION METAL AIR AND GUM

(Patented by R. Vose, Jan. 3, June 5 and 12, 1860)

CAR SPRINGS.

The two most reliable Springs ever offered to the RAILROAD PUBLIC.

COURTLANDT PALMER, President.

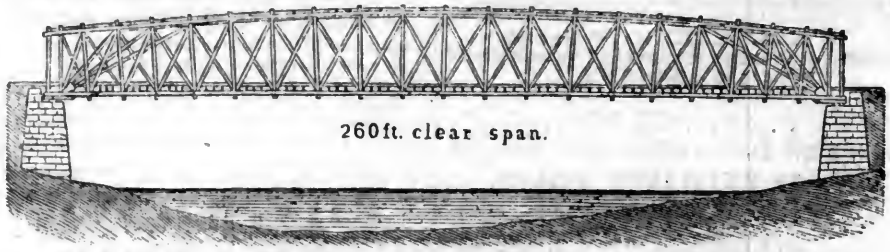
CHARLES D. GIBSON, Treasurer.

RICHARD VOSE, Secretary.

JAMES JEFFRIES & SONS,

MANUFACTURERS OF

LOCOMOTIVE, CAR AND TANK



SPRINGS,

PHILADELPHIA, (rear of Girard House.)

Will be happy to furnish a **SET OF SPRINGS** to such companies as may wish to **try** their **Durability** and **Elasticity,** by writing us the Length, Width, Curve over all, and the weight which they are to bear.

THE McCALLUM BRIDGE COMPANY,

(OFFICE No. 110 BROADWAY—over Metropolitan Bank—NEW YORK,)

ARE prepared to construct **Railroad, Draw,** and other **Bridges** and **Railroad Depots** at any point in the United States or Canada, on as **favorable** terms as any other parties.

Their plan of Bridge is known as **"McCALLUM'S PATENT INFLEXIBLE ARCHED TRUSS,"** and is claimed to be **superior** to, and more **economical** than any other form of bridge now in use.

The principles upon which this bridge is constructed, remove **the necessity for adjustment,** cause it to be **inflexible,** and allow of much **longer spans** than can be used with any other truss bridge.

They are also prepared to construct **Roofs** of churches, halls, or other buildings where **arched ceilings** are required, upon a **new** and **peculiar** plan, by which **cross-tie beams** or rods are entirely **avoided,** leaving the whole space to the peak **unobstructed,** while the **side walls** are not subjected to the **slightest thrust.**

Engineers, Officers of Railroad Companies, Architects, and others desiring information are requested to call and examine models, plans, etc., **or address** this Company **at 110 Broadway.**

D. C. McCALLUM, President.

EDWIN J. HORNER,

SUCCESSOR TO

McDANEL & HORNER,

LOCOMOTIVE AND RAILROAD

CAR SPRING

MANUFACTURER,

WILMINGTON, DELAWARE.

COL. LONG'S PATENT IRON RAILWAY BRIDGE.

THE plan of this **Bridge** is upon the principle of the **SUSPENSION TRUSS;** and the **Iron** is so arranged in its construction as to impart its greatest **longitudinal strength** to the whole work.

The subscribers are prepared to furnish large quantities of **IRON BRIDGING,** for Railroad or other purposes, at short notice, and at moderate prices.

M. M. WHITE & CO., Proprietors,

GLOBE IRON WORKS, 33d St., near 11th Avenue, N. Y.

Our Commercial Prospects.

The political and commercial world are so intimately allied, so dependent upon each other and so controlling in their reciprocal effect, that nothing can happen to the one without influencing, either for good or evil, the other also. The panic which has recently swept over our land, ruining thousands of merchants and scattering hard earned fortunes to the winds, is the result of a political crisis. The storm had long been gathering. At first it was a speck upon the horizon; but gradually the cloud darkened in appearance—now and then came a gust of wind, and ever and anon was heard the faint rumblings of thunder. But still the community did not take warning, and few if any preparations were made for the awful tempest. Now it has burst upon us, with all its stern reality.

That we shall ever again enjoy the same *character* of prosperity may well be doubted. Whatever may be the result of this unfortunate struggle, the old channels of business will be broken up; for many of the old merchants have failed, and political animosity, we fear, has gone so far as to separate men who were dependent upon each other for their very subsistence, and indisposed them to any future commercial relations. But that we shall be prospered, and that our prosperity will go on increasing, and, in due time, will surpass the measure of any past success, nay more, will go as far beyond it as the steam-engine, the printing press and the telegraph, surpass the tread mill, the manuscript and the stage coach, we have no manner of doubt. If, when peace is declared, the Southern States are still found in the Union the deprivations which thousands have suffered during the hostilities, the exhaustion of all the home stock of goods and merchandise usually furnished by the merchants, manufacturers and farmers of the North, will create an immense demand which will tax all the resourses of the nation to supply; while the economy now universally practised will result in placing all classes in a position to profit by this demand. And this will be only measurably less the case should the independence of the Southern States be finally acknowledged. The inhabitants of the new republic will be in the same destitute condition, and they will find, after all, that the Northerners are not their enemies, and that they are as ready as ever to supply them with goods cheaper than they can purchase them elsewhere.

The most serious view of the case is, however, involved in the supposition that the Northern and Southern citizens will be permanently debarred from trading with each other by a long war; or adverse legislation after hostilities have embittered each section, and the Southern Confederacy shall be established. To this we respond, that, admitting such an unwelcome state of things, still it is not the extent of a country or the number of its inhabitants that is the true basis of its prosperity. Each section has within itself the power of sustaining millions of yet unborn generations. If a balance were to be struck we should say that the North has an advantage resulting from the variety of occupations which give its inhabitants employment. But the ultimate prosperity of every country is dependent upon the intelligence, the industry and enterprise of its citizens. In these qualities there is no nation upon the globe that will surpass our own countrymen; and whether we exist in the Union as in times past, or separate into a Northern and a Southern Confederacy, these elements are a sure guarantee of the ultimate prosperity of both Nations. We know that a government which oppresses its citizens with heavy burdens of taxation may in time destroy much of this energy; and we lament the unfortunate divisions in our national counsels that has left no other way of settlement than by the arbitration of the sword, because it necessitates an expenditure of money which will weigh more or less heavily in time to come. But we also know that during the wars which ended in the overthrow of the first Napoleon, England, notwithstanding her vast outlay of money, actually increased her wealth in a greater ratio, than during any former period of her history. These wars extended from 1794 to 1816, and the total expenditures amounted to $8,499,551,195; the annual expenditures averaged nearly $100,000,000. These sums appear to us almost fabulous; but in 1801 the official value of her exports of cotton were only $35,000,000 while in 1822 they amounted to $155,000,000. Her manufactures and commercial interests increased in the same proportions. While her Generals were winning laurels in the field, her inventors were bringing forth the wealth of the nation and winning the undying gratitude of millions of men. The *Steam Engine* and the *Cotton Gin* developed resources which enabled her to bear the enormous taxation and to come out of the conflict stronger than ever. If England could do as well in the beginning of the century, shall we go behind her now? Are we less energetic, or have we fewer inventors? The archives of the Patent office, the many valuable American inventions during the last fifty years afford the answer. We have many Fultons and McCormicks left; and we hear the click of the Sewing Machine while we write. A few years in our history has made the drudgery of the farm, a rural pastime for nature's noblemen, while every department of manufacture has multiplied its productive power by the ingenuity of American inventors. These are sources of wealth that spring from intelligence and enterprise; and we believe that no nation is so greatly blessed in these respects as our own.

Nor are evidences of even a present prosperity lacking around us. The failures in the commercial world are chiefly among the heavy importers of foreign goods. Our home manufacturers are doing very well. As we walk abroad we see new stores being erected; excavations being made and foundations laid for other still more magnificent palaces. We are inclined to think that what many men want is confidence; and that those who pos-

sess confidence and exert themselves with their usual energy will come out well in the end. We believe that the cool weather of fall will bring a brisk home trade, and merrier hearts than panic mongers are now willing to admit.

New York Canals.

The present Canal Board entered upon its duties January 1, 1860. The condition in which it found the Canals and their revenues may be gathered from the annual message of the Governor, of the same date. The receipts from all sources belonging to the Canal Fund were insufficient, by nearly half a million of dollars, to pay for repairs and maintenance of the Canals and the interest on the Canal debt. The figures were these :—

The interest on the canal debt of $26,807,684 38	$1,400,000 00
Expenses, repairs, &c	897,858 96
	$2,297,858 95
Revenue from tolls, &c	1,859,879 63
Deficiency	$437,979 33

There seemed to be no resort to supply this deficiency but taxation.

In addition to the canal debt, the State owed $6,500,000 on account of the general fund, requiring an annual interest of about $400,000, and was without any source of revenue, except taxation, to meet either that charge or the ordinary expenses of administration.

At the same time the canals were unfinished and required an expenditure of $1,600,000 to complete them. * * * The Legislature, elected in ignorance of an actual deficiency of revenue, and of course without any instructions upon the point from their constituents, adjourned, after providing for the immediate wants of the State and for the completion of the canals, by the heaviest tax ever levied upon the people, leaving it to the Canal Board to devise a policy which might save the State from perpetuating such a system,

To this duty the Canal Board addressed itself by reducing the expenditure on the one hand and increasing the revenue on the other.

The effort to reduce the cost of maintenance and repairs produced gratifying results.

Expenses in 1859-'60	$897,878 96
Same in 1860-'61	746,976 78
Annual saving	$150,902 18

The expenses for the present year can now be estimated only, but there is no reason to suppose they will exceed those of 1860-'61.

To increase the revenue no means appeared to be so expedient as an increase of the rates of toll.

The increase was denounced by some, who dreaded its effect upon the tonnage of the canals, by diverting transportation from the canals to railroads. This opposition was reinforced by nearly the entire carrying interest upon the canals, which maintained that its business would be circumscribed thereby. The Board, however, persisted in discarding the ruinous rates at which the tolls had been placed, and upon several important articles of transport it imposed a moderately increased rate. Experience has settled the question between the Canal Board and such as dissented from its views. The Auditor's report, made to the Legislature in January last, contains this statement :— "On every class of articles on which the rates have been raised, the toll receipts have been increased over 1859." The result of the year's business was most satisfactory, and contrasted with that of the previous year thus :—

Tolls received in 1860-'61	$3,009,597 00
Tolls received in 1859-'60	1,723,945 00
Increase in 1860-'61	$1,285,652 00
Add amount saved in expenses	150,902 18
Increase net income in '60 over '59.	$1,436,554 18

Instructed as well as encouraged by results like these, the Board made some further modifications of the rates of toll last spring. Up to August 1st the increase over the large receipts of 1860 is $293,000; which justifies the belief that the whole increase of the present year will be $500,000 over 1860 and $2,000,000 over 1859.

Contrasting the close of 1861 with the opening of 1860, it will be seen that while, on January 1, 1860, the canals were deficient in receipts to pay expenses and interest by the sum of $437,979 33, they will be able, on January 1, 1862, to pay, from the receipts of the year, all charges for expenses and interest, and $1,500,000 of principal.

The hope may now be reasonably indulged that, if the policy established by the present Board be adhered to—rigid economy and adequate tolls—the day is not distant when the canals will redeem the State from debt and taxation.—*Albany Evening Journal.*

Gold in Lower Canada.

We have been favored by a friend, a practical gold-miner, who spent some years in the placers of California, engaged in gold-mining, with an account of his exploration of the Chaudiere gold district during the present summer. Our informant spent two months in prospecting the country from the junction of the Du Loup and Chaudiere rivers, where the Montreal Company worked, and where the Napanee is now working, to the Maine and New Brunswick boundary lines. The season has been one of the worst ever known for prospecting, the water in the rivers and brooks being at flood height, and the ground saturated with moisture by the constant rain. He was therefore prevented from examining the beds of the stream, and sinking trial shafts to the necessary distance to obtain an accurate knowledge of the nature and extent of the distribution of the precious metal. But with these unfavorable circumstances his general exploration was highly successful. He found gold in the banks of every stream examined, in the ditches by the road side, in the gravel beds adjoining water courses, on the tops of hills far removed from water, and in other localitities which cannot have been submerged for many ages. The general character of the gold, of which we have many specimens now before us, is great purity and exceeding coarseness; some of it is much water worn, and other specimens appear to have been only recently dislodged from the quartz matrix. The country generally exhibits broad exposures of slate, traversed by numerous quartz veins, and resembles in every respect the gold region of California with the exception of the absence of volcanic evidences. Although it is believed by geologists that the coarse gold of the Chaudiere had its origin in quartz veins, up to the present time there has been no discovery of gold in this connection. We have now to announce the discovery of a large quartz vein in the Chaudiere district carrying an unusually large amount of gold in drills and nuggets, many of them weighing several ounces, and the discovery of other leads showing smaller indications of the precious metal, and proving conclusively that those quartz veins may be worked in Canada as in Australia or California with a prospect of very large returns. One mass of quartz taken from the large vein was thickly set with nuggets of gold from an ounce up to six ounces in weight, carrying the gold not in regular strings but isolated lumps throughout its substance, a quantity of quartz estimated at five hundred weight having yielded to the discoverer seven hundred dollars worth of gold by the simple process of breaking out the largest pieces with a hammer, and still containing a larger amount of finer gold only to be obtained by crushing.

Our informant states that he saw nothing equal to this mass in the most productive quartz leads of California, and if the remainder of the vein from which it was taken is at all like it, its value is incalculable. It was discovered last year by some inhabitants of the district, who kept its locality a secret. It was from this vein that the large nuggets sold in Quebec last November were taken. We have before us some specimens, showing its exceeding richness.

The gold in the different streams varies much in character; in some it is exceedingly fine, as fine indeed as that of Frazer's River; in others, and some of the smallest, it is coarser than that found in California, the fine gold being apparently the result of the decomposition of auriferous pyrites, and the coarse the product of quartz veins.

Hitherto the streams alone have been worked, and the operations on them were conducted with so little skill, that our informant is surprised that any gold was obtained; as it was the whole of the fine gold was washed away.

Yet, in one instance 15,000 dwts. were taken from a little more than half-an-acre of a bar; in another nine pounds weight were got from a single hole, and more recently $2,000 were obtained in two days, after damming a considerable stream, nearly all being coarse gold.

Our informant is of opinion, and as a thoroughly practical man his opinion is entitled to the highest consideration, that the dry diggings in the Chaudiere district will be found more productive than the streams. He says that on the whole California streams have not repaid the expense of working them. He believes that the streams contain no more gold than has been displaced by the water from the rocks traversing them, and that the whole country in their vicinity would be found as rich, and in many cases much richer, if mined in the same manner as similar lands are in California and Australia, by sinking shafts through the gravel down to the rock or clay beds beneath. He says that in no part of California could he obtain the same quantity of gold by the same means as he obtained upon the Chaudiere and its tributary streams; that the surface prospects, in spite of the unfavorable season, were superior to any he had ever found before; and that with ordinary skill, by simply panning on the river banks, large wages can be made with certainty.—*Montreal Commercial Advertiser.*

Great Indian Peninsular Railway.

A proposal of this company to have a line surveyed, from Sholapore to Hyderabad has received the sanction of the Bombay Government, and a reference to the Secretary of State for India will be made for the purpose of obtaining guaranteed interest at 5 per cent. The annual report of operations on the railway for 1860 61 shows that the total receipts for passengers and goods were 11,-04,548r. from January to June, 1860; and 10,39,-023r. from July to December, 1860—the former amount on 329,174 miles run, and the latter on 318,551 miles. The expenditure from January to June, 1860, was 6,50,801r., and for the latter half-year, 6,46,099r. The per centage of expenditure on gross receipts was 58.92 and 62.18 for the two half-years respectively, the gross cost of open line being 2,523,711*l.* and 1,584,214*l.* respectively. The net revenue for the two half-years was 4,53,-746r. (41,593*l.*) and 3,96,923r. (36,018*l.*) respectively—the equivalent to, per cent. per annum, being 3*l.* 5s. 11d. and 2*l.* 15s. 9d. respectively.

Floating Piers on the Ganges.

Letters from Calcutta announce the intended formation of a public company for that place with a capital of 200,000*l.*, for the purpose of erecting floating piers on the banks of the Ganges. The want of docks, piers, or other appliances for facilitating the shipment or discharge of cargoes at Calcutta has hitherto been found a very serious drawback. Floating piers recommend themselves by the facility with which they are established, and also by their adapting themselves to the rise and fall of the tide, so as to present an unvarying altitude relatively with a vessel alongside. The example of the landing stages at Liverpool shows how efficient for all the purposes of commerce floating piers may be rendered.

Census of Ireland.

The following table shows the number of inhabitants in each province, county, city and certain corporate towns, in 1841, 1851 and 1861. The total population of Ireland on the 7th of April, 1861, was 5,764,543, a decrease as compared with 1851, of 787,842, or 12.02 per cent. In the previous decade the decrease was 1,622,739, or 19.85 per cent. The entire loss in 20 years being equal to 31.87 per cent. The diminuation has been greatest in Munster, where it is 18 per cent., and least in Ulster, where it is only 5 per cent. The Commissioners ascribe the decrease to emigration, as there has been no other powerful cause in operation, such as famine, pestilence or war. From the report of the emigration commissioners, it appears that 1,230,986 emigrants left Ireland during the last ten years; and from the returns obtained by the Registrar General of Ireland it is found that of these, 1,174,179 were set down as *permanent emigrants.*

The table also shows the religious denominations—Catholic, Protestant and Presbyterian—in 1861. This portion of the returns was looked for with much anxiety, as no similar return had been made since 1834. The results are as follows: Roman Catholics, 4,490,583; Members of the Established Church, 678,661; Presbyterian, 528,992; other persuasions, 8,414; Jews, 332. The total number of Protestants in Ireland is 1,273,960—giving the Roman Catholics a majority of 3,216,623. In obtaining these returns the enumerator met with every facility from the clergy and people; and but few complaints having been made, the commissioners infer that they are nearly, if not quite correct.

POPULATION OF IRELAND IN 1841, 1851 AND 1861.

Provinces.	Total in 1841.	Total in 1851.	Total in 1861.	Decr. in 1861.	Protestants.	Catholics.	Presbyterians.

Journal of Railroad Law.

RAILROADS; THE LAND UPON WHICH THEY ARE BUILT PROTECTED FROM SALE UNDER EXECUTIONS. THE INTERESTS OF THE PEOPLE INVOLVED.

The interest of the public in railroads, as convenient means of transportation of merchandise and of travel, is quite as direct as the interest of the corporation. For this reason railroad companies are endowed with certain privileges which are incidental to their character, and exist by virtue of the public interest in them and not through any merit of their own. It has thus been held by the Supreme Court of Philadelphia, in the case of the Plymouth Railroad Company *vs.* Stephen Colwell—that where a company has authority to buy land, and does purchase land over which it constructs a railroad, in pursuance of the powers granted in the act of incorporation, the land so covered, and necessary for the full enjoyment and exercise of its franchise, is not liable to be seized and sold under an execution issued at the suit of a judgment creditor. And this in virtue of the public interest in the road, which would be disastrously affected if the property of the road could be thus interfered with.

By an act of Assembly, of the 18th of March, 1836, the plaintiffs were incorporated as a railroad company to build a railroad apparently for the purpose of connecting the lime-kilns and farms of the interior of Montgomery county with the Philadelphia, Germantown and Norristown Railroad. In April, 1837, they bought a farm of Aaron Luckens of 40 acres and 104 perches, through which their road was to pass. They built a cheap railroad, 3¾ miles long, suitable only for horse power, and have maintained it as such ever since. In 1841, they sold off to John Freedly and others 38 acres and 130 perches of the Lukens' farm, retaining only one acre and 134 perches—the premises in dispute. In 1844, this retained lot was sold at sheriff's sale on a judgment of Joseph Leedom against the Company—the sale was set aside—and it was sold again on the same judgment to John Freedly for $950. The last levy and sale described the premises as "two acres more or less, on a part of which is the Plymouth Basin, and the Plymouth Railroad passes across said lot, subject to the corporate franchises of the said Plymouth Railroad Company over a part of said lot if any they have." Exceptions were filed to said sale on behalf of the company, on the ground that the premises were expressly reserved to the company for railroad purposes, and that they included the basin and grounds on which the road is located, and which are indispensable appurtenants of the road. The court overruled the exceptions and confirmed the sale. On the 26th of November, 1849, Freedly conveyed part of the premises to Colwell, and after Freedly's death, his executors, in 1853, conveyed the residue to Susanna Jacoby. The company claimed the basin as a means of communicating with the Schuylkill Canal. It would seem there was a basin on the Lukens farm before the company bought, and that it was used as a deposit for logs to supply an adjacent saw-mill. After their purchase the company deepened the basin so as to accommodate canal boats which were brought in there to receive from the railroad lime and other freights to be carried away by the Schuylkill Canal. The company insisted on their

right to retain the basin for this purpose, and they claimed the rest of the ground for the tracks of their road, for depots, engine houses, etc.

The following is the opinion of the Court rendered upon the decision of the case, in which certain distinctions are laid down as to what does and what does not constitute land or appurtenances exempt from such seizure.

WOODWARD, J.—What was the effect of the sheriff's sale on the company's title? They had very express authority by the incorporating law to buy, hold, mortgage and sell lands; and in locating their road they probably found it expedient to buy the Lucens farm rather than pay damages for crossing it. This is often the true policy of railroad companies. But lands so bought and not actually dedicated to corporate purposes, are bound by the lien of judgments, and are liable to be levied in execution and sold by the sheriff in the same manner and with the same effect as the lands of any other debtor. As to land which has been appropriated to corporate objects, and is necessary for the full enjoyment and exercise of any franchise of the company, whether acquired by purchase or by exercise of the delegated power of eminent domain, the company hold it entirely exempt from levy and sale, and this on no ground of prerogative or corporate immunity, for the company can no more alien or transfer such land by their own act than can a creditor by legal process, but the exemption rests on the public interests involved in the corporation. Though the corporation in respect to its capital is private, yet it was created to accomplish objects in which the public have a direct interest, and its authority to hold lands was conferred that these objects might be worked out. They shall not be balked, therefore, by either the act of the company itself or of its creditors. For the sake of the public, whatever is essential to the corporate functions shall be retained by the corporation. The only remedy which the law allows to creditors against property so held is sequestration; 9 W. & S. 28. And that remedy is consistent with corporate existence, whilst a power to alien, or liability to levy and sale on execution, would hang the existence of the corporation on the caprices of the managers or on the mercy of its creditors. For, the corporation would cease to exist for the purposes of its institution when its means of subsistence were gone. It might still have a name to live, but it would be only a life in name. A railroad company could scarcely accomplish the end of its being, after the ground on which its rails rest had been sold to a stranger. If such is in general the law of corporate tenures which are essential to corporate functions, it is peculiarly the law of this case where Freedly took his title from the sheriff, expressly subject to the franchises of the Plymouth Railroad Company.

Then what are the franchises of this company? Do they include a right to the basin for purposes of navigation?

The company were authorized to build a railroad, with as many sets of tracks as they may deem necessary, from a point in the lands of Samuel Maulsby, in the township of Whitemarsh, in the county of Montgomery, near the road dividing the township of Whitemarsh and Plymouth, east of said road, "and terminating at some suitable point of the Philadelphia, Germantown and Norristown Railroad, between Metser's ford and Wager's ford, on the river Schuylkill, in said township of Plymouth."

The reference to the river Schuylkill and the fords thereof, was for the purpose of fixing, with approximate certainty, the point *ad quem* the railroad was to be built; but its actual terminus was to be on the Philadelphia and Norristown Railroad. A connection with that road was intended, but not with the Schuylkill Canal. The thing contemplated was a transportation by connecting railroads, and not by a railroad and canal. There is not a word in the law of incorporation which imports an intention to create a navigation company. Then what has the company to do with canal basins and canal boats? It is not pertinent to urge that their road would be more profitably worked in connection with the canal than with the railroad. Their corporate powers are to be measured by a strict construction of the legislative grant. If they possess the right claimed, it must be found in the powers specifically granted, or it must result as a necessary implication from the express grants, and if it can neither be found in nor inferred from the terms of the grant, it does not exist. Authority granted to terminate a road on the Philadelphia and Norristown Railroad, cannot be construed an authority to terminate it in the Schuylkill Canal. And it follows as a necessary consequence, that a canal basin is not a legitimate incident of a railroad having no authorized canal connection. Neither, therefore, under the general principles of law, nor the particular qualification expressed in the sheriff's deed to Freedly, was this basin held as an appurtenant of the railroad, and hence a valid title passed by the sheriff's sale to Freedly, and through him to Mrs. Jacoby.

But the whole lot was sold, and included the very bed of the road, as well as the ground that was needed for a depot and other buildings. As to such portions of the lot as were occupied or appropriated for these purposes, no title passed to Freedly, and none, of course, vested in Mrs. Jacoby. Yet she having taken defence for the whole, the verdict ought to have distinguished what was lawfully appurtenant to the road and what was not. The company must be protected in the possession of all that is really essential to the enjoyment of their franchise.

Their charter authorizes them to appropriate four rods in width, and limits them to that, except in deep cuts and fillings, or at points selected for depots, or engine or water stations. It evidently contemplated a locomotive road, and it gave them five years to complete it, "according to the true intent and meaning of this act." In ascertaining the necessary appurtenances of the road, regard is to be had to this limitation of time, for the appropriations of ground were to be all made within that time. The road was to stand complete at the end of five years—not that all necessary tracks and buildings which increasing business should require to be added to the first construction, should have been erected in that time, but that the ground for all such additions should have been appropriated, and one track at least finished.

If the fact be that a locomotive road has not yet been constructed, it is too late to appropriate ground for engine and water stations; that should have been done within the five years. And, indeed, it would be hard for the company to maintain the track of a horse road under such a law as they have, if they were proceeded against by the Commonwealth. But we will not allow them to be ousted from the ground they actually occupy, by an intruder, with merely color of title; nor is a forfeiture of chartered privileges to be declared in this collateral action. They are entitled to retain and enjoy the ground they occupy, and which they appropriated for the lawful purposes of the road within five years from the date of the charter. But no alleged appropriation for engine houses and water stations ought to be respected, if it was followed by no *bona fide* effort to build a locomotive road, according to the plain intent of the charter. Without such a road, an appropriation of that sort would be useless, if not fraudulent.

The court, however, ordered a new trial on the ground that the question as to what portion of the ground had become appurtenant to the road by appropriation, such as described, was one of fact which ought to have been submitted to the jury.

East Brandywine and Waynesburg R. R.

On the 15th instant the cars on this road made their first trip, and are now steadily running—a distance of eighteen miles—between Waynesburg and Downingtown, along the banks of the East Brandywine River, connecting with the Pennsylvania Central Railroad at the latter place. The road has a single track, and was commenced one year ago. It opens a fine farming country, in which are a number of iron mines and foundries, with many ore beds yet undeveloped. The manufactured iron of this vicinity has hitherto been carted to Dowingtown. There are no coal beds, yet discovered, on the route. The scenery is pleasing, but not bold. The few engines and cars, at present required, are borrowed from the Pennsylvania Central Railroad Company, who, it is thought, will lease the road, arrangements now being in progress to that end. No stations or engine houses are yet built upon the route. The cost has been about two hundred and forty thousand dollars. The stock is chiefly owned by farmers in the neighborhood, who, as usual with farmers upon projected railroads, were induced with great difficulty to subscribe, not being able to see that a railroad would benefit their property.

Cleveland, Painesville and Ashtabula R. R.

At the annual meeting of this company recently held at Cleveland, the following named gentlemen were elected directors for the ensuing year: A. Stone, jr., T. M. Kelley, S. DeWitt, William Case, H. B. Payne, William Collins, James Miles, J. B. Johnson, Samuel F. Randall, Hamilton White, E. M. Gilbert, C. C. Dennis, Henry E. Parsons. At a subsequent meeting of the Directors the following gentlemen were elected officers of the board: President, A. Stone, jr.; Secretary and Treasurer, Geo. B. Ely; Superintendent, H. Nottingham; Engineer, Charles Collins.

Steel Rifled Guns.

Messrs. CORNING, WINSLOW & Co. have made the steel rifled guns for the Government. They are also preparing to manufacture, on a large scale, a new gun invented by JUAN PATTERSON. It is said to be a very valuable improvement.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* —) signifies "nil.' Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, August 24, 1861.

Railroad Reports.

Railroad Companies will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

There has been a large fluctuation in prices at the Stock Exchange during the past week, due, chiefly, to warlike rumors from Washington, and to the foreign news, which were unfavorably construed. There appears, however, to have been no adequate cause for the distrust which for a time prevailed, and there has been a considerable recovery from the decline, and better feeling prevails, and the tendency of the market is upward. The improvement, however, has not been large in Border State Stocks. Nearly the whole list of shares is better. The principal event of the week is the consummation of the negotiations between the Government and the Banks, whereby the latter have taken $50,000,000 of the new loan. Ten per cent. of the amount is already paid in. The prompt response of our capitalists to the wants of government has exerted a happy influence. The ability of the Banks named to take the $50,000,000 is ample. The capital of the Banks of the three cities is $120,000,000—of all the loyal States $329,000,000. The banking capital of New England, outside of the city of Boston, is $85,449,071, or very nearly twice as great as that of its metropolis. The deposits in the Banks of discounts in the loyal States are $207,388,618. The deposits in the Savings' Banks are nearly as large—those in the State of New York being $67,450,397; of Massachusetts, $45,054,584, of Rhode Island, $7,765,771; Connecticut, $20,161,942—making an aggregate for the four States of $141,378,110. The deposits in all the Savings Banks in the loyal States probably equal nearly $200,000,000; and in the Banks of discount and deposit fully $400,000,000. The action of the Banks as well as the increased activity and energy of the government, have exerted a favorable influence, and already considerable improvement is seen in business and commercial circles. The great drawback, however, to the business of New York, is the great falling off of its foreign trade. The total value of importations into this port since January, 1861, have been $88,653,826; for a corresponding period in 1860, $151,643,064, showing a diminution of $62,970,238. The exports during the some period have been $82,061,855, against $55,658,632 for a corresponding period of 1860, showing an increase of $26,403,223. This striking change in the commerce of the port explains the very large importations of specie since the commencement of the year. Money continues very abundant; the negotiation of the new loan not apparently exerting any influence upon the rates.

Holders of the first mortgage bonds of the Chicago and Northwestern Railway Company are informed that the bonds to be given in exchange for the first six coupons from each of said bonds, pursuant to the vote of the bondholders at their meeting, July 18, are now ready, and they are requested to present said coupons for exchange, without delay, at the agency of the Company, No. 12 Wall st.

The coupons on the bonds of the Boston, Concord and Montreal Railroad Company due Aug. 15, will be paid at the office of J. A. Underwood & Son, No. 18 Exchange Place, New York and at the office of Lyon & Vose, Nos. 1 and 3 Liberty Square, Boston.

Chesapeake and Delaware Canal.

This Canal commences in Delaware City, on the Delaware River, 42 miles below Philadelphia, and runs to Back Creek, a tributary of Elk River, which falls into the Chesapeake Bay, a distance of 13.63 miles. It has three locks—one having a lift of 16 feet on the Chesapeake side, and two on the Delaware side of 8 feet each. The locks are 220 feet by 24 feet, and passes vessels drawing 9 feet of water. There is also a tide lock at either terminus. The deepest cut is about 86 feet. The canal is supplied with water by pumping engines. This was one of the first works of the kind undertaking in the United States. The near approach of the two great indentations of the coast formed by the Chesapeake and Delaware Bays, mutually suggested their connection, by artificial means for commercial purposes, as well as for the maintenance of internal communication in time of war. In 1808 a complete survey of the route was made to ascertain its feasibility for the proposed work, but nothing was done in the way of construction till 1824, when the route was finally located and the work commenced. It involved many difficulties and obstacles not anticipated, and its cost greatly exceeded the estimates; and it was till the fall of 1829 that it was formally opened for business. For many years its revenues were small and the finances of the company were in an embarrassed condition. It was not till some fifteen years after its opening that it earned the interest on its debts. Up to 1847, the amount overdue had reached the sum of $796,592. At that time the revenues of the canal had so increased as to afford a prospect that, for the future, the earnings would discharge the accruing interest, and a proposition was made to the bondholders to convert the arrears into certificates due in 20 years from July 1, 1847, which was acceded to. In 1853, a further loan, amounting to $195,900, was authorized and made for the construction of new locks. In 1856, the bonds of 1836, amounting to $1,593,185, became due, and for the purpose of funding these, and consolidating all the liabilities of the company into one class, the canal and property of the company were mortgaged as security for a new issue

of bonds to the amount of $2,800,000, due in 30 years from July 1, 1856, and into which all the different classes of indebtedness have been converted, with the exception of $72,056. Since 1847, the accruing interest has been regularly met. A dividend of three per cent. was declared June 1, 1853. No farther dividend has been paid. The capital stock paid in, including old, new and united stocks, is $1,343,563 50. The funded debt amounts to $2,729,400, described as follows: 1st mortgage, 6 per cent. coupon bonds, $2,657,343 21, dated July 1, 1856, and payable in 30 years, interest payable semi-annually in Philadelphia. Loan of 1836, (due in 1856) $50,067 80. Loan of 1847, (due in 1867) $21,988 99.

The receipts from tolls for the year ending May 31, 1861, were $195,946 39; from other sources, $12,753 60—making a total of $208,699 99. The contingent and incidental expenses, including all items for repairs, salaries, wages, interest on loans, and all other expenses, amount to the sum of $224,409 38. The income account is as follows:

RECEIPTS.

Balance from previous year		$20,910 83
Tolls received during the year		195,946 39
Temporary loans paid in		27,000 00
Sinking fund	$6,751 94	
Temporary investment	3,715 36	
Dividend fund	971 80	
Money loaned out	465 00	
		11,904 10
For erection of telegraph line		500 00
Rents, etc		394 50
		$256,610 82

EXPENSES.

Ordinary expenses at the canal	$30,520 86
Water works—for fuel	6,095 83
" for ways and repairs	8,486 08
Wickets for new locks	2,836 34
Telegraph line	1,385 00
Incidental expenses	11,131 41
Interest on mortgage loans, etc	163,953 86
Loans ($8,000 mort.) purchased	6,684 66
Balance in hand of treasurer	25,516 78
	$256,610 82

The expenditures for repairs and maintenance of the works have been larger than for either of the past three years. The expenses in the Deep Cut, in consequence of a tendency to slides manifesting intself, have been one cause of the increase. The road bridges over the canal, and the approaches and guards connected with them, have required a large outlay for repairs. The bridge at Chesapeake city has been entirely rebuilt. The re-opening of Exton's drain; repairing of company's wharf at Delaware city; wickets for new locks; telegraph line, etc., are extraordinary in their character and amount, and cannot be considered as embraced in the amount required for the annual ordinary maintenance of the canal and its works. The report says:

The past year commenced with the brightest prospects, which have been presented for many years; for five months these prospects were more than realized, and if our business had continued to the end of the year, as it had commenced, our income would not only have been sufficient for all ordinary as well as extraordinary purposes, but a large surplus with which to commence the present year, would now be in the Treasury. The fallen condition of our business for the last six months, has compelled the Board to present a Statement, very different from that which it had the best reasons to anticipate but a few months ago—causes well known to the whole public, deeply to be lamented by every citizen, have arisen, by which the trade passing through the Canal from and to the Chesapeake Bay, as well as that from the Tide-Water Canal and Susquehanna River, has either been temporarily suspended or entirely abandoned.

The following is a statement of the financial condition of the company May 31, 1861.

Cost of canal	$3,561,785 25	
Cost of old feeder	110,925 00	
		3,672,710 25
Temporary investments		62,922 84
Sinking fund, viz:		
Stock of C. & D. Canal Co.	$100,000 00	
Mort. loan held by trust.	112,532 26	
		212,532 26
Dividend fund		82,549 92
Real estate		16,731 45
Balance in Treasury		25,516 78
		$4,072,063 50
Capital stock		$1,343,563 50
Mortgage loan		2,657,343 21
Balance of funded debt of 1856		50,067 80
" " 1867		21,988 99
		$4,072,963 50

The " dividend fund " was created in 1856, in pursuance of the mortgage of that year, which required that $25,000 per annum should be used in the purchase of the company's bonds, if such amount of surplus revenue should be made, and that the bonds purchased should be cancelled and converted into stock at par, and be divided among the stockholders at some future time. The " sinking fund " is simply the loans of the company purchased for the use of the company as occasion may require.

President—A. C. Gray, Newcastle, Del.

Directors—Algernon S. Roberts, Samuel W. Jones, George Cadwalader, I. Pemberton Hutchinson, Francis R. Cope, C. H. Fisher, Samuel Norris, Francis Hopkinson, Joseph Swift, Samuel C. Morton, Joseph Jones, Tobias Wagner, J. Francis Fisher, John Bohlen.

Treasurer—H. V. Lesley, Philadelphia.

Euphrates Valley--the Route to India.

It is not too much to say that there is no existing or projected railroad that can for a moment compare, in point of interest and importance, with that of the Euphrates Valley. It brings two quarters of the globe into juxtaposition, and three continents—Europe, Asia and Australia—into corelation. It binds the vast population of Hindostan by an iron link with the people of Europe, it inevitably entails the colonization and civilization of the great valleys of the Euphrates and Tigris, the resuscitation in a modern shape of Babylon and Nineveh, and the reawakening of Ctesiphon and Bagdad of old. It will also settle the mail route to and from Australia and China—an element of prosperity of very great importance—for the passenger traffic from the Australian colonies exceeds one hundred weekly, and ere the railway can be completed will be five times that number —of whom more than half will take the shortest route; while the number of emigrants from this country who will prefer a passage of forty to over eighty days may also be fairly expected to be very large.

According to Sir John Macneill, who was assisted in the survey by Captain Burgess, and the officers of H. M's steamship " Stromboli," there is every facility for making a harbor in the vicinity of the ancient port of Sileucia, near the mouth of the Orontes, and the country *via* Antioch, Killes and Ailam, to Aleppo, ninety miles in length, presents no engineering difficulty. By making a detour, a rich settled country, dotted over with towns and villages, is accommodated, and branch lines would be unnecessary. A large traffic is already in existence, as the toll books at a bridge on the Orontes show that about 1,200 camels and horses laden pass each day. This will be the most important portion of the railway, from the Mediterranean to the Persian Gulf, the link from Sileucia to Aleppo is in itself a complete work, having a port at one end and the chief emporium of Mesopotamia at the other, to which the traffic from India, Bagdad, &c., converges. Or should the railway be carried on to the Euphrates, sixty miles beyond Aleppo, by the route recommended by General Chesney and Sir John Macneill, there would be a still more perfect work of about one hundred and fifty miles in length, beginning at a port in a great sea and ending at the head of a navigable river in a greater ocean. This would be of itself, and by itself, a complete, perfect, and profitable enterprise; not only would a new country be opened up to European enterprise, but a directness in the route to India obtained, which few would believe who do not work it out on the map.

Taking the line of the Austrian railways to Trieste, thence by rail to Jabor Castle, down the stream of the Euphrates and by the Persian Gulf to Kurrachee, where the Scinde, the first complete Indian project, commences the future network of Indian lines, the traveler will follow a route as direct as any railway can be expected to afford. Eight days and six hours will take the traveler through Trieste to Sileucia, thence the railway will take him in five hours to the head of the navigable waters of the Euphrates. Three days and three hours more will see the river voyage completed to Bussorah; and three more days—making in all fourteen—bring the traveler to Kurrachee, where the Scinde keeps the western door of the railways of our Indian empire. Like most of the other railways for which India is indebted to Mr. Andrew, this line from Sileucia to Jabor Castle, though complete in itself, is regarded by him as the parent of further projects, whose construction will depend on the success of the parent line, and will gradually lessen the distance between the Mediterranean and the Persian Gulf. Thus he would extend his works by degrees along the valley of the river by Phumsah, the ancient Thapsacus, cross thence into Mesopotamia, working down the valley by Annah and Hit to the environs of Bagdad, and thence by Babylon and Hillah to the point where the Tigris and the Euphrates join at Kurnah, and the united stream becomes deep enough for steamers of the largest size. Other branches, too, might top the Persian Gulf at Scherster, or at Bussorah, where the trade is extensive, and the accommodation for ships of large tonnage already ample.—*London and China Telegraph.*

Pneumatic Despatch Company.

This company have been making experiments during the week on a length of tubing extending from the Battersea Steamboat Pier along the bank of the Thames for a distance of something over a quarter of a mile. The section of the tube is circular on the top, partly straight on the sides, and flat underneath where it rests on the ground. The horizontal section of the tube is about 30 inches in the clear, and the vertical section about 36 inches. Two ledges cast along the inside of the lower part of the tube form the rails for the iron carriages to travel on. The carriages are about 8 feet in length, open on the top, and run upon four wheels along the interior of the tube through which they are propelled by means of atmospheric pressure behind, and a vacuum in front of them. The tube from one end to the other is formed of cast iron in convenient lengths, and made air tight. The tube in its course has been made to represent in some cases gradients as steep as Holborn Hill and others of less ascent, it also forms rather quick curves in some places, with a view to show that the apparatus is capable of surmounting irregularities in level or quick curves on the plan. The cars which are propelled through the tube do not fit it exactly, there being sufficient play left so as not to become jammed any where inside, either while running on a level or in a curve. In order to propel the cars through the tube a partial vacuum is formed at the other end of the tube by means of a steam engine having a fly-wheel of 21

feet in diameter attached to it. This fly-wheel is formed by two discs about 30 inches apart on the axle gradually closing all round to about three inches on the circumference. The interior of this is divided into a number of compartments radiating from the centre towards the circumference. The fly-wheel thus performs two offices, that of a powerful fly-wheel, and an exhausting fan—for as the wheel is driven round, the air is drawn from chambers near its axle communicating with the main tube, and thus as it revolves rapidly throws off the air from the open compartments formed between the two discs on the periphery of the fly-wheel. This appears to be an admirable contrivance for the purpose of exhausting the air in the tube, and the steam engine works from beginning to end with great smoothness and efficiency. The velocity of the fly-wheel varies from 100 to 150 revolutions per minute, increasing in velocity as the partial vacuum extends along the tube and the cars advance. The cars traveled along the tube at the rate of about 16 or 17 miles an hour, and in some of the experiments on Wednesday, two laborers were conveyed in the cars through the tube, showing that there was plenty of air around them during the journey. The experiments were considered satisfactory. Mr. T. W. Ramwell and Mr. Latimer Clark are the engineers. The requirements of the proposed traffic, the necessary distance of the engine stations along a line of tubing, and other essential particulars so as to insure the greatest economy and efficiency in working, will have to be solved by experiments of a much more extended character than those in operation at Battersea.—*Herapath.*

Railroad Earnings.

The earnings of the Hudson River Railroad for

July, 1861, were	$114,795 33
July, 1860	140,865 92
Decrease	$26,071 59
Earnings for 10 months commencing October 1st, 1860	$1,707,965 12
Same period previous year	1,703,565 52
Increase	$3,399 60

The net receipts of the New York and Harlem

for July, 1860, were	$100,036 17
1861	92.898 07
Decrease	$7,138 10

The earnings for the last seven months compare with the corresponding periods of 1860 as follows:—

	1861.	1860.
January	$58,184 35	$37,519 76
February	44,026 96	32,301 23
March	43,636 62	39,501 04
April	49,102 19	45,810 59
May	112,265 44	59,082 39
June	141,771 03	48,797 30
July	107,399 96	37,429 36
Total	$556,386 55	$300,441 67
Increase		$255,944 88

The following is a statement of the approximate earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of July, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$103,180 15	$78,595 86
" Passengers	57,251 90	56,195 48
" Express	2,700 00	2,600 90
" Mails	7,825 00	7,825 00
" Rent of road	7,083 34	7,083 34
" Miscellaneous	370 50	1,732 31
Total	$178,410 89	$154,031 99
Increase		$24,378 90
Earnings January 1, to July 31	$1,554,812 77	$1,176,327 80
Increase		$378,484 96

The business of the Toledo and Wabash Railroad for July was:

	1860.	1861.
From passengers	$19,400 55	$13,732 05
From freight	65,478 62	77,732 21
Total	$84,879 17	$91,464 26
Increase		$6,585 09

The Milwaukee and Prairie du Chieu Railroad

earned July, 1861	$107,399 96
July, 1860	37,429 36
Increase	$69,970 60

The earnings of the Norwich and Worcester

Railroad for July, 1861, were	$25,666 08
July, 1860	35,755 57
Decrease	$10,089 48

The earnings of the Erie Railroad for the

month of July, 1861, were	$377,905 25
July, 1860	371,256 15
Increase	$6,649 10

The following are the earnings of the Great Western Railway of Canada for the week ending August 2, 1861:

Passengers	$19,998 66
Freight and live stock	13,043 33
Mails and sundries	1,288 92
Total	$34,380 91
Corresponding week of last year	30,618 87
Increase in 1861	$3,712 04

The traffic receipts of the Northern Railway of Canada for the week ending August 8, were $9,-224, being an increase of $2,660 over the corresponding week of 1860.

The receipts of the Grand Trunk Railway of Canada for the week ending August 10th, 1861, were $57,022 06

Corresponding week, 1860	52,784 17
Increase	$4,237 89
Tot. traffic from July 1, 1861, to date	$362,604 22
Corresponding period, 1860	322,714 13
Increase	$39,890 09

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of July, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$213,381 11	$237,789 25
" " merch'dise	26,630 51	41,787 15
" " travel, etc.	49,975 11	35,229 85
Total	$289,986 81	$314,806 25
Transportation, roadway, dumpage, renewal fund, and all charges	137,606 78	147,611 65
Net profit for the m'th	$152,380 03	$167,191 60
Profit for the previous 7 months	740,281 08	$712,297 23
Total profit for 8 mos.	$892,661 11	$879,491 83

The traffic of the Great Western Railway of Canada for the week ending August 16, 1861, was as follows:

Passenger	$16,027 25
Freight and live stock	10,750 66
Mails and sundries	1,288 67
Total	$28,066 28
Corresponding week of last year	34,547 69
Decrease	$7,481 41

The earnings of the La Crosse and Milwaukee Railroad for July, 1861, were as follows:

From freight	$62,087 77
" passengers	19,935 83
" express	502 00
" mails	1,679 17
" miscellaneous	82 10
Total, July, 1861	$84,286 87
" " 1860	35,426 05
Increase	$48,860 82

The earnings of the Galena and Chicago Railroad for July, 1861, were $144,126 95

July, 1860	80,705 35
Increase	$63,421 60

Corrected earnings for the previous month, $162,823 22.

Tunnelling Mount Cenis.

A communication from an engineer gives some details respecting the cutting of the tunnel through Mount Cenis:—"M. Perruzzi, one of the Ministers, some deputies, several scientific men, and M. Someiller, a French engineer, went a few days back to Bardoneche, and for some hours witnessed the working of the machines for cutting the rock. The opinion of the scientific men who were present at the experiment, and among whom were MM. Sella, Cadolini, and Pecceto, is that the mechanical difficulties of the cutting will be fully overcome. The perforating machines, in somewhat less than an hour, made 70 holes in the mountain at the end of the opening. The holes which were made in the centre, in order to permit a breach to be effected by blasting, were three centimetres (rather more than 1¼ inches) in diameter; the others made round it for the same purpose were two centimetres. The depth of the holes was from 60 to 90 centimetres (rather more than 23 inches to about 35½). From repeated experiments made in masses of schist with a single perforating instrument, it was proved that ten minutes' labor was sufficient to make a hole of 60 centimetres, whereas by the ordinary means three workmen would be occupied for an hour in effecting one. The machine employed cuts simultaneously from 20 to 30 holes in a space of four square metres—that is one in which it would not be easy to employ three or four men. The machine thus presents an advantage which, as regards space, is three or four fold, and, as regards time, sixfold, what could be done by workmen. The advantage is, however, somewhat diminished by the fact that the machine must be dragged back to a distance of 100 metres, or more, whenever blasting has to be resorted to, and that it cannot be got to work again until after the ground is cleared of the fragments of rock, and until the front of the mountain is made tolerably smooth. But it is certain that when the workmen have obtained greater skill they will be able to perform the three operations of boring, blasting, and clearing away in three or four hours at the outside. When operations can be commenced on the side of Modane, as they will be in a few weeks, it is certain that six metres of rock can be removed in a day. This will make more than two kilometres (five-eighths of a mile each) a year, and it is probable from what is now being accomplished that three kilometres may be attained. In that case the cutting of the tunnel can be terminated by 1864. It follows that M. Grattoni, the engineer, runs little risk by offering to bet, as it is said he has done, 100,000f. that this great work will be finished in five years. Unforeseen obstacles may, however, arise from the rock becoming harder, water springing, or fissures taking place. But nothing thus far causes such obstacles to be feared. The rock, at least on the side of Bardoneche, is of schist, which is of no great resistance, and in which are silicious veins; and instead of inconvenience being caused by water filtering through, as had been feared, some is caused by insufficiency of moisture."

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. "S. F.," Sinking Fund. "var.," that the bonds fall due at different periods

Locomotive Performances on the Illinois Central Railroad for June, 1861.

We are indebted to SAMUEL J. HAYES, Esq., Superintendent of Machinery, for a copy of his statement of the Performance of Locomotives on the Illinois Central railroad for June, 1861, from which the following is compiled:

	Chicago branch.	South division.	North division.	Total.
Miles of road.	252.5	230.75	225.0	708.25
MILES RUN.				
By pass. trains.	31,273	24,964	23,669	79,906
" freight "	29,975	11,679	24,057	65,711
" other "	13,497	8,573	5,816	27,886
Tot. miles run.	74,745	45,216	53,542	173,503
RUNNING EXPENSES.				
Lbs. of waste.	1,043	757	543	2,343
Gallons of oil.	535	417	390	1,372
Cords of wood	572	837	419	1,828
Tons of coal..	1,020	.....	855	1,875
Cost of wages.	$2,971	$1,796	$2,096	$6,864
" repairs	3,976	2,448	3,670	10,494
" stores.	494	363	322	1,179
" fuel ..	4,329	3,351	3,386	11,066
" cleaning engines.	456	271	341	1,068
Total cost ...	$12,226	$8,629	$9,815	$30,671
COST PER MILE RUN.	cts.	cts.	cts.	cts.
For oil, waste, and tallow.	0.66	0.80	0.60	0.68

Atlantic and St. Lawrence Railroad.

The annual meeting of this company was held at Portland on the 5th instant. The report represents the road and rolling stock to have been kept in good condition during the past year by the lessees, and that some improvements have been made. The funded debt of the corporation is $3,478,000. The amount of the sinking fund is $344,070 75. The interest on the City debt and mortgage bonds has been paid as it matured, but the contribution to the sinking fund of 1½ per cent. on the $1,500,000 of City Loan, has not been paid for the past year. There is also one year's rent or dividend on the stock due and unpaid. A committee have had an interview with the Canadian Directors at Montreal in relation to the unpaid rent, but have not received any reliable assurance of the time they will be able to resume payments. The stock account consists of 5,070 shares of Federal, of $100 each; 4,103 shares of Sterling of $484 each; and 128 fractional parts of shares of $16 each; showing a little more than one-fifth held in this country. Messrs. Charles E. Barrett, Wm. Buxton, and Samuel Chase, were appointed a committee to receive, sort, and scrutinize the ballots for nine Directors. Having attended to that duty they reported that the ballots for Directors show that but 568 shares of the stock were represented. The by-laws of the corporation requiring that not less than 3,000 shares should constitute a quorum, there was, therefore, no choice of Directors. The meeting then adjourned to the first Tuesday in October, to meet at 10 o'clock in the same place, at which time it is expected the foreign stock will be represented.

(For the American Railroad Journal.)

On the Consumption of Smoke in Locomotives.

A few days ago the writer returned from Washington to Philadelphia by he Philadelphia, Wilmington and Baltimore Railroad. Upon the road between Havre de Grace and Philadelphia passengers were almost suffocated by smoke from the locomotive entering the cars. The smoke nuisance is well known on railways, and in the case referred to, the wind was the most favorable for leading it into the faces of the passengers, and the whole body and clothing were covered with coal dust.

The cause of this great nuisance is well known to practical and scientific men, and contrivances have been deviced for the purpose of remedying the evil, but as yet without success. By investigating the *modus operandi* in a locomotive boiler we may easily find that the principle of the same is wrong.

The exhaust steam blown out in the chimney in order to create draft, causes a partial vacuum in the furnace and tubes where there ought to be a pressure of air or carbonic acid gas; the consequence is that a great deal of carbon escapes in form of smoke and coal dust, for want of oxygen required for its combustion, and the gases pass through with such a great velocity and rare density that there is not time enough for consuming the smoke. Also, the contracted exhaust pipe causes a contra pressure on the steam piston, that in all, at least 50 per cent. of fuel or effect is lost. It is not considered necessary here to enter into the well known science of combustion, but the writer merely wishes to call the attention of Railroad Companies to what he has accomplished on steamboats, where the smoke evil is also much complained of. The writer called his attention to this subject while he was constructing steamboats in Russia several years ago. Arrangements were applied for the consumption of the smoke, and the success was so complete that not a spark or particle of smoke could be seen on the chimney, and the result gave a saving of 50 per cent. of fuel. The same simple arrangement can easily be applied on locomotives, and the writer is willing to undertake the experiment for any company that may feel disposed to offer a locomotive for that purpose. The writer would also propose instead of the spark-arrester, to substitute a superheating apparatus similar to that described in the fifth edition of Nystrom's Pocket Book for 1861, published by Lippincot, Philadelphia.

JOHN W. NYSTROM.

Philadelphia, August 13, 1861.

The Shubenacadie Canal.

This canal, which connects Halifax Harbor with the Bay of Funday, is now completed, and a through business is about being undertaken by means of canal boats. This work has cost a struggle of 38 years and money enough to have built St. Paul's Cathedral, Westminster Abbey and Buckingham Palace.—*St. John News.*

NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, ALBANY, Aug. 8, 1861.

SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend of Three Per Cent. on the Capital Stock thereof, payable on the Twentieth day of August instant, upon Stock registered at New York, Boston, or Albany, and on the Twentieth day of September next, upon Stock registered at London. Stockholders whose Stock is registered at New York will receive their Dividends at the office of DUNCAN, SHERMAN & CO.; those whose Stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose Stock is registered at Albany, at the ALBANY CITY BANK; those whose Stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The Transfer Books which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Friday, the Twenty-third day of August instant.

JOHN V. L. PRUYN,
33 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

THE McCALLUM BRIDGE COMPANY,
OFFICE No. 110 BROADWAY—over Metropolitan Bank—NEW YORK,)

ARE prepared to construct **Railroad, Draw,** and other **Bridges** and **Railroad Depots** at any point in the United States or Canada, on as **favorable** terms as any other parties.

Their plan of Bridge is known as **"McCALLUM'S PATENT INFLEXIBLE ARCHED TRUSS,"** and is claimed to be **superior** to, and more **economical** than any other form of bridge now in use.

The principles upon which this bridge is constructed, remove **the necessity for adjustment,** cause it to be **inflexible,** and allow of much **longer spans** than can be used with any other truss bridge

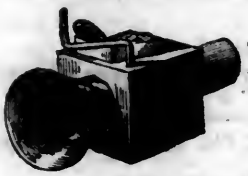
They are also prepared to construct **Roofs** of churches, halls, or other buildings where **arched ceilings** are required, upon a **new** and **peculiar** plan, by which **cross-tie beams** or rods are entirely **avoided,** leaving the whole space at the peak **unobstructed,** while the **side walls** are not subjected to the **slightest thrust.**

Engineers, Officers of Railroad Companies, Architects, and others desiring information are requested to call and examine models, plans, etc., **or address** this Company **at 110 Broadway.**

D. C. McCALLUM, President.

EDWIN J. HORNER,
SUCCESSOR TO
McDANEL & HORNER,

LOCOMOTIVE AND RAILROAD
CAR SPRING
MANUFACTURER,
WILMINGTON, DELAWARE.



COL. LONG'S PATENT IRON RAILWAY BRIDGE.

THE plan of this **Bridge** is upon the principle of the **SUSPENSION TRUSS;** and the **Iron** is so arranged in its construction as to impart its greatest **longitudinal strength** to the whole work.

The subscribers are prepared to furnish large quantities of **IRON BRIDGING,** for Railroad or other purposes, at short notice, and at moderate prices.

New York, Saturday, August 31, 1861.

Pennsylvania Railroad.

This company was chartered April 14, 1846, with authority to construct a road from Harrisburg to Pittsburg, and branches to Erie, Blairsville, Uniontown, and to any parts of the countries through which the main road might pass. The capital authorized was $10,000,000, which by subsequent acts was increased to $14,000,000; and in consideration of the privileges granted, and for the protection of the public works, the company were to pay to the State three mills for every ton of freight carried one mile. The State also reserved to itself the right to purchase the road at the expiration of twenty years at cost, with 8 per cent. interest thereon, deducting the profits of the company; but if this right should not be exercised, then the company to continue possession for a further period of twenty years, and so on from twenty years to twenty years.

The work of construction was commenced in July, 1847, and 60⅔ miles of road from Harrisburg to Lewistown, was opened Sept. 1, 1849; to McVeytown, 72 miles, Dec. 24, 1849; to Schæffer's, 85 miles, April 1, 1850; to Huntingdon, 96 miles, June 10, 1850; and to Hollidaysburg, 137 miles, Sept. 16, 1850. At the last-named place, it made a connection with the Alleghany Portage railroad, a State work, and at that time used for the transportation of boats over the mountains from one division of the State canal to another. On the Western division, the road was completed from Johnstown, the western terminus of the State road, to Lockport, 18 miles, August 25, 1851; thence to Beatty's, 21 miles, and from Pittsburg to Turtle Creek, 13 miles, Dec. 10, 1851; and from Turtle Creek to Beatty's, 26 miles, Dec. 10, 1852. The Mountain Division of the road, between Altoona and the Portage Viaduct, 39 miles, was completed February 15, 1854. The Indiana Branch, from Blairsville to Indiana, 16½ miles, was completed June 9, 1856. The laying of the second track was commenced in 1854, and is still progressing. On the 1st Jan., 1861, but 16½ miles remained to be finished to make a continuous double track from Pittsburg to Petersburg; and but 68½ miles to complete the second track throughout the entire length of the road.

On the 23rd of March, 1853, an act was passed authorizing the company to subscribe capital, or guaranty the bonds of other companies, to the extent of 15 per cent. of its own paid-up capital. Under this authority, the company exchanged stocks with the Cincinnati and Marietta Railroad Company, to the amount of $650,000; with the Maysville and Big Sandy Railroad Company, to the amount of $100,000; with the Springfield, Mount Vernon and Pittsburg Railroad Company, to the amount of $100,000; with the Ohio and Indiana, and the Ohio and Pennsylvania Railroad Companies, to the amount of $600,000, which last sum has been increased by dividends paid, to $816,050. In 1858, the three subscriptions first named were charged off as worthless.

Up to August, 1857, the company had run their cars into Philadelphia, over the Philadelphia and Columbia railroad, under contract with the Commissioners of Public Works. On the 1st of that month, in pursuance of an act passed by the Legislature, and a vote of the stockholders on the 13th of July, this road and also the main line of the public works, was purchased by the company. The price paid for the whole was $7,500,000, for which the company issued to the State its bonds, bearing 5 per cent. interest, made payable in annual instalments of $100,000 until July 31, 1890; and after that date of $1,000,000 until the whole be paid. These are now operated by the company, with the exception of the Alleghany Portage railroad, which has been abandoned. By the terms of the contract of sale, the State relinquishes its right to buy the road as provided in the original charter.

In 1858, the bridge over the Alleghany river at Pittsburg was completed, and a junction made with the Pittsburg, Fort Wayne and Chicago railroad.

A further improvement is also in progress, that of making a terminus on the Delaware river at Philadelphia, so as to avoid the inconvenience and expense of drayage within the city. Surveys for this purpose were made in the early part of 1860, and a location of a line from a point on the Westchester railroad, opposite the Alms House, to an intersection with the Philadelphia, Wilmington and Baltimore railroad, was adopted by the board. It is expected that the line will be ready for use to the Delaware river not later than the 1st of October next.

The contract with the Harrisburg and Lancaster Railroad Company for the use of its road was made April 21, 1849, to continue 20 years, the lessee to supply motive power and cars, and charge the expense to the lessors, the charges on freight and passengers going over the whole or part of both roads to be governed by the charges on the Pennsylvania railroad, but all local business to be regulated by the Harrisburg and Lancaster Company.

Under the authority of the act of the Legislature for the sale of the main line, the Pennsylvania Company has leased the Harrisburg and Lancaster railroad for the term of 999 years. The shareholders of that company to receive semi-annual dividends of 3½ per cent. on $1,182,550 of capital stock, and the bondholders the interest upon $700,000, at 6 per cent. per annum, amounting in all to a semi-annual payment of $62,389 25. In addition to this, there is to be paid to the treasurer of that company $2,000 per annum to continue the corporation, and meet its necessary expenditures. This lease supersedes the contract made April 21, 1849, which proved to be an unfortunate one for the Pennsylvania Company, while the mode provided for adjusting rates under it has been a source of vexation to both parties. Over eight years remained for the

fulfillment of the contract. By the terms of the new lease from thirty to sixty thousand dollars is annually saved. The trustees of the sinking fund have been directed by the board to invest the saving upon the old contract until it would have terminated in such manner as will finally result in the extinguishment of the stock of the Harrisburg and Lancaster Company. The shareholders of that Company have the right to convert their stock into shares of the Pennsylvania Railroad Company at par, until 1871. It is believed that this mode of absorbing the stock may be carried into effect, from the greater prospective intrinsic value of the stock of the latter company.

The Westchester railroad is also operated by this company under lease having five years to run from April, 1859.

The sinking fund established by the board for the redemption of the second mortgage bonds, with the accumulation of interest, now amounts to $532,491.

There has been charged during the year 1860, to construction and equipment account $781,302 69, of which $221,106 36 has been for real estate at the Delaware terminus, Pittsburg and along the line of the road.

The length of the several divisions of the road and branches is as follows:

	Miles.
Eastern div.—Philadelphia to Columbia	80.9
Second track, 80.9 miles. Sidings, etc., 9.3 miles.	
Middle div.—Harrisburg to Altoona	131.7
Second track, 79.7 miles. Sidings, etc., 19.5 miles.	
Western div.—Altoona to Pittsburg	117.6
Second track, 101.1 miles. Sidings, etc., 17.4 miles.	
Hollidaysburg branch—Altoona to Hollidaysburg	8.0
Indiana branch—Blairsville to Indiana	19.0
Total length of main line and branches	357.2
Second track, 61.7 miles. Sidings, etc., 46.2 miles.	
Leased—	
Harrisburg and Lancaster railroad—Dillerville to Harrisburg	36.3
Columbia branch—Middletown to Columbia	18.5
Westchester railroad—Junction (23 miles west of Philadelphia) to Westchester	9.0
Total length of road operated by the Co.	421.0

The amount of capital stock authorized by the charter, and by subsequent acts of the Legislature, is $14,000,000—of which $13,261,960 has been paid.

The funded debt of the company Jan. 1, 1861, amounted to $16,391,400; described as follows:

First Mortgage 6 per cent. dollar bonds, $4,905,000—dated Oct. 14, 1852, and payable Dec. 31, 1880; interest semi-annually, Jan. 1, and July 1, in Philadelphia.

Second Mortgage 6 per cent. dollars bonds, $2,319,000—dated June 1, 1854, and payable March 31, 1875; interest semi-annually April 1, and Oct. 1, in Philadelphia.

Second Mortgage 6 per cent. sterling bonds, $1,957,440—dated June 1, 1854, and payable March 31, 1875; interest semi-annually April 1, and October 1, in London.

The second mortgage provided for an issue of bonds to the amount of $5,000,000.

State work bonds, bearing 5 per cent. interest, $7,200,000—dated July 31, 1857, and payable in yearly instalments of $100,000 until 1890, and after that date, $1,000,000, until the whole is paid; interest semi-annually, July 31, and Jan. 31, at Harrisburg—the whole to be paid off by July 31, 1894.

The floating debt amounted to $1,377,233 78; consisting of mortgages and ground rents on real estate, $299,363 84; bills payable $189,500; accounts, including pay-roll for December, 1860, $888,369 94.

The income account for the year ending December 31, 1860, is as follows:

Earnings:		
From passengers		$1,453,992 77
" freights		4,191,783 97
" mails		74,504 34
" expresses		75,120 00
" miscellaneous sources		137,300 40
Total railroad		$5,932,701 48
Canals—Eastern divis'n.	$159,651 08	
" Juniata divis'ns	26,180 95	
" Western "	16,003 57	
" Miscellan's receipts	7,530 23	
		209,365 83
Total railroad and canals		$6,142,067 31
Expenses:		
Conducting transportation		$1,539,361 08
Motive power		970,490 32
Maintenance of road		783,163 81
" cars		260,452 41
General expenses		82,831 46
Net earnings of the road		2,296,402 40
		$8,932,701 48
Canals—repairs, renewals and enlargement	$130,696 79	
" salaries and wages	24,063 84	
" net earnings	54,605 20	
		209,365 83
		$6,142,067 31

The earnings of the road as compared with those of the preceding year show an increase of $570,346 27; with an increase in expenses of $505,560 93—making the increase in net earnings $64,785 34.

The increase in canal revenues over those of 1859 was $11,816 45; with a decrease in expenses of $20,691 75—making the increase in net earnings $32,508 20.

The canals were found to be in a much worse condition than their appearance indicated, and hence the expenditures incurred in their maintenance have been larger, and their net revenues, consequently, less than the company had reason to expect. The net profit of the Eastern, or Susquehanna division, was $65,525 62, and the loss upon the other portions of the canal $18,450 65. With the same amount of revenue, and the works in complete order, the profit on the Eastern division should have been over $100,000.

The following statement will show the condition of the company's affairs, January 1, 1861:

	Dr.	Cr.
Cost of road, including engineering, land damages, fencing and buildings from Harrisburg to Pittsburg and station and warehouses on the Philadelphia division		$17,307,669 29
Less profits of road, after paying interest to stockholders up to Nov. 1, 1855, credited to cost of construction, as required by charter		589,185 79
		$16,718,483 50
Cost of Philadelphia and Columbia railroad	$6,500,000	
Cost of Canals and Portage railroad	1,000,000	
		7,500,000 00
Locomotives and cars		3,065,284 44
Real estate		1,781,579 41
Telegraph line		45,264 28
Extension to Steubenville & Pittsburg railroad		5,214 09
Extension to Delaware river		30,616 87
Stock of P., Ft. W. & C. R. R. Co.		816,050 00

The equipment of the road consists of 211 locomotives; 113 eight-wheel passenger cars—of which 67 are wide, 17 narrow, and 29 emigrant. Other eight-wheel cars 2,405, viz: 34 baggage, 10 express, 1,326 house freight, 6 powder, 300 stock, 657 coal and lumber, and 72 wood. Four-wheel cars, 571, viz: 116 house freight, 133 coal, 88 gravel, and 234 road and hand cars—making the total number of cars belonging to the Pennsylvania Company, and in service on its own line, 3,089. In addition to which, the Pennsylvania Company owns on the Pittsburg, Fort Wayne and Chicago road, 100 stock and freight cars; and on the Pitts-

burg, Columbus and Cincinnati road 6 passenger, and 113 freight, stock and coal cars—making the total number of cars owned by the Pennsylvania Company, 3,308. During the year 4 first class freight engines and 1 steam passenger car have been added to the equipment; 56 stock, and coal and lumber cars have been built; and 208 cars rebuilt, of which 11 were passenger, 4 baggage, 7 express, and the balance for freight, stock, etc.

The office of the company is at Philadelphia, Penn. The officers and directors for 1861-'62, are as follows:

President—J. EDGAR THOMSON.

Vice-President—THOMAS A. SCOTT.

Directors elected by the Stockholders—J. Edgar Thomson, Washington Butcher, William R. Thompson, Josiah Bacon, Thomas Mellon, John Holme, G. D. Rosengarten, Wistar Morris, G. W. Cass, W. H. Smith.

By the City of Philadelphia—John M. Kennedy, Samuel T. Bodine, Edward C. Knight.

By the Board—Thomas A. Scott.

Treasurer—THOMAS T. FIRTH.

Secretary—EDMUND SMITH.

General Sup't—ENOCH LEWIS.

Master of Machinery—G. W. GRIER.

Foreman Car Department—AMBROSE WARD.

Assistant Engineer—W. H. WILSON.

Chief Eng. Canal Depart.—T. T. WIERMAN.

Pittsburg, Fort Wayne and Chicago R. R.

We are indebted to T. D. Messler, Esq., Auditor, for a copy of his semi-annual statement, showing the business of this Company for the six months ending June 30th ult., also the financial condition of the company at that date. The gross earnings have been $1,376,421 48, an increase over the corresponding period of last year of $354,125 07, which is equivalent to $20,510 47 per month, or 34.64 per cent. The expenses of operating the road and maintaining it, its structures and equipment, have been $861,631 96, an increase of $104,561 26—making the increase in net earnings $249,564 41. The current charges upon revenue have been: For 6 months' interest on bonds $324,121 25; do., on floating debt, $37,910 78; taxes, $23,439 33; drawbacks, overcharges, etc., $15,887 53—making a total of $401,358 89, leaving a surplus of $113,430 63. Deducting expenses of receivership and re-organization, $17,644 97, a net balance remains to credit of income of $95,785 66. We shall publish the report next week, in the mean time copies can be procured at the office of GILEAD A. SMITH, Transfer Agent, No. 207 Broadway.

Grand Trunk Railway of Canada.

On Wednesday the 17th July, 1861, the seventh annual general meeting of the shareholders in this company, adjourned from the 24th day of the previous December, was held in Quebec; the Hon. John Ross in the chair. Mr. Elliott (the secretary and treasurer) read the report of the directors as follows:

"The Canadian directors of the Grand Trunk submit herewith to the shareholders, copy of the reports and statements laid before the share and boudholders of the company, at a meeting held at the London Tavern, in London (England), on Wednesday, 2d January, 1861, Thomas Baring, Esq., M. P., in the chair, and also a copy of the proceedings at that meeting. It will be observed that a select committee of seven persons was then appointed—namely, two first preference bondholders, one second preference bondholder, two ordinary bondholders, and two shareholders, 'to confer with the directors as regards sending a commission to Canada, and as regards all the affairs of the company, and with power to add to their number;' the first report of which select committee is also herewith submitted. The memorial to the Government and Legislature of Canada suggested in this report from the select committee was duly adopted by the directors and laid before the provincial authorities, but the board regrets to state that the relief prayed for was not granted, and that the financial embarrassments of the company still continue. On the 1st May last the select committee addressed to the London directors a letter, in which allusion is made to the importance 'of establishing a supreme management of the company in England, with an effective representation in Canada, and the committee state that this is a question which must receive early and careful consideration.' A copy of this letter was immediately transmitted to Canada by the London secretary, and on receipt thereof the President summoned a meeting of the Canadian directors, which took place at Montreal on 31st May last, and on the above letter being read to the board, it was unanimously resolved—'That the members of this board are most anxious to afford every facility to the London board in effecting such a reorganisation in the management of the company as their colleagues in London may, during their conference with the select committee, deem best calculated to promote the interests of the company, and for this purpose the London Board is requested to announce to the committee the resignation of the undersigned as directors of the Grand Trunk—namely, John Ross, James Beaty, T. E. Campbell, G. Crawford, T. G. Ridout, J. Ferrier, E. P. Tache, W. Cayley.'

"The Canadian directors adopted the foregoing resolution in the sincere wish to aid the share and bondholders in establishing such a system of management as they may desire, and the directors will continue to administer the affairs of the company as they have hitherto done, until the new arrangement contemplated can be made. A legal difficulty has been suggested, whether those directors who have signed and sent forward to their London colleagues their resolution of resignation, can continue to act until their successors are appointed and the reorganization of the management carried out: and it is now proposed to re-elect the Canadian directors who have retired, until the necessary legislation can be had, and as Messrs. John Ross, George Crawford, Sir E. P. Tache, James Beaty, Thomas G. Ridout, T. E. Campbell, James Ferrier, and William Cayley are eligible, they present themselves for re election for the reasons and purposes stated: and as Thomas Baring, Esq., M. P., George Carr Glyn, Esq., M. P., and Kirkman D. Hodgson, Esq., M. P., London directors, and Thomas E. Blackwell, Esq., Canadian director, retiring by rotation, are eligible for re-election, they present themselves accordingly.

"The accounts of the company for the half-year ended 30th June, 1860, are herewith submitted; and as the annual meeting of shareholders has been adjourned from time to time, it enables the directors also to present the accounts for the half-year ended 31st December, 1860, which have been made up subsequent to the meeting in London on 2d January last.

"The following gentlemen are recommended as auditors of the company:—Tancred Bouthillier, Edward T. Taylor, and Thomas Morland, Esquires, of Montreal."

The Chairman then moved the following resolutions, which were adopted unanimously:—

"That the report of the directors and statement of accounts now submitted be received, adopted, and published for circulation among the shareholders."

"That the following directors of the Canadian board who signed the resolution of resignation on 31st May last be re-elected directors of this company, viz:—Hon. John Ross, Hon. George Crawford, Hon. Sir Etienne P. Tache, Hon. W. Cayley, Hon. James Ferrier, Major T. E. Campbell, C. B., James Beaty, Esq., Thomas G. Ridout, Esq.; and that Thomas Baring, Esq., M. P., George Carr Glyn, Esq., M. P., Kirkman D. Hodgson, Esq., M. P., London directors, and Thomas E. Blackwell, Esq., Canadian director, retiring by rotation, be also re-elected directors of this company.

"That the following gentlemen be elected auditors of the company's accounts:—Tancred Bouthillier, E. T. Taylor, and Thomas Morland, Esqs."

It was then moved by Thos. E. Blackwell, Esq., seconded by the Hon. James Ferrier, and carried unanimously, that the thanks of the meeting be given to the Hon. John Ross, for the manner in which he has presided over this meeting.

Orange and Alexandria Railroad.

This company was chartered on the 27th March, 1848, with authority to construct a railroad from Alexandria to Gordonsville, and raise a share capital of $937,500. By subsequent acts of the Legislature the capital was increased by $100,000, (act 7th March, 1851) for the Warrenton Branch, and $420,000, (act 21st February, 1853) for completing the main line. Of the latter amount $350,000 was constituted a preferred 6 per cent. stock. In all these cases the State subscribed three-fifths of the whole number of shares. In the original grant of aid the work was divided into three—Eastern, Middle and Western Sections and so much of the State appropriation made applicable to each, and only when subscriptions from the sources reached a certain amount. This provision retarded operations on the Western Section for nearly two years on account of the difficulty of obtaining local subscriptions to the required amount. Bonds to the amount of $400,000 were issued on the 1st November, 1851, and constitute a first mortgage on the road.

The company was organized in May, 1849. Surveys were made and completed during the ensuing summer and the Eastern Section placed under contract in January, and the Middle Section in April, 1850—both to be completed by the spring of 1852. The failure of contractors, however, postponed the date of opening the Western portion of the Middle Section for several months. In October, 1851, the first 27 miles, from Alexandria to Manassas Junction were completed. In September, 1852, the road was opened to the Rappahannock, 51 miles, and in November of the same year to Culpepper, 62 miles. This was the limit of progress for some time, owing to the cause above stated. In the fall of 1851 the Western Section was placed under contract, and the whole line completed to Gordonsville, 88 miles from Alexandria in March, 1854. The Warrenton Branch which leaves the main line 41 miles west from Alexandria and extends about 9 miles to Warrenton was completed in December, 1852.

The Lynchburg Extension was authorized by an act passed in 1852-3, and the surveys were soon afterwards executed. The capital under the charter was $1,500,000, none of which was taken by the State. The work of construction was commenced in the spring of 1854. On the 1st January, 1855, bonds to the amount of $1,200,000 were issued, and on second issue to the amount of $600,000 was made on the 1st May, 1858. These are secured by a 1st and 2d mortgage on the Extension, and a 2d and 3d mortgage on the main line. In 1858-59, the State loaned the company $400,000. With the proceeds of these the Extension was completed in October, 1859.

Of the main line 61.53 miles are straight line

and 26.77 miles curved line—the whole curvature being 2,918 degrees, or an average of 109 degrees per mile. The max. radius is 68.760 feet, and the min. radius 1,000 feet. The sum of ascents westward is 1,838½ feet, and eastward 1,345½ feet—making a total of ascents and descents of 3,184 feet or 36.06 feet to the mile, with a maximum of 66 feet. Of the Warrenton Branch the straight and curved line is about equal, with a total curvature of 387 degrees and a min. radius of 1,910 feet. The sum of ascents westward is 342 feet, and eastward 357 feet, with a maximum grade of 66 feet and an average of 40 feet. The extreme grades on the Lynchburg Extension are limited to 66 feet per mile, and the minimum radius to 1,000 feet, according in these respects with the main line. The route is 4.6 miles more than a straight line, the curvature being spread over 30½ miles.

For the purpose of forming a connection between the two portions of the company's road, a contract was concluded with the Virginia Central Company for the use of its road between Gordonsville and Charlottesville, a distance of 22 miles. By this contract (dated 12th May, 1859) the Orange and Alexandria Company is to pay to the Virginia Central Company, 62 per cent. of the charges on the through traffic, the contract to be in force for five years from the time the Orange and Alexandria Company commences to use the road.

The Manassas Gap Railroad Company uses the Orange and Alexandria Railroad from the Junction to Alexandria, a distance of 27 miles, and pays therefor 68 per cent. of the charges on the through traffic over said road.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Share and Money Market.

The principal topic of interest the past week has been the new government loan, for which an active demand has sprung up, outside the Banks, that bids fair to absorb the whole loan. The high rate of interest, with the increased confidence in the military operations of Government, renders it, in public estimation, a most desirable security. The rate paid is nearly double that realized to the holders of the United States States Stocks for the past 10 years.

For 11 years past the quotations have averaged 116, which rate allows an interest of only about 4½ per cent. There can be no reasonable doubt that the present loan is destined to reach still higher figures, the interest being 1 3/10 cents greater. Such a conviction is of itself enough to attract purchasers.

We copy from the Circular of Messrs. SAMUEL HALLETT & Co., 58 Beaver Street, New York, the following interesting statements, relative to the public debt of the United States and England.

"Upon the organization of the government of the United States, the amount of debt assumed and funded by it was $75,463,476. This amount was slightly increased by the wants incident to the new order of things, but its extinguishment was never lost sight of, and after 1806, the financial policy of government enabled it to devote, annually, a large sum towards its reduction. In 1812 it was reduced to $45,209,738. The war which commenced that year was followed by new loans, and in 1816 the debt was swelled to $127,334,934. Upon the return of peace, notwithstanding the embarrassed condition of the country, the first step of government was a financial policy which looked to the speedy payment of the debt, which was totally extinguished in 1835. The embarrassments following the memorable speculations of that year, forced the government to make some small loans, but in 1845 the debt was only $16,801,647. The expenses of the Mexican war, which soon followed, again swelled the debt to $67,560,395. The payment of this, however, was immediately commenced, a large amount of it being purchased at 22 per cent. premium, out of an overflowing treasury, so that in 1857 the amount was reduced to $25,165,155. In that year the rates of duty on imported merchandise were greatly reduced, and the revenue from this source correspondingly diminished, caused in part by the commercial disasters of that year. The expenses of government, for extraordinary emergencies, were largely increased, and the debt in March last stood, at about $77,000,000; a part of this being incurred to put down the present rebellion. At its late session, Congress authorized a loan to the amount of $250,000,000, the first instalment of which has recently been taken by the Banks. Annexed is a statement showing the amount of the national debt for each year since the organization of the government.

1825	83,788,433	1861	110,000,000
1826	81,054,060		

This table proves, in the most conclusive manner, that all the debts contracted by the United States, unlike those of other nations, are treated purely as commercial transactions, to be paid at an early day, and for which provisions have always been speedily made, and which at one period entirely extinguished the debt, and reduced it to merely nominal amounts at two others. As the people are the government, they are anxious to be relieved from debts existing against them in a collective, as those in a private capacity. Each man feels that he personally owes a portion of them, and wishes to be discharged of the burden as soon as possible. In this country those who vote the money pay it. The conviction of this fact is coupled with every financial transaction of government. Its uniform policy in providing for the payment of all debts, is an important element in the value of its securities. These are always subject to fluctuations, but the United States stocks have averaged prices which have realized the holders considerably less than 5 per cent., as will be seen by the following statement of quotations of these stocks for the last 19 years:

Years.	Highest quot. for U. S. 6s.	Years.	Highest quot. for U. S. 6s.	Years.	Highest quot. for U. S. 6s.
1842	100	1849	113¼	1855	118¾
1843	118¾	1850	122	1856	118¾
1844	115	1851	122½	1857	118½
1845	114	1852	121	1858	115½
1846	112	1853	124	1859	112
1847	108	1854	123¼	1860	109
1848	108				

The highest average quotation for 19 years has been 116 per cent. Since 1849 the quotations given are for the U. S. 6s, payable in 1868. The

average highest quotations for these, for 11 consecutive years, have been 119. These rates would yield an interest of only 4¼ per cent. If we take the average of highest and lowest quotations, for the past 11 years, for the government 6s of 1868, the averages have not been under 116, and have not realized their holders over 4½ per cent. As a rule, it may be stated that the public securities of all solvent governments are in request at rates that yield the smallest interest of any investment, for the reason that government represents the aggregate wealth of the people, and its failure must always be preceded by that of the individual members who compose it. The average rate of money for commercial transactions, both in England and the United States, is two or three per cent. greater than the public securities of the two countries yield. This has been a uniform experience. It is just as probable in the future as it has been in the past, modified, of course, by extraordinary events. The loans brought out in the Mexican war sold at par, but the moment public confidence was restored they sold at 20 per cent. premium. Owing to the present political troubles the United States 6s of 1868 are selling at a rate which will yield to those holding them till their maturity 8 per cent.—or very near twice the rate of interest they have yielded for the past 11 years. A nation with a vitality like that of the United States is not going to be extinguished in a day, nor till, like all other great nations, it has run its course, which is not measured by any ordinary computation. In a year or so our fears will be forgotten, and as money is now far more abundant among us than at any former period, it will not be long before government securities will be selling at the highest rates they ever reached. The supply coming upon the market will, for a time, keep down the price, but the moment that ceases, rates will rapidly advance, no matter, within any reasonable bounds, how great a debt may be contracted. The public debt of England equals nearly $4,000 000,000. A debt of $500,000,000, or eight times less, would be, for us, nothing in comparison. The English consols would bear no higher price were they reduced to one-half their present amount. Were the public debt of the United States $500,000,000 instead of $110,000,000, its securities would probably bear a higher price, from the vastly greater number of parties interested and dealing in them. The Canadas, with a population of about 2,500,000, have a public debt of $65,000,000, which would be equal to a debt of $800,000 000 for the United States, which have three-fold greater wealth and resources in proportion to population. Yet the securities of the former are selling at a premium of some 10 per cent., while those of the latter are at 12 per cent. discount. This fact shows the excess and unreasonableness of our fright. The debt at the formation of the government was equal to nearly $20 per head; in 1816, $15 per head. A similar ratio per head would give us a debt of $650,000,000 in one case and $465,000,000 in the other; yet the wealth of the country is more than three-fold greater per head than in either of the periods named. At the close, in 1815, of the great Continental wars, the debt of Great Britain, including Ireland, was £860,000,000, or about $4,300,000,000, which was nearly $250 per head for each man, woman and child in that country—its population, including Ireland, not much exceeding 18,000,000. The population of the United States is nearly twice that number; that of the loyal States once and a half greater, with resources vastly exceeding those of Great Britain in her eventful struggle which humbled the greatest military power, and military genius, the world had ever seen.

The following statement will show the debt and expenditures of the British government; the population of the United Kingdom; the average amount of bullion held by the Bank of England, and the average price of 3 per cent. consols, for each year from 1797 to 1816, inclusive. The value of the pound is estimated at $5. The yearly population is deduced from the decennial enumerations.

Years.	Amount of debt.	Annual expenditures.	Population.	Bullion held by the Bank.	Av. price of Consols.
1797	$1,878,123,815	$203,807,660	$13,278,500	$12,939,478	52⅝

Money continues very abundant, call loans being freely made at 5 per cent. The new government loan does not seem to have had any influence upon rates. Railroad shares are quiet but firm with an advancing tendency. In Southern State stocks that has been a heavy decline with one or two exceptions. United States securities are very firmly held.

Journal of Railroad Law.

TRANSPORTATION OF PASSENGERS—DROVERS FREE PASS—POWER OF COMPANIES TO MAKE SPECIAL CONTRACTS AVOIDING LIABILITY FOR ORDINARY DAMAGES.

The nature of the liabilities of companies, and the mutual obligations assumed between railroad companies and drovers who are usually sent over the road free in order to enable them to take personal charge of their cattle, was recently brought before the Superior Court of the City of New York in the case of George B. Boswell, Administrator, &c., of John B. Boswell *vs.* The Hudson River Railroad Company. The action was for an injury to the person sustained by John B. Boswell while riding in the defendants cars, through the alleged negligence of the servants of the company, and it was held to be a good defence to the action that the decedent was at the time riding by virtue of a *special contract*, which was evidenced by a pass or free ticket, accepted and used by him, to enable him to take charge and care of his live stock, while on the railroad, and as part of the contract for transporting such stock. It was also held that a railroad company may limit their common law liability as carriers of passengers, by express contracts with the passenger upon sufficient consideration, so as not to be liable for casualties not arising from fraud, willfulness, recklessness, or gross neglect.

The complaint alleged, in substance, and among other things, that John B. Boswell, the plaintiff's intestate, on the 8th of September, 1858, at the defendants' request became a passenger in their car to be carried by them as common carriers from East Albany to the City of New York. That defendants undertook, and it became their duty to carry him safely; but the defendants and their agents conducted so negligently that the car in which he was came in contact with another car or locomotive and was demolished or thrown from the track, and the said John B. Boswell, then and there, from such gross negligence of the defendants was instantly killed or received great injury from which he immediately died. And the death of the said John B. Boswell was caused by and was the result of the gross negligence of the defendants.

The answer contained denials of many of the allegations in the complaint, and then set up the following defence, to which the plaintiff demurred: And for a separate defence the defendants say: that at the time and place in the complaint mentioned, the said John B. Boswell was upon the cars of the defendants, not as a passenger, nor upon the payment of or promise to pay any fare, but under and in virtue of a special contract made between the said Boswell and the said defendants, which contract was evidenced by the pass or free ticket given to him by the defendants, and accepted and used by him, and by virtue of which he was riding upon the road and in the cars of the defendants at the time of the alleged injury. That the conditions of the contract by which the defendants agreed to carry the said Boswell, were printed upon the face of the ticket or pass, and were in the following words:

Conditions. This ticket is issued to the owner of live stock or his agent, to enable him to take the entire charge and care of his stock while on the Hudson River Railroad, and is part of the contract for transporting the same. By accepting or using it he expressly releases the company, in consideration of this pass, and the reduction of price below the Tariff Rates, from all liability for injury to said stock from suffocation, crowding, trampling or delay in transportation, or for injury to his person or stock arising from any cause whatsoever.

That the said ticket was accepted and used by the said Boswell at the time of the injuries alleged to have been sustained by him; and that the said injuries were not caused by any fraudulent, willfull or reckless act or misconduct or gross neglect or default on the part of the defendants, and that the defendants are not liable therefor.

At the Special Term of the Court judgment on the demurrer was rendered the plaintiff; from this judgment sustaining the demurrer the defendants appealed to the General Term. The following is the opinion of the Court rendered upon the decision of the cause.

HOFFMAN, J. It is insisted by the counsel of the plaintiff, that the court is at liberty to interpret the contract between the defendants and the plaintiff's intestate by the attending circumstances, and to restrict the general language to cases which would still leave the defendants liable for some neglect. Adopting this view, this at least is clear, that the parties must show plainly that the intention of the parties was to qualify and restrain the very comprehensive language used in the instrument. So far from its being obvious that there are cases other than those of negligence, which the parties may be reasonably supposed to have contemplated, it seems to us difficult to under-

stand in what cases the company could be rendered liable at all for injury to the person of the party, without some negligence on their part or on the part of their agents. An injury to his person, in the course of his being carried to New York in their cars, could have arisen either from his own negligence, without any fault of the defendants; or from an event wholly independent of fault of either party; or from some neglect or fault on the part of the defendants. The parties cannot be intended to have contemplated the exemption of the defendants in the first two cases. The natural interpretation is, that they meant to cover the last case. The counsel of the defendants does not deny that there may be a degree of gross neglect, amounting to willful and fraudulent misconduct, for which they might be responsible, even under this contract. His answer is found to negative such a case. It may be difficult or impracticable as observed in Wells *vs.* The New York Central Railroad Company, to distinguish accurately between the different degrees of negligence. Yet one case can certainly be readily supposed in which a marked and practical distinction would exist. There might be a case of such misconduct on the part of an agent as would indicate a willful design to injure the party, a desperate recklessness which wantonly endangered the lives or property of all those who are in his charge, a case of personal misconduct, and yet the principal be responsible. In Weed *vs.* The Panama Railroad Company, the willful act of the conductor who managed the train was not allowed to be a ground of exemption for the company.

But the averments of the answer seem to us to cover all such cases by denying that the injuries were caused by any fraudulent, willful or reckless act, or misconduct, or gross neglect or default; and the terms and import of the stipulation appear to amount to an agreement that the party was to have no redress for injuries arising from other degrees or cases of negligence. We consider, also, that the parties were fully at liberty to enter into a contract of this nature.

The order below was accordingly reversed and the demurrer overruled.

United States Census.

(*Compiled from the official Returns.*)

* Double track railroad.
† A large portion double track railroad.
‡ The Peterboro' and Shirley railroad was sold to the Fitchburg Company in March, 1860, for $132,663.

New Brunswick and Canada Railway.

The hall-yearly meeting was held at the offices, Whitehall, London, July 30. Mr. F. Edwards in the chair. The report stated that the directors had transmitted to New Brunswick since their last report £18,700. This sum had enabled Mr. Osburn to pay off the judgment debts, besides meeting other urgent necessities. The old debts remaining unpaid in the province had been reduced to about £2,000. In addition to the cash remitted, acceptances at various dates from three to twelve months had been given for sums amounting in the aggregate to £13,428, which would have to be provided for. The whole of the permanent way had been shipped. The debt of the company on this account amounted to about £29,500, which must be met in the beginning of next year. The disturbances in the United States, and other causes, had considerably affected the money market of the Province, and deprived the contractors, to a great extent, of the assistance they had relied upon receiving from the local banks, and this had hitherto retarded their progress. But the directors had made such financial arrangements as would ensure the opening of the railway to Woodstock during the present year. A short act was passed last session, making absolute and irrevocable all the grants of land hitherto made to the company, and extending the time for the completion of the railway to October, 1862. The land agent of the company, Mr. Jack, stated in his report that the value for lumbering purposes of the land granted and to be granted to the company was about £75,000. The directors concluded by stating that the shareholders had not provided one-half the sum fixed by the committee of consultation as their quota, exclusive of the sum the board would have to find, and if the necessary amount were not provided before the end of the year, the property of the company must go into the hands of the bondholders. The Chairman said the directors had made such arrangements as would enable the contractors to complete the line from St. Andrew's to Woodstock in the present year. The short act of last session had completely disposed of the vexed question with regard to the company's lands, and had given them an absolute and indefeasible title to them. It was of the utmost importance that the shareholders should provide their full proportion of the funds to meet the liabilities of the company. The directors were prepared to provide among themselves their full proportion, as promised, amounting to £15,000, towards paying the liabilities of the company. After some observations from Mr. Field, Mr. Maude, and M. Conybeare, the report was adopted, it being agreed to hold the future ordinary meetings in the months of February and August in each year. The meeting was then made special to consider the propriety of confirming the resolutions passed 29th June, altering certain articles of association, so as to enable the directors to let or sell land granted to the company for the purpose of completing the railway. The Chairman having proposed a formal resolution confirming the resolutions passed at the special meeting of the company on the 29th ult., Mr. Conybeare moved as an amendment that the resolution be not confirmed, which was negatived and the original motion adopted.

The capital account of this company shows that £271,569 had been received to the 30th of June last, including £23,273 on temporary loan, and £307,989 expended, leaving a balance against the company of £36,420. The official balance sheet shows a total on both sides of £477,042. The capital, including £50,000 subscription from the Government, appears on the debit side to be £350,000; the debts and liabilities, £126,237; and land account, £805. The credit side shows £393,954 for the railway, works, and stations; £26,035 for plant and stock; £1,958 bills receivable; £1,196 arrears on calls, considered good; £10,690 arrears on calls, considered doubtful; and £26,766 arrears on calls, considered bad. The unissued shares represent £5,020, and the cash and securities £11,423, making together £477,042. The assets include 70,000 acres of land, the value of which has not been ascertained. At the special meeting to be held on the 30th instant, it is proposed to confirm the alteration in the articles of association, so as to enable the Directors to dispose of certain lands and other property for the completion of the railway throughout from St. Andrew's to Woodstock.

Italy--New Lines and Concessions.

The labors of the new Italian Parliament have not been altogether of a merely political character. Material improvements in the country, not overlooking communication by railway, it will be seen by the subjoined communication, have not been thought unworthy of the statesmen of the new kingdom:

"The contracts that have been negotiated, and which the Legislature has approved, extend from the northern to the southernmost regions of Italy. From the Maritime Alps of Piedmont and Liguria, which will be tunneled for the line decided upon, between the port of Savona and Turin, the system already stipulated for and decreed reaches down to those Neapolitan transverse lines conceded to M. Talabot and his partners, connecting the Tyrrhene shore with the Adriatic, and the Gulf of Salerno with Bari and Taranto on the opposite side. Below these lie the Calabrian and Sicilian projects, included in the agreement that Garibaldi made with Adami and Lemmi for all the railways of the Two Sicilies. The general design that prevails throughout these undertakings is to supply a continues series of roadways along that inevitable direct channel of commerce between Western Europe and Asia, from Mont Cenis, when it is opened by the tunnel, through Piedmont, the Æmilian provinces, and the straight coast line of the Marches and of the old Neapolitan territories, as far perhaps as Brindisi, which looks right into the Levant. But the railways of this series, already carried on to Forli in the heart of Romagna, will altogether pass through the most fertile and thriving parts of Italy. To say nothing of Parma, Modena and Bologna, which already enjoy the advantage of being within a few hours of Genoa by railway, to their immense gain within the last two or three years, that long strip of level which is enclosed with varying width between the Apennines and the Adriatic comprises, in the provinces of Macerata, Fermo, and Ascoli, the Capitanata and Bari, some of the richest lands in Europe, with several manufacturing towns, many excellent harbors, and a brisk, intelligent, well-disposed population.

"The longitudinal series of Italian railways, extending 500 or 600 miles tolerably straight from the north-west Alpine corner above Turin, to the south-east promontory almost within sight of the Ionian Isles, has an amount of commercial and economical importance which can scarcely be rated too high. The cross lines, which will traverse the breadth of Italy, have greater political importance. The Apennines have too long been a wall of partition between the inhabitants of neighboring plains and valleys, who belong to the same great nation. It is to overcome these natural divisions that railways have been planned to go from Bologna to Pistoja, from Florence by Arezzo and Perugia to Ancona, from the Marches through the Abruzzi to Naples, from Salerno on the western to the Gulf of Manfredonia on the eastern shore—piercing the Apennine range in half a dozen places, binding up Central and Southern Italy in one. Such is an outline of the railway system provided for by the votes of Parliament, and the chief part of it already contracted for, on terms which might, perhaps, be called extravagantly liberal, if it were not for the great political benefits to be expected, beyond all ordinary calculations of paying more or less per cent. Five years of independence, even though they be not years of peace, will remove all the material as well as the moral barriers to a perfect fusion of interests in Italy, and at the same time will establish the Indian overland route for conveyance of mails and passengers, to the saving of three days at least compared either with Trieste or Marseilles.

"The Roman company, represented by Messrs. Salamanca and Delahante, have engaged to open the line from Bologna Forli on 1st September, and complete it to Ancona, subject to heavy forfeitures for not doing so, by the end of this year. In consideration of this, a branch of 30 or 40 miles, from near Imola or Faenza to the port of Ravenna, has been granted to them on favorable terms. Under the previous contract, made five years ago by the Papal Government with Mires, there would have been no railway to Ancona earlier than 1866, ten years being allowed him for that work. Then comes, following the coast line southwards, the proposed railway from Ancona to the Neapolitan boundary at Tronto, undertaken by Messrs. Wander Elst, brothers, of Belgium, jointly with M. Sacerdote, and to be finished under penalties, within 18 months. The Leghorn company, owning most of the existing Tuscan lines, have undertaken to make a line from Florence by way of Arezzo and Perugia, to join the projected transverse from Rome to Ancona, thus bringing the heart and middle of Italy—the Arno and Tiber valleys—into communication with either sea. This will be completed about the same time as the line to Ancona. The lines conceded to Messrs. Talabot, Blount, Brassey, and others, are designed to connect Naples with the Adriatic at several points, northwards to the Tronto, eastwards to the rich plains of Apulia and the finest maritime positions of Mediterranean intercourse. These works are concurrent with various measures passed this session for improvement harbors, the better regulation of quarantine, the simplifying of customs tariffs, the reduction of port dues and tolls, the instruction of seamen, and other encouragements, not only to the Italian shipping interest, but to the free navigation of all the Italian waters by foreign vessels, with as much convenience as they can visit the British Isles, of which more will be heard shortly.

"Other provinces have not been quite neglected. Besides the second line from Turin to the Gulf of Genoa, there is one of great strategical value in Lombardy, from Brescia to Pavia by Pizzighettone; there is a short piece to give Milan more direct access to Genoa, and another by Massa or Carrara to join Tuscany with the littoral road ending at the naval arsenal of Spezia."

Railroad Earnings.

The receipts of the Grand Trunk Railway of Canada for the week ending August 17th, 1861,

were	$49,571 96
Corresponding week, 1860	52,395 14
Increase	$2,823 18
Tot. traffic from July 1, 1861, to date	$412,176 18
Corresponding period, 1860	375,109 27
Increase	$37,067 91

Important Patent Decisions.

Two suits in Equity were tried at the United States Circuit Court at Hartford, last September before Judges Nelson and Shipman, in which questions were involved of great interest to makers and users of steam engines. The decision has recently been rendered in each case sustaining the patents under which one suit was brought, and arriving at a reverse result with the other. Both suits were for alleged infringements of recently re issued patents for "cut-off" mechanism. The point of each will be found in the following.

Geo. H. Corliss vs. the Wheeler and Wilson Manufacturing Co.

The defendants were using a steam engine constructed in accordance with the patent of Noble T. Greene, 1855. The plaintiff claimed that this machine infringed four separate patents issued to him for his inventions. Judge Nelson says:

"1. The patent issued to Corliss dated 12th July, 1859, numbered 763, and which is a re-issue, in part of the original patent, dated 10th March, 1849, claims as follows:

'The method substantially as described, of regulating the velocity of steam engines, by combining a regulator with a liberating valve gear.'

We are of opinion the claim covers, not only the specific arrangement and combination described in the specifications, but any arrangement and combination for the purposes mentioned which embody the ideas, principle, and mode of operation of the patentee; and that, within this interpretation of the claim, in connection with the specification, the defendant's machine complained of, infringes the complainant's patent. We are also of opinion that the arrangement and combination were new and patentable.

2. The patent issued to Corliss dated 12th July, 1859, numbered 759, and which is also a re-issue, in part, of the original patent of 10th March, 1849, claims as follows:

'The combination of liberating valve gear with valves which are moved parallel to their seats, and continue their closing motion after their ports are closed, and commence their opening motion before their ports open.'

Another patent issued to Corliss, dated same time, numbered 760, and which was also a re issue, in part, of the patent of 10th March aforesaid, claims as follows:

'The combination, substantially as described, of an air cushion with the liberating valve gear of steam engines."

We are of opinion that both the above improvements are new and patentable, and that the defendant's machine infringes the patents.

3. The patent issued to Corliss 26th July, 1859, numbered 780, and which is a re-issue of the original patent of July 29, 1851, claims as follows:

'(1.) Combining with the rocking levers or their equivalents, for operating the valves, the shoulders on the spring bars or their equivalents, substantially as described and for the purpose specified. (2.) And I also claim, in combination with the shoulders on the spring bars that operate the rocking levers, substantially as described, the employment of the gauge bars or an equivalent therefor, to regulate the periods of closing the valves, whether the said gauge bars be regulated by a governor or by other means as set forth.'

We are of opinion the above improvement is new and patentable, and that the defendant's machine infringes the patent."

Frederick E. Sickles vs. the Falls Company.

Defendants were using an engine made by the Corliss Steam Engine Co., who defended the case. Judge Nelson in giving judgment for defendant says:

"This is a patent to F. E. Sickles, dated Sept. 19, 1845, extended for seven years from Sept. 19. 1859, and re-issued February 21, 1860, and is for an improvement in steam engines. The patentee, after describing the nature of his improvement, and the machinery for effecting it, claims as follows:

'Imparting a co-existing movement to two reciprocating catch pieces in the operation of the trip cut-off valves.'

The claim, in terms, is for an effect, or function, and therefore not patentable. But without placing the case upon this strict ground, the unanswerable objection to the plaintiff's recovery is, that the improvement is substantially described, and claimed in a patent to him dated 19th Oct., 1844. This is a bar to the subsequent patent.

Another difficulty in the case. The patentee admits he invented the improvement early in 1844. It was not embodied in the original patent of 1845, the one in question, nor noticed therein, until the re-issue February 21, 1860, more than fourteen years after the invention.

We think the defendant entitled to the judgment."

(Signed.) S. NELSON.

East Brandywine and Waynesburg R. R.

The East Brandywine and Waynesburg Railroad, extending from Downingtown, Chester county, 33 miles west of Philadelphia, to Waynesburg in the same county, a distance of 17½ miles, was opened on the 15th instant. It was built under a charter granted by the Legislature in 1860, authorizing a railroad to be built to connect Wilmington, Delaware, via the valley of the Brandywine with Waynesburg, with the right to extend it to intersect the Reading and Columbia Railroad or the Lebanon Valley Railroad; also the right to connect with the Pennsylvania Railroad.

In the same act the Pennsylvania Railroad was authorized to aid the said East Brandywine and Waynesburg Railroad Company, either by subscription to its stock or the endorsement of its bonds, and to lease and operate the road upon such terms as may be agreed upon between the companies.

The surveys for that portion of the road just completed were made by O. W. Barnes, Esq., (well known as a civil engineer and railroad man,) in 1859, and work was commenced in Aug., 1860. The estimated cost was $207,000, exclusive of right of way and station-houses. It has been completed for this estimate by means derived from stock subscriptions to the amount of $95,000, and an issue of $140,000 first mortgage bonds, which were indorsed by the Pennsylvania Railroad Company, with an agreement to receive them at par in payment of charges for transportation on passengers and freight going to and coming from the said East Brandywine and Waynesburg Railroad over any part of the Pennsylvania Railroad. These bonds were disposed of so as to net the sum of $112,000, which, with the $95,000 of stock subscription, makes up the sum of $207,000 above stated.

The line of the road follows the windings of the Brandywine with easy grades and curvatures, such as are used on the main line of the Pennsylvania Railroad.

The track is laid with a substantial 45 lb. T rail, made by Maltby & Case, of Columbia, Pa. There are two Howe-Truss bridges over the stream, one of 65 ft. and the other of 100 ft. span.

The country traversed by the road is thickly settled by an enterprising and prosperous people, and several iron forges, mills, and manufacturing establishments are located aloug the stream.

There are inexhaustable beds of very rich iron ore at the upper part of the line, which will be shipped by this road, and the Chester Valley road, to the furnaces on the Schuylkill, and by the Pennsylvania Railroad to various points west of Downingtown.

The road has being doing a good business since the opening. The cost of the road having been so moderate, only $11,800 per mile, it will, in all probability, pay satisfactory dividends.

Two trains per day are now being run up and down the road, the cars and engines being furnished by the Pennsylvania Railroad Co., to whom the road is to be leased for a term of years.—*U. S. Railroad and Mining Register.*

PASCAL IRON WORKS,

ESTABLISHED 1821.

MORRIS, TASKER & CO.,

MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.

Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches, etc., for same.

Gas Works Castings, etc., etc.

PHILADELPHIA.

STEPHEN MORRIS, ILY G. MORRIS, CHAS. WHEELER, THOS. T. TASKER, JR., STEPHEN P. M. TASKER.

PROSSER'S PATENT
LAP-WELDED IRON BOILER TUBES.
TUBULAR BOILER MAKERS
AND
ENGINEERS' TOOLS.

Tubes for Artesian Wells, conveying Steam or Water, Shafting, etc., screwed or coupled together, in various ways.

KRUPP'S BEST CAST STEEL.

PARIS'S PATENT GLASS ENAMELLED IRON TUBES, FOR WATER, ACIDS, ETC.

PATENT LAP-WELDED STEEL TUBES.

THOMAS PROSSER & SON,
28 Platt St., New York.

NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, ALBANY, Aug. 8, 1861.

SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend of Three Per Cent. on the Capital Stock thereof, payable on the Twentieth day of August instant, upon Stock registered at New York, Boston, or Albany, and on the Twentieth day of September next, upon Stock registered at London. Stockholders whose Stock is registered at New York will receive their Dividends at the office of DUNCAN, SHERMAN & CO.; those whose Stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose Stock is registered at Albany, at the ALBANY CITY BANK; those whose Stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The Transfer Books which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Friday, the Twenty-third day of August instant. JOHN V. L. PRUYN,

33 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Erie Railway.

We give below an abstract of the operations of this road from the opening of the first section to the present time. No general statement was published in 1860; nor since the organization of the new company. Its capital account will be substantially as follows: mortgage bonds, $20,000,000; preferred shares, $8,000,000; ordinary shares, $11,000,000. Unsecured bonds to the amount of $90,000, and shares to the amount of $300,000 have not been presented for exchange, and are barred, unless the Legislature, by a new act, interposes in favor of their holders.

The earnings of the road for the first ten months of the present fiscal year, compared with a similar period for 1860, have been as follows:

	1860-'61.	1859-'60.
October	$587,242	$473,774
November	561,448	499,426
December	412,722	409,131
January	407,949	336,390
February	391,100	303,279
March	454,237	426,470
April	544,511	462,815
May	507,480	419,991
June	429,757	401,560
July	377,907	371,256

The following is an abstract of general balance sheet for several years:

	1856.	1856.	1857.	1858.	1859.

Shipment of Iron from England to India.

The activity which prevailed last year in various branches of the iron trade is to some extent explained by the immense shipments made of *materiel* to India, on account of the vast railway works now in progress. It appears from an official return that last year no less than 234,710 tons of materials were despatched to India, of the collective value of 2,140,703*l.*, being the largest consignment made in any one year since the works were commenced. The proportion of *materiel* taken by each company was as follows, omitting fractions:—East Indian, 56,448 tons, of the value of 580,387*l.*; Madras, 38,348 tons, of the value of 296,842*l.*; Great Indian Peninsula, 25,971 tons of the value of 236,365*l.*; Bombay, Baroda and Central India, 32,981 tons, of the value of 335,668*l.*; Scinde, 2,056 tons, of the value of 26,582*l.*; Punjab, 24,107 tons, of the value of 241,211*l.*; Indus Steam Flotilla, 1,240 tons, of the value of 17,215*l.*; Great Southern of India, 17,139 tons, of the value of 118,574*l.*; Calcutta and South Eastern, 6,088 tons, of the value of 74,174*l.*; Eastern Bengal, 30,333 tons, of the value of 213,686*l.*—*London Railway Times.*

Racine and Mississippi Railroad.

The extension of this road is being pushed on with the utmost vigor, most of the track being ready for the iron. Schooners laden with ties and iron for the track are unloading at the wharf every day.—*Racine Journal.*

Cleveland, Columbus and Cincinnati R. R.

This Company was incorporated under a charter granted by the Legislature of Ohio in 1846. The work of constructing the road was commenced in the summer of 1848, and the whole line between Cleveland and Columbus, (which had been completed and opened by sections) was formally opened to the public on the 18th February, 1851. The Delaware curves, connecting the main line with the Springfield, Mount Vernon and Pittsburg Railroad were constructed in 1853, and 29 miles of second track, viz.: 25 miles between Cleveland and Grafton, and 4 miles between Galion and Crestline in the following year. In 1855, the second track was completed northward to Greenwich 11 miles from Crestline and has since been laid between Greenwich and Grafton—making a total of second track now completed measuring about 80 miles, leaving only about 55 miles of track yet to be duplicated. The road has also about 20 miles of sidings and turnouts.

This great and prosperous road forms a part of the trunk line between Buffalo and Cincinnati

and has connections under contract with the Columbus and Xenia, the Little Miami, the Bellefontaine and Indiana, the Cleveland and Toledo, the Columbus, Piqua and Indiana, and the Cleveland, Painesville and Ashtabula railroad companies.

The "Columbus and Xenia" and the "Little Miami" railroads continue the line of this company from Columbus to Cincinnati, a distance of 120 miles. The existing contract between the two companies is dated 1st July, 1853, and provides for a thorough business, etc.

The "Cleveland, Painesville and Ashtabula" Railroad continues the line eastward from Cleveland to Erie. The first contract with this company went into effect on the first December, 1852, and provided for operating the two roads under one superintendent and with equipment owned conjointly—the running expenses to be defrayed out of the joint earnings and the net profits divided in the ratio of the length of the roads respectively. This arrangement was terminated on the 1st April, 1855, and in place thereof arrangements were made forming a connecting line of the two roads whereby the cars of either could pass over the road of the other company.

The "Cleveland and Toledo" Railroad leaves the line at Grafton and extends hence to Toledo. The contract with this company was made in July, 1856, and is to continue in force for 20 years. It secures the use in common by the two companies of the track between Grafton and Cleveland, the C. & T. Company to pay therefore $66,000 per annum and its equitable portion of all expenses for repairs of track, buildings, etc.

The "Bellefontaine and Indiana" Railroad leaves the line at Gallion and extends to Union City. Under the contract with this company a large amount of the bonds of the B. & Ind. Company were endorsed by the C. C. & C. Company, which during the year 1860 were taken up and exchanged for the 1st mortgage bonds of the C. C. & C. Company.

A similar endorsement was also made on a large amount of the bonds of the "Columbus, Piqua and Indiana" Railroad which are now undergoing the same process of liquidation.

The company has also a contract with the "Springfield, Mt. Vernon and Pittsburg" Railroad Company.

For the details of the financial condition of the Cleveland, Columbus and Cincinnati Company on the 1st January, 1861, the reader is referred to the report inserted in the Railroad Journal No. 19, published on the 11th May last.

Share Capital—Authorized, $6,000,000.
Paid in, $4,746,200.

Funded Debt—$509,000: described as follows—

1st Mortgage 7 per cent. coupon bonds, $509,000—issued 1st July, 1860, and payable principal in yearly instalments of $25,000 after 1864, and coupons semi-annually 1st January and 1st July in the city of New York. These bonds of which $1,000,000 may be issued, were made for the purchase of the endorsed bonds of the Col., Piqua and Indiana and the Bellefontaine and Indiana bonds endorsed by the C. C. & C. Company.

Floating Debt—None.

Cost of Road and Equipment—$4,643,611. No detail.

* 13 months.

The length of the road and branch line is as follows:

	Miles.
Cleveland to Columbus	135.39
Second track, 80 miles. Sidings, etc., 20 miles.	
Branch line: Delaware curves	5.77
Total length of road owned by the Co. ..	141.16

The equipment of the road consists of 22 locomotive engines, 31 passenger cars, 297 house freight cars, 93 stock cars, 74 platform cars;—total, 495 cars.

The office of the company is at Cleveland, Cuyahoga County, Ohio. The officers and directors are as follows:

President—LEANDER M. HUBBY, Cleveland, O.

Directors—John M. Woolsey, New Haven, Ct.; David Dows, New York City; Erastus S. Prosser, Buffalo, N. Y.; Hosea Williams, Delaware, O.; John Miller, Columbus, O.; Amasa Stone, Stillman Witt, Samuel Williamson, Martin B. Scott, Joseph Perkins, Cleveland, O.

Secretary—GEORGE H. RUSSELL, Cleveland, O.
Treasurer—T. P. HANDY, "
Chief Engineer—P. KIDDER. "
Superintendent—E. S. FLINT.

Toledo and Wabash Railroad.

The receipts for the past six days amount to 166,500 bushels wheat and 147,140 bushels corn. Allowing 350 bushels of the former and 400 bushels of the latter to each car, we have an aggregate of 305 cars of wheat and 363 cars of corn. In addition to this is the rolling freight, in which a fair business is done. Of flour, this road has brought in 6,450 barrels—reduced to wheat 32,250 bushels or ninety-two car loads. This added to the above receipts would make 397 cars of wheat; other grains received 1,765 bushels. The business of this road, we think, will compare favorably with that of any line in the West, and our readers will readily believe the statement that this is but the beginning of greater business. The facilities of the Wabash Railway at Toledo for the storage of grain are unsurpassed by any in the West, due attention having been paid to the rapidity in removing the grain from the cars to the elevators, and thence to the boats. In addition to the new one recently erected by King Brothers, we notice that piles have been driven upon which to build another grain elevator of about the same capacity of those now used, and this latter will be erected at an early day, so that our friends in the Wabash valley or anywhere at the West need have no fears but that this road will at all times have sufficient accommodations for the grain, shipped over the line. This railway had a hard struggle through the financial depression of 1857–58, but the energy of those engaged was equal to the task before them, and the managers felt confident of a triumph ultimately. That end is now being attained, and we refer to the business of the road with pleasnre as confirming the statement repeatedly made by us, that the Wabash Railway would become one of the most important and best paying roads in the country.—*Toledo Blade.*

Journal of Railroad Law.

LIABILITY OF CORPORATIONS UPON CONTRACTS MADE IN EXCESS OF THEIR POWEES. THE WANT OF AUTHORITY TO ENTER INTO A CONTRACT WILL NOT RELIEVE A COMPANY FROM OBLIGATIONS UNDER IT, WHEN ACTUALLY ENTERED INTO.

Corporations are fictitious persons, clothed with an identity and possessing particular powers and privileges conferred by the statute of the State under which they are organized. Their nature depends upon the purposes of their organization, yet in law their personality is the same. They are all alike incapable of doing a purely criminal act, although they may be compelled to pay damages for injuries occasioned by them while engaged in their legitimate business, or, in some instance, when going beyond their just powers, and innocent parties have thus been injured. The case of Bissell *vs.* the Michigan Southern and Northern Indiana Railroad Company recently decided by the court of last resort in the State of New York, illustrates this truth. The court holds that corporations like natural persons, have the power, *in fact* to do wrong. They may in their contracts and dealings break over the restraints imposed upon them by their charters; and, when they do so, their exemption from liability cannot be claimed on the mere ground that they have no attributes or faculties which render it possible for them thus to act. Therefore, where two corporations, chartered respectively by the States of Michigan and Indiana, with power to each to build and operate a railroad within its own State, have united in the business of transporting passengers over a third road in the State of Illinois, beyond the limits authorized by the charter of either, such corporations are jointly liable for injuries to passengers resulting from the negligence of their employees.

It appears that the Michigan Southern Railroad Company was chartered by the State of Michigan to build and operate a railroad through the southern part of Michigan; and the Northern Indiana Railroad Company was chartered by the State of Indiana to build and operate a railroad through the northern part of the State of Indiana. The Southern Michigan Railroad Company built the railroad through the State of Indiana; and also in conjunction with another company built the railroad from the northern part of the State of Indiana through a part of the State of Illinois to Chicago. Previous to the 25th of April 1853, the Southern Michigan Railroad Company formed a business connection under the name of the Michigan Southern and Northern Indiana Railroad Companies, and on or about the 25th of April,

1853, ran their cars carrying passengers and freight from Lake Erie to Chicago and the intermediate places, and from Chicago to Lake Erie and the intermediate places, through the States of Ohio, Michigan, Indiana and Illinois. The cars and other property connected with these roads were used by the Michigan Southern and the Northern Indiana companies jointly, and each shared in the profit and losses. The business of the companies was carried on and transacted under their joint name, and the companies were practically consolidated into one. On the 25th of April, 1853, and while the defendants were jointly operating these roads, the defendants took into a train of their cars near Chicago the plaintiff and his baggage, as a passenger to Toledo; the plaintiff paying the customary fare. While the plaintiff was on the defendants' cars, and while being conveyed eastward, in the State of Illinois, the defendants' cars were run carelessly, at a hazardous speed at the crossing of the Illinois Central Railroad, and the road occupied and run by the defendants; by this means the cars came in collision with a train running on the Illinois Central Railroad across the road owned and occupied by the defendants, and the car which the plaintiff occupied was broken to pieces, and the plaintiff injured in person and property.

The case was tried before referees who reported in the plaintiff's favor for $2,500, for which judgment was entered; and the judgment having been affirmed at general term in the sixth district, the defendants appealed to this court. It would be impossible for us to give the entire opinions of the judges, or of any one of them, on account of their length. We, therefore, give the portion, embodying the decision of the able and exceedingly interesting opinion of JUSTICE COMSTOCK.

COMSTOCK, J.—Assuming the truth of this statement there is no doubt of the plaintiff's right to recover. But the defendants deny the legal truth of these facts, because one of the companies was chartered by the Legislature of Michigan, with power to build a road in that State, and the other by the Legislature of Indiana, with the power to build one in that State. They both insist that they had no right or power under their respective charters to consolidate their business in the manner stated, and especially that they could not legally, either separately or jointly, acquire the possession and use of a connecting road in the State of Illinois, and undertake to carry passengers or freight over the same. They do not deny that their boards of directors and agents duly authorized to wield all the powers which the corporations themselves possessed, entered into the arrangements which have been mentioned; nor that in the execution of those arrangements, they made the contract with the plaintiff to carry him as a passenger; nor do they deny that they received the benefit of that contract in the customary fare which he paid. Their defence is simply and purely, that they transcended their own powers and violated their own organic laws. On this ground they insist that their business was not, in judgment of law consolidated; that they did not use and operate a road in Illinois; that they did not undertake to carry the plaintiff over it; and did not by their negligence cause the injury of which he complains; but that all these acts and proceedings were, in legal contemplation, the acts and proceedings of the natural persons who were actually engaged in promoting the same. * * * *

The doctrine has certainly been asserted on some occasions, that in all cases where the contracts and dealings of a corporation are claimed to be invalid for want of power to enter into the same, a comparison must be instituted between these contracts and dealings and the charter, and if the charter does not appear to embrace them, then that they must be adjudged void to all intents and purposes, and in all conceivable circumstances. The reasoning upon which this doctrine has been usually claimed to rest, denies, in effect, that corporations can, or ever do exceed their powers. They are said to be artificial beings, having certain faculties given to them by law, which faculties are limited to the precise purpose and objects of their creation, and can no more be exerted outside of those purposes and objects than the faculties of an actual person can be exerted in the performance of acts which are not within human power. In this view these artificial existences are cast in so perfect a mould that transgression and wrong become impossible. The acts and dealings of a corporation, done and transacted in its name and behalf by its board of directors, vested with all its powers, are, unless justified by its charter, according to this reasoning, the acts and dealings of the individuals engaged in them, and for which they alone are responsible. But such, I apprehend, is not the nature of these bodies. Like natural persons they can overleap the legal and moral restraints imposed upon them; in other words they are capable of doing wrong. To say that a corporation has no right to do unauthorized acts, is only to put forth a very plain truism: but to say that such bodies have no power or capacity to err is to impute to them an excellence which does not belong to any created existences with which we are acquainted. The distinction between power and right is no more to be lost sight of in respect to artificial than in respect to natural persons. * * * * *

But I have no hesitation in affirming the judgment of the Court below upon the principles of contract, and of duty resulting therefrom. That the entire course of business in which the defendants were engaged could not be justified by their charters, I am not prepared to deny. Each of them was chartered to build a railroad, the termini of which were specified. They built the roads and then consolidated their business. The common interest might thus be promoted; but it is difficult to affirm that the charter of either authorized its capital to be thus blended with that of the other. It is equally difficult to hold that they had any rightful authority to construct or lease another road in continuation of the line. But these things were actually done, and they were done openly and publicly. If these acts were an abuse of power, the shareholders had ample opportunity to prevent or arrest the abuse. But no complaint from them has ever been heard, and their acquiescence must be presumed. If State sovereignties were wronged by the course of dealing pursued, no interference or complaint has come from that quarter. Conceding, then, that the defendants might change the attitude in which they stood towards the public, and return at any time to the sphere of legitimate duty, they could not revoke past contracts, the consideration of which they had received, and upon the performance of which they had entered. They were bound to pay their servants and laborers, and they were liable for the careful transportation of freight committed to their charge. They could not invite a traveler into their cars, and, after injuring him by their negligence, reject the responsibilities of their contract. A traveler from New York to the Mississippi can hardly be required to furnish himself with the charters of all the railroads on his route, or to study a treatise on the law of corporations. The present case in short, plainly falls within the principles of corporate liability herein asserted, and the defendants must respond to that liability. The judgment should be affirmed.

The Cincinnati and Chicago Air Line via Indianapolis.

Leaving Indianapolis at 11 o'clock, the passenger for Chicago over the newly opened route gets aboard the train on the Peru and Indianapolis railroad and goes to Kokomo, some 55 miles, and changes cars—taking a train on the Cincinnati and Chicago Air Line for Chicago, distant from Kokomo 129 miles, making the distance by this route to Chicago from Indianapolis 182 miles. The Peru and Indianapolis Railroad forms an important connection with this new route to the Northwest, and by its connections at Indianapolis for Cincinnati and Louisville, offers to the traveling public one of the very best routes from the Southeast for the Northwest. The travel on this road is quite satisfactory.

It is much better than could be expected for this dull season of the year. The local patronage is as heavy perhaps, as that given any railroad centering at this city. The track is in a fair condition, the bridges safe, and the management unexceptional. Mr. Macy President of the road, announces his intention to fence the entire line. This will render the running of trains perfectly safe from the accidents caused by stock getting on the track. The expenditure required for fencing the track will be returned to the road in a short time in the decreased bills of repairs for cars and machinery.

As we have before remarked, the Peru and Indianapolis Railroad runs through the best timbered region of Indiana. The productions of the forest, going to or returning from the numerous saw mills on the line, afford the road a large local income. The lumber and saw log business of the road is immense—checked somewhat, however, by the stagnation of business throughout the country.

The Cincinnati and Chicago Air Line road is really a continuation of the Hamilton and Eaton Railroad—the Cincinnati, Hamilton and Dayton forming the line from Hamilton to Cincinnati. It crosses the Indiana Central at Richmond, the Bellefontaine at Anderson, the Peru and Indianapolis at Kokomo, the Wabash Valley at Logansport, the New Albany and Chicago at La Crosse, and connects by the use of the same track, with the Pittsburg, Fort Wayne and Chicago at Valparaiso. Kokomo is 153 miles from Cincinnati and 127 from Chicago. By way of Indinapolis, Cincinnati is 9 miles further from Kokomo than by way of Richmond, but the time is less and the route more attractive.

Leaving Kokomo on the Air Line Railroad, Logansport is reached is 23 miles. The country between these two points is very much like it was about Tipton and Kokomo some ten or twelve years ago, not much improved. It is heavily timbered, and capable of a development. Logansport now enjoys the advantage of three railroads running in five directions from the city: the Cincinnati and Chicago, the Wabash Valley, and the Logansport and Burlington—the later having its eastern terminus here.—*Indianapolis Journal.*

☞ The extension of the Androscoggin Railroad to Lewisburg will soon be completed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* —) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, September 7, 1861.

Share and Money Market.

The market the past week has been a buoyant one, with a decided advance in nearly the whole list. The capture of Fort Hatteras which is a very important military success, the growing strength and preparations of government, and the complete success of the government loan, have all had there effect in inspiring confidence. Business also begins to show signs of increasing, and an altogether better feeling prevails. The most marked advance in shares, is in Galena and Chicago, which has improved some 3 per cent., there has also been a decided recovery in Missouri 6s. All classes of United States securities are very strong with a very active demand and an upward tendency. Money is more active, but there is not yet much change in rates. Railroads continue to do a very heavy business in produce, but receipts from passengers and from general merchandise are still light.

The annexed statement gives the export of breadstuffs from the United States to Great Britain and Ireland, for the year ending 1st inst., comparing the aggregate with the totals of previous years:

	Flour. bbls.	Wheat. bush.	Corn. bush.

Great Western, Ills., Railroad.

The earnings of this road for the year ending March 31, 1861, were:

From passengers		$209,484 72
" freight		239,725 97
" mails and express		26,415 24
" rent of cars, etc.		10,317 52
		$485,943 45
And the expenses were:		
Repairs of road	$71,699 61	
" bridges	2,151 12	
" engines	24,899 32	
" cars	20,220 49	
" buildings	8,304 78	
Fuel	37,113 48	
Oil and waste	5,100 93	
Taxes	12,618 90	
Pay of train hands	32,541 39	
Station expenses	26,727 85	
Salaries and general expenses	14,424 93	
All other expenses	48,611 69	
		304,414 49
Net earnings		$181,528 96
Expended for construction		18,693 83
Balance		$162,835 13

The ratio of operating expenses, including taxes, to earnings was 62.64 per cent.—exclusive of taxes, 60 per cent.

The increase in gross earnings over those of the previous year was $52,576 98

Decrease in expenses 5,882 57

Increase in net earnings $58,459 55

The outstanding bonds of the company are $1,041,000 ten per cents, and $1,350,000 seven per cents, making a total of $2,391,000. There is also due for unpaid interest 97,250, the payment of which, by agreement, has been postponed, on an average, for 5 years from Oct. 1, 1860. No general statement or income account is given.

Galena and Chicago Railroad Company.

This company, having first mortgage bonds to the amount of $262,000 falling due on the 1st of February next, propose to offer to the holders desiring to extend the same, new sheets of coupons covering a period of 20 years, the payment of the bonds to be extended for the same period. Responsible parties in this city offer to take the extended bonds at *par*, and pay off the old as they fall due. These, for some time past, have been selling very nearly at par, and the extended ones would probably command a higher price, so that the adjustment of the former will cause no embarrassment whatever to the company, nor divert any portion of earnings belonging to the dividend fund. To meet the extended bonds, the company have established a sinking fund, as well as for the second mortgage bonds, which will retire them at their maturity. The amount and operation

of this fund is set out in detail in the subjoined statement, taken from the weekly American Circular of Messrs. Samuel Hallett & Co., of 3rd inst.:

YEAR.	FIRST MORTGAGE. DEBT.	Sink. Fund Pay'ts. February.	Sink. Fund Pay'ts. August.	Coupon Pay'ts. Feb'y.	Coupon Pay'ts. August.

The maximum charge upon net earnings for interest and sinking funds will be $349,215, which will be diminished each year, till both mortgages are paid. The sinking fund applicable to the second mortgage was created when the bonds were issued.

We gave in the JOURNAL of July 27th, a historical sketch of this road from the opening of the first section, in 1849, to the close of its last fiscal year, December 31, 1860—comprising the length of each section, and the date of its opening; a description of the funded debt of the company; abstract of income account; cost; milcage; earnings, expenses and net income; dividends declared and amount; the amount of freight and number of passengers transported, etc., etc. The dividends declared during these twelve years have amounted to 149 per cent., or an average of 12½ per cent. for each year since the opening of the first division in June, 1849. The amount disbursed in dividends during that time has been $4,109,270, or an average of $342,439 per annum. The average mileage has been 183.15; the average cost $5,856,050. The gross earnings have been $14,919,469, an average of $1,159,956; the aggregate expenses $7,229,193, an average of $602,433; and the earnings less expenses, $6,690,276, or an average of $557,523. The milcage in 1860, was 261. The gross earnings were $1,462,752; operating expenses, $810,491; net earnings, $652,261. Cost of road, $9,352,481.

Welland (Canada) Railway.

At the adjourned annual meeting of this company held in London July 4th, the report of the directors was presented, which stated that authority was taken at the last general meeting held June 19th, for the issue of £50,000 second mortgage bonds at the rate of 80 per cent., payable by four instalments ending in July, 1862. The whole of these bonds have either been taken up or have been subscribed for on behalf of creditors of the company, and a sum of £16,734 has been paid into the bankers' on their account. The Directors have taken the necessary measures for placing the rolling stock in trust for the holders of these bonds, and have also brought a bill into the Canadian Legislature for the purpose of effecting this and other objects authorized at the last meeting. The Directors regretted to say that they were still unable to lay before the Proprietors such a balance sheet of the affairs of the company in Canada as they could have wished owing to the want of detailed information for which they had repeatedly applied, but had not obtained. The business of the railway during the winter has exceeded what the promoters of the line had at any time led the company to expect, but owing to the unusual prolongation of the winter season the through traffic did not commence until the beginning of May. The traffic returns from December 31 to May 31 show a total increase of £797 as compared with the corresponding period of the previous year. A powerful locomotive engine and tender was sent to Canada by the board at an expense of £2,860, and it was believed that the engine and tender were now at work on the line.

Chicago and North-Western Railroad.

This road is 213 miles in length, extending from Chicago, Ills., via Crystal Lake, Janesville, Watertown, Fond du Lac and Oshkosh, to Appleton, Wis. At Chicago, its track is connected with that of the Pittsburg, Fort Wayne and Chicago, and other roads leading out of that city; at Crystal Lake with the Elgin and State Line Railroad; at Harvard Junction, with the Kenosha, Rockford and Rock Island Railroad; at Clinton Junction, with the Racine and Mississippi Railroad; at Janesville, and Milton Junction, with the Milwaukee and Prairie du Chein Railroad; at Watertown, with the Milwaukee and Western Railroad; at Minnesota Junction, with the Milwaukee and Minnesota Railroad; at Burnett, with the Milwaukee and Horicon Railroad; at Fond du Lac, Oshkosh and Appleton with steamers for Green Bay, etc.

The income account of this company shows the gross earnings from June 1, 1859 to April 1, 1860, to have been, as follows:

From passengers		$153,167 46
" freight		212,630 44
" express, mails, etc		18,861 25
		$384,659 15

		58,982 11
Balance to credit of income account June 1, 1861		$382,562 75

The aggregate gross earnings for the two years ending June 1, 1861, were $1,250,675 15; the operating expenses, including interest, taxes, etc., $868,112 40-leaving balance as above $382,562 75.

The gross earnings of the road from April 1, 1860, to Jan. 1, 1861, nine months, were $563,809 28. Had the road been fully completed and thoroughly appointed for business, and amply supplied, equipped and furnished, these earnings would have been increased to an amount equal to all the current accruing interest in that time, upon all of the first and second mortgage bonds of the company, over and above ordinary running expenses.

The floating debt of the company Jan. 1, 1861, was $331,491 01, against which it had assets of $196,788 46. The report of the company issued at that date says:

The company will pay interest on the first of February next, on its preferred first mortgage

sinking fund bonds, but not upon its general first mortgage bonds. Its earnings have been equal to the payment of interest on both classes of bonds, but this has been the result of large additions to the rolling stock of the road, without which no such earnings could have been realized, and to pay for which and for other structures and necessary improvements in part, these earnings have been used.

In order to do the business offering, and to earn an amount equal to the payment of interest on our bonds, it was early foreseen that large additions must be made to our stock of engines and cars, and that further buildings, structures and business facilities and accommodations must be provided.

These wants were from time to time, as imperatively demanded, partially supplied, and the further necessities of the company in this direction were laid before the general annual meeting of the stock and bondholders in June last, and before the bondholders' meeting in New York in August last, when still further purchases of equipment were advised and approved of, and were subsequently authorized by the Board of Directors.

The opinion entertained at the bondholders' meeting in New York in August last, when the money market was easy and the future very promising, was, that if the company should need to borrow the larger part of the money necessary to pay interest on its general first mortgage bonds in February, 1861, because of having used its earnings in paying for equipment, &c., it would be easy to do so, and to carry portions of such loan forward to such times as the surplus current earnings beyond the payment of current accruing interest should be equal to the discharge of such loan.

The alarming changes in the political condition and prospects of our country which have since occurred, and the consequent serious derangement of monetary and business affairs, have not only precluded the hope of any such loan, but have made its propriety more than questionable, and have caused demands to be made upon us for the more prompt payment of some of the large claims assumed by this company in its re-organization than was anticipated. The result of all which is to make the payment of interest on general first mortgage bonds, as hoped for at this time, simply impossible.

This company is at this moment suffering a loss of earnings of from ten to twenty thousand dollars per month, because of its inability to receive in store, or hold in deposit, in any way at Chicago, until the opening of navigation, the products which seek to be transported over its road; and the proper, and at the same time profitable remedy for this difficulty, would seem to be a large elevating grain warehouse on the company's own grounds at Chicago. Such a building seems an indispensable necessity; the want of it, for a few months like the present, would subject the company to a loss equal to its cost.

By the statement annexed hereto, it will be seen that since the close of navigation, say 1st December to 12th January inst., the receipts of flour at Chicago, from all roads and sources, amount to 82,322 barrels, and that of this amount the Chicago and Northwestern Railway brought 29,348 barrels, or over one-third of the whole. It will also be seen that the whole amount of wheat received at Chicago, in the same time, is 690,484 bushels, and that of this amount the Chicago and Northwestern Railway brought 204,948 bushels, about 30 per cent. of the whole. With ample and desirable places for storage, it is believed the Chicago and Northwestern Railway would have increased its proportion of the entire wheat receipts, at least, to that of its receipts of flour, probably to a greater per cent.

At a meeting of the bondholders held in this city in July last, it was decided to fund six coupons of the 3d mortgage bonds, including the one due in the month of February previous. These coupons to be funded in income bonds, bearing interest from February next, the average date of the coupons, with a two per cent. sinking fund, and the coupons to remain in the hands of trustees as security. The funding of these coupons will enable the company not only to pay off its floating debt, but to supply also the much needed machinery for its steadily increasing business. On the first of June last, the funded debt of the company amounted to $7,279,000; the unfunded debt to $326,961; capital stock $2,826,736. Of the funded debt $1,250,000 are first mortgage sinking fund bonds, upon which the interest has always been paid.

Railroad Earnings.

The following is an abstract of the report of W. Key, Bond, Receiver of the Cincinnati, Wilmington and Zanesville Railroad, covering the operations of the road for the month of July:

RECEIPTS.		
Passengers, through business.	$117 00	
Passengers, local business	3,281 78	
Mail	831 25	
Express	438 45	
		$4,668 48
Freight, through	155 42	
Freight, local	6,550 98	
		6,706 40
Total earnings		$11,374 88
EXPENSES.		
Total working expenses		$11,334 67
Extraordinary expenses		2,480 17
Total expenses		$13,814 84
Balance on hand July 1		$32,363 75
Received during July		10,075 55
Total		$42,439 30

The following is the twenty-sixth monthly report of H. J. Jewett, Receiver of the Central Ohio Railroad Company, covering the operations of the road for the month of June, 1861:

To balance as per last report		$29,929 39
RECEIPTS.		
From passenger business	$22,268 82	
From freight business	37,261 53	
From express business	954 82	
From mileage on cars	498 82	
From other sources	2,473 83	
		63,457 92
Total		$93,487 31
EARNINGS FOR JUNE.		
From passenger business	$36,214 63	
From express business	1,349 71	
From freight business	26,812 71	
From mail business	2,202 50	
		66,579 55
EXPENSES.		
Working expenses		$34,343 33
Construction		878 01
Total		$35,221 34

The following are the earnings of the Great Western Railway of Canada for the week ending August 23, 1861:

Passengers	$16,649 05
Freight and live stock	14,091 32
Mails and sundries	1,301 22
Total	$32,041 59
Corresponding week of last year	38,454 75
Decrease in 1861	$6,413 16

The earnings of the Hudson River Railroad for

August, 1860, were	$167,219 75
" 1861	135,298 67
Decrease	$31,921 08

Mr. J. W. Alsop, receiver of the Ohio and Mississippi Railroad, furnishes the following statement of the operations of the road for the month of June:

Balance from May account		$20,172 56
RECEIPTS.		
From express freight for May	$1,175 29	
From passengers, prior to June	6,688 70	
From freight, prior to June.	9,521 30	
		17,925 29
From passengers on June account	15,752 80	
From freight on June acc't.	14,168 89	
		29,921 69
From other sources		108 42
Total		$68,127 96
Disbursements		44,713 82
Balance carried to July account		$23,414 07

The traffic of the Great Western Railway of Canada for the week ending August 30, 1861, was as follows:

Passenger	$22,473 72
Freight and live stock	15,583 98
Mails and sundries	1,303 21
Total	$39,365 91
Corresponding week of last year	45,183 08
Decrease	$5,817 17

The National Income of England.

The following abstract of a Parliamentary statement just issued shows the estimated income of the United Kingdom during each of the last thirty three years, from which it appears that although, according to the sanguine views of the various Chancellors of the Exchequer, a deficiency was apprehended only in nine instances, this result actually occurred in fourteen instances:—

Year ending	Estimated. Income.	Estimated. Surplus.	Actual Surplus.
	£	£	£
Jan. 5, 1830	51,347,000	3,013,407	1,711,548
1831	49,950,000	2,137,000	2,913,673
1832	47,250,000	493,479	*698,857

Galena and Chicago Railroad.

Negotiations are in progress among the stock and bondholders of this company for the extension of the first mortgage bonds maturing next year. We learn that the principal holders have signified their willingness to take a new sheet of coupons for twenty years. The plan of the President is to create a sinking fund and interest account on a sliding scale, which shall be sufficient to extinguish the entire debt of the company in 20 years. According to the Schedule, the total charge in 1862 for the sinking fund and interest will be $349,215, and gradually reducing each year, the last payment of $117,000 in February, 1882, wipes out the entire bonded debt of the company. The opinion of the oldest directors of the company is, that $800,000 is sufficient to constantly keep the line in good order, and it is upon this calculation that the plan is drawn up, which, in a word, contemplates the entire adjustment of the bonded debt and its extinction in twenty years, and at the same time admitting of a fair division of profits to the stockholders. The bonded debt, which commands nearly par in the market, is as follows:

First mort. bonds, payable Feb. 1, 1862.	$262,000
" " " Aug. 1, 1862.	160,000
" " " Feb. 1, 1863.	60,000
" " " Aug. 1, 1863.	1,511,000
Total	$1,993,000
Second mortgage bonds, (originally two millions,) due May 1, 1875, which will all be retired by the operation of the existing sinking fund by the time they mature	$1,465,000
	$3,458,000

The annual sinking fund of the second mortgage is fixed at $109,000.

Interest and Dividends.

The past due coupons of the 1st mortgage bonds of the Buffalo, New York and Erie Railroad will be paid on presentation at the Bank of Commerce.

Pittsburg, Fort Wayne and Chicago R. R.

This company is a consolidation of three companies, viz: the Ohio and Pennsylvania, the Ohio and Indiana, and the Fort Wayne and Chicago.

The Ohio and Pennsylvania Railroad Company was chartered in Ohio on the 24th of Feb., 1848; and in Pennsylvania on the 11th of April following. The company was organized May 17th, 1848, and the construction of the road commenced July 4, 1849. It was completed in sections as follows: from Pittsburg to Rochester, 25 miles, July 30th; to Clark's Summit, 36 miles, Oct. 22d; to Enon Valley, 44 miles, Nov. 19th; and to Palestine, 49 miles, Dec. 8th, 1851; to Columbiana, 59 miles, Jan. 3d; to Alliance, 82 miles, Jan. 6th; to Massillon, 108 miles, March 11th; and to Wooster, 134 miles, August 10th, 1852; to Mansfield, 174 miles, April 8th; and to Crestline, 187 miles, April 11th, 1853. The length of the line in Pennsylvania is 49 miles, and in Ohio, 138 miles. The charter authorized the construction of a road to the Indiana State line, but the company determined to stop at this point, and the remainder of the road in Ohio was built by the Ohio and Indiana Company.

The Ohio and Indiana Railroad Company was chartered in Ohio on the 20th of March, 1850, and in Indiana on the 15th of January, 1851. The company was organized on the 4th of July following. The road was put under contract Jan. 28th, 1852. Construction was commenced in the spring of the same year, and the road completed in 1854, by sections as follows: from Crestline to Forest, 41 miles, Jan. 18; to Delphos, 86 miles, June 10; and to Fort Wayne, 131 miles, Nov. 1st. The length of the line in Ohio is 112 miles, and in Indiana, 19 miles.

The Fort Wayne and Chicago Railroad Company was chartered in Illinois on the 5th of Feb., and in Indiana on the 8th of April, 1853. Construction was commenced in the summer of the same year, and the section from Fort Wayne to Columbia, Ind., 20 miles, opened for business Jan. 23, 1855. The work beyond Plymouth had been suspended since July 1, 1854, and only that portion between Columbia and Plymouth was being prosecuted.

The consolidation of these companies was authorized by the Legislatures of the four States which the road traverses, viz: of Pennsylvania, April 16, 1856; of Ohio and Indiana by general law; and of Illinois Feb. 28, 1856. The articles of consolidation, dated May 6, 1856, were agreed to by the Ohio and Pennsylvania Company, July 2; by the Ohio and Indiana Company, June 24; and by the Fort Wayne and Chicago Railroad Company, June 12, 1856. The consolidation of these companies under the name of the Pittsburg, Fort Wayne and Chicago Railroad Company was consummated August 1st, 1856. At that period the road was in operation from Pittsburg, Pa., to Columbia, Ind., 338 miles. It was opened to Plymouth, Nov. 10, 1856; to Rock Junction, Nov. 9, 1858; and to Chicago, Jan. 1, 1859. On the 22d of Sept., 1857, the bridge over the Alleghany river was completed, and trains for the first time entered the city of Pittsburg, the eastern terminus of the road having previously been in Alleghany City.

In 1860, the board purchased in Chicago, for a passenger station, two entire blocks of ground, 852 by 255 feet, at a cost of $333,485, payable on the 1st day of May, 1865, interest at six per cent. per annum, payable semi-annually. In the month of December, the track of the road was extended not only to these grounds, but, in conjunction with the Northwestern Railroad Company, was carried north through the city to the station of that company, and also to connect with the tracks of the Chicago and Milwaukee and the Galena and Chicago Union railroads. This extension connects the track of this road with the track of every road running north and west from Chicago, and has been the cause of bringing to the road, ever since, a large trade not previously enjoyed.

In 1857, the company failed to pay the coupons due on the 1st of October, and in November following suspended payment on its floating debt. To relieve the company from embarrassment, and to allow the earnings to be applied to the discharge of current liabilities, the bondholders consented to fund the coupons falling due to April, 1859, into 10 per cent. bonds due in five years from April 1, 1858. This plan was only partially carried out, and default was again made in the interest falling due on the 1st of July, 1859, in consequence of which the road was placed in charge of a receiver, excepting that portion lying in the State of Pennsylvania, which had previously been placed in the hands of a sequestrator on the suit of local creditors. To relieve the company of its embarrassments, a plan for the adjustment of its liabilities and the re-organization of the company was agreed upon on the 22d of October, 1860, by a committee of stockholders and bondholders, of which the following is a synopsis:

The road to be sold under process for foreclosure to the following parties, viz.: J. F. D. Lanier, L. H. Meyer, S. J. Tilden, Samuel Hanna, and J. Edgar Thomson, and a new company organized by which new classes of bonds and stock for the benefit of the holders of bonds and shares in the old companies, are to be issued as follows:

1st Mortgage bonds $5,250,000, being a first lien on the entire line and equipments of the company, to bear interest after the first of January, 1862, payable semi-annually in six classes; the interest on one class to fall due on the 1st of each month; the principal to be redeemable July 1st 1911, or at the option of the company after the first day of July, 1866. This class of bonds may, at the option of the holders, be converted into 6 per cent. bonds, irredeemable except by the operation of a sinking fund of one per cent. annually, till $2,500,000 shall be redeemed. The holders of the bonds are to be entitled to vote at the meetings of the stockholders at the rate of one vote for two hundred dollars of the par amount of said bonds.

2nd Mortgage bonds $5,100,000. These bonds are to bear interest after April 1st, 1862, and contain the same provisions as the 1st mortgage bonds in reference to the rate of interest; to their redemption and conversion into irredeemable bonds, and also in reference to voting at the meeting of the stockholders. A further clause provides that in case of sale of the road under this mortgage, bonds to the amount of $400,000 shall have preference as to payment.

3d mortgage bonds $2,000,000. These bonds entitle the holder to interest at the rate of 7 per cent. after the first day of April, 1862, out of such balance of net earnings as may remain after paying the interest and sinking funds previously provided, and maintaining the road. The holders are entitled to cast one vote for every hundred dollars held by them.

Share capital. The share capital of the new company to be $6,500,000. The dividends in the same to be limited to 6 per cent.: any surplus then remaining to be paid to the sinking fund for the redemption of the first bonds.

To carry out this plan the holders of the 1st mortgage bonds created by the original company are required to assign to certain parties designated by the purchasing committee, their bonds, with the coupon unpaid, whether funded or not, and thereupon to be entitled to the bonds of the new corporation of the same nominal value as the amount surrendered.

The second mortgage bonds and income bonds of the Ohio and Pennsylvania Company; the second and third mortgage bonds of the Ohio and Indiana, and the construction bonds of the Pittsburg, Ft. Wayne and Chicago have the following provisions in their favor—they are to be surrendered in the same manner as the 1st mortgage bonds, with the unpaid interest, and their holders to be entitled to the second mortgage bonds of the new corporation to an equal amount, and for such coupons as matured on, or before Oct. 1st, 1859; to third mortgage bonds for coupons maturing after the date last named, and up to the 1st of April, 1862.

The holders of the *second* mortgage bonds of the Ohio and Indiana Railroad Company are to be entitled to receive for their bonds, that class of the second mortgage bonds having preference of payment as aforesaid, for the reason that the lien created by the two mortgages on this section of the road does not much exceed, per mile, the first mortgage on other portions of it.

The foregoing provision applies only to such bonds as were sold prior to July 1st, 1860.

Real estate bonds.—These classes of bonds is-

sued by the Fort Wayne and Chicago and the Pittsburg, Fort Wayne and Chicago, to be assigned as aforesaid and converted at their par value, and coupons, into third mortgage bonds of the company.

The construction bonds now outstanding as collateral may be used in the adjustment of the floating debt at rates to be first determined by John Ferguson, Esq., and approved by him.

All debts of the company not included in the foregoing classes may be exchanged for an equal amount of 3rd mortgage bonds of the new company. The nature and amount of such debts to be determined by the parties appointed by the purchasing committee.

The stockholders in the old corporation to receive stock in the new, equal in amount to that held by them.

The time for carrying out the above plan to be determined by the purchasing committee, which is to act by the majority, and its action in the premises, upon all questions, to be final and conclusive.

This plan seems to be very generally acceptable to all the parties in interest. To carry it into effect it was very important that appropriate legislation should be had in all the States through which the road passed. This was obtained in Pennsylvania in 1860, and in Ohio, Indiana and Illinois in March last. Uncontrollable circumstances, however, have delayed any action on the premises, but this will doubtlessly be accomplished before the close of the present financial year and the property will then be transferred from the jurisdiction of the United States Circuit Court to the possession of the re-organized company.

The share capital authorized was $1,600,000, of which $6,266,367 12 has been paid in; of this sum $6,206,600 is full paid, and $59,767 12 scrip given for fractional parts of interest and premium.

The funded debt June 30, 1861, was $10,192,-155, described as follows:

1st Mortgage (O. & P. Co.) 7 per cent. coupon bonds $1,000,000—dated July 1, 1850, and payable July 1, 1865; secured on the road between Pittsburg and Massillon.

2d Mortgage (O. & P. Co.) 7 per cent. coupon bonds $750,000—dated Jan. 1, 1851, and payable Jan. 1, 1866; secured on the road between Massillon and Crestline, and on second lien on the road between Pittsburg and Massillon.

Income (O. & P. R. R.) 7 per cent. coupon bonds, $1,988,000—dated April 1, 1853, and payable April 1, 1873.

Alleghany River Bridge (O. & P. Co.) 7 per cent. coupon bonds, $207,000—dated May 1, 1856, and payable, May 1, 1876; secured by mortgage on the bridge.

1st Mortgage (O. & I. Co.) 7 per cent. coupon bonds, $1,000,000—dated Aug. 1, 1852, and payable Feb. 1, 1872; secured on the road between Crestline and Fort Wayne.

2d Mortgage (O. & I. Co.) 7 per cent. coupon bonds, $380,000—dated Oct. 1, 1853, and payable Oct. 1, 1873; secured on the road between Crestline and Fort Wayne.

3d Mortgage (O. & I. Co.) 7 per cent. coupon bonds, $17,000—dated Sept. 1, 1854, and payable Sept. 1, 1860; secured on the road between Crestline and Fort Wayne.

1st Mortgage (F. W. & C. Co.) 7 per cent. coupon bonds $1,250,000—dated July 1, 1853, and payable July 1, 1873; secured on the road between Fort Wayne and Chicago.

Real estate (F. W. & C. Co.) 7 per cent. coupon bonds $498,000—dated Dec. 1, 1856, and payable Dec. 1, 1866.

Construction (P., F. W. & C. Co.) 7 per cent. coupon bonds $2,064,000; Redemption do., $2,000—dated Jan. 1, 1857, and payable Jan. 1, 1887; secured by a mortgage on the whole road. The amount provided is $10,000,000, of which $3,500,-000 are applicable to "construction," and the balance to the "redemption" of outstanding bonds. Both are convertible into stock within 10 years from date.

Real estate (P., F. W. & C. Co.)7 per cent. coupon bonds $98,500—dated Dec. 1, 1856, and payable Dec. 1, 1866.

Sinking fund 10 per cent. coupon bonds $282,-765—dated Jan. 1, 1858, and payable Jan. 1, 1863.

Sinking Fund 10 per cent. coupon bonds $90,-510—dated Feb. 1, 1858, and payable Feb. 1, 1863.

Sinking Fund 10 per cent. coupon bonds $230,-895—dated April 1, 1858, and payable April 1, 1863.

The three last classes of bonds have been issued for coupons surrendered.

Chicago Depot 6 per cent. bonds $333,485—dated May 1, 1860, and payable May 1, 1865.

Scrip convertible into construction bonds at par $1,756.

The Floating debt June 30, 1861, was $1,757,-273 12, as follows:

Bills payable, O. & P. Co	$6,000 00
" O. & I. Co	4,795 00
" Ft. W. & C. Co	3,761 53
" P., Ft. W. & C. Co	336,998 53

" mortgage conv. bonds P., Ft. W. and C. R. R. Co			535,832 61
" real estate			65,100 58
Premium on stock of Ohio and Pennsylvania Company			530,825 95
" Fort Wayne and Chicago Company			71,522 77
Total cost of road June 30, 1861			$16,700,407 25

During the half year ending June 30, 1861, additions have been made to the funded and floating liabilities as follows:

Mortgage and construction bonds, taken by parties holding them as collateral		$286,000 00
Warrants payable, issued for construction claim		16,952 58
Six months' interest unpaid on bonds to June 30		309,439 30
Increase of receiver's current transportation accounts		53,112 34
Gross increase		$665,504 22
Less reduction in:		
Real estate bonds	$4,500 00	
Bills payable Ohio and Indiana Railroad Co	4,000 00	
Bills payable, Fort Wayne and Chicago Railroad	3,005 00	
Bills payable of this Co	169,603 39	
Construction acc'ts payable	1,455 46	
Construction acc'ts payable Pennsylvania R. R. Co.	75,639 89	
Transportation acc'ts pay'e.	8,154 33	
Other accounts	34,422 21	
Receiver's bills payable	14,477 90	
Receiver's construction accounts payable	17,525 57	
		332,785 75
Net inc. in funded and float'g liabilit's.		$332,718 47

This amount is represented in the additional cost of the property and assets of the company, as follows:

Increase of cost of the three original roads, ascertained to June 30, 1861.		$1,090 29
Construction expenditures on the Eastern division for six months		111,555 21
Construction expenditures on the Western division for six months		115,000 74
Increase of discount on bonds		70,752 47
" stock and bonds of other companies		17,808 00
Increase of unapplied materials		95,375 96
" other available assets		4,667 18
" doubtful assets		19,277 06
		$436,426 91
Less value of real estate sold.	$5,000 00	
Less reduction in amount of cash on hand	3,483 82	
Less net surplus for six months end'g June 30, ult.	95,224 62	
		103,703 44
Net increase in property and assets		$332,718 47

The construction expenditures have been mainly on account of the building of the second track from Pittsburg to Sewickley, 12 miles; additions to engine houses, machine shops, and the machinery therein; 8 new locomotives; 152 new freight cars; fencing; the completion of the connection with other roads in Chicago; and the payment of an instalment due for the purchase of the right of way in Alleghany City.

The income account for six months ending June 30, 1861, is as follows:

	Dr.	
Balance December 31, 1860		$310,471 20
Six months' interest on hand		324,121 25
Interest on floating debt		37,910 78
Discount on currency		5,367 61
Taxes		23,430 33
Drawbacks and overcharges		10,519 92
Expenses of receivership		13,423 49
" re-organization		4,221 48
Transportation expenses, viz:		
Conducting transportat'n	$238,497 30	
Motive power	306,961 13	
Maintenance of way	209,535 46	
" cars	86,338 38	
General expenses	20,299 69	
		861,631 96
		$1,591,110 02

	Cr.
Earnings from freight	$887,879 52
" passengers	380,958 94
" express, mail, etc.	65,083 02
Rent of road	42,500 00
Balance June 30, 1861	214,688 54
	$1,591,110 02

The net balance carried to credit of income account is $95,785 66. "This result," says the report, "is one that has not been before attained since the financial revulsion of 1857, and may be regarded as a practical, and therefore a satisfactory solution of the problem, whether the earnings of the road will suffice to pay the interest on its debt, and leave something to divide among the stockholders, more especially as every month is adding to the facilities of the company for transacting an increased business, and every year is developing the country directly or indirectly tributary to the line."

A comparison of the gross earnings during the period named, with the corresponding period of the previous year, exhibit an increase of $354,125 67, while the expenses have increased but $104,561 26—making an increase of $249,564 41 in the net earnings. The amount of earnings absorbed by expenses has been 62.6 per cent. The following is a comparative statement of the recipts and expenditures for the two half-years:

RECEIPTS.

	1861.	1860.	Increase.
January	$217,251 90	$139,950 87	$77,311 03
February	202,071 14	152,574 28	49,496 86
March	265,734 58	192,578 69	73,155 89
April	270,074 58	182,565 72	87,508 86
May	216,500 91	188,830 66	27,670 25
June	204,778 37	165,795 59	38,982 78
Total	$1,376,421 48	$1,022,295 81	$354,125 67

St. Andrew's Railway.

The St. Andrew's *Standard* of 7th ult. says:—

"We can state upon good authority, that the grading of the line between Canterbury and Woodstock is rapidly progressing towards completion—the contractors, Messrs. Walker, Johnson & Co. are already laying the rail forward from Canterbury, and we expect to see the greater portion of the line open for traffic early this autumn."

Philadelphia and Reading Railroad.

We learn that the Reading Company has decided not to make the advance of 15 cents per ton on the 1st of September, as they did last year, and had purposed doing this. This course is, no doubt, a very politic one under the circumstances, as it will enable them to control some trade which otherwise they might have lost; but in footing up the profits of the year, should they continue to lose per week to the extent they have lately, and then carry the reduced freight at these low rates, it cannot fail to show a large deficiency. Their business in the early part of the year, however, showed a handsome profit, and it is to be hoped that the present dullness in the coal trade may soon pass away.—*Philad. Inq.*

New Brunswick Railway.

The following statement of the earnings of the New Brunswick Railway from Aug. 1, 1860 to Aug. 1, 1861, has just been published in the St. John *Courier:*

Revenue—		
From passengers	$68,485 59	
Freight	45,516 32	
Locomotives and cars	13,314 00	
Mails and sundries	5,238 75	
		$132,554 66
Expenses—		
For locomotive power	$40,009 96	
Merchandise and passenger cars	19,400 30	
Maintenance of way and buildings	18,996 12	
General charges	17,388 12	
		95,884 50
Net earnings		$36,670 16

THE RENSSELAER
Polytechnic Institute,
TROY, N. Y.

THE thirty-eighth Annual Session of this School for thorough instruction in the Natural Sciences and Civil Engineering, will begin September 18th, 1861.

A department for instruction in Military Science and Art has been instituted.

Inquiries may be addressed to Prof. CHAS. DROWNE, Director of Rens. Pol. Institute, Troy, N. Y.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.

Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches, etc., for same.

Gas Works Castings, etc., etc.

PHILADELPHIA.

STEPHEN MORRIS, HY G. MORRIS, CHAS. WHEELER, THOS. T. TASKER, JR., STEPHEN P. M. TASKER.

PROSSER'S PATENT
LAP-WELDED IRON BOILER TUBES.
TUBULAR BOILER MAKERS
AND
ENGINEERS' TOOLS.

Tubes for Artesian Wells, conveying Steam or Water, Shafting, etc., screwed or coupled together, in various ways.

KRUPP'S BEST CAST STEEL.

PARIS'S PATENT GLASS ENAMELLED IRON TUBES, FOR WATER, ACIDS, ETC.

PATENT LAP-WELDED STEEL TUBES.

THOMAS PROSSER & SON,
28 Platt St., New York.

NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, ALBANY, Aug. 8, 1861.

SIXTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-annual Dividend of Three Per Cent. on the Capital Stock thereof, payable on the Twentieth day of August instant, upon Stock registered at New York, Boston, or Albany, and on the Twentieth day of September next, upon Stock registered at London. Stockholders whose Stock is registered at New York will receive their Dividends at the office of DUNCAN, SHERMAN & CO.; those whose Stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose Stock is registered at Albany, at the ALBANY CITY BANK; those whose Stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The Transfer Books which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Friday, the Twenty-third day of August instant.

JOHN V. L. PRUYN,
33 Treasurer *pro tem.*

Notice to Contractors and Railroad Operators.

THE LONG ISLAND RAILROAD COMPANY will receive proposals until the first of September next for furnishing by contract all the materials and labor required for keeping in repair the Road, Buildings, Fixtures and Equipment and for conducting the entire business of the same.

After 1st of August specifications or forms of contract may be had by persons desiring to propose, on application to A. E. Dougherty, Esq., No. 25 Merchants' Exchange, Philadelphia, or the undersigned at the office of the Company at Hunter's Point.

6t30 WM. E. MORRIS, Pres't.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Little Miami and Columbus and Xenia R. R.

We give elsewhere a statement of the joint operations of these roads since November 30, 1853, the date at which they commenced being operated as one line. The average length of road operated has been 142.51 miles. The average cost, including equipment, $5,454,543. The total earnings from passengers has been $3,693,354; from freight, $4,176,601; mail and express $600,006—making the total earnings during the past seven years, $8,469,961, or an average of $1.209,994 per annum. The aggregate expenses during the same time have been $5,086,033, an average of $726,576; and the net earnings $3,383,928, an average of $483,418. The dividends declared during that time have amounted to 59 per cent, or an average of nearly 8½ per cent; and amount disbursed, $2,620,043, or an average of $374,292. The total mileage in 1860 was 153.58. Cost of road and equipment, $5,648,810. The gross earnings, $1,328,332; operating expenses, $830,410; net earnings $497,922. Dividend 8 per cent. Amount disbursed in dividends $357,767. We propose to to give in subsequent numbers a historical sketch of each road from the commencement of operations to the close of the last financial year.

Public Debt of the United States.

The Secretary of the Treasury has prepared the following statement showing the amount of the public debt of the United States on 3d day of September, 1861, and the amount of Treasury notes outstanding on the 7th day of September, 1861, together with the date of acts authorizing the same, rates of interest, time of maturity, &c.:

Boston and Maine Railroad.

This company was formed by the consolidation of four companies, viz: the Boston and Portland in Massachusetts; the Boston and Maine in New Hampshire; the Maine, New Hampshire and Massachusetts in Maine; and the Boston and Maine "Extension" in Massachusetts. The Medford Branch was also built by the Boston and Maine Company under a separate charter.

The Boston and Portland Railroad Company was chartered in 1833, and was authorized to build a branch from the Boston and Lowell Railroad, at Wilmington, to the State Line of New Hampshire.

The Boston and Maine Railroad Company was chartered in June, 1835, by the Legislature of New Hampshire, with authority to build a railroad through that State to the boundary of Maine.

The Maine, New Hampshire and Massachusetts Railroad Company was chartered in March, 1836, by the Legislature of Maine, with authority to build a line in that State from the New Hampshire boundary to South Berwick, and there to unite with the Portland, Saco and Portsmouth Railroad.

By subsequent legislative acts, a consolidation of all these companies was authorized, and consummated Jan. 1, 1842.

The construction of the section between Wilmington and Andover was commenced in 1835, and opened for business in 1836. Between Wilmington and Boston, the track of the Boston and Lowell Railroad was used till July, 1845, when an independent line to Boston was constructed under a charter obtained in 1844. From Andover to Exeter, N. H., the road was opened in 1840; from Exeter to Dover in 1841; from Dover to Great Falls, and a junction with the P., S. & P. Railroad, February 23, 1843.

On the 28th of January, 1843, a contract was was entered into, in connection with the Eastern Railroad Company, for a lease of the P., S. & P. Railroad, for a period of 99 years, paying therefor a rent equal to 6 per cent. on its cost. Under this contract the dividends, which have been earned by the road, have been regularly paid. The lease is a joint undertaking, the two companies sharing equally in the profit and loss of operating the leased line. From the gross sum paid by each passenger, 25 cents is first deducted in favor of the road over which he is transported between Boston and the leased line. For the fiscal year ending May 31st, 1860, $10,000 was received from the surplus earnings of this road; and for the year ending May 31, 1861, $9,000. In consequence of the general prostration of business, and the extraordinary outlay in building a bridge over the Saco river, the present season, it will, probably, be some time before another remittance is received from that source.

In 1846, authority was obtained to change the route, so as to make the city of Lawrence a point on its line; also to construct the Methuen branch extending from the Merrimac river, at Lawrence, to the boundary line of New Hampshire, a distance of about 3½ miles, to form a connection with the Manchester and Lawrence Railroad. These improvements were completed in 1848. The change of route involved the construction of 9½ miles of new road.

The Methuen Branch was subsequently leased to the Manchester and Lawrence Railroad Company, and is now operated as a part of that road.

The Medford Branch was chartered in 1845. Construction was assumed by the Boston and Maine Company, by which it is now owned.

The Danvers Railroad Company was chartered in 1852, construction was commenced in 1853, and the road was opened to the public in 1855. The Danvers and Georgetown Railroad Company was chartered in 1849, and organized in 1851. Construction was commenced in 1852, and the road opened for public use in the fall of 1853. The Newburyport Railroad Company was chartered in 1846. Construction was commenced in 1848, and the road completed to Bradford, Sept. 23, 1851. The Danvers Railroad is 9.20 miles in length, extending from South Reading to North Danvers. The Danvers and Georgetown Railroad is 12.39 miles in length, extending from South Danvers to Georgetown; and the Newburyport Railroad 14.58 miles in length, extending from Newburyport to Bradford. In 1853, a contract was made between the Danvers Railroad Company and the Danvers and Georgetown and Newburyport Companies, whereby the trains of the latter companies were allowed to run over the road of the former, the earnings being divided *pro rata*. On the 9th of February, 1855, an act was passed authorizing the consolidation of the Danvers and Georgetown and Newburyport Companies, under the corporate name of the Newburyport Railroad Company. On the 1st of March, 1855, a contract was made with the Danvers by the Boston and Maine Company whereby the latter agreed to assume the contracts of the former with the Newburyport Company, and to run and maintain its road for 100 years from May 1, 1853. As the consideration therefor, the Boston and Maine Company were to endorse the obligations of the Danvers Company to the amount of $125,000, and pay the interest thereon at the rate of 6 per cent., and the principal at their maturity, out of the anticipated profits of the road, and to pay in addition the net profits of the road, after deducting running expenses, at the same per mile as upon its own line. In 1860, this contract was modified, so that upon the payment to the Danvers Company of $25,000 in cash there were released to the Boston and Maine Company the sinking fund amounting to $6,523 84, and all claim for any surplus for the remainder of the lease, which will expire in 1953. At that time the claim against the Danvers Company will be the said $25,000 together with the amount of the obligations of said road heretofore guarantied for $125,000, of which the Boston and Maine Company now own $71,000. In proportion as these obligations are purchased, the rent will diminish; and upon the expiration of the lease there will be due from the Danvers to the Boston and Maine Company the sum of $150,000 without interest.

In 1860, this company took a lease of the Newburyport Railroad for 100 years, without rent, for $300,000—$75,000 of which was paid in liabilities against that road, and $225,000 in cash. These two sums are to be treated as an absolute loan. At the expiration of the term in 1960, there will be due from the Newburyport Railroad Company to the Boston and Maine Railroad Company the sum of $300,000 without interest.

By these arrangements and a total investment of $450,000, the whole line of roads from South Reading Junction, by Danvers to Georgetown, and thence to Newburyport, and also from Georgetown to Bradford Station, in all 36.17 miles, is under the absolute control of this corporation for a term of nearly 100 years; at the expiration of which time, the whole amount becomes a debt due and payable to to the Boston and Maine by the Danvers and Newburyport railroad companies.

The total length of the main line, from Boston to South Berwick Junction is	74.26 miles.
Medford Branch	2.23 "
Methuen "	3.61 "
Great Falls "	2.95 "
Newburyport Railroad	26.97 "
Danvers "	9.20 "
Total length of road operated	119.22 miles.

The capital stock authorized by charter is $4,550,000, of which $4,155,700 has been subscribed; of this $4,076,974 52 has been paid.

The company has no funded debt.

The cost of road and equipment May 31, 1861, was as follows:

Graduation and masonry		$884,067 40
Wooden bridges		371,468 55
Superstructure, including iron		984,523 89
Stations, buildings, fixtures, etc.		520,722 78
Land, land damages and fences		848,198 08
Engineering, and other expenses		272,388 94
		$3,881,369 64
Locomotives	$201,418	
Passenger and baggage cars	79,260	
Merchandise cars	145,897	
		426,575 00
Total cost of road and equipment		$4,307,944 64

The equipment consists of 36 locomotives; 53 passenger, 18 baggage, and 587 freight cars.

The gross revenue from all sources for the year ending May 31, 1861, has been as follows:

From passengers	$548,730 51
" freight	341,781 46
" rents	12,345 42
" mails	9,735 25
" interest	8,558 67
Portland, Saco and Portsmouth R. R.	9,000 00
	$930,151 31

And the expenses were:

Repairs of road	$86,479 16	
" bridges	12,661 51	
" buildings, etc.	51,229 41	
" locomotives	36,645 08	
" cars	27,841 92	
Coal	28,371 81	
Wood	38,450 75	
Oil and waste	11,869 87	
Switchman, gatemen, etc.	22,246 01	
Passenger expenses	70,583 72	
Freight "	59,792 88	
Taxes	13,944 69	
Danvers Railroad rent	7,500 00	
Miscellaneous	44,619 17	
		512,239 95
Net earnings		$417,911 33
Charged for renewals of iron	$27,703 51	
Do. for depreciation of locomotives and cars	1,658 00	
		17,488 47
Balance of net earnings		$400,422 86
Deduct two dividends 7½ per cent.		311,677 50
Balance		$88,745 36
Add balance from previous year		499,117 14
Making the sum of undivided earn'gs.		$587,862 50

Compared with the previous year, the earnings and expenses are as follows:

	1859–60.	1860–61.
Gross earnings	$915,625 86	$930,151 31
Expenses, renewals, etc.	499,488 53	529,728 45
Net earnings	$416,177 33	$400,422 86
Miles run	553,484	663,721

The mileage of trains in 1860–61 was as follows: by passenger trains, 449,152; by freight trains, 184,019; by wood trains, 4,755; by gravel trains, 8,395; by extra trains, 17,400.

The number of passenger carried in the cars was 1,868,797; do., carried one mile, 28,308,103; tons of merchandise carried in the cars, 278,440; do., carried one mile, 7,551,842. The report says:

The result of the last year's business will compare favorably with that of former years. But this is in a great measure due to the first six months of the year. Those were months of prosperity without precedent in the annals of this corporation.

For reasons well known to the stockholders, traffic has decreased very largely, in almost every department, during the last six months. This road, depending mostly upon its local business, has sympathized with the general depression. Its business has decreased more than $50,000, as compared with the corresponding six months of the preceding year. The prospect for the future is not flattering.

Our average dividends, for twenty-three years, have been more than 6¾ per cent. per annum.

For the last twelve years they will average 7 per cent. The road may be considered to have been in full operation during this latter period, as no new shares have been issued since about the close of the year 1849.

In addition to the dividends, the amount of undivided earnings have accumulated, during this latter period of time, more than half a million of dollars, which exceeds one per cent. annually upon the capital stock.

In the meantime, large expenditures have been

made in erecting new buildings, widening Charles River Bridge, &c., which were charged to *running expenses*, but which might have been charged to *construction account* with great propriety.

The number of shares of stock actually sold, and upon which dividends have been declared for about twelve years past, is $41,557. In the disposition of these shares there was a loss, by sale below par, of $78,725 48. Consequently the corporation realized only $4,076,974 52.

There has been expended in building and furnishing the road, and charged to construction, the sum of $4,307,944 64. This is $230,970 12 more than was received from the sale of capital stock. The amount was largely increased, during the past year, by the purchase of a lot of land in Boston. The last named sum, together with the sums advanced to the Newburyport and Danvers Roads, and the amount invested in our own stock and in valuable bonds, show where the undivided earnings of the road have been placed.

During the past year, new station buildings have been erected at Newmarket. The grounds have been enlarged and improved, so as to make the accommodations at that place quite satisfactory. At Haverhill, engine and car houses have been built in a thorough and workmanlike manner. They are ample in capacity, and were long needed at that important station. This will account for the large item expended for repairs of station buildings, &c., which is $25,000 larger than the corresponding item last year.

With one exception, (the Great Falls and Conway, which is now operated by the Trustees of the third mortgage bonds,) our relations with connecting roads remain as they were last year.

CONDENSED BALANCE SHEET.

Capital stock		$4,076,974 52

President—FRANCIS COGSWELL, Andover, Mass.

Directors—Francis Cogswell, James H. Duncan, Geo. W. Kittredge, Daniel M. Christie, Peter T. Homer, Israel M. Spelman, Henry Saltonstall.

Superintendent—WILLIAM MERRITT, Boston.

Clerk—JAMES C. MERRILL, Boston.

Treasurer—H. C. WILBUR, Charlestown.

Baltimore City Passenger Railway.

This company has paid to the city of Baltimore, since the opening of the road, $73,000, principally for the Park Fund.

Debt of Kentucky.

The Governor of Kentucky makes the following statement of the debt of the Commonwealth on the 31st of August.

DESCRIPTION OF BONDS.	
Of 6 per cent. due and outstanding	$402 00
Of 5 per cent. bonds	459,000 00
Of 6 per cent. bonds	2,600,000 00
At thirty-five years date, 6 per cent.	24,000 00
At thirty years date, 6 per cent	43,500 00
At thirty years date, 5 per cent	850,000 00
Five per cent. interest from Jan. 1, 1846, payable at the pleasure of the Legislature	308,268 42
Amount of bond issued for balance due for interest on State bonds, and same, dated July 5, 1850, and made payable at the pleasure of the Legislature, and to bear interest at the rate of 5 per cent. per annum, from January 1, 1850	101,001 59
Bond issued by the Governor for surplus due the several counties, dated 23d August, 1855, held by Board of Education	42,894 72
Bond issued by the Governor for surplus due the several counties, dated 21st February, 1857, held by Board of Education	12,167 30
Total	$4,731,284 03

The State has the following means to meet her indebtedness as above, $4,731,234 03, if they could be applied, viz:

Stock in Bank of Kentucky	$939,900 00
Stock in Northern Bank of Kentucky	200,000 00
Stock in Bank of Louisville	40,600 00
Stock in Southern Bank of Kent'y	600,000 00
Total	$1,670,500 00
Stock in Lexington Railroad	$217,800 00
Stock in Frankfort Railroad	74,529 50
Sinking fund 1st August, 1861	563,406 44

Toronto Street Railway.

This railway will open for the first time, on the 18th inst. The inauguration is to be celebrated by a festival—a dinner, concert and ball.

Wyoming Canal Company.--Receiver Appointed.

PHILADELPHIA, Sept. 2.—NISI PRIUS—JUSTICE J. M. READ.—Edward W. Clark *vs.* The Wyoming Canal Company, and Jay Cooke and Anthony Drexel, Trustees. This is a bill filed by the complainant, one of the mortgage bondholders of the Company, against it, and the other defendants, trustees on the mortgage, and avers the creation of the corporation by act of Assembly of 21st day of April, 1858, its ownership of the canal now in public use, beginning at Wilkesbarre and ending at Northumberland, in this State, and the bridges, aqueducts, toll houses, etc., therewith connected, and of the machinery, tools, and other personal property used in the management and operation of the canal.

That on the 24th day of June, 1858, the Company issued bonds to the amount of $900,000, securing the same by mortgage of that date to Jay Cooke and Anthony J. Drexel, in trust of which amount $850,000, together with the interest due thereon to the 15th of July last, are outstanding and unpaid; that the corporation is otherwise indebted to other creditors, and is utterly insolvent and unable to pay; that suits have been commenced by some of the bondholders on their coupons and interest warrants, who are entitled to judgment thereon; and that executions will be issued thereon by means whereof the property of the Company may be levied upon, sold and removed from the jurisdiction of the Court, and thus the security pledged to parties entitled thereto, entirely removed, and the public use of the canal prevented. It prays, therefore, an injunction, and the appointment of a Receiver.

The case was heard yesterday morning on this bill, and the special affidavit filed, and it was ordered by the Court that Chas. Parrish be appointed Receiver of the real and personal property, etc., of the Company, and of the rents, tolls and income thereof, with power to use the canal, preserve it in repair and in good condition, and to employ such persons and make such payments, etc., as may be necessary in so doing. Power is also given him, among other things, to adjust and arbitrate all claims for damages, injury and loss to persons and property, that may be claimed of him while acting as such Receiver. Security is also ordered in the sum of $10,000.

Census of Nova Scotia.

We subjoin a complete statement of the Nova Scotia census returns from which it will be seen that the Province has increased its population 20 per cent. in the last ten years. The returns are made up to 30th March, 1861.

Little Miami and Columbus and Xenia Railroads.

The Little Miami and Columbus and Xenia Railroad Companies concluded a contract of union on the 30th November, 1853, and the same became operative on the succeeding day. The two companies mutually agreed to unite permanently their respective roads in their business management and uses as *one*, and that they should be worked together under one superintendent, subject to the direction of a joint committee of four members, two from the directory of each company.

The duties of the committee are to establish rules and regulations for the keeping and settling accounts, and for receiving and paying all moneys accruing from the road or otherwise; and to act as general managers of the two properties.

It is also provided that all the current expenses of the two companies, including renewals, and all current interest becoming due by either company on its bonds or other debts bearing interest, already existing or which may hereafter be created for their mutual benefit, shall be paid out of the gross earnings of the joint companies. After satisfying these demands, the residue is to be applied, first to the payment of the dividends of the two companies, which dividends shall at all times be of equal rate on the stock of each, and

after paying such dividends, the surplus, if any, is to be divided between the two companies or otherwise disposed of as the two boards of directors may by concurrent action order and direct. In this distribution the stock of the Little Miami Railroad is assumed as being $3,000,000 and that of the Columbus and Xenia Railroad as being $1,500,000.

On the 30th November, 1858, the joint companies took a lease of the Dayton, Xenia and Belpre Railroad and have operated it since the 1st Jan., 1859. The rent paid for the same is $29,000 a year.

In 1860, a new agreement was made to which the Cincinnati, Hamilton and Dayton Railroad Company was a party for the joint operation of the four roads for 20 years. This became operative on the 1st May, 1860. The statistics appended, however, only apply to the Little Miami and the Columbus and Xenia.

	Miles.
LENGTH OF ROAD.—Little Miami R. R. Cincinnati to Springfield.	83.50
Col. & Xenia R. R. Columbus to Xenia	54.50
Total length of the joint railroads	138.00
Road Leased.—Dayton, Xenia and Belpre, Dayton to Xenia	14.50
Total length of road operated	152.50

The rolling stock owned by the joint companies is as follows: 42 locomotives; 36 passenger, 16 baggage, mail and express, 312 box freight, 99 platform, 49 box stock, 25 rack do., 21 lime and 54 gravel cars.

Dayton and Michigan Railroad.

The Toledo *Blade* says "this company are making good progress with their improvements on the Bayon, and this road will soon have a dock front comparing favorably with any in the city. The business of the road has increased very rapidly this season, especially in the transportation of grain, the amount brought over this line forming a prominent item in our daily receipts. The red warehouse at the foot of Monroe street has been fitted up for the reception of grain coming by this route, and will furnish storage facilities for a large amount after the close of navigation, so that we apprehend the Company will not again be under the necessity of refusing to receive freight at the various stations for want of storage room."

Revenues of the New York Canals.

Our readers should, and no doubt will, be gratified to know that, amid the gloom that overspeads the country in consequence of the rebellion, there will not at present be any occasion for the imposition of taxes to meet the interest on the public debt, or to reimburse any principal that may fall due this year or next.

The whole amount of tolls received on the canals during the fiscal year ending on the 30th of September, 1861, is estimated at $3,366,822.

The following comparative statement shows the gross receipts of tolls for the years named:

1859	$1,814,363
1860	2,381,301
1861	3,366,822

Showing a gain in 1861 of $985,621 over 1860, and of $1,552,460 over 1859; or an aggregate of $2,537,981 for the two years—equal to the proceeds of a tax of one and three-fourth mills.

It may not be uninteresting to see what amount of these tolls collected the present fiscal year was paid on the products of this State, and what amount has been paid on through traffic.

The tolls collected at the Buffalo and Tonawanda, Oswego and Phœnix offices, were paid on the products of the Western States and Canada.

Tolls at Buffalo and Tonawanda	$1,580,217
Tolls at Oswego and Phœnix	537,428
Total	$2,117,645

The tolls paid at the four tide-water offices amount to $344,523, and two-thirds of this sum was no doubt on freight going to the Western States and Canada, so that we may assume that at least $2,350,000, in round numbers, has been paid on through traffic, leaving only about one million of dollars to have been paid on the products of this State. We give these figures to show our readers what the canals are now doing towards paying for their construction and maintenance without drawing upon our own citizens to meet those charges. We take a just pride in making these exhibits. They not only show the capacity of our public works in meeting the exigencies thrown upon them, but their ability also in responding a fair revenue upon a proper adjustment of the rates of toll.—*Albany Evening Journal.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

Saturday, September 14, 1861.

Share and Money Market.

There has been an increased activity the past week in the share market, with a considerable improvement in railroad stocks, and in government securities. The advance in the latter is decided, with a very firm market. Such advance, with a supply coming upon the market, equal to $1,000,000 per day, is a very favorable evidence of the confidence reposed in the government. The rest of the list is firm as a natural consequence. There has been considerable fluctuations in Southern State stocks, and a large decline in some, particularly in Tennessee, owing to the rumor that government was about to prevent their being dealt in at the Stock Exchange. No such order has yet been issued. The improvement in Western shares has averaged from one to three per cent. The earnings of all our roads continue satisfactory, and in some instances show a decided improvement over 1860. Money continues as abundant as ever, but rates are a trifle higher. There is a decided improvement in trade, with a prospect of considerable activity in commercial operations, for the rest of the year.

The canal receipts of Indian Corn at Albany the present year have been very heavy. They compare with last year, the next heaviest report, as follows:

	Bushels.
August, 1861	3,787,300
August, 1860	3,229,800
Increase	557,500

The increase of tolls on the canals for the present season amount to $357,240 79, as follows:

Amount of tolls received the fourth week in August, 1860	$122,358 90
Amount of tolls received the fourth week in August, 1861	160,167 50
Increase in 1861	$37,808 60
Amount of tolls received from the opening of navigation, to and including the fourth week in August, 1860	$1,563,896 42
Amount of tolls received from the opening of navigation, to and including the fourth week in August, 1861	1,921,137 21
Increase in 1861	$357,240 79

The deliveries of grain in Chicago for three weeks past are beyond all precedent, and the prospect is, that this scale of receipts will be continued through September and October, if not later in the season. The table dates from the breaking out of hostilities in April last:

GRAIN DELIVERIES AT CHICAGO SINCE APRIL 15.

Week ending	1861.	1860.
April 20	238,159	428,919
April 27	462,712	529,977
May 4	613,039	514,584
May 11	902,820	836,293
May 18	984,538	677,333
May 25	1,088,210	817,163
June 1	1,085,405	827,348
June 8	1,326,146	675,103
June 15	1,228,450	524,076
June 22	1,097,967	675,512
June 29	1,081,888	827,271
July 6	1,124,945	960,345
July 13	1,078,763	685,887
July 20	1,638,607	996,982
July 27	1,590,092	646,476
Aug. 3	1,610,060	669,123
Aug. 10	1,278,209	913,898
Aug. 17	1,268,209	1,212,795
Aug. 24	1,827,445	1,648,110
Aug. 31	2,235,219	1,345,137
Sept. 7	2,221,572	1,365,597
Total bushels	26,014,435	17,793,130
Increased deliveries	bushels	8,221,305

Southern State Stocks.

One of the most striking effects of the rebellion is the excessive depreciation in the market value of the bonds of all the seceding States, in which those of Kentucky and Missouri, States loyal to the government, largely sympathise. The following table, copied from the American Circular of Messrs. Samuel Hallett & Co., will show the amount of these debts, and the objects for which they were contracted:

States.	Total amt. of debts prior to rebellion.	Contr. for the construc. of public works.	Do. to provide capital for banks.	Do. for other objects.
Alabama	$6,030,778	$.	$3,423,000	$2,607,778
Arkansas	3,020,997	.....	3,020,997	.....
Florida	7,500,000	3,000,000	4,500,000	.....
Georgia	3,170,780	3,170,780	.....	.....
Kentucky	5,573,244	3,592,412	600,000	1,381,832
Louisiana	10,099,074	2,020,997	5,398,533	2,679,544
Mississippi	18,000,000	.....	18,000,000	.....
Missouri	23,602,000	22,901,000	.....	701,000
North Carolina	9,129,505	7,663,140	.....	1,466,365
South Carolina	6,292,643	3,000,000	2,770,802	521,841
Tennessee	16,643,607	14,910,607	1,125,000	606,000
Virginia	37,478,528	32,131,578	3,346,950	2,000,000
Total	$146,537,256	$92,390,514	$42,185,282	$19,166,460

Of the above, the debts of the States of Mississippi and Florida, to the amount of $22,500,000, including interest, have been repudiated. To these should be added that of Arkansas, which has also been practically repudiated, making a total of such debts, $25,520,997, leaving $121,021,253 upon which interest was regularly paid up to the period of the re-

bellion. Of this sum, $92,390,514 was contracted for the construction of public works, chiefly railroads; $16,637,285 to supply banking capital, and $11,966,460 chiefly for the erection of government buildings and educational purposes.

With the exception of Virginia, the debts of none of these States were excessive, compared with their population and means of payment. The public works for which they were contracted, so largely added to the resources of the people, as fully to compensate for the increased burdens, although, as a general rule, the works themselves were unproductive. The following is a brief sketch of the history of the debts of each State.

The greater portion of the debt of Alabama was contracted to supply capital to Banks. The original amount was $15,400,000, which, by good management, has been reduced $3,423,000. Previous to the rebellion, the finances of the State were in excellent condition.

The debt of Arkansas was also contracted to supply capital for Banks. The original amount was $2,676,000. A portion of it has been paid by the assets of the Banks, but none by the State, although the debt was contracted 24 years ago. It may be regarded as virtually repudiated.

The Territory of Florida contracted a debt of $3,900,000 to supply capital for Banks. These institutions proving unsuccessful, the people, on being admitted as a State, repudiated the debt by a specific clause in their constitution. In 1855 the State being possessed of a large amount of lands, some 15,000,000 acres, set them apart as a fund to aid in the construction of a system of railroads, authorizing the Board of Trustees, to which they were conveyed, to issue to the companies bonds to the amount of $10,000 per mile of road. These bonds also constituted, by law, a first mortgage on the roads. The State is not liable on account of them, and made no other provision for the payment of the same than that recited. Under this system, about 300 miles of railroad were constructed, and bonds to the amount of some $3,000,000, issued. The interest was paid, up to the rebellion, partly by the companies and partly by the land fund. The roads are now wholly unproductive, and the proceeds of the land fund, in the hands of the Trustees, nearly, if not entirely, exhausted.

The debt of Georgia, with the exception of $500,000, was contracted for the construction of the Western and Atlantic Railroad. This is a valuable work, and up to the rebellion was producing more than enough to pay the interest on the State debt. The $500,000 referred to, was a subscription to the Savannah, Albany and Gulf Railroad. The finances of this State have always been in excellent condition.

The greater portion of the debt of Kentucky was contracted for the improvement of the navigation of its rivers and for McAdamized turnpikes. These, though of great advantage to the State, have proved in a great measure unremunerative. A small subscription was made to the Louisville and Lexington Railroad, and one of $600,000 to the Northern Bank of Kentucky. The finances of this State have been well conducted, and its credit has always stood deservedly high.

Of the debt of Louisiana, $5,398,533 is on account of Banks, and $2,020,997 on account of railroads. The investment in the Banks has proved productive, while that in railroads may be put down as a total loss. The finances of the State for some time past have been in a prosperous condition.

The debt of Mississippi, originally $7,000,000, a portion of it being contracted in 1830, was to provide capital for Banks. These institutions failed, and the State has, by a popular vote, repudiated a portion of the debt, and has never made provision for any portion of it, either principal or interest. With the accumulated interest, it amounts, at the present time, to at least $18,000,000.

Of the total amount of the debt of Missouri, $22,901,000 is on account of railroads. The bonds issued have been instrumental in constructing 740 miles of road, costing $35,000,000. They constitute, by law, a first mortgage on the several roads on account of which they were issued. Of these bonds, $3,000,000 were issued to the Hannibal and St. Joseph Railroad, the interest of which has been regularly paid by that company. To the Pacific Railroad, bonds to the amount of $7,000,000 have been issued. The net earnings of this road have so far been applied toward construction. Its traffic, as far as completed, indicates a profitable business when extended to the boundary of Kansas. To the Southwest Branch of the Pacific Railroad, bonds to the amount of $2,800,000 have been issued. This branch has a land grant of nearly 1,000,000 acres. To the North Missouri Company $4,350,000 in bonds were issued; to the St. Louis and Iron Mountain $3,500,000; to the Cairo and Fulton $650,000, and to the Platte County $300,000. All the companies, with the exception of the Hannibal and St. Joseph, have made default in the payment of interest, and their roads, consequently, by law, have vested in the State. The half yearly interest, due 1st July, 1861, was not paid, owing to the treasonable conduct of the governor, who has been driven from the State and removed from office. The roads constructed have proved a vast benefit to the State. The burden of the debts assumed on their account is comparatively light, and the lapse in the payment of interest was occasioned by political troubles over which, at the time, the people had no control. As soon as order is fully restored, the payment of interest will unquestionably be resumed. Missouri has been steadfast in her loyalty to the government, notwithstanding the treason of her governor and a considerable portion of her legislature.

The greater portion of the debt of North Carolina was recently contracted for the construction of a system of railroads which, though unproductive, have proved a great advantage to the people. The State stands in the position of stockholder, for the greater part of the money expended, and derives but little revenue from its investments. Its affairs, however, have always been well managed, and its credit up to the rebellion, stood high.

South Carolina has rendered aid to nearly every road within it. With the exception of its investment in the Blue Ridge Railroad, an unfinished work, its investments have proved productive. The State has also a large investment in the South-Western Railroad Bank, which has also been remunerative. Its finances have always been in a sound condition, and its credit high.

Tennessee has been one of the most enterprising of the Southern States, and has had the best system of internal improvements of any. To aid in its construction, the State loaned its credit to the amount of $10,000 per mile, with some additions for expensive structures, taking a first mortgage upon the roads, the respective companies undertaking to pay the interest, which, with some slight exceptions, they have been enabled to do from earnings, saving the State from all responsibility. Under this system, 1,200 miles of road have been constructed. The holders of the bonds, consequently, have a double security—the faith of the State, and completed roads, yielding an income sufficient to pay the interest. Upon return of peace there can hardly be a doubt but that the obligations of the State will be faithfully met.

Virginia labors under the double disadvantage of possessing a very bad system, and an enormous debt—that for public works alone, with guarantees of bonds for insolvent companies, being $32,131,578. Toward the construction of an extensive system of turnpikes and railroads, the State subscribed three-fifths of their share capital, which in a great majority of cases, owing to its sparse population, and non-commercial habits of its people, have been almost entirely unproductive. In this, alone of all the Southern States, has a system of public improvements proved a severe burden to the people, so much so, as to be the reason assigned for a large emigration to other States, and a cause of a great deal of political discontent.

Previous to the rebellion the affairs of nearly every seceding, non-repudiating State, were in a prosperous condition. This event put an end to their internal as well as external commerce, and their railroads have in most cases been surrendered up to the Confederate Government, which has monopolized their use for the transportation of troops and munitions of war, paying therefor in Confederate bonds. While the war continues they must remain unproductive. Upon the restoration of peace, so that effect can be given to the laws of the United States, in some of the States, particularly in Tennessee, the holders of bonds can enforce their claims against the roads, in favor of which, they were issued. In the Missouri,

this remedy now exist in favor of the bondholders of the defaulting roads. Of the States named two only, Tennessee and Missouri, allowed default to be made on the July interest

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations. By M. CEZANNE, Engineer des Ponts et Chaussees. Translated by J. BENNETT.

PART THIRD.

(Continued from p. 597.)

Air Pumps.—The air pumps used at Szegedin were composed of two vertical cylinders a short distance apart. In the upper cylinder, which was 8.66 ins. diameter, the steam worked a piston having the same rod with the piston of the pump, which was 11.8 inches in diameter.

The stroke of the piston was 7.87 ins.; the number of strokes per minute was from 100 to 120.

These machines were double-acting, with a variable expansion and a free escapement. They were from 10 to 12 horse-powers and weighed 4,840 pounds; the steam was furnished by old locomotives planted upon a pontoon, coupled with a similar pontoon, bearing the coal and watchman's box.

The apparatus thus being installed, the bell loaded with the counterpoise, designed to equilibrate the interior pressure, the column being inserted between its guides, and the inner doors of the air chamber being shut, with one valve at least open, the pumps were set at work. At first there was much leakage through the air chambers, but the pressure increasing closed the doors or valves against the linings, and the joints became air-tight. At Szegedin, it required one hour's work of one pump to obtain one atmosphere of pressure. When the interior pressure was sufficient, the interior cock of the syphon was opened, and the water rose to its delivery. By a little contrivance the water could be exhausted at a less pressure than required by the usual hydrostatic laws, by slackening a joint in the lower part of the interior syphon, a little air was admitted, and the mixture of air and water being lighter than water, was raised before attaining the pressure required for pure water.

The diameter of the syphon was 2.36 ins.; the time required to draw off 705.7 cubic feet of water was, in good working condition, one hour.

When the water was exhausted, the men went in, and the work began. A gang was usually composed of nine men:

One overseer, sometimes inside, sometimes outside.

Two miners at the bottom of the column.

Four hands at the interior windlass (placed upon the platform), upon which was rolled a chain, with a full bucket ascending at one end, and an empty bucket descending at the other.

Two men upon the reservoir, to draw up the full buckets placed in the air chamber by the men within. This operation was performed by means of a common wood windlass placed upon the counterpoise.

There were besides these, a stoker and his assistant, and one to take charge of the manometer.

The valve being opened, the men and the buckets were passed into the air chamber. The men at the exterior windlass made fast the hook of their chain to the ring or handle of the valve, and raised it to press against the india-rubber lining.

The cocks being suitably worked by the person who enters or by the men outside, if a bucket is to be passed, the air blows in the chamber; the valve closes of itself, and the lower door opens.

Physiological Effects of the Compressed Air.—This is the proper place to give some details as to the physiological effects of the compressed air. It may be regarded in three phases—the entrance, the remaining, and the departure.

When cooped in the air chamber to allow the closing of the upper valve, a cock is opened for the entrance of the air, one is immediately seized with a violent buzzing in the ears, attended with pain, whose intensity varies with individuals. The air is of an oppressive heat, with a strong smell of caoutchouc and sweat. There is utter darkness. Care must be taken to avoid opening the cock for the entrance of the air, before making sure that the outlet orifice is well closed. If this precaution is neglected, one is caught in a violent current of air, which immediately causes severe neuralgic pains in the teeth, temples, and ears.

When no regard is paid to favoring the ears, and the cock is opened briskly, as is usually done by the workmen, the pressure is established in less than a minute, and the lower door opens. On reaching the platform at the side of the windlass hands, the air is very damp and heated by compression; this space resembles a drying room, and at Szegedin the thermometer rose above 140°.

To reach the miners, one is lowered in a bucket; and in proportion to the descent, the air becomes more fresh and pure. At the bottom of the column, when the water is completely cleared, and the bottom dry, the position is supportable; still the excessive comfort spoken of by an author* is not experienced, but a sensation of relief similar to that succeeding a painful operation.

The passage through the air chamber is quite disagreeable; some persons, however, are so accustomed to it as to think nothing of it; but there are workmen who, after many weeks perseverance, become discouraged, and decline the high pay tendered as a bonus for their sufferings.

The position at the bottom of the tube, under a pressure of 3 atmospheres, may be prolonged many hours without inconvenience; the tone of the voice is somewhat changed, the respiration increased as by a rapid walk; a dry cigar kept in motion is consumed in a flame; the wax-lights burn rapidly, but with a smoky flame, depositing lamp-black on all sides; it quickly blackens the nostrils, the bottom of the throat, and penetrates the lungs; smut is blown from the nose, and spit from the month, for many days after a long stay in the tubes. These discomforts are more apparent with oil lamps.

The time of departure, though but little painful for the majority of individuals, is the most dangerous for the workmen. As soon as the compressed air escapes from the air chamber, the temperature lowers suddenly, the vapor condenses, and when the upper valve is opened, one issues surrounded by a cloud. At this moment blood sometimes flows from the nose and the throat; some persons experience violent neuralgias, but of short duration; others have tooth and headache for many days.

Most frequently the leaving is attended with no other sensation but that of a cold air douche, followed by a slight tension of the ears.

The men who usually work in the tubes look ill; but they persevere steadily, and up to pressures of 3 atmospheres we may be sure of finding as many workmen as are required for the working of the tubes.

There were at Szegedin some miners who had worked at the Quarantaine bridge at Lyons, and at the bridge at Macon, whose health was perfect. One died of paralysis of the lungs, but his habits were very irregular.

The fever, endemic along the borders of the Theiss, has not attacked the miners more than other workmen; in a sanitary view it seemed that they might be rather classed by nationality; the Italians and the Germans were the most sickly, the French and Hungarians were in better health.

A gang of nine men worked six hours and rested six hours; the work progressed night and day.

Fifteen buckets of clay or sand were taken out per hour; the contents of a bucket being 2.47 cubic feet.

The slowest operation was the raising of the buckets, and some interest was felt in expediting the work; at the bridge of Bordeaux, this was effected by making an opening in the cylindrical sides, midway of the column, to which was fitted a special air chamber, through which the excavation was emptied.

*Revue des Deux-Mondes, 1st Nov., 1857, p. 207.

At Szegedin, the ends of the chain bearing the buckets, on leaving the windlass, passed over a gibbet, fixed upon the plane part of the air chamber, and movable around a vertical axis. By this arrangement the bucket is raised to the level of the air chamber, in which it is deposited without effort if the vertical door is open.

Then this door is pushed to, the cock is turned, the door closes, the upper valve falls, and the men outside fasten their end of the chain in the handle of the bucket, raise it, and replace it by an empty bucket, which by a turn of the cock is put at the disposal of the men inside.

Sinking of the Columns.—When the excavation has reached the end of the tube, the miners leave, after taking up the lower branch of the syphon, and placing their tools upon the interior flooring; the column is adjusted in its guides, and the escape valves are opened briskly.

The effect then produced varies with the nature of the bottom, and in the same bottom with the plugging of the tube, the height of the water, and the load of the column, &c.

At the first trial of the sinkage of a column on the Theiss (the first pier) it lowered rapidly, carrying with it the guides, and there were fears of its swamping. It stopped after a descent of fourteen feet. Usually the descent varied from 3 ft. to 6.6 ft.; often, whatever the load upon the column, it remained insensible to the discharge of the air, and then started without apparent cause.

The interior pressure of the air equilibrates at the same time the outward pressure of the water and of the air, and the weight of the column, which would itself be lifted up were it not amply loaded. The moment the air escapes, the water enters violently at the bottom, bearing the earth with it, and the tube falls in proportion to the undermining thus made at its foot. The motion stops when the mass of water and sand let inside equilibrates the outward pressure, and when the friction of the tube is in equilibrium with its weight. The friction is very slight in sand and fine gravel, but enormous in clay. Now, as the latter is more difficult to undermine than the sand, we see that the effects of discharging the air must vary with the proportion of clay or sand in the bottom. When a column which has only gained a few inches under action of many discharges of air, falls suddenly 1 or 2 yards, it is from the fact that having passed with difficulty through a clay bed, it then meets with a bed of sand more easily disturbed.

A column weighing 120 tons, having a depth of 19.7 feet, in a clay bottom, is stopped in the descent when there is a difference of 32.8 ft. between the levels of the internal and external water, and with only a slight interior tamping; while in the sand, a column weighing 40 tons, having a depth of 32.8 feet, and a tamping of 16.4 feet, falls of itself if the rising of the water produces only a difference of 6.5 feet in the level.

In clay, the column adjoining that worked upon generally remains immovable during the ascent of the latter; in sand, it either settles or inclines. In clay, the columns have a slight tendency to deviate; in sand, they generally incline up stream, because on that side the river makes the first undermining.

From the above remarks it is seen how little control is had in arresting the columns at a desired plane, or in preserving a vertical direction. Each bottom has its inconveniences and its resources, and it becomes necessary to feel the way along by trial. The columns deviate most frequently in sand, but the deviations are most difficult to be righted in clay. The best bottoms are the gravel.

(to be continued.)

Northern Central Railroad.

The earnings of this road for June were $108,000, and for July $170,000, including the sums received for the transportation of troops, government stores, etc. The net earnings of the road from the 1st of January to the 1st of August, were upwards of $300,000.

Boston and Maine Railroad.

We have compiled from the annual reports made by this company to the Legislature, the following statement in reference to the cost, mileage, earnings, expenses, etc., of this road since 1840. The average mileage has been 73.31. The average cost $3,146,781. The gross earnings from passengers $7,278,757; from freight, $4,064,609; from mails, etc., $435,078—making the total gross earnings for the 21 years ending November 30, 1860, $11,778,444, or an average of $560,878 per annum. The aggregate expenses during the same time have been $6,301,337, or an average of $300,063. The net earnings, $5,477,107, or an average of $260,814. The dividends declared have amounted to $4,315,415, or 139¾ per cent.; the average yearly dividend has been $205,496, or 6⅔ per cent. The mileage in 1860 was 83.05. Cost of road and equipment, $4,271,417. The receipts from passengers, freight, mails, etc., $990,930; the expenses, $515,211; and the net earnings, $475,719. The dividend declared in that year amounted to $332,456, or 8 per cent. on the capital stock. We give elsewhere the report of this company made to the stockholders for the fiscal year ending May 31, 1861, together with a brief historical sketch of the road.

☞ At a recent meeting of the Canadian Directors of the Grand Trunk Railway, at Montreal, Mr. Watkin, the representative of the English Directors, and Mr. Ward, of Boston, Mass., were added to the Board in the places, respectively, of Mr. T. G. Ridout and Hon. Peter McGill, deceased.

Railroad Earnings.

The statement of the Illinois Central Railroad for August is as follows:

Land Department.

Acres Construction Lands sold	2,605.66	for	$35,115 15
Acres Interest Fund L'ds sold	80.00	"	1,046 40
Acres Free Lands sold	796.61	"	12,157 76
Total sales during the month	3,482.27	for	$48,319 31
To which add Town Lot sales			1,831 00
Total of all			$50,150 31
Acres land sold since Jan'y 1, 1861	71,360.66	for	$1,096,834 07
Acres sold prev'sly (net sales)	1,260,273.46	for	16,147,983 91
Total	1,331,634.12	for	17,244,817 98
Construction bonds canceled previous to August 31			$1,863,000 00
Collections in August on Construction bond account			37,000 00
Collection in August for free land and interest account			38,495 04
Total collections to 31st Aug., 1861			4,633,814 12

Traffic Department.

Receipts from Passengers	$53,963 45
" Freight	170,958 10
" Mails	6,358 33
" Rent of road	4,933 33
" Other sources	3,067 21
Total receipts for August, 1861	$239,280 42
Do. do. 1860	248,970 68
Total receipts since Jan'y 1, 1861	$1,845,397 44
Total receipts in corresponding period of 1860	1,615,786 45
Increase	$229,610 99

The earnings of the Galena and Chicago Railroad for August, 1861, were $144,705 57
August, 1860 166,540 84

Decrease $21,835 27

Corrected earnings for the previous month, $145,389 19.

The earnings of the Chicago and Rock Island Railroad for August, 1860, were $133,455
August, 1861 119,395

Decrease $14,060

The earnings of the Cleveland and Toledo Railroad for August, 1861, were $60,928
August, 1860 65,910

Decrease $4,982

The net receipts of the New York and Harlem Railroad for August, 1860, were $104,941 18
1861 92,033 46

Decrease $12,907 72

The expenses of working this road have been largely reduced, by economy and reduction of service, nearly equal to the above falling off in business. The new arrangement for funding the over-due bonds of the Company is going on successfully. About $75,000 have already been exchanged. The new bonds are abundantly secured.

The Milwaukee and Prairie du Chien Railroad makes the following satisfactory exhibit:

For passengers	$6,718 89
For freight	26,894 14
For sundries	1,814 98
Total for last week in August, 1861	$35,428 01
Do. do. do. 1860	15,057 17
Increase	$20,370 84
Earnings for August, 1861	90,461 33
Do. do. 1860	60,228 67
Increase	$30,232 66
Earn'gs for first eight months of 1861	$646,847 88
Do. do. do. 1860	360,660 34
Increase	$286,187 54

The receipts of the Grand Trunk Railway of Canada for the week ending Aug. 24, were $50,267 17
Week ending Aug. 25, 1860 60,734 29

Decrease in 1861 $10,467 12
Total traffic from July 1st, 1861 $462,443 35
Corresponding period previous year 435,843 56

Increase $26,599 79

The receipts of the Grand Trunk Railway of Canada for the week ending August 31st, 1861, were $58,033 04
Corresponding week, 1860 66,536 54

Decrease $8,503 50
Tot. traffic from July 1, 1861, to date $520,476 39
Corresponding period, 1860 502,380 10

Increase $18,096 29

The earnings of the Toledo and Wabash Railroad for August, 1861, were $137,222 54
August, 1860 122,784 97

Increase $14,437 57

The earnings of the St. Louis, Alton and Chicago Railroad in August, 1861 were $103,189 46
August, 1860 103,635 11

Decrease $445 65
First eight months of 1861 $635,045 38
" " " " 1860 597,267 12

Increase $37,778 26

For the last week of August the earnings were $57,540 13, being the largest of any single week in the history of the road. The Cincinnati *Gazette* says:

During the past few weeks the demand for cars along the route has greatly exceeded the ability of the Company to supply, and the amount of freight now offering or awaiting shipment is without any precedent. Had the equipment of the road been as large as required, or as could have been successfully employed, the revenue of the past month would not have fallen below $250,000.

Journal of Railroad Law.

PURCHASES OF RAILROAD CORPORATIONS FOR OTHER THAN OBJECTS ALLOWED BY ACT OF INCORPORATION. WHEN SUCH PURCHASES ARE SUSTAINED, AND THE RIGHTS OF OTHER PARTIES PROTECTED.

The Northern Railroad Company was incorporated in 1845 to construct, maintain and operate a railroad from Ogdensburg to Lake Champlain. The terminus on the lake is at Rouse' Point. In 1852, one James F. Church became the purchaser in his own name of fourteen barges, and had them registered in his name, and used and employed them in a transportation line from Rouse's Point to the city of New York, known as Church's Ogdensburg Railroad Line." The money for the payment of those boats was furnished to Church by the Railroad Company, with directions to purchase the barges in his own name; and at the time of such purchase and during all the time Church ran and used the barges, he was the station agent of the Railroad Company and in its employ, and it received the profits and defrayed the losses of the transportation line.

Prior to March, 1852, one Edwin Le French who was the station agent of the Railroad Company at Ogdensburg, and a British subject, purchased the British steamer Boston, at Quebec. She was registered and enrolled in his name as owner in the Canada offices, and French made and delivered to the corporation a declaration that he held the property in trust for it. The corporation was to have all the profits from running the steamboat, and was to sustain all the losses incident thereto.

Subsequently to these transactions, the company being indebted to the plaintiff in certain sums, it was agreed that to secure the payment of this indebtedness, the barges should be conveyed to the plaintiff, and the steamboat should be conveyed to one Dickinson, free from all incumbrances. Dickinson and the plaintiff were then to charter the steamboat and barges to the president of the company. If the sums due to the plaintiff were paid on or before the 1st of June, then next the plaintiff agreed to procure a conveyance from Dickinson of the steamer, and would himself convey the canal boats to such persons as the company should appoint. It was also agreed that if there was a default in the payment of the amounts to grow due it might be lawful for the plaintiff to cause the steamboat and canal boats to be sold in order to satisfy his debts. The steamboat was sold on the 23d of Oct., 1855, to one Crane, as the highest bidder, for $11,500.

The referee before whom the case was tried, found as conclusions of law that the plaintiff was the owner of the boats, or barges, therein mentioned; that the defendants wrongfully converted the property; and that the plaintiff's damages by

means of the premises were $8,400. Upon appeal the judgment was reversed at a general term of the New York Supreme Court in the 4th District, and the plaintiff then appealed to the Court of Appeals. At the time the steamboat was sold, the company's effects were in the hands of mortgage trustees, who refused to give up the steamboat at first; but finally they did so upon an arrangement made by the trustees with the plaintiff's counsel. The following are extracts from a very long opinion delivered at the decision of the case by the Court of Appeals.

COMSTOCK, Ch. J.—The mortgage given by the Company, dated the 7th of April, 1854, to secure its issue of bonds, was upon its real estate, railroad, bridges, ferries, etc., locomotive engines, cars, tenders, shops, tools and machinery, and "all other personal property whatsoever in any way belonging or appertaining to the said railroad of the said company." The inclination of my mind is that the canal boats in question were not included in this description. The boats were used and run in connection with the road, forming that connection at the point where the road terminated. They were, in a general sense, accessory to the business of the road; but I very much doubt whether they belonged or appertained to it, according to any interpretation which we can place upon these terms. Assuming this to be so, I think nevertheless, that the trustees to whom the mortgage was given may be looked upon as representing the rights of the railroad company for any purpose material to this case. In October, 1855, the company was in default in respect to the interest due upon the bonds secured by the mortgage, and they executed to the trustees a deed of surrender of all the mortgaged property, whether real or personal. This deed certainly conveyed nothing which the mortgage did not embrace; but under it the trustees or mortgagees took possession of and controlled these boats, and this was done with the consent of the company through its president. After this arrangement the boats were run by the agent Church, under the direction of the trustees; and they were held and used in this manner at the time when it is alleged that the defendant refused to deliver them up to the plaintiff. * * * *

The plaintiff had a security upon these boats in the nature of a mortgage. They were conveyed to him on the 30th August, 1854, by Church on the procurement of the company, and pursuant to a previous agreement between the plaintiff and the company dated the 4th of August, 1854, by which he agreed to pay to them or their appointee, on payment of the sums and liabilities which the agreement specified. It needs no argument to prove that this arrangement constituted a mere mortgage, and that the interest of the plaintiff would cease when his claims were satisfied. Much has been said on both sides about the supposed illegality of the original purchase of these boats by the company, through and in the name of its agent Church. It has been urged that the purchase was beyond the powers of the company; that the transaction was consequently illegal, and that the illegality is not cured by using the name of an individual in the purchase, or by the intention that he should hold the title; and it is also urged that as the corporation for the reason suggested, could not possibly acquire the title, it could not convey or mortgage, or procure it to be conveyed or mortgaged to the plaintiff. I take the view most favorable to the plaintiff on this question, and concede that the conveyance to him was effectual and is to be maintained according to the exact terms and conditions on which it was given. Nor have I the slightest doubt that this is the correct view. Much has been loosely and inconsiderately said about the incapacity of corporations to acquire property outside of the precise purposes specified in their charters. To all propositions of this nature the short answer is, that corporations sometimes do actually purchase and hold property under that condition. If a railroad company buys and pays for a horse or a boat, and the vender delivers the chattel, the corporation will own it and can sell and mortgage it, although its charter cannot be pleaded in strict justification of the purchase. This is a conclusion of common sense and common honesty, which no legal subtlety or refinement can refute. It cannot be true that the vender of a chattel, who sells and delivers it to a corporation and receives his pay for it, can allege that he has never sold it, on the mere ground that it was unlawful for the corporation to buy it. Nor can it be true that the title is lapsed or lost on any such ground. These boats therefore belonged either to the railroad company or to Church, their agent, in whose name they were purchased; and it is not material to inquire which was the owner according to the forms of that transaction, because the transfer to the plaintiff was the act of both of them.

The defendant denied that the plaintiff should be credited with the sum of $5,396 86, advanced by him to pay the last draft drawn for the original purchase money of the Bosten, and which the company had accepted, on the ground that the purchase of the steamer by the corporation was *ultra vires* and illegal; and he insisted that the plaintiff knowing all the facts, made this advance in pursuance and consummation of that purchase. But the court held that the position of the defendant could not be maintained. Conceding that the company being simply a railroad corporation, ought not according to its charter to purchase and own a steamboat, it nevertheless did purchase one in the name of another person, and it took the possession and had the use of the property. If the purchase of the steamboat involved any breach of the public law, the corporation alone was guilty, because all the restraints of the statute or the common law affecting the transaction are imposed upon it alone.

The sum of $11,500 received by the sale of the steamboat, the plaintiff insisted ought not to be allowed in payment of, or the reduction of his claim on the ground that the agreement of August 4, 1854, was illegal. But the court held, that if the contract was illegal in such a sense that the plaintiff, having sold a part of the mortgaged property, is not accountable for the proceeds. The same illegality would prevent the enforcement of the contract in his favor as to another part of the same property. Contracts with corporations made in excess of their powers, which are purely executory on both sides, and where no wrong will be done if the parties are left in their previous situation, should not be enforced, because such contracts contemplate an unauthorized diversion of corporate funds, and, therefore, a breach of private trust. But the executed dealings of corporations must be allowed to stand for and against both the parties when the plainest rules of good faith so require.

The referee allowed the full value of the property against the defendant; this the court held to be an error, and therefore affirmed the judgment of the General Term.

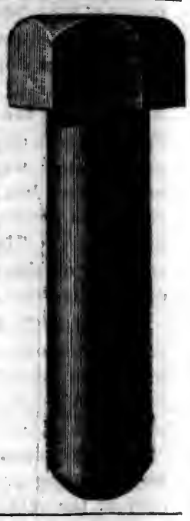
LOCOMOTIVES FOR SALE.



THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.
WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut SUPERIOR TO ANY made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish SAMPLES and PRICE LIST on application.

New York, Saturday, September 21, 1861.

Pennsylvania Coal Company.

This company is a consolidation of the Washington Coal Company and the Pennsylvania Coal Company. Each were chartered April 16, 1838, the former with authority to construct a railroad from the Delaware and Hudson Canal to the Wyoming coal mines, and the latter with authority to construct an extension to the North Branch Canal and the Susquehanna river. The act for the union of the two companies was passed April 12, 1849, and the consolidation consummated on the 16th of May following, the Pennsylvania Coal Company assuming a contract made between the Wyoming Coal Association and the Delaware and Hudson Canal Company, dated August 31, 1847, for the perpetual use of one-half of the coal capacity of the canal, paying tolls therefor based upon the price of coal each year at the terminus of the canal on the Hudson river. Construction was commenced in November, 1847, and the road completed and brought into use in June, 1850. The road of this company consists of two tracks, diverging in some parts nearly a mile from each other—the one track for the conveyance of coal, and the other for the return of the empty cars. Each track is a series of inclined planes—the trains being drawn up the steep and short ones by stationary engines, and running down the long ones by their own gravity. The length of the road, from Port Griffith to Hawley, is 47 miles.

The capital stock authorized and paid in, is $3,200,000. The funded debt of the company, consisting of $600,000 first mortgage 7 per cent. bonds, dated August 7, 1851, and payable August 7, 1861, were retired at maturity. The company has therefore no bonded debt. The floating debt of the company is $199,754 47—composed of bonds and mortgages payable, $83,863 54, and bills and accounts payable, $115,890 93. Cost of road and equipment, $2,000,000.

The business of the company for the fiscal year ending May 1, 1861, was as follows:

Sales of coal		$2,548,122 27
Transportation Co.'s road, etc.		57,081 53
Coal on hand May 1, 1861		136,722 20
Total		$2,741,926 00
Coal on hand May 1, '60.	$777,797 81	
Road expenses	369,370 56	
Canal freight	673,880 96	
Tolls to Delaware and Hudson Canal Co.	341,115 71	
Port Ewen expenses	50,592 81	
State tax	11,200 00	
Interest on bonds	42,000 00	
Salaries and expenses	34,981 94	
Coal yards, harbor expenses, etc.	149,263 43	
		2,450,203 22
Profit for the year		$291,722 78

—being about nine per cent. on the capital stock, from which two semi-annual dividends of three and a-half per cent. each have been declared. Annexed is the balance sheet of the Company:—

Capital stock		$3,200,000 00
Seven per cent. mortgage bonds		600,000 00
Bonds and mortgages payable		83,863 54
Bills and accounts, payable, etc.		115,890 93
Balance, made up as follows:—		
Balance per last report.	$471,012 76	
Earnings, 1860, per statement	291,722 78	
	$762,735 54	
Dividend August 16th, 1860	$112,000	
Dividend Feb'y 16, 1861	112,000	
Cred. real estate	20,000	
	244,000 00	
Balance		518,735 54
Total		$4,518,490 01

Cost of railroad and equipment		$2,000,000 00
Real estate, docks, etc.		1,216,555 92
Canal boat		178,217 78
Barges, steamboats, tools, etc.		34,000 00
Opening mines		150,295 51
Balances in the hands of agents		13,599 93
Balances due from the Delaware & Hudson Canal Company, on business of 1850 and 1851, not including interest, sundry unsettled claims, etc.		25,608 13
Disbursements on account of business of 1861, etc.	$194,062 04	
Cash on hand, May 1st, 1861	157,403 19	
Loans receivable and bonds paid and cancelled	102,274 62	
Bills and accounts receivable	309,750 69	
Coal on hand	136,722 20	
		900,212 74
Total		$4,518,490 01

The report states that the business of the company is progressing with regularity and economy, and the works continue to be improved without charge to construction. The directors anticipate a decreased consumption of coal from the depressing influence in certain branches of industry of the political disturbances of the country.

The amount of coal sent to market since June, 1850, has been 5,535,812, or an average of 503,256 tons per annum. The sales of coal during the same time have amounted to $21,292,182, an average of $1,935,653. The profits from other sources have been $550,871, an average of $50,079. The average value of coal on hand at the close of each financial year has been $150,660. The total income from all sources including coal on hand during the past eleven years has been $23,500,316, or an average of $2,136,393. The expenses of all kinds $20,085,833, an average of $310,408. The dividends declared 68½ per cent., an average of 6.7. The amount disbursed has been $2,196,280, an average of $199,662 per annum. In 1850-'51, the total income from all sources was only $414,751, netting $31,413. During this and the succeeding year no dividends were paid, although the gross receipts in the latter year had reached $1,119,539, netting $171,872. The average rate of dividends since the first dividend was declared in 1852-'53, has been 7.7, and

the average amount disbursed in dividends, $244,-031. The mortgage bonds of the Company having been retired, the expenses will be less hereafter by $42,000, the amount of the interest heretofore paid. Upon the cessation of hostilities, and the consequent return of prosperity to this as well as all other branches of business, the stockholders of this company may have reason to expect the dividends upon their investment to be largely increased.

President—JOHN EWEN.

Directors—Jonathan Thorn, Wm. R. Griffith, Isaac L. Platt, John Q. Jones, John Ewen, Charles Morgan, Geo. L. Brown, Thos. W. Pearsall, and Wm. F. Havemeyer.

Treasurer—GEO. H. HOYT.

Secretary—EDWARD H. MEAD.

Pittsburg, Fort Wayne and Chicago R. R.

The re-organization of this company is soon to be effected under special enactments of the Legislatures of the States through which the road runs, viz: Pennsylvania, Ohio, Indiana, and Illinois. Legislation for this purpose was had in the former State in the spring of 1860, and in the others in March, 1861. These acts were published by us in the full in April and May last. We gave also in a recent number a history of the roads commencing the line, with the date of the opening of the different sections, before and since the consolidation of the companies, together with a description of the bonds, and the plan for the re-organization of the company, and adjustment of its liabilities, agreed upon in October last by a committee of bondholders and stockholders, which plan we believe has been very generally approved of by the parties interested. The sale of the road will take place at Cleveland, Ohio, on the 24th of October next. In the meantime, holders of the bonds of the original companies, of the various classes, and of the consolidated company, who have subscribed to the agreement of re-organization are required to deposit their bonds with John Ferguson, trustee, No. 35 Pine St., this city, in conformity to said agreement. Those who have not subscribed to the agreement are requested to do so without delay. Persons omitting to subscribe, or to deposit their bonds in season for the use of the purchasing agents at the sale, will be liable to be excluded from participating in the purchase. The road is to be sold to Samuel I. Tilden, J. Edgar Thomson, J. F. D. Lanier, Samuel Hanna, and L. H. Meyer; and the old Ohio and Pennsylvania, Ohio and Indiana and Fort Wayne and Chicago first mortgage bonds and accrued interest become merged in a new issue of $5,250,000 seven per cent. sinking fund bonds, secured by a first mortgage over the whole road—equal to about $11,000 per mile. A second mortgage of like amount secures bonds to be awarded to the holders of the present second mortgage bonds of the old companies and a third mortgage of $2,000,000 will secure the interest on bonds to be given to the holders of the old real estate bonds and other classes of old indebtedness. The interest on the bonds to be issued under this third mortgage will only be paid in case the earnings of the road prove sufficient for the interest and sinking fund for the first and second issues. Stock for $6,000,000 will only draw six per cent. dividend, the balance of the net earnings going to redeem the first issue of bonds.

The road is 467 miles in length, extending from Chicago to Pittsburg, completing, in connection with the Pennsylvania Railroad, the Great Western line from Philadelphia to Chicago. The cost of the road and equipment to the date of the last semi-annual report, June 30, 1861, was $16,700,-407 25. Capital stock, $6,266,367 12. Funded debt, $10,192,155. Floating debt, $1,757,273 12. The earnings for the first six months of the year were $1,376,421 48, against $1,022,295 81 in the corresponding period of the previous year—being an increase of $534,125 67; with an increase in expenses of only $104,561 41—making the increase in net earnings $249,654 41. The net balance carried to credit of income account was $95,785 66. The following is a statement of the cost, earnings, expenses and net income since the consolidation, August 1, 1856:

	Cost.	Gross earnings.	Operating expenses.	Net earnings.
1856*.	$12,764,894	$795,579	$273,434	$522,145
1857..	14,048,759	1,660,425	1,036,011	625,414

Totals.....		$9,700,999	6,001,782	3,500,217
Average.....		1,940,200	1,200,356	700,043

* Five months. † Six months—reckoned together as one year in deducing the average.

Railroad Earnings--Weekly.

The receipts of the Chicago and Northwestern Railroad for the first week in September, 1861, were $15,071 85
Do. 1860 ..... 16,705 99

Decrease in Sept., 1861 ..... $1,634 14

The receipts of the Morris Canal for the week and season, compared with those of 1860, have been:

Total to Sept. 1, 1860 ..... $216,705 22
Week ending Sept. 8, 1860 ..... 10,403 48
$227,113 70
Total to Aug. 31, 1861 .. $162,693 94
Week ending Sept. 7, 1861 8,292 92
170,986 96

Decrease $56,126 92

The earnings of the St. Louis, Alton and Chicago Railroad for the week ending Sept. 7, 1861, were $22,065 00
Do. 1860 ..... 25,290 14

Decrease in 1861 ..... $3,225 14
Total since 1st January, 1861 ..... $657,110 38
Do., 1860 ..... 622,557 26

Increase $34,553 12

The earnings of the Milwaukee and Prairie du Chien Railroad, for the first week in September, 1861, were $29,884 40
Do. 1860 ..... 32,610 50

Decrease $2,726 10

The receipts of the Grand Trunk Railway of Canada for the week ending Sept. 7, were $50,275 79
Corresponding week, 1860 ..... 73,244 49

Decrease in 1861 ..... $22,968 70
Total traffic from July 1st, 1861 ..... $570,752 18
Corresponding period previous year. 575,624 59

Decrease $4,872 41

The Cleveland and Toledo Railroad earned the first week in Sept., 1861 ..... $16,558
First week in Sept., 1860 18,008

Decrease $1,450

The earnings of the Great Western Railway of Canada for the week ending September 6th, were $43,706 53
Corresponding week of last year 50,507 82

Decrease $6,801 29

The earnings of the Galena and Chicago Railroad the first week in Sept., 1861, were. $38,308 48
September, 1860 ..... 60,469 09

Decrease $22,160 61
Second week in September, 1861 ..... $51,437 00
Do. do. do. 1860. ..... 56,309 00

Decrease $4,872 00

The earnings of the Michigan Central Railroad, the first week of Sept., 1861, were ... $44,758 57
Do. 1860 ..... 59,172 18

Decrease $14,413 61

The earnings of the Chicago and Rock Island road, the first week in Sept., 1861, were.. $35,757
Do. 1860 33,191

Decrease $2,566

Railroad Earnings--Monthly.

The earnings of the Indianapolis and Cincinnati Road for July were as follows:

From passengers $16,981 83
" freight 10,035 21
" mails 925 00
" express 488 54
$28,430 42

The earnings of the Chicago and Northwestern Railroad in August, 1861, were $59,648 88
August, 1860 ..... 49,142 17

Increase $10,506 71

The earnings of the Michigan Central Railroad for August, 1861, were $195,539 75
August, 1860 ..... 144,982 52

Decrease $48,333 23

The earnings of the Erie Railroad for the month of August, were $418,674 58
August, 1860 ..... 477,883 34

Decrease $59,208 76

The following is an approximate statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of August, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$140,710 96	$112,561 67
" Passengers	88,694 16	73,000 80
" Express	2,700 00	2,700 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 34	7,083 33
" Miscellaneous..	688 75	682 98
Total	$247,702 20	$203,853 28
Increase		$43,848 92
Earnings from Jan. 1, to Aug. 31, '61.		$1,804,397 93
Do. do. do. '60.		1,380,181 08
Increase		$424,216 85

The earnings of the Norwich and Worcester Railroad for August were:

	Passengers.	Freight.	Total.
1860	$14,680	$22,578	$37,258
1861	15,928	13,603	29,531
Decrease			$7,727

La Crosse and Milwaukee Railroad.

The plan proposed for the purchase of this road, and the organization of a new company by the purchase, has been receiving assents during the past week, and we understand that it has already met with the approbation of a sufficient number of the bondholders to carry it into effect. Other bondholders can become parties to the agreement at any time previous to the 21st inst. Whenever the road is sold, it is the intention of the party represented by the plan to purchase it for the benefit of themselves and associates; and they think they will be enabled to do this by having more than three-fourths of all the land grant bonds, which are an equivalent for specie in paying for the road. As the law new stands, the first issue, $1,990,000 are to be first paid, principal and interest, in all say $2,500,000, And if the road does not sell for a greater sum than $2,500,000, the medium numbers—1,991 to 2,500—and the high numbers—2,501 and upwards—get nothing from the foreclosure and sale, except such benefits as they derive by being associated as purchasers.

The new company will be organized upon a basis of $8,200,000. The road, it is expected, will earn this year over $1,100,000; allow 60 per cent. for operating expenses, and the net income will be over $440,000, or nearly 7 per cent. on $7,000,000. If the earnings continue to increase next year as they have the present year over the last, the road will earn in 1862 7 per cent. on the whole cost of $8,200,000.

It would seem to be the pecuniary interest of the bondholders, who are the real owners of this valuable property, to give the plan their careful attention.

Michigan Central Railroad.

We learn from the Detroit *Free Press* that this company has leased the northern division of the Louisville, New Albany and Chicago Railroad, extending from Lafayette, Indiana, to Michigan City, and will repair and run it. This section is ninety-three miles in length. The Central Road pays a per centage for its use, keeps it in running order, and furnishes the rolling stock.

Journal of Railroad Law.

RAILWAY PROPERTY IN THE HANDS OF A RECEIVER NOT LIABLE TO BE SOLD ON A JUDGMENT AT LAW.

The Pittsburg *Legal Journal* gives a report of a decision by the District Court of Alleghany County, Pennsylvania, in the case of James Robinson *vs.* The Ohio and Pennsylvania Railroad Company. The point decided was: that property in the hands or custody of a Receiver appointed by a Court of Chancery, is not liable to seizure or sale under execution on a judgment at law. The following is an abstract:

RULE to show cause why levy, &c., should not be set aside.

Hampton, for the rule.—1st. That the property levied upon is the General Business Office of the said companies in the city of Pittsburg, is necessary and convenient for the management of the affairs of the said companies, is part of said railroads, and as such is not the subject of levy and sale under the law of Pennsylvania. 2d. That all the rights, powers, privileges, and liability of said Ohio and Pennsylvania Railroad Company were by the Legislation of the States of Ohio and Pennsylvania transferred and vested in the Pittsburg, Fort Wayne and Chicago Railroad Company, prior to the making of the levy in this case, and that prior also to the same, the property in dispute, and all other property of said Pittsburg, Fort Wayne and Chicago Railroad Company, was given into the custody of a receiver, under an order of the Circuit Court of the United States for the Northern District of Ohio, and said receiver, (W. B. Ogden,) was duly recognized as such in the State of Pennsylvania, by an order in equity of of the Circuit Court for the Western District of Pennsylvania, and entered into possession of the property levied upon, and has ever since been in the possession thereof. That by reason of the appointment of said receiver, and his having the custody of said property, he cannot be disturbed in the enjoyment thereof by a sale.

The opinion of the Court was delivered July, 1861, by

WILLIAMS, J.—This is a rule to show cause why the levy, condemnation and all subsequent proceedings thereon should not be set aside.

The facts material to the determination of the question raised by this rule are as follows;

On the 2d of May, 1856, James Robinson, the plaintiff, instituted an action of assumpsit in this Court against the Ohio and Pennsylvania Railroad Company, and on the 20th of October, 1857, obtained an award in his favor against the said company for the sum of $6,728; upon which a writ of *fi. fa.* to November term, 1860, was issued, and on the 16th of October, by virtue of said execution, a levy was made on a lot of ground situated on the north side of Fifth street, in the Third Ward of the city of Pittsburg, having a three story brick building erected thereon, which was condemned by the sheriff's inquest on the 27th of December, 1860, and thereupon a writ of *vend. ex.* was issued to January term, 1861, for the sale thereof.

The property levied on was purchased by the Ohio and Pennsylvania Railroad Company for the purpose of establishing therein a General Office for the transaction of its business, and at the date of the institution of the plaintiff's action was occupied as the Principal Office of the company, with the exception of the cellar and first floor, which had been previously leased to Robinson & Co. for a carpet store, and who are still the lessees thereof.

By articles of agreement bearing date the 6th of May, 1856, ratified by the Ohio and Indiana Railroad Company, June 24th, 1856, by the Fort Wayne and Chicago Railroad Company, June 26, 1856, and by the Ohio and Pennsylvania Railroad Company, the 2d of July, 1856, the said companies, in pursuance of Acts of Assembly of the several States by which they were incorporated, were consolidated under the name and style of the Pittsburg, Fort Wayne and Chicago Railroad Company, and the title of the property levied on (inter alia) thereby became vested in the Pittsburg, Fort Wayne and Chicago Railroad Company, subject to the debts, liabilities, and duties of the Ohio and Pennsylvania Railroad Company to the same extent as if said debts, liabilities and duties had been contracted by the said Pittsburg, Fort Wayne and Chicago Railroad Company. Upon the ratification of the agreement for the consolidation of the several companies as aforesaid, the Pittsburg, Fort Wayne and Chicago Railroad Company took possession of the property levied on and occupied the same, with the exception of the part leased to Robinson & Co., as its Principal Office, and continued to occupy the same until the 18th of January, 1860, when Wm. B. Ogden, who had been appointed receiver of said Pittsburg, Fort Wayne and Chicago Railroad Company by the Circuit Court of the United States for the Northern District of Ohio, and also by the Circuit Court for the Western District of Pennsylvania, in certain proceedings in equity in said Courts against said company at the suit of certain creditors thereof, took possession of the lot and building levied on, together with all the property, real and personal, belonging to the said company, and at the date of the levy in this case had, and still has, the custody and possession of said property as receiver as aforesaid, and occupies the same as a Principal Office for the transaction of the company's business.

Is this property liable to be seized and sold on plaintiff's execution while it is in the custody of the receiver? Under the provision in the consolidation acts the plaintiff's judgment must be regarded and treated as a judgment against the Pittsburg, Fort Wayne and Chicago Railroad Company, and his right to seize and sell the property levied on is the same as it would be if his judgment and execution were directly against the company. Is the property then liable to seizure and sale on a judgment and execution of this Court while it is in the possession of the receiver appointed by the Circuit Court?

The case of Wiswall *vs.* Sampson, 14 How. U. S. 52, is decisive of this question. It was there ruled that where real estate is in the custody of a receiver appointed by a Court of Chancery, a sale of the property under an execution issued by virtue of a judgment at law, is illegal and void, and passes no title to the purchaser. A mortgagee or creditor having a prior lien on the property, if desirous of enforcing it against the estate after it has been taken into the care and custody of the Court, by the appointment of a receiver, must first obtain leave of the Court for this purpose, and the Court will permit him to be examined *pro interesse suo*, and direct a master to inquire into the circumstances, whether his judgement is an existing unsatisfied demand, or as to the priority of the lien, &c., and take care that the fund be applied accordingly. Where the law gives priority of lien it will be protected and perserved in Chancery. The plaintiff, therefore, if his judgment is a prior lien on the property, is not without remedy as the case cited clearly shows. It may be that a sale on his writ would occasion no interference with the possession of the receiver, and no contempt of the authority of the Court by which he was appointed, but this Court having the control of its own process ought not to permit it to be used for an illegal and void purpose, and the rule must, therefore, be made absolute.

This view of the law renders it unnecessary to consider the question presented by the facts of this case, viz: Whether under that provision of the defendant's charter, which makes it the company's duty to establish a Principal Office at some point on the line of the road, the property purchased and occupied by the company as a Principal Office for the transaction of its business, though not on the immediate line of the road, but convenient thereto, is liable to be seized and sold on plaintiff's execution?—Perhaps it would not be difficult to show there is the same reason for holding the Principal Office of a Railroad Company exempt from levy and sale on execution as there is for the exemption of the rolling stock and other equipments of its road. But it is not necessary to discuss this question. Rule absolute.

In the Supreme Court in Buffalo, on the 3rd inst., in the case of the New York and Erie Bank against A. D. Shepard & Co. of Albany, and Wm. B. Mann & Co. of Buffalo, a question was decided of some importance to bankers and others. The action was on two drafts drawn by Mann & Co. on Shepard & Co. It appeared that Mann & Co. were employed by Shepard & Co. to borrow money in Buffalo and remit to Shepard & Co., and accordingly applied to the bank and procured the drafts in suit, to be discounted, requesting the proceeds in drafts on New York. The bank accordingly paid the proceeds to Mann & Co. in sight drafts on New York, charging ½ per cent. premium, that being the usual rate of exchange on New York. The defendants claimed that this charge for exchange constituted usury, and set up

the same as a defense to the discounted paper. The Court decided that these facts did not make out a defense, and ordered judgment for the plaintiff.

The Montreal Terminus Railway Company.

It will be remembered that an act was passed during the last session of Parliament incorporating a company under the above name, and authorizing them to do what the Grand Trunk has hitherto failed or been unable to get done. We mean the bringing the railway from Point St. Charles into the city, so as to accommodate our merchants, the travelers, and the public. The prospectus of the company has just been published, and operations will be commenced as soon as the capital required by law can be raised. The terminus is to be at the place first proposed—McGill street—the City Council giving $50,000 toward the cost of the land required. Grey Nun street is to be widened from 44 to 70 feet, and a new street is to be opened of 70 feet wide in rear of the station, and the east side of McGill street. The Directors of the Grand Trunk Company have concurred generally in the proposed arrangements and plans. The capital stock is to be £200,000, divided into shares of £50 each; Directors to be elected when ever £50,000 shall have been subscribed, and ten per cent. thereon paid. Most of the land to be acquired belongs to the Hon. John Young and the Hon. Mr. Galt, and these gentlemen have intimated their readiness to dispose of it to the company at a price to be fixed by arbitration, and to accept payment thereof in shares. It is proposed that the Grand Trunk should use the road, paying for such use a scale of tolls calculated on the basis of the traffic of last year, to yield a fitting return for the capital invested. The revenue to be obtained from the proposed enterprise is estimated as follows:

The number of passengers inwards and outwards at Point St. Charles Station, in 1860, was, as nearly as possible, 120,000; the local freight, 60,000 tons, and the inward freight 120,000 tons.

If, therefore, 20 cents be charged for each passenger, out and in, it will give $24,000
If all the outward freight and half of the inward freight is charged at 25 cents per ton, this will give 30,000

Total $54,000

There would be no charge for management except keeping the track in order, nor is there any plant to be provided.

The Grand Trunk have the power to purchase the property at any time on giving the Terminus Company 6 months' notice, and paying the outlay, with first dividend and bonus. The plans are at the Merchants' Exchange, where the books of subscription for shares are also open, as well as at Dawson's book store and Molsons' Bank. The provincial directors are men of the highest standing in the city—merchants of large means and influence, in whose hands the speculation is sure to succeed.—*Montreal Pilot.*

Bridges Across the Thames at London.

The following table shows the length, area, and cost of each of the metropolitan bridges:

Bridges.	L'gth. feet.	Width. ft.	in.	Area. sq. feet.	Cost. £.	Cost per sq. foot. £.	s.	d.

(1) Operated under a lease by the Malden and Melrose Railroad Company, who furnish the entire equipment. The total income given is the amount received for rent for six months.

(2) On $70,000 of stock.

(3) The entire road owned by this Company is under lease to the Union Railway Company, who pay as rent therefor nine per cent. per annum on the capital stock of this Company, the interest on its debt, and two per cent. per annum on the mortgage debt, as a sinking fund for its payment. The road being equipped, operated and kept in repair by the Union Railway Company, reference is made to its return for replies to the interrogatories, in the blank form of return furnished by the Secretary of the Commonwealth, under the heads of *Cost of Equipment, Earnings, Expenditures for Working the Road,* and *List of Accidents.*

(4) Not in operation one year.

(5) No return received.

(6) Road not completed.

(7) The Dorchester Railway Company was organized under the provisions of chapter 279 of the acts of the year 1856, and purchased the corporate property of the Dorchester Avenue Railroad Company at a sale ordered by a decree of the Supreme Judicial Court, in January, 1858. The road has been leased to Messrs. Gore, Rose & Company, of Boston, who purchased the entire equipment, and have run the cars and the line of coaches connected therewith, since June 1, 1858, on their own account, paying a rent equal to eight per cent. per annum on the amount of stock outstanding, and also the taxes and insurance on the buildings. The amount given as "cost of equipment," is for lands and buildings, and the amount given as "expenses of working the road," is for office expenses.

(8) This Company own no equipment or buildings; the road has been leased to Messrs. Gore, Rose & Company, of Boston, who run the cars on their own account, paying to this corporation a rent equal to eight per cent. per annum on the amount of stock outstanding.

(9) Road not finished.

(10) This road is leased, the lessees equipping and operating it.

(11) The amount of capital stock originally issued, was $68,000, and the Company then owned 6,685 feet of road on Broadway in addition to what is herein specified—which Broadway track has been disposed of to the Medford and Charlestown Horse Railroad Company, for which $18,000 of the capital stock of this Company has been returned into the treasury; leaving the present capital, $50,000. The Malden and Melrose Railroad Company are running the Somerville Road upon an agreement to keep the road in repair, and to pay whatever the business will afford for its use.

(12) Road not completed.

(13) The roads operated by this Company are owned by the Cambridge Railroad Company and the Waltham and Watertown Railroad Company; and the number of passengers carried includes those carried over the Cambridge Road to Watertown, Brighton, and West Cambridge.

(14) This road is leased for the sum of $1,500 per annum to the Union Railway Company who operate it and own the entire equipment used thereon; the amount given as "cost of equipment," is for land and buildings.

(15) The Company own no equipment, and (the road being leased) it is unable to give the items concerning its business.

(16) This road is leased to, equipped and run by the Metropolitan Railroad Company; the amount given as "cost of equipment," is for land and buildings; and the item given as the "expense of working the road," is for incidental expenses. The assets consist of 20 shares of Company's stock.

(17) Road not completed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* —) signifies "nil." Running *dots* (....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, September 21, 1861.

Share and Money Market.

The share market the past week has been steady, with limited transactions. Prices have slightly receded, although the market is firm. The decline has been owing, in part, to the very large payments to the Government loan, and to an unexpected demand for exchange for the remittance to England of funds held by our Banks on Southern account, to prevent their seizure by our Government. The disturbance is regarded as only temporary. Money is still abundant, although rates are somewhat increased. The earnings of our railroads are on the whole well maintained, indicating our active internal commerce. This subject is so well set out in the recent Circular of Messrs. Hallett & Co., that we tranfer a portion of it into our columns.

Foreigners, particularly Englishmen, have very exaggerated ideas of the injurious effects of the rebellion upon the trade and prosperity of the Northern States, from supposing that they are suffering all the horrors and disasters of an intestine war. This is a great mistake. To the Northern States, the war is as if it were waged upon foreign soil, and hemmed in from the sea by a powerful fleet. The Rebel States contributed in no way to the military or naval strength of our government. They produced one great staple, which the North took and sold, supplying the producers with their clothing, a considerable portion of their food, nearly all the luxuries, and the greater part of the necessities of life. There was never a more complete, rounded and independent nation than were the Northern States before the rebellion. They were no more dependent upon the South than Great Britain is upon China, nor half so much so as it is upon India. When the rebellion broke out, the trade with the seceding States instantly ceased. The Northern States were in the position of a merchant who had lost several good customers, but who, with a little economy and the growth of his business, very soon finds himself in as comfortable a position as ever. The increase of the population of the Northern States will, in a very few years, give us a trade fully equal to that withdrawn by the South, should the latter forever disappear. The increase of population in the loyal States from 1850 to 1860 was 6,492,048, while the total white population of the rebel States is only 5,450,711. The value of the trade of such increase is worth twice that of the whole South. This statement is conclusive proof of the recuperative energies of our people. In this connection, the tabular statement upon another page, of the population of the United States, possesses great interest.

The first effect of an intestine, or civil war, is the destruction of the internal trade of a country, for the reason that production ceases, and merchandise can not be safely sent over its highways. No rebel soldier has set his foot upon the soil of the free States, and their industries are pursued without any more apprehension of being interfered with on account of the war than those of Birmingham or Manchester. In proof of this, we give the following table of the earnings of all the railroad companies of the Northern States that report regularly their earnings, with those of the Erie Canal, for 1861, compared with corresponding periods for 1860. It will be borne in mind that the table embraces all the roads that are accustomed to report their earnings monthly, and are those that bear the most intimate relation to the internal trade of the country.

Roads.	1861.	1860.	Increase.
New York Central, 10 mos	$6,614,298	$6,098,252	$516,046
New York and Erie, 10 mos	5,091,403	4,583,975	508,428
Hudson River, 11 mos	1,843,263	1,870,784	*27,521
Cleveland and Toledo, 5 mos	372,492	353,071	19,421
Michigan Central, 8 mos	992,895	954,499	38,396
Galena and Chicago, 8 mos	992,842	743,597	249,245
Chicago and Rock Island, 8 mos	668,068	722,423	*54,335
Chicago, Burlington & Quincy, 8 mos	838,655	931,736	*93,081
Illinois Central, 8 mos	1,845,397	1,615,786	229,610
Milwaukee & Prairie du Chien, 8 mos	646,847	360,660	286,187
Milwaukee and Lacrosse, 7 mos	524,752	320,184	204,568
Toledo, Wabash and Western, 8 mos	627,540	566,705	60,839
Chicago, Alton and St. Louis, 8 mos	635,045	597,267	37,778
Pittsb., Ft. Wayne & Chicago, 8 mos	1,554,812	1,176,329	378,484
Philadelphia and Reading, 8 mos	1,844,060	1,951,971	*107,911
Chicago and Northwestern, 5 mos	333,132	230,482	102,650
Harlem, 8 mos	741,364	764,546	*23,184
Erie Canal, 5 mos	3,366,822	2,381,301	985,521
Totals	29,543,707	26,242,568	3,301,139

* Decrease.

The table shows that the earnings of the great lines of railroads and canals of the country, in this year of disasters, when, if we are to believe the statements that are coming to us by every steamer from abroad, our government is destroyed, anarchy triumphant, and our material as well as our political destruction sealed, are greater by nearly 13 per cent. than in 1860, a remarkably active and prosperous year. We commend this result, with some comparative statements of the condition of the internal and

foreign commerce of the country, to those with whom our utter ruin is a foregone conclusion. The activity of the internal trade of the country is strikingly illustrated by the enormously increased movement at the great centres. The receipts of grain at Chicago in 1861 are nearly four times as great as they were in 1859, and *fifty* per cent. greater than in 1860. The weekly deliveries, in bushels, at that port, since the commencement of the year, compared with those for 1859 and 1860, have been as follows:

Weeks.	1859.	1860.	1861.
1st	61,293	156,237	385,329
2d	79,201	231,862	469,107
3d	72,350	333,095	414,218
4th	84,971	321,288	344,615
5th	136,778	241,886	353,309
6th	133,298	288,130	372,500
7th	173,847	263,601	308,791
8th	112,056	188,588	313,461
9th	101,260	131,993	338,051
10th	84,794	230,129	274,076
11th	77,726	481,498	478,811
12th	162,185	299,575	484,041
13th	155,379	281,266	533,191
14th	181,914	442,743	296,470
15th	129,686	428,919	238,159
16th	168,945	529,977	462,712
17th	185,433	514,584	613,039
18th	213,831	836,293	902,820
19th	228,303	677,333	984,538
20th	322,136	817,163	1,088,210
21st	479,887	827,348	1,085,405
22d	514,634	675,103	1,326,146
23d	474,305	524,076	1,228,450
24th	369,795	675,512	1,097,967
25th	274,848	827,271	1,081,888
26th	292,421	960,345	1,124,945
27th	190,072	085,887	1,078,763
28th	304,170	996,983	1,638,607
29th	231,644	646,476	1,590,092
30th	126,829	669,123	1,610,060
31st	160,587	913,898	1,278,209
32d	356,763	1,212,795	1,268,209
33d	523,133	1,648,110	1,857,445
34th	853,900	1,345,137	2,235,219
35th	876,421	1,366,597	2,221,572
36th	824,690	1,306,278	1,835,768
Totals	9,735,582	22,866,088	35,214,294

The deliveries of grain at Tide-water, through the Erie Canal, from the opening of navigation to September 7th, have been upon a scale of corresponding magnitude, as will be seen by the following comparative statement of the movement for three years past. The flour is reduced to bushels at the rate of five to the barrel.

	1859.	1860.	1861.
	Canal opened April 15.	April 25.	May 1.
Flour, bbls.	226,539	436,155	648,160
Wheat, bush.	820,526	5,976,968	13,315,990
Corn, bush	1,700,036	10,347,246	11,051,874
Barley, bush.	160,675	84,306	210,524
Oats, bush.	2,550,932	3,900,465	3,072,834
Rye, bush	103,216	143,075	411,997
Total bushels	5,234,388	22,632,835	31,304,049

Our exports to foreign countries show a similar increase. The total exports to England and the Continent of breadstuffs from the United States for three years have been as follows:

	Flour, bbls.	Wheat, bush.	Corn, bush.
1861, to Sept. 1	2,703,790	29,005,866	11,810,565
1860, to Sept. 1	766,399	5,116,745	2,242,059
1859, to Sept. 1	157,855	497,855	367,532

We have only the means of giving the foreign export of the port of New York for 1861, compared with a similar period for 1860. These, from January 1st to September 7th, 1861, have been as follows:

Exports, exclusive of bullion	$91,246,351
Same time last year	63,843,917
Increase	$27,402,434

Our import trade shows still more strongly in our favor. The imports into this port since

January 1, exclusive of bullion, have been	$96,847,208
Same time last year	175,292,275
Decrease	$78,445,007
Add excess of exports	27,402,434
Add excess of imports of bullion	38,193,000
Change in our favor at the port of New York in eight months of the current year	$144,040,497

In a period of civil war or of great pecuniary distress, specie is the first thing to disappear. It has long since gone out of sight in the Southern States. At the North it was never so abundant as at the present moment. The Receipts of Foreign Gold and Silver, and of Gold from California, at New York, and at Boston for New York account, since January 1, have been as follows:

Foreign Gold entered at New York	$33,818,000	
Foreign Gold entered at Boston	7,636,000	
California Gold at New York	25,283,000	
Total income of Gold since January 1		$66,739,000
Against same time 1860:		
From California	$24,218,000	
From abroad	895,000	$25,110,000
Increased receipts since January 1		$41,629,000

The Exports of Specie from New York from

January 1, to present date have been	$3,261,000
Against same time, 1860	40,887,817
Decreased Export of Specie since Jan. 1	$37,626,817

All the above data are from authentic sources, and present a result unexampled in the history of nations. It shows the complete independence of the Northern States of the Southern, and that the nation was never so rich and strong as at the moment that superficial observers or enemies believe that we are crumbling to pieces, and that our Government must soon come to an actual stand for want of money. If prolonged we shall unquestionably suffer less from the war than England.

Pittsburg and Connellsville Railroad.

The work on the extension of this road from Port Perry to the city is rapidly approaching completion, and arrangements are already making for the erection of buildings for a separate maintenance of business. Since the opening of the road to M'Keesport, some years since, the Company has used the track of the Pennsylvania Central to Turtle creek, and transacted their freight and passenger business in the stations of that Company in the city. The extension from the city to Port Perry, along the Monongahela river, will be opened probably in the course of the ensuing month, and temporary buildings for transacting business are being erected. A large frame depot is being constructed on the continuation of Duquesne Way, from Try street to the bank of the canal. The stone work is nearly completed, and the carpenters are engaged in putting together the framework.

The location of the temporary station is so far from the railroad centre in the city, at the corner of Grant and Liberty streets, that an effort will doubtless be made to have it removed at no distant day.

When the Steubenville Railroad was projected, one portion of the plan contemplated a junction of the road with the Pennsylvania Central at Liberty street, and the route to be used was by so altering the old canal tunnel through the hill as to permit the passage of trains. The work had progressed so far as the laying of the foundation of the first pier in the Monongahela river (at the mouth of the canal) when the general railroad collapse took place, and the work stopped. Should it never be resumed on behalf of the Steubenville road, the contemplated route offers the same advantages to the Connellsville road. The bed of the canal and the tunnel are still open, and it will require but little labor to fit the route for use. The tunnel would require to be considerably changed, but the labor of filling up the locks and bed of the canal is already in a great measure performed. Three railroads—the Pennsylvania, Pittsburg, Ft. W. and Chicago, and Pittsburg & Cleveland—already centre at the canal, and a 4th—the Alleghany Valley—is only awaiting certain movements, we believe, to make a closer connection—the Connellsville road, and ultimately, the Steubenville, will doubtless centre in the great Union depot to be erected ere long, at the intersection of Grant and Liberty streets.—*Pittsburg Dispatch, August* 17.

(From the Journal of the Franklin Institute.)

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations.

By M. Cezanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

PART THIRD.

(Continued from p. 659.)

Means of Correction.—To right an inclined column, strong oblique shores abutting on scaffolds are applied to it. The head of the shores descends with the column, and drives it back on approaching the horizontal; the column inclining one side, it is pressed over the other side, and at each trial is made to approach the vertical.

When a column descends with an inclined direction, its foot moves horizontally; on this account some allowance must be made, either by increasing the counter-weight upon the side to be sunk, or in digging away the bottom more deeply on that side, so as to facilitate the undermining, and sometimes by placing strong oak wedges under the foot of the columns, and supporting them against a core of earth placed inside. The foot of the tube slides upon these wedges during the descent; but when the hold is considerable in the clay, it is difficult by these means to gain more than 1½ to 2 inches. When the errors are very great, there is no remedy but to withdraw the column, which can be effected by the windlasses, after establishing an equilibrium with the internal pressure.

As the plane of the foundation is approached the discharge of the air is moderated, by leaving a tamping at the bottom of the tubes, by controlling the escape of the air, and by unloading the column; if the motion is more rapid than desirable, the pressure may be renewed, and the tube stopped by a forced working of the pumps. At Szegedin, water pumps were placed near the air chambers, and sometimes the column was filled to the outer level, lowering the pressure proportionally, the only way of assuring the immobility of the tube. It is remarkable that a bottom in which the tube sinks spontaneously, with the least difference between the inner and outer levels, presents so great resistance to compression when a hydrostatic equilibrium is established.

Columns of 100 tons weight have often been observed to be supported upon the foundation by a surface of 1.863 square yards, formed of the end and flanch of the tube. This would be 91 pounds per square inch.

Whatever precautions are taken for directing the columns, it is well to count upon deviations of 4 inches in every direction, and to reserve the means of correcting them. This is quite easy when the columns support uprights only. The errors, measured in the plane of the head, are as a mean 4 inches in each direction, giving a slope of 0.005 with the vertical; they may reach the double of these figures, and depend upon many circumstances, but chiefly upon the nature of the bottom, and the stiffness of the scaffolding which guides the column.

The increased volume of earth due to the descent is quite variable; as a mean at the Theiss

it was three-fold; in other words, the cube of the excavated earth, measured by the number and capacity of the buckets, was three times greater than the total void dug out by the miners. In clay the increase is hardly appreciable.

In the common applications of tubular foundations, as soon as by reason of the last discharge of air the column has reached the desired depth, the pressure is renewed, the miners take away the pugging, leaving however a thickness of earth of three feet, to check the variations of water level which follow the variations of the manometer; the necessary materials of sand and water are passed to them through the air chamber, and a layer of cement from 2 to 3 ft. thick is commenced. Care is taken to leave in the middle of this layer a cylindrical hole from 8 to 12 inches diameter, which is only filled at the moment when they begin to lay on the beton. This hole allows the water to enter the pumps, in case of accident, without destroying the body of the cement.

At Szegedin, when a column was at its depth it was filled with the water an appointed height, to avoid the spontaneous sinkage, and the pneumatic fixtures being taken away, special diving bells were then used.

It was only after the driving of the piles to the desired refusal, that the first available pneumatic apparatus was put up for syphoning the water, to cut away the piles in pieces of 3 ft. for their passage through the air chamber, and to finish the excavation.

Betonage of the Columns.—When a column is ready for the beton, some buckets of beton are lowered, which is laid with the trowel at the bottom of the column to form a cushion, and then all the miners retire upon the platform under the reservoir. A barrow-gang is organized to fill the air chamber with beton; as soon as it is full, notice is given for those inside to clear the way; the upper valve is closed and the lower door opened by manœuvring the cocks as usual. the beton then falls upon the platform and at the bottom of the column. The miners inside clear the chamber with scrapers, and close the lower door; the upper valve falls, and the chamber is again filled with beton.

Whenever an approach is made to the flanch, the miners level the beton and fill up its recesses.

When the height of the beton is half that of the exterior water, measured from the plane of the foundation, the pressure is stopped, the receiver raised, and the beton laid in open air; after this the beton is crowned with masonry and the superstructure is raised.

The following table gives the drincipal dates of work of the second pier of the Theiss bridge:

Character of work.	Dates for the Up-stream Column.	Down-stream Column.
Sinking of the column....	July 31,	Aug. 4, 1857
Pneumatic work—commencement	Aug. 10,	Aug. 17, 1857
Pneumaric work—end ...	Aug. 31,	Sep. 6, 1857
Interior piling—commencement	Oct. 25,	Oct. 9, 1857
Interior piling—end	Jan. 25,	Jan. 8, 1858
Betonage—commencem't.	Mch 10,	Mch. 6, 1858
" end.....	Mch 13,	Mch 8, 1858
Sett'g up the square bod's.	Mch 17,	Mch 17, 1858

If the interior piling had not been required, the beton could have been introduced—

In the down-stream column, August 31, 1857.

In the up-stream column, September 6, 1857.

This operation for both columns would have been completed on the 15th of September; the entire pier would have been laid and prepared for the superstructure of the bridge in less than two months, with the use of but a single pneumatic apparatus. The interior piling and the severity of the winter of 1857–58, retarded the completion of the bridge several months, and yet the work was finished in two years after the settlement of the contract. This result could not have been attained with other systems of foundations, and the advantage of rapid execution has recommended the future use of tubular piers to all engineers.

The processes and apparatus above described have been applied to numerous works, and though convenient and sure, are yet susceptible of improvements. Many ingenious thoughts have become subjects for experiment or study upon some of the great European rivers, the Garonne, the Rhone, the Po, the Danube, the Vistula, &c. It is to be hoped that the authors of these works will make known the results.

We close this notice with some data relative to the net cost of the foundations of the Theiss bridge.

Net Cost of Tubular Foundations.—The cost depends upon the number of columns, their dimensions, the price of materials. &c. We shall consider only the expense of the pneumatic construction, in which we must distinguish the cost of the first establishment and that of manœuvring the apparatus.

An outfit for the Theiss bridge is comprised of the following parts:

A pneumatic reservoir, with its accessories, such as pipes, india-rubber linings, weighing 7,600 kil., at 2 fr.....	$2,632 00
An air pump, weighing 1,200 kil., at 4 frs.	902 40
Rough cast iron counter-weights, bought in England, 40,000 kil., at 10 centimes	752 00
Besides these articles, represent'g about.	$3,534 40
The company furnished some old locomotives, answering for steam boilers, and some pontoons. For this part of the instalment we should reckon, as for special apparatus.....	2,105 60
The whole cost of the first establishment, amounting to....	$5,640 00

should be divided by the number of the pneumatic piers, designed to be constructed with one outfit, either for one or many bridges.

This total does not include the planing or piercing machines, the loading cars, windlasses, tackle, &c.

The manœuvring of the apparatus is composed of the requisite loading for the instalment, and of the manœuvring proper.

The moving of the outfits from one pier to another cost as a mean at Szegedin, $56 40.

A similar moving from one column to another of the same pier cost $32 90.

An hour's working of the apparatus cost $1 99 distributed as follows:

	Frs.	Cts.
Workmanship—8 miners, at	0.35 =	52.64
" 1 miner, at	0.50 =	9.40
" 1 assist't fireman.	0.25 =	4.70
" 1 watchman, at..	0.25 =	4.70
Total of workmanship.....	4.10 =	77.08
Gen'l expenses, ⅓ of workmans'p.	1.37 =	25.75
Bonus for excavators.	0.40 =	7.52
Fuel and different furnishings ...	4.75 =	89.30
Total.....	10.	=$1.99

The total pneumatic construction of 318 feet, divided between six piers, and so twelve columns of the Theiss bridge required.

10 loadings, at 300 frs...	$654 00
21 movings, at 175 frs	690 90
3,451 hours, at 10.60 frs.	6,877 04
Total.....	$8,131 94
Or the mean cost per running foot of pneumatic construction.....	$25 57

This price does not include the furnishing, the transportation, and maintenance of the apparatus, the jointing, the sinking of the columns, the carpenter's work in directing or repairing.

The introdnction of 31,855 cubic feet of beton through the pneumatic bell, required 253 hours at $1 99, which may be regarded as the mean cost of the betonage under the bell, including leveling and interior damages, but exclusive of the carriage of the beton from its place of manufacture to the air chamber into which it was dumped directly from the barrow; this may be set at 56 cents.

The above cost of the moving of apparatus and of the running foot of pneumatic construction may be considered as proportional, all else being equal to the cube of the diameter of the columns, and the depth required below the water.

(to be continued.)

Investments in England and the United States Compared.

As there has been some inquiry among the British correspondents of our foreign houses and British holders of our securities with regard to the exact amount of income yielded by the new Treasury notes issued by the United States Government, we have thought it worth while to publish the following table, showing the actual income yielded by the same sum of money when invested in England and when invested in United States Treasury notes. It is assumed that an interest of four per cent. can be obtained on investments in England, though, of course, neither consols, nor any other security of equal standing with United States Treasury notes can be bought at such a price as to yield as much as four per cent. The interest yielded by the new Treasury notes is one cent a day on $50, or 7.3 per cent. per annum. The following is the table:

	Invested in England yields per annum.	Invested in United States yields per annum.
£1,000	£40	£73 00
1,500	60	109 10
2,000	80	146 00
2,500	100	182 10
3,000	120	219 00
3,500	140	255 10
4,000	160	292 00
4,500	180	328 10
5,000	200	365 00
5,500	220	410 10
6,000	240	438 00
6,500	260	474 10
7,000	280	511 00
7,500	300	547 10
8,000	320	584 00
8,500	340	620 10
9,000	360	657 00
9,500	380	693 10
10,000	400	730 00
11,000	440	803 00
12,000	480	876 00
13,000	520	949 00
14,000	560	1,022 00
15,000	600	1,095 00
20,000	800	1,460 00
25,000	1,000	1,825 00
30,000	1,200	2,190 00

Sugar Valley Railway.

A Dubuque paper states that at a late meeting of the directors of this road, the President of the Company made a very satisfactory statement of the affairs, giving promise of a speedy completion of the road to Portage. N. N. Wood, of Portage City, was elected a Director to fill a vacancy. Mr. Waldo Abel, one of the Directors, and Col. Miller, the Chief Engineer, were authorized with full power, to negotiate for the iron, chairs and spikes for fifty miles of road. The surveys of the Northern Division have been completed, and maps, profiles and plans will be perfected in about ten days. If the people along the line take hold of this matter with proper zeal, this road may be completed to Portage within the next year.

Oil Well Pipe, Tools, Fixtures, Etc.

We have received a Circular List, giving dimensions, weight, price, etc., of the Cast and Wrought Iron Artesian Well Pipes and Tubes, manufactured and for sale by Messrs. MORRIS, TASKER & Co., Pascal Iron Works, Philadelphia. These pipes and tubes are made either with the *flush* or *socket* joint, of any diameter, length or weight that may be required. The flush joint Artesian Well Tubes are made under the Patent of J. N. Bolles, and is described as "the mode of rendering cylinders or tubes flush or upon a line on their exterior surfaces, for Artesian Wells, or other purposes, etc., patented June 19, 1855." This patent is owned by Messrs. MORRIS, TASKER & Co., who grant no licenses to others to manufacture, or for the use of any manufacture but their own. They also supply at short notice, tools for boring and drilling, derricks, drilling machines, etc., of every description, for sinking Artesian Wells. Also, to connect the tubing, pumping cylinders, of all diameters; composition or cast iron chambers; composition buckets and valves, and all the working parts, very substantial for hard service in deep well pumping. This is probably the oldest and most extensive establishment of the kind in the country, and the facilities enjoyed by them for rapid and economical working are not surpassed by any. We invite attention to their Advertisement in another column. For a descriptive and priced catalogue, address Messrs. MORRIS, TASKER & Co., Philadelphia, Pa.

Journal of Law.

CORPORATIONS: THEIR STATED MEETINGS; PRESUMPTION AS TO KNOWLEDGE OF BUSINESS TRANSACTED BY ABSENT MEMBERS.

The relator claimed the office of the first district court in the city of New York by virtue of an election made by the Board of Aldermen of the city of New York. On the 14th December, 1857, a majority of the Board of Aldermen, passed resolutions to give notice to the Mayor that they would meet in convention on the 21st of December, for the purpose of electing clerks of the district courts in the place of those whose term was to expire at the end of the month, and invited the Mayor to be present at that meeting. There were present and voting nineteen aldermen; the remaining three members of the board were absent. On the 18th December, 1857, there was another stated meeting of the Board of Aldermen, at which seventeen were present, five being absent. The resolution of the 14th December was rescinded, and a resolution was passed inviting the Mayor to meet the board at half past six o'clock of that evening, in convention, for the purpose of appointing district clerks. Within ten minutes after the passage of this resolution, the Board of Aldermen adjourned, and the Mayor Fernando Wood entered their chamber, took the chair and organized the convention. The relator was then appinted clerk of the district court for the first district. None of the Aldermen had notice of the convention of the 18th of December except those who were present when the resolution calling it was passed. It was contended that the election was irregular on the ground that the absent members of the board had no notice of the election.

HELD.—That the inquiry was not whether it was necessary to give any notice previous to passing the resolution calling the convention at which the plaintiff was appointed. Such a resolution might be passed at any stated meeting of the board without any preliminary notice. But the question was, whether such of the Aldermen as were absent at the time of the adoption of the resolution, were not entitled to some notice of the time fixed for the election; or, whether on the other hand, that time might be lawfully so arranged, as effectually to prevent the possibility of their obtaining any notice. Every member of a board is bound by whatever is done at any stated meeting within the range of the ordinary duties of the board; and no member has any right to object on the ground that he was not present; because all the members have or are presumed to have, knowledge of the times for holding the stated meetings, and if any member fails to attend, he voluntarily waives his right to participate in the business of the meeting; but there is no presumption that members know what is transacted at the meeting of the board, so as to charge them with notice of anything there transacted, contemplating future action at a time, other than that of a stated meeting. The election in this instance was, therefore, void, *New York Court of Appeals, Law vs. Batchelor.*

MANUFACTURING CORPORATIONS, WHEN SUBSCRIBERS ARE STOCKHOLDERS: LIABILITY OF FOR DEBTS OF COMPANY.

The action was brought to recover $1,000 from the defendant, on the ground that he was the proprietor of $1,000 worth of stock in the Hudson River Stone Dressing Company, against which the plaintiff had recovered a judgment for $1,756 98. The case was brought under the general law providing for the personal liability of stockholders of manufacturing companies to the amount of their stock. The defence was that the defendant was not a *legal* stockholder.

It appeared that a certificate of ten shares of the capital stock, dated Feb. 6, 1854, was issued to the defendant. This was apportioned to one Samuel H. Jordan *for the defendant*, on the 15th of April, 1853, pursuant to a subscription for capital stock originally made by Jordan for the defendant, at his request; the amount subscribed to be paid in ten equal monthly installments, the first payment being made on the 3d of May, 1853. The defendant was one of the signers of the articles of association, and derived such interest as he had in its stock from the facts before stated. A by-law of the company which was in force during its whole existence, declared that the stock of the corporation was transferable only on its transfer book, by the holder thereof or his attorney, on the surrender of his certificate. No stock transfer whatever to the defendant was contained in the transfer book of the company, and no shares of the company's stock had ever been transferred to the defendant or to any person for him, on the transfer books. The plaintiff had a verdict, which was sustained by a general term of the New York Supreme Court. The defendant then appealed to the Court of Appeals.

HELD,—That the defendant was a legal, and not merely an equitable owner of the stock. Jordan acted merely as the defendant's agent; the relation between them was not of a trustee and *cestuique trust*, but that of principal and agent, which, although in a certain sense and for certain purposes, involving the idea of a trust, does not make the principal the equitable and the agent the legal owner of everything he buys for the former in his own name, particularly when he discloses the name of his principal. If it is known to the seller that the agent acts on behalf of another, and that other is recognized by the seller as the real owner, the principal is at once entitled to the possession of the thing purchased. So in this case the certificate of stock was issued to the defendant in his own name; and although the name of Jordan was originally employed, the certificate of stock in view of the whole circumstances, related back to make the defendant the legal owner from the commencement of the transaction. He was entitled to demand a share of the profits from that time, if any profits accrued; he then became a stockholder, and continued to be a stockholder, at the time this action was commenced. After the original issue of stock, perhaps any subsequent holders, in order to be made liable, should have the stock transferred to them on the book, or their names as stockholders should appear in the index book, or in the register of stockholders. But in the present case the defendant was an original subscriber, through his agent Jordan; and, of course, no transfer as from an old to a new stockholder was requisite. The stock was issued not transferred to him. Judgment affirmed. New York Court of Appeals, Barr *vs.* Wilcox.

Dayton and Western Railroad.

The following gentlemen have been elected directors of this road for the ensuing year: Simon Gebhart, Frederick Gebhart, Valentine Winters, Jonathan Hartman, Robert Dickey, Jonathan D. Phillips, Henry L. Brown, Henry Herman, Robert W. Steele, of Dayton; E. F. Drake, Xenia; John W. Kirk, John W. Owens, Cincinnati; S. Brindley, of Preble County.

At a subsequent meeting of the board Simon Gebhart was elected President, in place of J. W. Kirk, who declined a re-election.

The New State of Kanawha.

The counties included in the boundaries of the new State of Kanawha (Western Virginia) had a population, according to the census of 1860, of 281,786, as follows:

Logan	4,928	Barbour	8,959
Wyoming	2,865	Upahur	7,292
Raleigh	3,367	Harrison	13,790
Fayette	5,997	Lewis	7,999
Nicholas	4,626	Braxton	4,092
Webster	1,555	Clay	1,787
Randolph	4,990	Kanawha	14,575
Tucker	1,428	Boone	4,810
Preston	13,312	Wayne	6,747
Monongalia	13,048	Cabell	8,030
Marion	12,721	Putnam	6,801
Taylor	7,463	Mason	9,185
Jackson	8,306	Wood	11,046
Roanoke	8,048	Pleasants	2,945
Calhoun	2,502	Tyler	6,517
Wirt	3,751	Doddridge	5,208
Gilmer	3,759	Wetzel	9,708
Ritche	6,847	Marshall	13,001
Ohio	22,422	Hancock	4,445
Brooke	5,494		
Total population			281,786

The whole population of Virginia in 1861 was 1,593,199, including 495,826 slaves, leaving a white population of 1,097,373. Not more than eight or ten thousand of the slaves were in the counties now included in the State of Kanawha, so

that in losing this population of 281,786, Virginia loses about one fourth of her inhabitants. As there are a number of other counties that will be sure to come into the new State if the federal government affords their people sufficient protection, the loss will soon be still greater. Moreover, the territory of Kanawha, including the fine valley of the river of that name, and the fertile region along the Ohio, is as fine as any in the State, and in the decate between 1850 and 1860 population increased there more rapidly than in any other part of Virginia.

The Philadelphia and Erie Railroad Lease.

The negotiations between the Pennsylvania and Philadelphia and Erie Railroad Companies for the lease of the unfinished line to Lake Erie to the company owning the completed line to the Ohio river, for the unity of great interests within the State, proceeds steadily towards a finality. In a matter involving large existing investments and heavy prospective outlays, the utmost nicety of consideration is inevitable; and as in the progress of all great movements deliberation begets modifications, mutual precautions and concurrent vigilance—the consequences of observations from different stand points, even where the aim is common and the end identical—considerable time divides an end from a beginning.

Meantime, the popular verdict has been rendered in advance in favor of the measure, and so naturally did the policy of the proposition commend itself to the approval of the communities and interests involved, that we verily believe the majority of our citizens take it for granted the act is already consummated.

Before the public, there is no diversity of sentiment on the policy of the lease, nor could opposition find a foothold for justification among intelligent people, even if there were Quixottes to conjure phantoms only to combat them, in these latter days.—*U. S. R. R. and Mining Register.*

Brazilian Railway.

The report of Mr. Brunlees, the engineer-in-chief of the San Paulo (Brazilian) Railway, states that on the first section, of 13 miles in length, the greater part of the line from Santos to Mugi is formed, and about four miles of the permanent way has been laid. On the second section, 37 miles in length, he had determined to lower the inclines, and form the line in the ordinary way, with cuttings and embankments. The contractors have made rapid progress with the earthworks. After passing the summit the line runs in a valley all the way to San Paulo, with works of a very light nature. The work on the inclines is the key to the whole. On the third section, 30 miles in length, a distance of about four miles from San Paulo to the Tiete river has been formed to facilitate the transit of materials. From 1,500 to 1,800 men were employed on the works at the date of the last advices.

Valuation of Boston, Mass.

We give below the annual statement of the Assessors, of the valuation of the real and persona estate in the city of Boston, May 1, 1861. The valuation of the real estate in the city is $167,335,900, against $163,891,300 last year, an increase of $344,600. The personal property is estimated at $107,945,300, against $112,969,700 in 1860, a falling off of $5,024.400. The number of polls is 35,037, or 588 more than last year (34,449).

The rate of taxation this year is forty cents less than in 1860, it being now $8 90 on $1,000, and $9 30 last year. The increase in the valuation of real estate is owing in part to the new law in regard to the valuation of such property, which requires a measurement of the land, in making up the valuation. There is a decrease of personal property in every ward of the city.

The State tax in Boston in 1860 was $82,245; in 1861, $94,575, or about 3 93-100ths of the entire amount.

The Assessor's figures for this year are as follows:

Wards.	Real Estate.	Personal Estate.	Polls.	Poll Tax.
1....	$7,475,700	$2,586,400	3,288	$4,932.00
2....	5,496,800	673,000	3,629	5,543.50
3....	6,536,700	2,932,200	2,254	3,381.00
4....	38,933,900	33,365,400	2,755	4,132.50
5....	5,612,800	2,245,200	2,233	3,347.50
6....	27,237,800	23,127,800	2,429	3,643.50
7....	16,981,200	23,324,200	2,398	3,597.00
8....	11,550,700	4,630,900	2,000	3,000.00
9....	10,125,800	3,829,700	1,926	2,889.00
10....	7,703,800	2,569,800	2,372	3,558.00
11....	20,552,200	6,268,700	4,456	6,684.00
12....	9,128,500	2,492,000	5,297	7,945.50
	$167,335,900	$107,945,300	36,037	$54,555.50

The following was the valuation of last year:

1....	$7,673,300	$2,848,600	3,566	$5,349.00
2....	5,364,500	725,800	3,520	5,580.00
3....	6,911,000	3,243,300	2,226	3,339.00
4....	38,259,300	36,972,000	3,192	4,788.00
5....	5,595,000	2,234,900	2,202	3,303.00
6....	27,453,300	23,276,400	2,262	3,393.00
7....	10,624,900	23,897,800	2,567	3,850.50
8....	11,734,200	4,955,900	2,175	3,262.50
9....	8,770,900	3,173,000	1,998	2,997.00
10....	7,456,900	2,689,700	2,384	3,576.00

1860.	
Total of real and personal estate	276,861,000

The Russian Pacific Telegraph.

The plan for establishing a telegraphic line connecting Europe through Siberia with the Pacific Ocean has, during four years, had time to take shape and form, so that at the commencement of the present year, the supreme sanction was given to the project for constructing a telegraphic line in the counties bordering on the Amoor and Oussouri, from Nikolaiewsk by Khabarovka to the port of Novgorod (1,900 versts), the most important point of the possessions recently annexed to Russia on the Sea of Japan. The establishment of this line is undertaken by the Ministry of Marine at its cost, and under its direction; and at the same time the superior direction of the means of communication (Board of Works) has commenced the construction of a line starting from Kasan in the direction of Siberia, which proposes opening at the end of the present year a telegraphic communication from Kasan to Omsk (1,900 versts), and to continue it afterwards to Irkutsk, a distance of 2,475 versts from Omsk. Thus, probably within two or three years on the one side there will be telegraphic communication between Europe and Asia to Irkutsk, and, on the other hand, our new colonies on the Amoor and Oussouri will be connected with each other, and with our principal ports on the Japanese waters. Thus of the extent of 10,000 versts which the Siberian telegraph will embrace, there only remains the central portion, that of Irkutsk by Kiakhta to Kabarovka, about 3,500 versts, where as yet nothing has been settled; but it is beyond a doubt that as soon as the works actually projected shall have been successfully completed this intermediate line will be constructed, and thus within four or five years at the latest the gigantic project of a telegraphic communication from Europe to the distant lands on the shores of the Pacific Ocean will be realized. The year 1861 promises to be a memorable one, if we consider the great questions which will receive a solution. Among those questions we must place the commencement of a durable connexion and the establishment of rapid communication between Siberia and civilized Europe, and the apparatus of the electric telegraph on the virgin shores of the Amoor and Sea of Japan. It seems needless to point out the importance and usefulness of so vast an extension of improved communication by the promoters of civilization and commerce.—*St. Petersburg Gazette.*

ATTORNEY AND COUNSELLOR AT LAW,
Law Reporter for the "American Railroad Journal,"
No. 8 WALL STREET, NEW YORK.
PATENT RIGHTS SECURED.

THE RENSSELAER
Polytechnic Institute,
TROY, N. Y.

THE thirty-eighth Annual Session of this School for thorough instruction in the Natural Sciences and Civil Engineering, will begin September 18th, 1861.
A department for instruction in Military Science and Art has been instituted.
Inquiries may be addressed to Prof. Chas. Drowne, Director of Rens. Pol. Institute, Troy, N. Y.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF
Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.
Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.
Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.
Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches, etc., for same.
Gas Works Castings, etc., etc.
PHILADELPHIA.
Stephen Morris, Hy G. Morris, Chas. Wheeler, Thos. T. Tasker, Jr., Stephen P. M. Tasker.

PROSSER'S PATENT
LAP-WELDED IRON BOILER TUBES.
TUBULAR BOILER MAKERS
AND
ENGINEERS' TOOLS.
Tubes for Artesian Wells, conveying Steam or Water, Shafting, etc., screwed or coupled together, in various ways.
KRUPP'S BEST CAST STEEL.
PARIS'S PATENT GLASS ENAMELLED IRON TUBES, FOR WATER, ACIDS, ETC.
PATENT LAP-WELDED STEEL TUBES.
THOMAS PROSSER & SON,
28 Platt St., New York.

LOCOMOTIVES FOR SALE.
THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

Sandusky, Dayton & Cincinnati Railroad.

The earnings of this road for the fiscal year ending June 30, 1861, were:

From passengers		$114,913 51
" freight		278,364 41
" mail		16,080 00
" express, storage, etc.		13,842 06
		$423,229 98

And the expenses were:

Maintenance of way	$107,995 91	
Locomotive power	89,626 64	
Train expenses	78,566 65	
Station "	57,682 72	
General "	40,448 05	
Machine shop	5,881 20	
		380,201 17
		$43,028 81
Loss and damage on freight		829 00
Balance		$42,199 81
Interest account	$85,312 50	
Taxes	10,626 29	
		95,938 79
Deficiency		$53,738 98

Compared with the previous year, the gross earnings show a decrease of $16,435 64
With an increase in expenses of 44,724 00
Making the decrease in net earnings .. $61,159 64

The following is a statement of the receipts and disbursements during the year:

	Dr.	
Balance on hand July 1, 1860		$23,624 03
Receipts from transportation		433,899 60
Joint earnings with Clev., Col. & Cin. Railroad		27,015 38
Sales of old materials, etc.		10,366 39
		$494,905 40
	Cr.	
Operating expenses, taxes, damages, etc.		$318,149 62
Interest and insurance		3,398 30
New iron and re-rolling		22,184 34
New freight cars		27,081 16
Expense occasioned by fire		2,480 00
Rebuilding telegraph and filling Ravine		1,751 00
San. City and Ind. coupons for 1860-'61		23,520 00
Bonds due in 1856, principal		11,000 00
Interest on same		12,491 07
Coupons under programme		14,538 48
Completed settlement of adjusted debt, etc.		32,546 46
Balance on hand June 30, 1861		25,765 07
		$494,905 40

The records of passenger statistics were burned in March last. The number of tons of through freight carried was 60,352; do. way, 96,324. The number of miles run by engines was 452,635; expense per mile 84 cents.

The equipment consists of 40 locomotives; 18 passenger, 2 passenger and mail, 6 baggage, 251 freight, 60 stock, 80 platform, and 44 hand cars. But 10 of the engines are in first class order; 10 in second rate, but in running condition; 6, though still in use are not worth re-building; 5 are worthless, except for old iron; 4 are re-building; and 5 need general repairing. The report says:

The balance from net earnings for the year ending June 30, 1860, made up of the items included in the above statement, was $109,646 07—showing a decrease of $51,057 17, being about the same percentage of decrease exhibited last year between the net earnings of 1860 and 1859.

An analysis of the tables accompanying this report will show that this falling off occurred almost entirely in the latter half of the year.

The details embraced in table C, show that under the head of Train Expenses, the item of "new cars" has been swelled from some three hundred dollars last year, to $26,508, and the item for repairing freight and passenger cars, from $24,356, to $33,393—showing an aggregate increase in these several items of $35,220, made necessary by pressing deficiencies. The increase under the several heads pertaining to working expenses, though separately not large, has arisen principally from dilapidation and imperfect adaptation in machinery. The repairs of buildings is almost exclusively to be charged to the effects of the fire at Sandusky last winter, and to the renovation of the ware-houses and wharves at the same place.

These expenditures were forced upon us at an unpropitious time, and could the falling off in business have been foreseen in time, a large proportion of them could have been profitably diverted to the track for ballasting and iron. The rolling stock and machinery had been neglected, and needed both renewal and increase. The expenditures made in these departements under the supervision of our new Superintendent, have been judiciously made. And when it is considered that the falling off in transportation is mainly on business from the east, it will be seen that the number of cars and engines necessary to maintain the efficiency of the line could not have been materially reduced.

The condition of the road-bed and track demands serious attention, and the holders of the Company's securities are quite as much interested in this aspect of its affairs as any other parties in interest. In 1851 and 1852, the track was laid with T rail, which took the place of the original flat bar or strap rail. From some unaccountable theory of economy, the new iron was put down without chairs. Much of the track was laid in clay soil, without sufficient ballasting; and in fact the whole line of road, according to the Engineer's report at the close of 1853, (though most of it was declared in good condition,) needed gravelling—six inches being reported as the minimum quantity required.

From that time forward no persistent measures have been carried out for bringing the track up to the required standard of a first-class road. Doubtless the reason may be traced, in the earlier as in the later period, to want of means.

Experience has demonstrated that the cost of transportation depends largely upon the condition of the track. The repairs of machinery and car equipment keep even with the state of the road, showing a difference as high as forty per cent. in favor of a well ballasted and well ironed road. The items of track repairer's wages and tools take a higher range of difference, and may safely be counted as one to three in favor of the well conditioned track. In a line of 190 miles, including branches, the waste in the maintenance of way is enormous. A few years would show an aggregate equal to the whole cost of re-ironing. These are startling facts demanding in our case close and enlightened consideration.

Since the failure, in 1857, to meet promptly the full interest on the funded debt of the company, the management has labored under increasing and discouraging embarrassments. The pressing nature of a heavy floating debt, incurred under the fallacious hope of overcoming permanent obstacles by temporizing expedients, compelled, as is well known, early in 1858, the adoption of a plan for its extinguishment. The company has reason to congratulate itself that the plan, defective, as subsequent experience has shown it to have been, in not being able to meet changing circumstances in the external affairs of the company, has, nevertheless, been made to answer the purpose of extinguishing the entire floating debt proper. It must be admitted, however, that so far as the means for the accomplishment of this purpose were derived from the current earnings of the road, they have been to a large extent diverted from the track and the road equipment. The company being relieved from this crushing pressure, may it not now turn to the holders of its mortgage securities for that indulgence which could not be asked of the floating debt?

CONDENSED BALANCE SHEET.

Secretary and Treasurer—L. H. LATHAM.

Superintendent—HARVEY RICE.

Albemarle and Chesapeake Canal.

This canal, or the channel which is so called, is formed by the construction of two short lines of canal—one known as the Virginia Branch and one as the North Carolina Branch. The former connects the southwest branch of Elizabeth River, at a point about 25 miles from Norfolk, with the navigable head of North Landing River—a stream which empties into Currituck Sound. The latter branch completes the communication with Albemarle Sound by connecting Coinjock Bay, an indentation of Currituck Sound, with North River. The Virginia Branch is eight and a-half miles in length, and the North Carolina Branch five and a-half—making in all fourteen miles of Canal proper, while the entire line of navigation, from Chesapeake Bay to Albemarle Sound, is about 65 miles long.

The Canal was commenced in 1855 by parties from Buffalo, and was brought very near completion about the time the rebellion broke out. The contractors were Messrs. Theodore D. Barton of Buffalo, and Milton Courtwright of Erie, N. Y. Mr. John Lathrop, of Buffalo, was the engineer. The construction was prosecuted with vigor until the past Spring, when the rebellion brought the contractors to a sudden halt in their operations; so sudden, we understand, that they were unable to get away many of the men employed in the work. The canals were for all practical purposes completed, however, when their connection with them ceased.

The improvement completes a chain of inland navigation extending from New York Bay to Newbern and Beaufort, N. C., a distance of 600 miles; the other artificial link being the Delaware and Raritan and the Chesapeake and Delaware Canals.

The depth of the Albemarle and Chesapeake Canal is eight feet. The Dismal Swamp Canal admits only a draft of five feet.

Dubuque, Marion and Western Railroad.

Work has again commenced on the extension of the road from Springville. Mr. Shaw of Anamosa has taken the contract and will finish it for $300 per mile. This amount will be refunded to those who pay it in by the company's scrip, which will be received by them for all dues and business of the road. We understand nearly the whole amount required has been subscribed.

The work was resumed on the 9th inst., and it was thought by Mr. Shaw that seven weeks would be sufficient time in which to finish it to Marion. He says he can have the track ready for the cars in less time than that if the iron and ties are ready for him as fast as needed.—*Lynn Co. Regist.*

Marietta and Cincinnati Railroad.

ANNUAL REPORT OF THE PRESIDENT, JUST ISSUED IN LONDON.

To the Stockholders of the Marietta and Cincinnati Railway as re-organized.

The Board of Directors of the Marietta and Cincinnati Railroad Company (as re-organized) having decided that a resort to the borrowing power of the corporation is absolutely indispensable for the preservation and future productiveness of the property, deem it proper to present to all parties interested a full and complete exposition of its affairs—to point out the reason why the owners have failed hitherto to realize expected benefits—to suggest and urge upon their immediate consideration effective plans of relief, and demonstrate the security offered for such an outlay of additional capital as will secure the completion of the enterprise.

In order that clear and intelligent information on the whole subject may be within the reach of shareholders, copies of all legislative and judicial action—the proceedings of stockholders and directors, in relation to the proposed loan, together with a full statement of the road and its present financial condition, may be seen at the office of the company, in London, and at Chillicothe, Ohio.

Before entering upon a discussion of these topics, however, it seems to be proper to recall the leading facts connected with the construction of the road, proving that the long delay in its opening for traffic, and the large increase of cost, resulted from causes entirely beyond the control of the Board of Directors.

Early in 1853, the entire line of road from Blanchester to Wheeling had been placed in the hands of the most experienced and reliable contractors. The contracts stipulated for the completion of the entire work by the 1st of December, 1854. The contractors had placed upon the line a force fully adequate to bring about this result. Six thousand men and teams were actually engaged upon the work. The Directors at that time had securities enough, at prevailing prices, to meet their engagements to contractors. The conditions of success seemed, therefore, to have been established beyond any doubt; but the revulsion of that year, resulting from the European war and other well known causes, so impaired the value of railroad securities, that sales were entirely stopped. The contractors were compelled to disband their forces and abandon their work. During the suspension that followed, the interest upon the large and totally unproductive outlay that had been made, was enough to absorb a large portion of the money that was raised for the purpose of renewing the work.

Although the company succeeded, in the face of all these difficulties, in effecting large sales of securities at good prices, yet the delays in realizing money were so great, that current interest and the extra expense of resuscitating an enterprise so greatly paralyzed, not only absorbed a large share of the money, but has added heavily to the ultimate cost. Had the contracts been completed by the 1st of December, 1854, the interest account would have been comparatively light, while income would have taken at once the place of outlay. But in consequence of the reverses above named, more than $3,000,000 have been added to this account of money, which might otherwise have been expended in the completion of the road. Had the road been opened for traffic through to Wheeling in 1855, as contemplated, it would at once have assumed its proper position as the main trunk line from Cincinnati to the seaboard, and the earnings would have answered all demands for interest.

During a large portion of this season of extreme embarrassment, the work was actually carried forward by the private means and personal credit of the Directors, and the heavy advances thus made to preserve the enterprise from total ruin have never been replaced to them. Not one of those who constituted the Board during that arduous struggle, but who has suffered severely in his private fortune. This brief vindication of the past is not only due to the managers who have thus devoted time, property, and personal comfort to the thankless undertaking, but it is also right and proper that those who have advanced their money should look at the matter in the light of actual facts, that they may judge correctly of the causes of disappointment.

When we come to look for the causes of failure to earn a fair interest upon cost, it is also impossible to form a correct judgment of the value of the property, without considering carefully all the facts connected with this part of its past history. Had the scheme with its connections been completed, and put upon a trial of its merits under circumstances of average fairness, the results, as shown in receipts and expenses, might have been claimed as decisive of actual value. But such has not been the case. The capacity of the route to control its appropriate traffic has never been tested, while the condition of the track has never been such as to afford the opportunity of thorough practical economy in operating the road. To the owners of the property it is especially important that these matters be well understood, as a feeling of discouragement arising from past experience might prove fatal. The year 1857 will be long remembered for its financial crisis—paralyzing the internal commerce of the country—producing disaster and ruin to enterprise, and an almost utter prostration of credit. Beneath the waves of that storm nearly all the railroad capital of the country, invested in unfinished works, was lost. In that year the Marietta & Cincinnati road was opened for public use. But its opening was just in time to receive, with fatal effect, that blow which for a time staggered the commerce, credit, and enterprise of the civilized world. In the earnest and laborious effort to complete the road, with adequate means, and in the shortest time possible, the traffic was thrown upon its track while yet in an

unfinished condition. The work on the extension, from Marietta to Wheeling, had not been prosecuted since its abandonment in 1854—consequently the Baltimore and Ohio road was the only connection left available. The value even of this was greatly impaired, by the use of the Ohio river nine miles between Parkersburg and Scott's landing, as a connecting link with the Baltimore and Ohio Railway. Had a season of average prosperity instead of uncommon disaster succeeded, the current earnings would have been sufficient for the completion of the track, and for its extension from Scott's landing to Parkersburg. The application of earnings in this direction has been successfully resorted to in numerous instances by other railways. All the net earnings of the Baltimore and Ohio Railroad for a series of years were applied to purposes of construction—affording an amount of aid absolutely indispensable to the completion of that work. Pursuing this policy, a large force had been placed along the line after its opening, to prosecute vigorously works really of construction. To meet payment for this work, the managers relied upon earnings which continued rapidly to increase after the opening in June of 1857, until the crisis of the subsequent autumn was fully developed. The consequent loss of earnings left them without means to pay off a force they were reluctant to discharge without full compensation for past labor. Strikes, insubordination, and riots were the result. To the almost entire demoralization of the operating force which ensued, was added the calamity of 18 months of almost incessant rain. This was so completely destructive of the newly laid track, that regular trains were actually stopped on a portion of the road for nearly three months in the winter of 1857–58. The patrons of the road became discouraged—its enemies were active and unscrupulous. Thus, between internal disaster and outside enmity, its life was crushed out as between the upper and nether millstone.

In the fall of 1858, while struggling to rise out of these difficulties, but before any improvement could be effected, and while legal proceedings for foreclosure were impending, the property passed into the hands of a Receiver. During the interval of judicial guardianship, extending to the re-organization in June, 1860, it has been impossible to inspire the public with confidence in a bankrupt enterprise—while competing roads, by pre-occupancy of the field, have grown strong upon a traffic legitimately belonging to this route.

This brief outline of three years of disaster and downfall affords sufficient answer to the question —Why has not the road paid interest and yielded dividends?

A new road depending entirely upon traffic for means to perfect its track is deprived of those means by a commercial crash. For the want of a good track its business is broken up, and its *prestige* and popularity destroyed—succeeding litigation completes the chapter of disaster. In the earlier stages of railroad enterprise, defective lines were tolerated by the public—because even with their defects, they were far superior to all other means of transit.

But the case is now widely different. It is no longer a choice between a railroad and a canal or turnpike—but between different lines of railroad, each offering peculiar facilities of route, distance, character of track, and general accommodation. In the competition thus excited, defective lines, or circuitous routes must go to the wall. In addition to the natural competition always to be expected between common carriers for the same business, a wide spread system of combinations is rapidly being developed, which aims to control all the best business of the country, and draw it over particular routes.

The effect of this effort at combination is, to break down the weaker lines and secure permanent prosperity to the stronger.

While this road has undoubtedly suffered both from competition and combination, yet its location is such that, with a completed track, and perfect connections, it can bid defiance to both. But in devising plans for permanent relief, it is idle to ignore the stubborn realities of competing routes, with perfect tracks and mutual combinations. In view of this state of affairs the remedy would seem plain. Give the road a good track—a well ballasted permanent way for the passage of trains, and public confidence will be restored, and traffic regained. Something has already been accomplished in the right direction, by the application of earnings to the improvement of the works. The sides of the cuts, which in 1857 were almost perpendicular, and were constantly falling upon and covering up the track, are now sloped so wide as to give little trouble even in rainy weather; embankments have been widened and become firm, and some temporary trestles filled. The most troublesome portions of the track have been partially ballasted, so that trains pass with regularity and comfort to passengers over the road. The long ferriage of nine miles from Scott's landing to Parkersburg, has been superseded by the construction of a Union Railroad, now the property of this company. While it is true that if a small amount of capital could have been applied simultaneously with the opening of the road, the obstructions to a successful traffic would have been removed before public attention had become fixed upon the defects of the line, yet as it is, nothing short of a thorough and permanent rebuilding of the defective portions of the road will meet public requirements and secure public confidence and patronage.

The Directors have therefore authorized careful instrumental examinations and surveys of the entire line upon which an estimate of cost for the completion of the railway, in the most durable manner, has been made. In recommending any plan of relief, the Board are unwilling to stop short of that which will give the most complete assurance, not only of interest upon the proposed loan, but also of dividends upon the two classes of preference shares. To accomplish this with the smallest amount of capital, it is proposed, after perfecting the present track, to extend the line by an independent entrance into the city of Cincinnati, and also to build a branch road to Dayton.

It was a part of the original plan, as provided by charter privilege to carry the line directly into the city of Cincinnati by an independent entrance. Hitherto this part of the scheme has remained undeveloped for want of sufficient capital. Resort was had to the use of the Little Miami track, under a contract giving to this company an equal right to run all their trains over the road into the city. This contract imposed upon the company the payment of $60,000 annually, in equal monthly payments. This heavy charge upon the revenue of the road has thus far been promptly met.

While it has yielded the Little Miami Company more than a fair pro rata share of a hitherto small business, it has also served to establish for this company some degree of independence in the city. But the difficulties of an alliance of this sort with a powerful and determined rival are becoming daily more apparent. While the crippled condition of the railway, and an entire want of connection with the Baltimore and Ohio line at the east end, except by water, precluded all possibility of competing for through business, the Little Miami Company were content to receive a compensation yielding them a greater income than would have been derived from a fair pro rata share of the business; but since an improved track and a more perfect connection have secured for this line a liberal share of all eastward bound railroad freight from Cincinnati, a decided tone of dissatisfaction has been manifested. In view of the troubles likely to arise from this source, as well as to secure a much better entrance to the city, giving a direct connection with the Ohio and Mississippi Railroad, the Board have determined, as soon as possible, to make the necessary extension of their own road to the city. The annual compensation of $60,000, now paid to the Little Miami Company for the use of their track, is ample to pay the interest upon the cost of the proposed work. It is also proposed to construct a branch line directly to Dayton, from the nearest available point. Surveys and estimates of cost have therefore been made from Vienna (forty-one miles west of Chillicothe) to that city, a distance of forty-two miles. This connection will open up a new traffic, which can never be successfully reached through Cincinnati. At the city of Dayton, connection will be formed with the entire system of railways, extending in all directions through the States of Indiana, Missouri, Iowa and Kansas. It affords a field for competition, where railroad lines alone are interested. The traffic drawn from Cincinnati is secured against the powerful competition of the Ohio river, the rates upon which are kept permanently low by the action of the great Eastern trunk roads. From Dayton it is fifteen miles nearer to Baltimore and Washington City by this than any other route, with the advantage over all others of a continuous gauge to the seaboard. With these advantages of distance and continuous gauge, and freedom from river competition, an amount of business could be drawn upon the main line that would be decisive of future dividends, at least to the preference shares.

RESULTS.

The current earnings indicates a traffic of $450,000 per annum. This sum is mainly absorbed in necessary working expenses, because a certain number of daily trains are absolutely necessary to secure any business at all. A line competing for through freight must have one regular freight train a day each way; so also a competition for through travel requires two regular passenger trains per day each way. After this expense is once incurred, it costs but little more to haul full trains than empty ones. The business of this line has reached the point of being able to sustain these regular trains, but they are usually run with light loads, and of course yield but little more revenue than enough to pay expenses. In through freight traffic the road is confined to the cheap, heavy articles of agricultural produce going eastward, or to the fourth-class freights bound west. The hauling of these articles is costly, the revenue very light. But more than this: there is locomotive power enough expended, with attendant conducting expenses, to do double the business, provided the proposed improvement in the track was made. The present passenger traffic amounts to about $11,000 per month. The same trains could earn $40,000 per month, by adding a few more cars to each train, thus increasing the receipts nearly fourfold, with very little additional expense. Now it takes all the income to pay expenses; with such an increase, there would be a handsome profit.

Herewith the Directors submit the "General Balance Sheet" of the Company, showing its condition as it appeared upon the books on the 1st day of March last, accompanied by several statements prepared by Mr. Alison, the Secretary of the London Committee. To the reports of Mr. Durand, the Superintendent, and Mr. Waddle, the Chief Engineer of the Company, herewith furnished, the special attention of the stockholders is invited for detailed information, as to the operations of the railway since the re-organization of the company, and the condition and prospects of the property.

The following is an analysis of the accounts and reports above referred to:

The gross earnings of the company for the six and a-half months, from August 15, 1860 to March 1st, 1861, amounted to	$268,701 24
Less working expenses	231,432 06
Leaving net earnings	$37,269 18
In the item of "working expenses" is embraced the rent of $5,000 per month paid for the use of the Little Miami Railway track, from Loveland to Cincinnati, say	32,500 00
	$69,769 18

Showing a rate of net receipts equal to the interest upon the Engineer's estimated cost of completing and making the present line of railway a

first-class work, and of extending it into the city of Cincinnati. If, therefore, the means can be obtained upon reasonable terms for the objects stated, it is shown that even the earnings of the last half year would have met the interest. If, however, these improvements were made, the Superintendent (one of the most experienced railway managers in the United States) estimates the traffic, as will appear in his report, at an average of $100,000 per month, say $1,200,000 00
Deduct 50 per cent. for working expenses 600,000 00

Net earnings $600,000 00

The Engineer estimates the cost of completing the railway, and the annual expenditure in doing the work, as follows:

1861	$541,371 05	
1862	302,123 20	
1863	89,744 25	
After 1863	156,581 90	
Completing main line ..	$1,089,820 40	
Cincinnati extension ...	828,954 74	
	$1,918,775 14	
Trustees' loan	200,000 00	
Liabil's per state't, say.	93,705 68	
	$2,213,480 82	
The interest upon this sum at 7 per cent. per annum		154,873 65
Leaving the sum of		$445,126 35

to apply to interest on account of preference shares.

If, in addition to completing the present line and its extension into the city of Cincinnati, the branch line to Dayton be constructed, it will increase the expenditure of the company, agreeably to the estimate of the Engineer $750,000, and would augment its income by the sum of $423.000 00
Less working expenses, 50 per cent .. 211,500 00
$211,500 00
Deduct interest upon $750,000—cost of this branch, say at 7 per cent ... 52,500 00
$159,500 00
Which sum added to the above 445,126 35
Will leave for stockholders $604,126 35

The completion of the railway to Wheeling, upon which about $300,000 has been already expended, would, agreeably to the report of the Engineer, involve an additional cost of $1,477,554 63.

This would add to the gross resources of the company, agreeably to the estimates of traffic made by the same authority $675,000 00
Deduct working expenses 337,500 00
$337,500 00
Deduct 7 per cent. interest on the cost of this work 103,428 00
Net income $234,072 00

By completing the railway into Cincinnati, and building the branch to Dayton, the company would secure alternative connections with the systems of railways at its western termini, and thus be able to control the share of traffic, to which it is entitled by its geographical postion, from all points in the vast and fertile States in the West, Southwest and Northwest. So also by extending the railway to Wheeling, the company would be placed in a position of comparative independence in its intercourse with the Pennsylvania Central, and the Baltimore and Ohio railways, a position indispensable to success. Every railway which has not an alternative connection is crushed out by the severe terms imposed by the line upon which it is dependent.

If the project were entire completed according to the plans proposed, the position of the company would be as follows:

LENGTH OF LINE.

	Miles.
Main line from Marietta to Loveland	151
Branch from Marietta to Parkersburg	9
Branch from Blanchester to Hillsboro'	21
Extension from Loveland to Cincinnati	24¼
Dayton and Eastern Branch	42
Marietta to Wheeling	75
Total	328¼

COST.

Represented by the following:

Capital stock:		
First pref. shares	$3,499,116 11	
Do. to Hillsboro' bondholders	1,200,000 00	$4,699,116 11
Second pref. shares ..	2,799,445 00	
Do. to Hillsboro' bondholders	336,000 00	3,135,445 00
Common or deferred stock	1,850,000 00	
Do. to Hillsboro' bondholders	350,000 00	2,200,000 00
		$10,034,561 11
Leaving to be provided for the following objects, viz:		
Cost of completing main line	$1,089,820 00	
Cincinnati extension.	828,954 74	
Dayton do	750,000 00	
Wheeling do	1,471,554 63	
Trustee's loan	200,000 00	
Liabilities per statement	93,705 68	
To complete cash paym'ts for Union railway purpose ..	54,852 53	
Union Railway bonds payable 1871	74,595 25	
To complete Zaleski workshop	25,000 00	4,594,483 23
		$14,629,044 34

ESTIMATED REVENUE.

	Gross.	Net.
From completing main line and extension to Cincin'ti.	$1,200,000	$600,000
From Dayton branch	423,000	211,500
From Ex'n to Wheeling ...	675,000	337,500
	$2,298,000	$1,149,000
Being an average of about $7,000 per mile. If a mortgage debt of $5,000,000 were negotiated to produce the above sum of $4,594,483 23, bearing 7 per cent., the interest thereon would be		350,000
Leaving applicable to stock		$799,000

The cost of the railway would thus stand about $46,000 per mile, and be represented by about $30,500 per mile in capital stock, and about $15,250 per mile of mortgage debt.

In the present condition of American affairs, it is only proposed to pursue such policy as may be necessary to preserve the property until the restoration of public confidence; when the true interests of the company will be promoted by completing the undertaking. The condition of the bridges, trestles, tunnels, &c., of the company *imperatively demand* the expenditure of the sum indicated in the report of the Chief Engineer, within the next twelve months, in about equal monthly instalments; and it will be the aim of the Board to accomplish this result from the sales of an issue of seven per cent. mortgage bonds, a market for which it is hoped will be found among the stockholders who are so deeply interested in a work, the completion of which will enable them to realize the interest upon their present investments.

Respectfully submitted by order of the Board of Directors.

NOAH L. WILSON, *President.*

Castle and Falcon Hotel,
St. Martin's-le Grand,
London, 22d June, 1861.

Journal of Law.

In the Superior Court, Boston, on the 17th inst., in the case of the Fitchburg Railroad Company *vs.* the Grand Junction Railroad Depot Company, a verdict was given for plaintiffs; damages assessed at $10,244 41. The case has been on trial a week. Derby & Williamson for plaintiff; Geo. S. Hale for defendant.

The National Mining Company has another decision in its favor, and against the Minnesota Mining Company. The Detroit *Advertiser* says:

The Minnesota Mining Company agt. The National Mining Company and James M. Cooper.

This important action, commenced in June, 1860, in the District Court of the Upper Peninsula of Michigan, for the County of Ontonagon, has been lately tried in that Court, his Honor Judge Goodwin presiding.

It was brought to eject the National Mining Company from a portion of School Section No. 16, on which were situated the principal mining grounds of said company, and was therefore one of great interest and importance.

The Minnesota Mining Company claimed title under a patent of the United States. The National Mining Company claimed under a patent of the State of Michigan.

The cause was tried without a jury; the trial was commenced on the 6th of September instant, and concluded on the 9th following. On the morning of the next day the Court delivered its decision in favor of the National Company.

This is the fifth time that the title in dispute has been before a court of law. It was first tried before the Circuit Court of the United States for the District of Michigan in an ejectment suit, brought by Cooper in behalf of the National Mining Company, against E. C. Roberts, who represented the Minnesota Company, when judgment was rendered against the title of the National Company. On a writ of error this judgment was reversed in the Supreme Court of the United States.

The case was then tried again in the United States Circuit Court for the District of Michigan, when judgment was given in favor of the title of the National Company. On a second writ of error the judgment in favor of the National was affirmed by the Supreme Court of the United States.

In addition to these five trials at law, two bills in equity have been heretofore filed by the Minnesota Company against the National Company—one in the United States Circuit Court for the District of Michigan, and in the District Court of the Upper Peninsula, for the County of Ontonagon, both of which have been dismissed by the Minnesota Company, the complainant.

How to Measure Coal.

Coal put into bins and leveled can be measured, from one to a thousand tons, with as much accuracy as it can be weighed on scales. For instance, Lehigh white ash coal per ton of 2,000 pounds, of the egg or stove size, will uniformly measure 34½ ft. cubical, white ash Schuylkill coal will measure 35, and the pink gray and red ash will reach 36 cubical feet per ton of 2,000 pounds, or 40 feet for 2,240 pounds, the difference of cubical contents between the net and gross ton being exactly four feet. If the length, breadth and height of the bin be multiplied together, and the product divided by the aforesaid contents of a ton, the quotient must show the number of tons therein.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* —) signifies "nil.' Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, September 28, 1861.

National Finances--Our Ability to Pay.

The great theme, at the present time, of foreigners, particularly Englishmen, is the vast debt the United States are contracting to put down the rebellion. They confidently predicted the money could not be raised on loans. Driven from this position, they are equally loud in assertions that our people will not be taxed to pay the interest on the debt and for the ordinary purposes of government; that they have not that docility which belongs to those of the Old World, who patiently bear whatever load may be imposed upon them. We have so long been without a national debt, that it would not have been strange if the systematic outcry of the British press, the great object of which was to destroy our credit in European markets, should have created some anxiety in reference to this matter among ourselves. Such, however, has not been the case. No one doubts that the interest on the debt that may be created, say $500,000,000, can be easily met from ordinary sources of revenue, with such as we can add, without imposing burdens that will be complained of, or really felt.

A debt of $500,000,000 is not one-fifth so large in proportion to their means, and not greater in proportion to their population, than our people have twice contracted and twice paid. Upon the adoption of the Constitution, the debt assumed was $80,000,000. The population of the country was 3,900,000. This sum exceeded $20 per head. At that time the wealth of the country, and its means for the payment of taxes, did not equal a tenth of those at present possessed by our people. It had been exhausted by long wars which had desolated nearly every portion of it. It was without commerce and without manufactures, while at that time there was hardly any demand in foreign countries for the products of its agriculture. It was previous to the use of steam or of labor-saving machines, or of any considerable division of labor on which all wealth is based. The population were widely scattered, without internal commerce, and were almost solely engrossed in providing for their daily wants. The expenses and revenues of government were on a corresponding scale. The total expenses of the United States for the first fourteen years after the formation of the government, exclusive of payments of interest on the national debt, were $53,373,478, and the yearly average $3,812,391, which is about one-third of the annual expenditures of the city of New York. This small sum taxed the industries of the country much more severely than ten times the amount, in ratio to the population, would at the present day. Yet the debt was gradually reduced till it was only $45,000,000 at the commencement of the war of 1812, when it was swelled to $127,000,000 in 1816. The population of the country at that time being about 8,500,000; the rate per head was $15. Notwithstanding the impoverished condition of the country, the payment of this debt was immediately commenced and fully consummated in 1835.

A national debt not exceeding, per head, those twice contracted and paid by our people, is no cause for alarm. But since the creation and payment of these, the wealth of our people has increased, probably in tenfold greater ratio than that of their population. The valuation of all the property in the several States, for taxation, in 1850, equalled $5,989,152,771; in 1860, $11,296,306,942—an increase of nearly 100 per cent.; the increase of population in the same time was 35 per cent. The increase of the former has been in threefold ratio to the latter, from the effect of the new agencies that man is constantly summoning to his aid. The locomotive engines in the United States are now performing the labor of 50,000,000 horses. The machinery brought into use since 1816 in this country is equal to the labor of 500,000,000 men. In effect, the productive capacity and wealth of the country has increased as if the population of the country had gone up to hundreds of millions instead of 31,500,000.

This statement strikingly illustrates our increased means, and is fully confirmed by the extent of the internal commerce of the country, which is almost entirely the result of the application of steam to locomotion, and which has been almost wholly created since 1816. The tonnage carried by the railroads of the State of Massachusetts for 1859 was 3,716,726 tons, worth, at the very low valuation of $100 per ton, $371,672,600. The tonnage of the Erie Canal and the Erie and New York Central Railroad for 1860 were 6,767,736 tons, worth at least $676,773,600—making an internal commerce, for the two States alone, exceeding $1,000,000,000 in value, nearly the whole of which has been created since the opening of the Erie Canal in 1824. Other portions of the country show a still greater relative progress, as their public works have not only been constructed, but their population supplied within

the last 40 years. There are now in the United States 31,500 miles of railroad, that have cost $1,250,000,000, and 5,131 miles of canal that have cost $200,000,000. The loyal States have 23,600 miles of railroad costing $950,000,000, and 5,000 miles of canal costing $200,000,000. If the annual value of the trade of the public works of New York and Massachusetts, with a mileage of 5,160 miles, is equal to $1,000,000,000, that of the remainder of the loyal States, with a railroad and canal mileage of 23,500 miles, must surely amount to a sum twice as large, or $2,000,000,000.

This subject can here be only generally referred to, but enough has been shown to dispel all fears of our ability to sustain burdens no larger, in ratio to our population, than those twice assumed and twice discharged. But the ability of a country to bear a heavy taxation does not so much depend upon its permanent or accumulated wealth, as upon the productiveness of its industries. Great Britain, the country to which we are accustomed to refer in discussing this and kindred subjects, derives only a small portion of its revenue from taxes on property. Of the taxes of all kinds collected for 1860, amounting to £70,809,977, land and assessed taxes produced only £3,241,107; leaving £67,568,870 raised upon consumption, chiefly of luxuries. Of this sum the customs produced £23,396,395; excise, £20,070,000; stamps, £8,267,258; post office, £3,370,000; income tax, £3,012,935. The following is a statement of the results, in dollars, into the British Treasury from the four great sources of revenue for the past 12 years:

	Receipts from Customs.	Receipts from Excise.	Receipts from Income and Property tax.	Receipts from Stamps.
1849.....	$103,194,605	$69,926,815	$27,040,795	34,337,740
1850.....	100,210,850	70,580,415	26,915,180	32,791,660
1851.....	103,076,650	72,210,405	26,524,015	21,938,410
1852.....	100,757,705	74,175,350	27,548,185	33,908,175
1853.....	104,513,675	76,688,620	27,940,855	34,877,080
1854.....	103,898,570	80,645,215	38,280,125	37,343,020
1855.....	104,938,760	81,947,430	78,590,925	34,038,020
1856.....	118,091,870	90,368,885	80,142,105	36,318,355
1857.....	114,321,715	87,360,000	75,689,986	38,215,460
1858.....	123,239,995	92,402,860	37,955,935	39,651,710
1859.....	124,122,890	104,118,635	30,335,525	39,984,905
1860.....	116,931,975	100,350,000	50,548,080	40,336,290

Of the customs' revenue, wines and liquors produced $22,222,270; tea, $27,044,620; tobacco, $27,867,315; sugars, $31,363,015, making a total from these four articles of $108,497,025. All the rest of the foreign commerce of the Empire is virtually free.

The art of taxation in all foreign countries is reduced to a science, and produces enormous sums without great apparent inconvenience. Were the taxes of England for a year assessed in a gross sum, to be paid on a given day, their payment would be utterly impossible. A beer drinker finds no difficulty in paying into the public treasury two or three pennies daily as a tax upon his beverage, who has not sufficient thrift to collect a pound ahead in a lifetime. He can provide for the day, but not for the morrow. It is by connecting the tax with the daily earnings of the laboring people, so that every glass of liquor drank, or pound of tobacco, or tea, or sugar used, or business transaction entered into, a certain sum is daily collected, that the vast revenues of that country are produced. They might be enormously increased if necessary. The ruling classes in England have never allowed their estates to be taxed for national expenditures, but impose the great portion of these burdens upon the consumption of luxuries—upon *processes* instead of accumulations or results. In the United States we have, since the war of 1812, had only two sources of national income—customs and lands. The income from the latter have never paid the cost of their management and the annuities to the various tribes of Indians from whom they were purchased. Customs' duties in England are less than one third of the revenues. We have only to adopt the example of that country to swell ours to five times their ordinary amounts. The economy of our government has kept our expenditures to one sixth those of Great Britain. We can raise an equal sum with a similar system, and a larger one, as labor, which pays the revenues of both countries, is vastly more productive in the United States than that country. That our people will not readily submit to any burdens necessary to put down the rebellion is a most unwarranted assumption. The economic workings of their institutions, with the marvellous material progress under them, has caused them to be regarded by an affection which people of other countries can not appreciate. In England the annual taxes for the support of the national government exceed $12 per head. In this country they have averaged less than $2 per head. Upon the return of peace they will not probably exceed $100,000,000. This sum will not call for more than $3 per head. A rate per head equal to that paid by the people of New York for municipal and State purposes, would produce $450,000,000; or a rate equal to that assessed upon the taxable property of the city, $250,000,000; a sum exceeding considerably twice the probable expenditure of the Federal Government upon a peace footing. For such expenditures, we have the customs' revenue estimated to produce $58,000,000; a direct tax of $20,000,000, and an income tax of 3 per cent. on all incomes over $800 annually. These sources should produce very nearly the amount required, without resorting to excise or stamps, or other internal taxes. The increased burdens will hardly be perceptible. The rapid increase of our population daily lightens previous burdens. The increase for the past decade was equal to 800,000 yearly. For the next it will exceed 1,000,000, proving most fully the remark of the Emperor of Russia in his late letter to our President, that the movement of the United States is upon the *ascending scale*. When their resources and future are fully appreciated, we can predict a price for their securities which shall place them on a level with those of the most stable of European Governments, and far higher than their previous customary range.—*Samuel Hallett & Co.'s American Circular.*

Share and Money Market.

The share market the past week has been firm with an advancing tendency. Government 6s have improved fully one per cent., in consequence of the favorable progress of the new loan and the general confidence felt in the position of military affairs. There is a good demand for Railroad bonds at an advance. Shares are also better. Money still remains very abundant and can be had at the lowest rates that for some time past prevailed. The traffic of the roads is good and will be increased by better prices for bread-stuffs from an active foreign demand, of the continuance of which there now seems to be little doubt.

Inter-Colonial Railway.

Canadian papers are again urging upon the British government and the Provincial Parliament, the necessity of proceeding without delay in the work of completing the great system of internal railway communication between the seaboard and the colonies at the extreme Northwest, having reference to an ultimate connection with the Pacific. They express some apprehension lest, in case of trouble with the United States, access to the sea by way of Portland should be refused, which, in the winter season, would entail serious embarrassment. The Toronto *Leader* says:

"For all defensive purposes, we must consider the Province deprived of direct winter communication with Great Britain; and so it will be until easy access be had at all seasons with the chief harbor of Nova Scotia.

Necessity tolerates no further parley. Another winter harbor than that of Portland is indispensable to Canada. We must be put in possession of an iron route to Halifax. And to accomplish this, not only is Canada required at almost any cost to perform her share of the great work, but the Imperial Government may well be called upon to contribute its quota without more delay."

Philadelphia, Wilmington and Baltimore Railroad.

This company is a consolidation of four railroad companies, viz: the Philadelphia and Delaware Counties, chartered by the Legislature of Pennsylvania, April 2, 1831; the Wilmington and Susquehanna, chartered by the Legislature of Delaware, Jan. 18, 1832; the Maryland and Delaware, chartered by the Legislature of Maryland in 1831; and the Baltimore and Port Deposit, chartered by the Legislature of Maryland in 1834. In March, 1836, the title of the Philadelphia and Delaware Counties Railroad Company, was changed to that of the Philadelphia, Wilmington and Baltimore. On the 18th of April, 1836, the Wilmington and Susquehanna and Delaware and Maryland Companies were consolidated, under the title of the Wilmington and Susquehanna Railroad Company; and on the 5th of February, 1838, the Philadelphia, Wilmington and Baltimore, the Wilmington and Susquehanna, and the Baltimore and Port Deposit Companies were consolidated under the title of the Philadelphia, Wilmington and Baltimore Railroad Company; the relative interests in the old companies in the consolidated line being represented by 10,000 shares of Consolidated Stock issued to the stockholders in the

old Philadelphia, Wilmington and Baltimore Company; 16,000 to the stockholders in the Wilmington and Susquehanna; and 19,000 to the stockholders in the Baltimore and Port Deposit—the par value of the shares being $50. Previous to the consolidation, the several companies had commenced, and most of them had completed the respective links. The Philadelphia and Delaware Counties was completed in 1837. The Baltimore and Port Deposit was opened in the same year to Havre de Grace instead of Port Deposit. In the same year the Maryland and Delaware road was completed. In 1838, the viaduct over the Schuylkill was finished, and a connection opened to Philadelphia by means of the Southwark road.

The Delaware, the Newcastle and Wilmington, the Junction and Breakwater, and the Eastern Shore railroads are also operated under lease by this Company. It is by means of the Newcastle and Wilmington, that the connection is made with the Newcastle and Frenchtown & Delaware railroads.

The Newcastle and Frenchtown Railroad Company was chartered in 1829, and the road constructed in 1830 '32. It is 16.19 miles in length, extending from Newcastle to Frenchtown, on Elk river. In 1840, the road was merged in the Philadelphia, Wilmington and Baltimore Railroad by an exchange of stock, and has since been operated as a part of its works. The portion of the road west of the Delaware junction is in disuse.

The total length of road owned, leased and operated by the Company is as follows:

Philadelphia to Baltimors	98 miles.
Newcastle and Frenchtown line	16 "
Newcastle and Wilmington	7 miles.
Delaware Railroad	71 "
Junction and Breakwater	8¼ "
Eastern shore	8 "
	94¼ "
Total	208¼ "

The company have 30 locomotives, (8 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads); 60 first class and 3 second class passenger cars, 2 sleeping, 16 baggage, 7 platform for crates, 4 express, and 1 paymasters cars; 250 house, 34 stock, 83 platform, 7 gondola, 70 dump, 16 lumber, and 61 road and hand cars.

The share capital authorized is $6,250,000, of which $5,600,000 has been paid in.

The funded debt of the company October 31, 1860, was $2,469,300, viz:

Mortgage 6 per cent. loan bonds $300, dated July 1, 1850, and payable July 1, 1860. The original amount of this loan was $2,161,775—the whole of which has been paid off except one certificate of $300, which has not been presented for payment.

New Mortgage 6 per cent. loan bonds $2,300,000, dated July 1, 1859, and payable July 1, 1884, interest semi-annually at Philadelphia. These bonds to the amount of $2,600,000 were issued for the purpose of taking up the bonds due July 1, 1860, and the two improvement loans, one for $144,000, due April 1, 1858, and the other for $119,000, due May 1, 1863. There had been issued up to the close of the last fiscal year, $2,342,000, of which $42,000 had been redeemed, leaving outstanding $2,300,000. These bonds are secured by a first mortgage on the road, and by a sinking fund beginning with $40,000 in 1860, and $42,000 in 1861, and so on increasing every year by the sum of $2,000, which sinking fund must be used in the purchase and cancellation of the loan at the market price.

Improvement 6 per cent. bonds, $119,000, dated May 1, 1853, and payable May 1, 1863, interest semi-annually at Philadelphia.

Mortgages on real estate, $40,000; ground rents, $10,000.

The aggregate amount of capital stock, bonded indebtedness, real estate mortgages and ground rents is $8,069,300. The company has no floating debt.

The current liabilities, consisting of unclaimed dividends and interest, rent of Delaware road, and interest on all debts accrued, etc., amounted to $140,918 30. The assets to $624,421 30.

The total cost of road, bridges, buildings, equipment, real estate, etc., October 31, 1860, was $7,786,443 83.

The following is a statement of cost, gross and net earnings, amount of dividend and rate per cent. from 1838 to 1860 inclusive:

	Cost of road.	Gross earnings.	Net earnings.	Dividend. am't.	Dividend. p. c.

Chicago, Alton and St. Louis Railroad.

The new management of this road is effectively overhauling its track and rolling stock, and within a few weeks, or months at most, it will be in as good condition as any railway in the West. Indeed, it may already be said to be in capital order. Many old bridges have been replaced by substantial stone structures; tressle works are being filled up; the road bed is being ballasted with good gravel, and every department seems to be receiving proper attention.—*Chicago Tribune.*

Railroad in Oregon.

The first railroad in Oregon has just been built on what is called the "Transit across the Cascades." The road is of substantial construction, is 3¾ miles long, and the majority of it is on trestle-work of a dizzy and dangerous hight.

AMERICAN RAILROAD BOND LIST.

(s) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. "S. F.," Sinking Fund. "var.," that the bonds fall due at different periods

The unissued portion of the recent $150,000,000 loan will swell the aggregate debt to about $240,000,000. The last $50,000,000 is not to be taken till December 15. Congress meets on the first of the month, and will have ample time to provide further means for the operations of government before the present shall be exhausted.

Racine and Mississippi Railroad.

Fourteen miles of iron have been laid west of Freeport, and the balance of the distance to "Lanark" is being laid at the rate of a mile a day. This extends the line of the road twenty miles west of its present terminus, and within sixteen miles of the Mississippi. This Company will soon have an independent line to the Mississippi river.—*Racine Advocate.*

(From the Journal of the Franklin Institute.)

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations.

By M. Cezanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

(Concluded from p. 675.)

NOTES.

Note A.—*Upon some effects of the variations of temperature observed at the Theiss Bridge.*

In preparing the plan, it was admitted, that the variations of temperature would, as is usual for arch bridges, have no other effect but to raise or lower the summit of the arches, that the distance between the piers would remain constant, that the efforts produced by the changes of form arising from changes of temperature would attain their maximum in the upper chord, during the low temperatures, and that there was no occasion for solicitude, as might be inferred from a very simple calculation. The fastening of the upper chord upon the square bodies, being one of the conditions of the stability of the piers, it was proposed to complete it by mooring the ends of these upper chords behind the abutments.

In reality the rolled iron trusses are so rigid in the vertical plane, that they manifest a tendency to remain similar to themselves through the changes of temperature. In the early part of November, 1858, the north wind having suddenly reduced the temperature 18° Fahr. the whole bridge was seen to contract and the extremities tended towards the middle; the abutments partook partially of this motion; a slight crack between the mass of the right abutment and the viaduct, opened in the morning and closed at noon. On suppressing the mooring, the motion continued; the iron trusses were bound to the masonry solely by eight bolts of 1.97 inches secured with lead, into the stone, and resting the heels of the arches against their shoes with a screw fastening. These screws being suppressed, the abutments were immovable; but the heels of the arches separated from their shoes nearly .39 inch. The summit of the arch then fell to its original level and resumed the form in which it had been constructed.

From this observation we conclude that the arches of the Theiss bridge exerted no thrust when unloaded, and that they could be held by simply being placed upon two supports at the springing line.

Six iron wedges in couples were driven between the heels of the arches and the shoes. In the morning the slant of the arches bore mainly upon the lower wedges, and at noon upon the upper wedges; advantage of this was taken in striking upon the upper wedges in the morning, and at noon upon the lower, so that the severest cold could not separate the heel of the arches.

In reality the arches act partly as a rigid girder, and partly as flexible arches. We observed, for example, that for a fall of 58.5°, the fourth pier remained immovable, the first advancing towards it 0.55 inches. Now, this pier is 437.3 feet from the fourth, and should approach it by 2.08 inches, if there were no change in the arches; the motion observed at the springing was 0.55 inches, proving in this case that the effect of change in temperature was divided between the piers, which received .26, and the arches, which received the remainder.

Note B.—*Machine for making Beton.*

The beton for the Theiss bridge, was prepared in a machine widely known in Germany, but little known in France.

This simple machine is composed of a cylinder 13 feet long, and 4 feet diameter, open at its ends, and turning upon an axis inclined to the horizon. The stone and the mortar were thrown from a barrow into a hopper, which delivered them into the cylinder at its upper end. The mixture was effected by the rotation of the cylinder, whose lower end delivered the beton either into barrows or cars.

The interior of the cylinder was smooth and lined with sheet iron; the proportion of the materials was made by regulating the number of barrows of mortar and those of stone cast into the hopper. At Szegedin the cylinder was inclined to the horizon one-13th; it made from fifteen to twenty turns per minute, and the mixture was perfect. The cylinder was driven by a belt passing directly over its outer surface. Motion was given by an engine which worked at the same time a strong mortar mill.

This machine easily made from 104 to 131 cubic yards in ten hours, and so long as the loading of the materials was not included in the net cost, the expense per cubic yard, is very small, and is but a fraction of the expense of the engines which drive the beton cylinders.

Note C.—*Pile Driving.*

At Szegedin there were three kinds of piling:—

1. The piles for the scaffolding, the service bridge, &c., were driven in the river; for the most part they were driven by steam; and the work progressed night and day. The machine gave sixty to eighty blows in one hour, the fall varying between 10 and 19½ feet.

2. The piles were driven upon the shore, for the foundation of the abutments; the pile drivers were worked by steam, with a ram 2,200 pounds weight falling from 26 to 29½ feet. The heads of the piles were crushed in spite of their bands, but the parts towards the end of the driving, which jutted a little above the bottom, resisted well. The piles were of spruce. The engine worked a pump at the same time that it imparted motion to a horizontal shaft placed in front of the excavation. One or two pulleys worked the pile driver by means of a belt. A row of piles perpendicular to the horizontal shaft was driven without displacing the pulley.

3. The interior piles of the column were driven by hand; the work went on night and day; sometimes forty hours were given to one pile, as the falls used were moderate. The ram, 880 pounds, was worked by a hand rope of the pile driver. After 810 volleys a pile has opposed an absolute refusal during 180 volleys of 25 blows. The ram of 2,200 pounds was taken; and the pile sunk 0.63 inch per blow with a fall of 9.3 feet.

These piles were cut to a diameter of 11.8 inches, so as not to tighten indefinitely the tamping of earth left in the columns; it was proved by direct experiments, that this packing consumed but a small fraction of the resistance of the pile, about one-15th, or in other words, that fourteen-15ths of the resistance of the pile was due to its fixture below the column, the only use for which it was designed.

The piles of the abutments and those of the first piers, were provided with iron shoes; but in excavating after the piling of the first pier, several detached shoes were found in the foundation, and they were abandoned in the last piers, the work being done better without them.

This experience confirms that of the Prussian engineers in the construction of the bridges of Dirschau, and of Marienbourg upon the Vistula, in which they concluded that the shoe had no influence upon the driving of the piles. The same engineers charged with the construction of the bridge at Cologne, drove their piles unshod through the gravelly bottom. The system appeared however to be too absolute.

A Compliment to the Canadian Geological Survey.

When the American Association for the advancement of science met here, Professor Ramsay, Director for England of the Geological Survey of Britain, said if he were consulted by any small or young State respecting the best method of carrying on a Geological Survey, he should refer them to Canada as, under Sir William E. Logan's direction, furnishing the best model he knew of. Without the learned Professor's advice we believe a great European State has made the reference. The King of Italy has recently appointed a commission to decide upon the proper method of carrying out a Geological Survey of his kingdom, and application has been made on behalf of this commission to Canada for suggestions, embracing a description of the whole organization of the Survey here, the salaries of officers, the construction of the map,

&c., &c., &c. Thus it seems the great exhibitions and the publications of the Survey here, which have been regularly furnished to savans in Italy have given the Province a status in the scientific world, of which we have not a little reason to be proud.—*Montreal Gazette.*

Railroad Earnings--Weekly.

The following are the earnings of the Great Western Railway of Canada for the week ending September 13, 1861:

Passengers	$20,448 09
Freight and live stock	17,248 52
Mails and sundries	1,322 53
Total	$39,019 15
Corresponding week of last year	56,451 19
Decrease	$17,438 04

The receipts of the Morris Canal for the week and season, compared with those of 1860, have been:

Total to Sept. 8, 1860	$227,113 70
Week ending Sept. 15, 1860	10,345 69
	$237,459 39
Total to Sept. 7, 1861	$170,986 86
Week ending Sept. 14, '61	7,996 70
	178,983 56
Decrease	$58,475 82

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in Sept., 1861, were $52,077 90
Do. 1860 23,589 15

Increase in 1861	$28,488 75
Total since 1st September, 1861	$74,142 90
Do. 1860	48,876 29
Increase	$25,266 61
Total since 1st January, 1861	$709,188 28
Do., 1860	646,146 41
Increase	$63,041 87

The earnings of the Chicago and Rock Island road, the 2d week in Sept., '61, were $35,757 00
Do. 1860 33,191 00

Decrease	$2,566 00

The earnings of the Toledo and Wabash Railroad the 1st week in Sept., 1861, were $32,114 50
Do. 1860 27,389 41

Increase	$4,725 09
2d week, 1861	$30,093 00
Do. 1860	25,027 90
Increase	$5,065 10

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 2nd week in September, 1861, were $29,951 66
Do. 1860 32,610 50

Decrease	$2,658 84

The receipts of the Chicago and Northwestern Railroad for the 2nd week in September, 1861, were $21,557 02
Do. 1860 19,371 88

Increase in Sept., 1861	$2,185 14

The earnings of the Michigan Central Railroad, the 2d week of Sept., 1861, were $47,752 72
Do. 1860 58,399 12

Decrease	$10,646 40

The earnings of the Galena and Chicago Railroad the 3rd week in Sept., 1861, were $48,103 00
Do. September, 1860 49,967 68

Decrease	$1,864 68

The earnings of the Cleveland and Toledo Railroad the second week in Sept., 1861, were $20,082
Second week in Sept., 1860 23,620

Decrease	$3,538

NB.—Celebration September 10th, last year, gave passenger earnings of $4,800.

Railroad Earnings--Monthly.

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of August, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$194,344 77	$250,073 71
" " merch'dise	32,406 78	49,100 38
" " travel, etc.	38,606 60	38,320 85
Total	$265,358 15	$337,494 94
Transportation, roadway, dumpage, renewal fund, and all charges	134,332 83	147,358 58
Net profit for the m'th,	$131,025 32	$190,136 36
Profit for the previous 8 months	892,661 11	$879,491 83
Tot. profit for 9 mos.	$1,023,686 43	$1,069,628 19

The following is the 16th monthly report of Mr. Jos. W. Alsop, receiver of the Ohio and Mississippi Railroad Company, for July, 1861:

Balance brought down from June account		$23,414 07
RECEIPTS.		
From passengers, prior to July 1	$3,018 33	
From freight and express	11,064 98	
From mail service collected,	374 08	
		14,657 39
From passengers on July account	12,577 44	
From freight on July acc't.	18,346 04	
		30,921 48
From temporary loan (for which the Receiver's notes are given with interest to maturity the sum of $35,665 66) to meet extraordinary repairs of Miami Bridge, etc., damaged by storm		35,000 00
From other sources		672 26
Total		$104,665 20
DISBURSEMENTS:		
Paid balance of charges with other roads	$949 96	
Paid discount, interest and exchange	101 84	
Paid note on account of iron purchased	3,226 56	
Paid sundry office expenses,	259 45	
Paid on account of former arrearages	3,214 25	
Paid on account May current expenses	45,163 26	
Do. June do.	38,190 32	
Do. July do.	2,294 44	
		93,490 07
Balance carried to August account		$11,265 13

Atlantic and Great Western Railroad.

We learn that Chief Engineer Kennard has ordered that work be commenced before Akron, O., and the Sunbury & Erie Railroad, now under way, immediately, and that the work be pushed forward with all possible vigor, preparatory to putting up the superstructure; and for this purpose three thousand additional men will be put upon the work forthwith. The grading and masonry between Akron and Ravenna is now nearly completed, while a large portion of the iron has been purchased, and is ready to be laid down as soon as the road bed shall be prepared for it.—*Pittsburg Chronicle.*

Live Stock on the Erie Railroad.

For the week ending Monday, Sept. 23—197 cars of cattle; 38 cars of hogs; 16 cars of sheep; 13 cars of horses. Total stock, 264; add 300 cars of express freight, making a total number of cars hauled by stock express trains during the week 564, showing an increase over last week of 52 cars of live stock. Total increase of all cars hauled by stock express, 57.

PATENT RIGHTS SECURED.

THE RENSSELAER
Polytechnic Institute,
TROY, N. Y.

THE thirty-eighth Annual Session of this School for thorough instruction in the Natural Sciences and Civil Engineering, will begin September 18th, 1861.
A department for instruction in Military Science and Art has been instituted.
Inquiries may be addressed to Prof. Chas. Drowne, Director of Rens. Pol. Institute, Troy, N. Y.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF
Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.
Wrought Iron Welded Tubes—from ¼ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.
Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.
Cast Iron Gas or Water Pipe—1½ to 24 inches in diameter, and branches, etc., for same.
Gas Works Castings, etc., etc.
PHILADELPHIA.
Stephen Morris, Hy G. Morris, Chas. Wheeler, Thos. T. Tasker, Jr., Stephen P. M. Tasker.

PROSSER'S PATENT
LAP-WELDED IRON BOILER TUBES.
TUBULAR BOILER MAKERS
AND
ENGINEERS' TOOLS.
Tubes for Artesian Wells, conveying Steam or Water, Shafting, etc., screwed or coupled together, in various ways.
KRUPP'S BEST CAST STEEL.
PARIS'S PATENT GLASS ENAMELLED IRON TUBES, FOR WATER, ACIDS, ETC.
PATENT LAP-WELDED STEEL TUBES.
THOMAS PROSSER & SON,
28 Platt St., New York.

LOCOMOTIVES FOR SALE.
THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.
They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.
The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.
WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

BOONTON IRON WORKS.

PATENT MACHINE FORGED

BOLTS AND NUTS.

WE are now manufacturing these goods at our Works at BOONTON, N. J.—In the manufacture of the Nuts, the patented device of the "Double Punch," viz, two punches operating from opposite sides towards the centre of the Nut, forces into the body of the Nut most of the Iron which in all other processes is punched out, and also condenses the Iron around the Bolt hole, thus ensuring the greatest strength in the Screw Thread, and making a Nut SUPERIOR TO ANY made by hand or the ordinary machine processes. In size they are made according to the standard approved and adopted by our best Machinists and Engine Builders. The mode of making Bolts is such as to produce an upset solid head, perfectly true on all sides, and of uniform size. The Iron used is of our own manufacture, and we guaranty it of superior quality.

We invite consumers to make trial of them, and will furnish SAMPLES and PRICE LIST on application.

Commercial Results of the War.

We give below an interesting and striking statement of the commercial condition of the country growing out of the war in which it is engaged.

Foreigners who, almost up to the present moment, have regarded the civil war now raging in the United States as possessing political significance alone, and as deserving attention only from the inferences it enables them to draw unfavorable to our institutions in contrast with their own, are beginning to discover that they perhaps have a deeper interest than ourselves in the contest, and that their commerce, and not our existence and welfare as a nation, may be made shipwreck in the great maelstrom which they see raging across the Atlantic.

The movement of the commerce of a nation in either direction is necessarily slow, but trade returns at home and abroad are already indicating that a great revolution has taken place. The value of imports into the port of New York, for the first nine months of the year, have been $97,920,820, against $181,411,187 for 1860, and $192,988,691 for 1859. The falling off from 1860 has been equal to 46 per cent.; from 1859, 49 per cent. The imports into this port for July, August and September have been $19,971,820, against $41,319,774 for 1860, showing a falling off, so far, for the last half of the year, equal to 55 per cent. The falling off for the balance of the year will probably be equal to 60 per cent., and that for the whole year equal to 50 per cent. The diminished value of imports at the other ports has been in still greater ratio. All the Southern ports, south of Baltimore, are rigorously closed by the blockade, and the foreign commerce of that city has been nearly destroyed by the war, and will not revive at present. It will, therefore, be safe to estimate the imports into the United States from foreign countries, for the year ending December 31, will not exceed $181,000,000 in value, or one half those of 1860, which were valued at $362,166,254.

We have only to turn to England, the country bearing the most intimate commercial relations with our own, to witness a correspondingly reduced export trade. For the month of August the exports from the port of Liverpool to the United States were $6,000,000 less than in August, 1860, having fallen from $8,300,000 to $2,250,000. Such a falling off is well calculated to strike the foreign merchant and manufacturer with consternation, which will only be aggravated as the season advances. A similar decline for a year would reduce the trade of one port in the United Kingdom to the United States nearly $75,000,000! It is needless to say that a city or people, whose importance is chiefly derived from a foreign trade, can suffer no such loss without experiencing the most serious disasters. Liverpool is the type of the nation. But this is not half the result. England took from the United States last year raw cotton valued at $135,000,000. This she worked up into fabrics having an exportable value exceeding $300,000,000. The season will commence and the greater portion of it pass, when the movement of the staple has been accustomed to be most free, without the shipment of a bale. Such sudden and excessive contractions in the imports of foreign merchandize of a first-class nation like the United States, can not take place without producing results so tremendous and far reaching as to overshadow, to the distant observer, all events of a merely political character.

Such a reduction in our imports will naturally most affect the export trade of those countries whose industries coincide most closely with our own. The reduction in imports does not imply a corresponding reduction in consumption by our people, but increased domestic production. We shall continue importations, in the accustomed volume, of luxuries and articles that we do not produce, such as tea, coffee, sugar, tobacco, and wines and distilled liquors. The experience of foreign countries fully proves that an increase in their price from impost or excise duties, does not materially check their consumption. To these articles we may add hides, a necessary article of import, no matter at what cost, and imports of produce from the British North American provinces, which come in duty-free, and are not likely to diminish in amount. The value of such articles imported the past year were as follows:

Sugar and molasses	$38,338,449
Tea	21,883,797
Coffee	8,915,327
Wines and spirits	7,795,224
Tobacco	6,079,909
Hides	10,524,706
Imports from British Provinces	20,446,586
Total	$111,982,998

If, to the above, we add silks, which were imported last year to the value of $33,265,820, and which we must continue to import in very large quantities, we shall have a total of $145,248,815 of articles regarded as indispensable to the wants and appetites of a people, and in the production of which we can not compete, at present at least, with other nations. Deducting this sum from the gross imports the present

year, there would be left only $35,500,000 for other articles.

While the list of imports given may not compose so large a per centage of the imports of the country as that estimated, it is plain to see that it will be a great portion of them. The high rates of duty recently imposed on manufactures of cotton and wool, and upon iron of all kinds, may be regarded as an effectual bar upon their importation. The value of these articles imported into this country the past year were as follows: cottons, $32,328,659; woolens, $38,324,659; iron, $21,524,571, making a total of the three articles of $93,314,254; or adding silks, which will be temporarily affected, of $126,680,074. The reduction in the importations from Liverpool to the United States show how the three first are already affected. Although it is highly probable that there may be some modifications in the tariff, there is no hope that they can be so great as to help the matter. Under the great call for money, we must expect that high rates will be continued upon all the ordinary sources of revenue. Under their protecting influence domestic manufactures will get a start which, with low rates of money which are almost certain to prevail, and with labor nearly as cheap in this country as in the Old World, will enable them to keep out of our markets foreign manufactures of all kinds which this country is adapted to produce. We have equal advantages or the production of cotton and woolen goods, and iron, as England, and shall not only drive her out of our own markets, but in time compete with her, with them, in foreign ones.

To estimate the full effect of such a revolution in the import trade of a great nation, we must look at its effect upon its export trade. The phenomenon here is still more striking than that already described. While the imports into the port of New York have fallen off nearly 50 per cent. in two years, its exports have nearly doubled. The following is a comparative statement of the imports of foreign merchandize, exclusive of bullion, into this port, and exports of domestic produce, exclusive of bullion, for the first nine months of 1859, 1860 and 1861:

	1859.	1860.	1861.
Imports	$192,988,691	$181,411,137	$97,920,820
Exports	48,488,576	66,961,535	93,014,968

Such an exhibit fully proves that, while we can so far forego, through economy of consumption or domestic production, the use of foreign merchandize as to reduce importations to one-half of their accustomed volume, foreign nations do not bear the same relations toward us, for the very good reason that we are self-sustaining, while they are more or less dependent. We can take $100,000,000 less from England the present year than we did the last without any great inconvenience, and on some accounts with very great advantage. She can not take from us a cent less without standing in her own light. She wants food, which she can get from us at cheaper rates than from any other nation. She wants cotton if we can give it to her, which we trust we very soon can. She took from us last year $202,000,000 of domestic produce. She is eager to take as large an amount for the present. How is this to be paid for? By merchandize, as far as this will go, and the balance in specie. To meet the balance of trade which has existed against her, in consequence of the falling off of purchases, she has shipped to us the present year $40,000,000 in specie. To make good the balance against us in the corresponding portion of 1860, we shipped an equal amount to that country. Already the difference amounts to $80,000,000. It is likely to be very largely increased as the year goes on, carrying the gold received from that country up to $50,000,000 or $55,000,000. The exports of bullion from the United States to England in 1860 was over $56,000,000, showing an almost exact reversal of the relative commercial position of the two nations.

Such a state of things is most extraordinary, and could never have been believed to be possible without actual demonstration. The empirical mode of reasoning adopted, particularly by foreigners, who could be expected to know but little of this country, led to a very different result. The first effect of the civil war, they argued, would be to check exportations, from the cessation of production. From the same cause, imports would be likely to be largely increased, to make up for the domestic deficit, and by the immense purchases rendered necessary for the army and navy. In payment of these the country would first part with its gold and silver, and push its credit for the balance. The loss of specie would force the banks to suspend payment, throw internal trade into utter confusion, and end, perhaps, in national bankruptcy.

That such has not been the result in the United States, is owing to their independent position, resulting from the great variety of their industries and productions, which renders them self-sustaining, and enables them to discontinue at will their purchases from foreign countries, which must, notwithstanding, keep up the full volume of theirs. The superiority of the United States over all other nations, in its commercial position or strength, is now fully demonstrated. The whole rebellion proceeded upon the assumption that any interference with the free flow of cotton would bankrupt the North, and render it powerless to exert any force for its repression. This idea was largely shared in by foreigners, who connected our political existence with the movement of this staple. The timid and disloyal among ourselves partook of the delusion. In the untried field before us here was our great danger. From the lack of experience we could not appreciate our real strength. We never stood, commercially, so well with other countries as we do now. We never have had so much specie in the country as we have now, and never before was the tide of the precious metals set so strongly in our favor. Money was never more abundant. The routes of internal trade never more heavily laden with traffic, while the exports of domestic products from this port are more than 50 per cent. greater than at any former period. Confidence is universally restored. All these things do not indicate, as foreigners affect to believe, that our government is effete, and that our only salvation is to be found in a change of our political institutions. Such are not the symptoms usually attending a nation in the last stages of decay, but one full of conscious strength, and just emerging upon the conspicuous theatre it is destined to occupy.

The war is already worth all that it is likely to cost in the lessons it has taught. It has forever released us from the bondage to cotton, which for a generation has hung over us like a spell, destroying all freedom of commercial or political action, and rendering us slaves to the most absurd delusions. The war has proved to the world that cotton is no longer needed to maintain our commercial independence, as this was never so thoroughly established as since this article has been counted out of the list of our exports. We have $65,000,000 in gold in the country more than we had on the first day of January last. The war has also shown where the real strength and wealth of the country lay. That in this country, as everywhere else, strength and justice, and industry and wealth go hand and hand. As all prosperity is based upon moral conditions, we establish one when we vindicate the other. Hence the contest for principle in which we are engaged is only one, in another form, for our material welfare.

This exhibit shows with what motives, and with what entire confidence and safety the banks, as the representatives of the capital of the country, come to the aid of the government. They proffer all the money it wants. The rapid flow of specie into their vaults, with the abundance of capital, relieves them of all apprehension as to the future. The expenditures going on, apparently exert no tendency to increase the value or diminish the abundance of money, while they have already given a great impulse to manufactures and trade.

The condition of this country resulting from the war is that of complete commercial independence. Its influence, with our diminished imports, upon foreign countries, remains to be seen. A leading member of a great system can not, in effect, disappear, and leave this system in harmonious action. The extent of this aberration we leave for those to be most injuriously affected, to decide. If England for the future will be compelled to send us $50,000,000 or $100,000,000 annually, in bullion, in place of her fabrics which we have been accustomed to consume, her commercial system must undergo a great revolution. If it should turn out that she is to receive no more American cotton, at least for a year or two to come, the effect of the loss of American trade must be greatly aggravated. The rebellion in our

country is thus involving all others in its material consequences, and, singular as it may seem, of all great commercial countries, the States loyal to our government may very probably suffer the least. Neither England nor France can be less indifferent than ourselves to the contest. They are interested really more than we are in the speedy return of peace.

European and North American Railway.

The revenue and expenses of this road (as far as completed from St. John to Shediac) during the year ending July 31, 1861, have been as follows:

REVENUE.

Date.	Passengers.	Freight.	Locomotives and cars.	Mails & sundries.	Total.
Aug...	$11,769	$2,899	$2,023	$290	$16,980

Total..	$40,100	$19,400	$18,996	$17,388	$95,884

RECAPITULATION.

Revenue—		
Passengers		$68,485 59
Freight		45,516 32
Locomotives and cars		13,314 00
Mails and sundries		5,238 75
		$132,554 66
Expenses—		
Locomotive power	$40,099 96	
Merchandise and passenger cars	19,400 30	
Maintenance of way and buildings	18,996 12	
General charges	17,388 12	
		95,884 50
Net earnings for 12 months ending 31st July, 1860		$36,670 16

It will be seen by the foregoing that the net earnings for the 12 months ending 31st July, 1861, amount to the very handsome sum of $36,670 16, a result gratifying alike to the management, the Government, and the public in general.

The returns of receipts and expenditures for the months of August, September and October, 1860, which appear in the above statements, have already appeared in the published report for 1860; and as the road was not opened through until August, 1860, a fair and equitable comparison cannot be made. However, it is quite evident that there is a considerable increase in the receipts for passengers, freight, etc., while the additional expense of running the through line is comparatively small. The receipts and expenses during the month of July in the present year will give a pretty good idea of what the profits of the road will be hereafter. On glancing at the table above, it will be seen that the receipts of the road for that month amount to the sum of $14,514 46 the largest amount received in any one month, except during the month of August, 1860, when the receipts were $16,980 05. The receipts of August of this year will doubtless be much larger than in 1860. The expenses of the road in July of the present year amounted to $7,500, leaving a net gain on that month's operations of $7,014 46. The receipts for July, 1860, before the road was run entirely through, amounted to $10,459 97, and the expenses $7,283 97. It will thus be seen that the operations for the month of July, 1861, when compared with the same month in 1860, exhibit an increase of $4,054 49 in the receipts; while the expenses of July, 1861, were but $216 03 over those of the same month in 1860. The largest amount received for the carriage of passengers during any one month was in August, 1860. The largest sum for the carriage of freight was in May last. The receipts for locomotives and cars were greater in September, 1860, than in any other month. The receipts for the carriage of mails and sundries during February last exceeded those of the other months.

Railways in the United Kingdom.

From two Parliamentary returns just issued, it appears that the aggregate number of miles of railway open for traffic in the United Kingdom at the end of 1860 was 10,433, against 10,002 miles at the end of 1859. The total number of passengers conveyed on those railways in the year 1860 was 163,435,678, against 149,757,294 in the year 1859, showing an increase of 13,678,384. The number of holders of season and periodical tickets in the year 1860 was 47,894, against 49,856 in the year 1859. The total receipts from passengers, parcels, horses, carriages, and dogs amounted, in the year 1860, to £13,085,756, and in the year 1859 to £12,530,646, showing an increase of £555,110. The total receipts for live stock amounted to £570,980, against £609,723 in 1859, showing a decrease of £38,743. The total receipts for conveying 60,386,788 tons of minerals amounted to £4,951,899, against 51,756,782 tons conveyed in 1859 for £4,223,002, showing an increase of 8,630,006 tons carried and of £728,897 in the receipts. The total receipts for 29,470,931 tons of general merchandise amounted to £9,157,987, against 27,005,737 tons conveyed in 1859 for £8,373,284, showing an increase in the tonnage of 2,465,194 tons, and in the receipts of £784,703. The total traffic receipts for the year 1860 amounted to £27,766,622, against £25,743,502 in the year 1859, showing an increase of £2,023,120.

The total working expenditure amounted to £13,187,368, or 47 per cent. of the receipts, not including that of the three small railways, the united traffic of which only amounted to £18,136 for the year 1860. This latter being deducted from the above total receipts of £27,766,622 leaves £27,748,486 in respect of which the returns are perfect. The total expenditure being deducted from the latter sum leaves the net receipts £14,561,118 for the year 1860, applicable to the purposes of interest and dividend on the loan and share capital of the various railway companies of the United Kingdom.

Of the total working expenditure £2,437,362, or 18.48 per cent., was for the maintenance of the permanent way; £3,801,282, or 28.83 per cent. for locomotive power; £1,118,784, or 8.49 per cent., for repairs and renewals of carriages and wagons; £3,699,708, or 22.05 per cent., for traffic charges; £517,367, or 3.93 per cent., for rates and taxes; £363,174, or 2.75 per cent.. for Government duty; £181,170, or 1.37 per cent., for compensation for accidents and losses; £1,068,521, or 8.10 per cent. for miscellaneous expenses; making the total working expenditure, as above, £13,187,368.

The working stock consisted of 5,801 locomotive engines, 15,076 carriages of all kinds for the conveyance of passengers, and 180,574 wagons of all kinds for the conveyance of live stock, minerals, and general merchandise.

Of the total receipts for the year 1860, £23,454,810 were on 7,583 miles of railway in England and Wales; £2,925,229 on 1,486 miles of railway in Scotland, and £1,368,447 on 1,364 miles in Ireland. The total working expenditure was £11,258,104, or 48 per cent.; £1,306,128, or 44 per cent., and 623,136, or 45 per cent. respectively; leaving £12,196,708 as the net receipts on railways in England and Wales, £1,619,101 on railways in Scotland, and £745,311 on railways in Ireland.

The rolling stock on railways in England and Wales consisted of 4,696 locomotives, 12,338 passenger carriages, and 150,582 wagons of all kinds; on railways in Scotland, 781 locomotives, 1,876 passenger carriages, and 25,215 wagons; and on railways in Ireland, 324 locomotives, 867 passenger carriages, and 4,777 wagons of all kinds.

Of the 163,435,678 passengers conveyed on railways in the United Kingdom during the year 1860, 20,625,851 were first class, 49,041,814 second-class, 93,768,013 third-class, including Parliamentary. The receipts were £3,170,935 for first-class passengers, £3,944,713 for second-class, and £4,162,487 for third-class and Parliamentary passengers, £272,807 for holders of season and periodical tickets; making the total receipts for passengers, £11,550,942. The total receipts for excess of luggage, parcels, carriages, horses, dogs, etc., conveyed in passenger trains amounted to £1,008,892, and for mails to £525,922, making with tha receipts for passengers a total of £13,085,756.

The increase in the number of first-class passengers carried in the year 1860, as compared with the number conveyed in 1859, was 1,421,700; in the number of second-class passengers, 4,689,911, and in the number of third-class and Parliamentary, 7,566,773; total increase, 13,678,384. The increase in the receipts for first-class passengers amounted to £13,204, for second-class to £174,912, for third-class and Parliamentary to £225,728, and for season and periodical ticket

holders to £25,366, making the total increase £439,210 in the receipts for passengers in 1860 as compared with those of 1859.

(From the Philadelphia Commercial List.)

The Manufacture of Iron and Steel.

The policy of the national government has not been hitherto favorable to the development of those branches of industry which naturally spring from our vast mineral and metallic resources. Especially hostile has it been to the growth of those departments of manufactures in which Pennsylvania has a peculiar interest. Now that after long years of opposition, we have gained such protection as is accorded by the MORRILL tariff, a determined effort is made on the part of New York importers and foreign producers to break down that which is our only guarantee of future safety. Heretofore, the cry has been that we had not the capital to contend with European rivals, and that it would be wiser for us to succumb at once, leave our natural wealth to slumber in its native hills, and buy just what foreign merchants chose to offer in the market. It is safe to say that no nation ever grew rich or independent in pursuit of such a policy, and it is creditable to the common sense of our people that they have labored, in despite of all these obstacles, to build up an independent industry. At the present time, when the friendly commerce of Great Britain is extremely uncertain, we have all a deep interest in the development of that production which has been most seriously injured by British competition.

We have, in the mountains of Pennsylvania, iron which is believed to be preferable for machinery and other purposes to any that is produced abroad. We have among the same grand old hills, coal, both anthracite and bituminous, of a superior quality. We have, thanks to emigration and the development of American energy and skill, an abundant supply of the kind of labor necessary to bring within the circle of active industry the natural resources of which we are so proud. Nothing was needed beyond the sympathy of the national government and an assured measure of protection, to render Pennsylvania the great manufacturing State of the nation, and a formidable rival of a people who have lately given abundant evidence of intense hostility to free institutions.

We have before us a report on the manufactures of Philadelphia, prepared by LORIN BLODGET, Secretary of the Board of Trade, in which document are embodied facts of great interest to everybody concerned in the prosperity of Philadelphia, and especially to those who are engaged in the production of iron and steel. In our present issue we give some statistics from this report. Mr. BLODGET has carefully prepared lists of the number of establishments, the amount of capital invested, the number of hands employed, and the aggregate amount of the production. From a careful consideration of these figures it will be seen that Philadelphia has steadily maintained the supremacy she acquired years ago, in the various branches of iron manufactures. By her railroad facilities, mainly constructed by her own capital, she has the readiest access to both coal and iron, and by the skill of her machinists and the inventive genius of her mechanics, she has shown that she can compete with any other city at the odds, and gain the superiority. The machinery of her production is to be found in almost every civilized city of the continent, and her reputation has spread to regions where even the enterprising "commercial metropolis" has failed to make her mark. The compiler confesses that some of his estimates are rather beneath the mark, but thinks they will afford sufficient data for a proper appreciation of our progress in the manufacture of iron and steel.

We append, as compiled for the Annual Report of the Board of Trade, the number of Iron Foundries, Machine Shops, Rolling Mills, and Steel Works in Philadelphia, and the number of Furnaces in Montgomery, Delaware and Chester Counties, within a few miles of the city :—

	No. of Establishments.	Power.	Capital.	Raw Material.	Males empl'd.	Females employed.	Value of Produce.
IRON FOUNDRIES—

American Railroad Journal.

Saturday, October 5, 1861.

Share and Money Market.

The share market the past week has, with the exception of Border State stocks, been firm but quiet, with an upward tendency, particularly of Government 6s that are now 91⅞ to 92, having risen one per cent. during the week. The improvement in these is the best evidence of increasing confidence, and effects the whole market, with the exception of the bonds of the seceding States. These are considerably lower. They have been sustained by a southern demand, which appears to be falling off. Money continues to be very abundant. The demands of Government do not appear to exert any tendency to advance rates. The business on railroads is getting more active in consequence of the improved foreign demand for breadstuffs. Railroad shares are better with an upward tendency.

Philadelphia and Reading Railroad.

This company was chartered April 4, 1833, with authority to construct a railroad from Philadelphia to Reading. At the time, it was expected that the line would be continued to the coal fields by other companies, but as they were unable to do so, the right to construct the road to Pottsville was granted to this company, and the time for its completion extended to March 30, 1842. Construction was commenced in 1836, and that part of the line between Reading and Norristown opened July 16, 1838. The section between Norristown and Philadelphia was completed December 5, 1859. The whole amount expended up to that date was $4,540,971. On the 13th of January, 1842, the entire line to Mt. Carbon was opened for business. On the 20th of May following, the Richmond line, for the accommodation of the coal trade was opened. In 1851, the company purchased of the State the railroad extending from the corner of Pine and Broad Sts., to a junction with the road on the west side of the Schuylkill river. In 1858 the Lebanon Valley Railroad was purchased. This road was the first great work of the kind opened, and still enjoys the pre-eminence of being the most important work engaged in the coal trade of the country. The following table will show the number of tons of coal transported annually over the road and the receipts for the same:

	Tons of coal carried.	Receipts from same.
1843	218,711	$278,840
1844	421,985	445,509
1845	814,279	886,939
1846	1,188,258	1,600,667
1847	1,360,681	1,698,664
1848	1,235,044	1,386,605
1849	1,097,762	1,648,900
1850	1,351,507	2,071,731
1851	1,650,270	2,018,871
1852	1,650,912	1,150,677
1853	1,582,248	2,254,694
1854	1,987,854	3,253,823
1855	2,213,292	3,664,095
1856	2,088,903	3,242,458
1857	1,709,692	2,412,923
1858	1,542,646	1,865,693
1859	1,632,932	1,883,685
1860	1,878,156	2,328,157
Total	25,625,132	$35,092,931

The whole amount of coal transported during the 18 years ending the 30th of November last has been 25,625,132 tons, or an average of 1,423,618 tons per annum. The amount received from the same has been $35,092,932, or an average of $1,949,607. The amount received from the transportation of passengers during the same time has been $3,785,069; from merchandise, $3,860,973; from mails and miscellaneous, $222,953—making the aggregate receipts from all sources $42,961,927, an average of $2,386,773. The aggregate expenses during the same time have been $22,297,918, an average of $1,238,773—making the net earnings $20,664,009, an average of $1,148,000 per annum. The total amount of dividends declared has been $4,688,84g, or 79 per cent., an average of $260,447, or 4.4 per cent. The above dividends are those paid on common stock. Of these 44 per cent. have been paid in stock, viz: 10 per cent. in 1846; 12 per cent. in 1847; and 4 per cent. in 1855. The expenses include the "renewal fund" established in 1848, of 3 cents (increased in 1847 to 5 cents) for every hundred tons carried one mile. The average mileage has been 105.5; the average cost of road and equipment $16,506,474. The gross earnings in 1860 were $3,312,546; the expenses $1,686,561; net earnings, $1,625,985. Total cost of road and equipment $24,161,889. Length of main track and branches 152 miles.

The amount of capital stock paid in is $11,548,929; of this $9,997,129 is common, and $1,551,800 preferred stock. The preferred stock was created in 1848, for the purpose of paying off the bonds due in 1850 and 1856. It is entitled to dividends at the rate of 7 per cent. annually, and shares with the common stock in any excess above that rate. Of these bonds (amounting to $3,703,000) $1,648,000 were converted.

The funded debt of the company November 30, 1857, was $12,093,950 (including real estate bonds and mortgages, amounting to $520,450). Of these bonds, $3,383,400 fell due July 1, 1860. Of these, $436,800 have been extended to 1867; and $2,864,300 to 1880; $76,800 have been purchased and cancelled, and the remainder, $5,500 had not been presented for extension or payment. The cost of extending these bonds, for bonus, commissions, etc., was $385,531 83 all of which was charged to income account, reducing by so much the available net income for the year, viz:

Gross receipts		$3,312,546 21
Expenses, including renewal fund		1,686,561 54
Profit		$1,625,984 67
Interest on bonded debt.	$700,434 00	
" bonds & mort.	30,687 00	
		731,721 00
Net profit or dividend fund		$894,863 67
Cost of extending 1860 bonds		385,531 83
Leaving only		$509,331 84
This has been credited as follows:		
Sinking funds	$150,000 00	
State tax on capital	16,828 02	
Dividend on preferred stock	108,626 00	
Accrued interest on do., not paid	16,554 60	
		292,008 62
Carried to reserved fund, 1860		$217,323 22
Balance of " 1859		208,581 64
Total reserved fund Nov. 30, 1860		$425,904 86

The company has established four sinking funds, to which the payment of $290,000 annually is required to be made, viz: $25,000 to the loans of 1836-'67 and 1835-'80; $75,000 to the loan of 1849-'70; $50,000 to the loan of 1856-'86; and $140,000 (after 1861) to the remainder of the bonds falling due in 1880. For the loan of 1857-'86, no provision has been made, except any surplus that may remain from the sinking fund of $140,000 per annum, after the bonds due in 1880 are liquidated. At the date of the last report there was due from the company to the sinking fund $407,501. The annual payments of coupons amounts to $700,434. The following is an abstract from the general account of the company November 30, 1860:

Capital stock, common		$9,997,129 61
" " preferred		1,551,800 00

On Supplying Water to Locomotives While Running.

Among the papers read at the meeting of the Institute of Mechanical Engineers held at Birmingham, England, in the early part of this year, was one by Mr. John Ramsbottom, locomotive superintendent of the northern division of the London and North-Western Railway, "On Supplying Water to Locomotive Engines whilst Running." The paper, and the discussion upon it, has been published, and as the invention explained is actually at work on the Chester and Holyhead line, near Conway, it possesses considerable interest. The invention consists of a cast-iron trough, which, in the portion available for the supply is ¼ mile long, 18 in. wide, and 6 in. deep, and is fixed between the rails. When full, the surface of the water is 2 inches above the level of the rails. At the ends the bottom of the trough gradually slopes upwards to the level of the top, so as to avoid the necessity of having ends to it, which would present an obstruction in case of a loose chain or other thing hanging down from the train, and dragging along the bottom of the trough. The railway, at the portion along which the trough extends, is lower than at its extremities, gradually sloping to this lower level at either end. A pipe, the upper part of which is connected with the boiler, terminates in a scoop, which meets the water at an angle, by which the mouth gathers up the water as the train advances. The mouth of the scoop is 10 inches wide and 2 inches high, and it is, when depressed to take up water, exactly level with the surface of the rails, and, consequently, descends 2 inches below the surface of the water in the trough. To prevent any possible accidents the scoop is raised by a balance when not in use, and has to be depressed when it is required to raise water. The force with which the water ascends the pipe is, of course, proportionate to the speed, but it is modified by the pipe increasing in diameter to the top. At the rate of 15 miles an hour the water just reaches the top of the pipe, but does not flow into the tender; whilst at 50 miles an hour it rises with sufficient force to ascend to a height of 70 feet, giving a pressure of 30 pounds to the square inch. The actual quantity delivered into the boiler, in passing over the trough, is a little over 1,000 gallons, and it varies but slightly at any speed exceeding 22 miles an hour, as the greater force which results from increased speed is balanced by the less time which the train takes to pass over the water. The invention is employed to supply water to the Irish mail, so as to save the time which would be lost in stopping on the way to fill the tender. It is urged by the inventor that the invention would be valuable in the case of goods' train going long journeys, as it would save time for stopping, and prevent the line being so long impeded for the passage of other trains.

(From the U. S. R. R. and Mining Register.)

The Coal Oil Trade.

Our streets continue to be thronged by oil teams, frequently so much so as to render a passage through them very tedious, and to convince *us* that the streets are too narrow for a place where so much business is to be transacted as will in all probability continue to be in Titusville. Oil teams of all kinds and conditions are engaged in transporting to the railroads, the P. & E. and A. & G. W., the tens of thousands of barrels forced from the rock below. Several ox teams are in the trade. These latter make two trips weekly from the railroad to the fountain wells below on the creek. Each team takes from six to twelve barrels of oil, about seven or eight is the more usual load. The shipping of oil was never more briskly conducted than it has been for some weeks past and continues to be at this present time.

One company orders 3,500 cards per week for their bbl. heads.

Petroleum still continues extremely low. But from present indication we almost hope refiners will not long be able to control the market. Parties visiting New York inform us there is but little there. And hence we conclude that if with the quantities recently shipped from oil creek there is a demand which uses it up as fast as forwarded, and the season for its use, only just commencing, there will soon be a demand which must offer higher figures than for some weeks past. The quantity along the creek is not, we think, increasing enough to more than supply with even reliable quantities the fall trade.

Flowing oil wells are expensive pets. The G. W. McClintock well has cost Brewer, Watson & Co., for barrels and hauling to the railroad, the not *very* small sum of over *thirty thousand dollars* since the second day of August, and that exclusive of some five or six thousand barrels sold at the wells to other parties. The above amount, though large, is by no means the whole cost of running, or allowing the well to run itself. This well continues to pour forth its oleaginous treasures in luxurious abundance.—*Titusville (Pa.) Gazette, September* 12.

On a recent visit to the Western Division of the Philadelphia and Erie road, Edward F. Gay, Esq., Vice-President and Superintendent, was surprised and pleased to find that a skilful painter in the company's service was using colors mixed wholly with refined coal oil, with entire success. By subjection to processes now understood in the region, coal oil is refined into illuminating oil, paint oil, and lubricating oil; the latter, however, is only used after admixture with lard oil; the residuum which is left after the different oils are manufactured from the petroleum as it is taken from the well, is used as a lubricator, and is said to be free from gritty matter which, where it exists, cuts the journals.

As a substitute for turpentine, which has risen to high price since the blockade of the Carolina ports, coal oil is said to answer many purposes. For painting, having a *drying* property, it bids fair, in a deodorized state, to come into use as a

substitute for linseed oil and spirits of turpentine. In short, science resolves coal oil into substances of essential usefulness in the domestic arts; and a great market is open to receive and consume it in all its qualities and under all its names.

Baltimore and Ohio Railroad.

Ever since the commencement in this country of hostilities, which occurred during the ever memorable days of April last, it is well known that the Baltimore and Ohio Railroad has been extensively used for the transportation of not only immense quantities of army and navy stores, but large bodies of troops, and it is a matter of singular remark, and worthy of common gratulation, that not a single accident has occurred upon the road. Whilst locomotives have fled the track upon other roads, cars demolished, and the lives of many soldiers lost, the trains of the Baltimore and Ohio Railroad have been extraordinarily exempt from such unwelcome casualties. It is estimated that since the eighteenth day of April, when the troops first commenced passing through here, over two hundred and sixty thousand soldiers have been carried upon the main stem and branches of the road, and not a single life lost, nor has a single accident of note occurred. Sometimes two or three regiments, mustering each one thousand men, have arrived at the Camden Station, the principal depot of transportation, and have been passed over the road as quietly, as comfortably and as swiftly as though they were occupying regular passenger trains. The commanding officers of some of the regiments who hail from the most distant sections of the country have frequently expressed their highest gratification at the workings of the road, especially as their respective commands have experienced such slight detentions and met with such courteous treatment on the part of the employees. For this excellant state of affairs much credit is due Mr. Joseph T. England, the Agent of the Camden Station, whose name is mentioned with the approbation of the highest authorities of the Company.—*Baltimore American.*

Debt of Michigan.

The debt of this State on the 14th September ult., was as follows:

Penitentiary bonds, 6 per cent. due 1863.	$13,000
Internal improvement warrant bonds...	50
Full paid $5,000,000 loan 6s of 1863....	177,000
Adjusted bonds 6s of 1863.....	1,744,185
Temporary loan 6s of 1878.....	50,000
Renewed loan 6s, 1878	216,000
$144,000 of $5,000,000, equal, when adjusted, to	83,314
Internal improvement warrant.....	3,274
Guaranteed canal bonds.....	100,000
Total.....	$2,386,823

La Crosse and Milwaukee Railroad.

A meeting of the assenting bondholders to the scheme proposed for the re-organization of this company was held in this city on the 2d inst., and a committee appointed to act for the bondholders. The time for assent has been extended to the 21st inst. There appears to be considerable opposition to the plan, for the reasons stated in the following paragraph from the Chicago *Journal:*

"The scheme for uniting the holders of the various issues of La Crosse and Milwaukee Railroad bonds meets with opposition from a portion of the owners of the high number Land Grant bonds, who consider their interests needlessly sacrificed in the details of the plan. An organization has been formed for taking an appeal against the rendering of Judge Miller in the case, if the decision should prove as foreshadowed by the Judge's opinion given out last spring. This organization is strong in amount and in the position of the parties forming it, and they consider there is good ground for obtaining a reversal of the decision in the higher court."

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending Sept. 14, were $53,424 74
Corresponding week, 1860 ..... 66,943 85

Decrease in 1861..... $13,519 09

Three weeks in September, 1861..... $108,195
Do. do. 1860..... 100,166

Increase..... $8,029

The earnings of the Toledo and Wabash Railroad the 3d week in Sept., 1861, were. $31,821 11
Do. 1860..... 23,019 33

Increase $8,801 78

The earnings of the Michigan Central Railroad, the 3d week of Sept., 1861, were..... $54,825 75
Do. 1860..... 60,876 06

Decrease..... $6,050 31

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3d week in September, 1861, were..... $36,357 06
Do. 1860 ..... 32,610 50

Increase..... $3,746 56

The following are the earnings of the Great Western Railway of Canada for the week ending September 20, 1861:

Passengers	$20,991 28
Freight and live stock	18,135 80
Mails and sundries	1,368 45
Total	$40,495 54
Corresponding week of last year	86,257 45
Decrease	$45,762 91

Railroad Arrangements.

It is understood that through the agency of the Assistant Secretary of War, Colonel Thomas A. Scott, arrangements have been made for a continuous connection of trains between Washington, Philadelphia and New York. The express trains, leaving New York at 7 A. M., and 6 P. M., and those leaving Washington at 6 A.M., and 2½ P. M., will go through without breaking connection, extraordinary emergencies alone excepted; and cars will run between here and Washington on these trains, without change at Havre de Grace or Baltimore. The stipulations for this have been signed by William P. Smith of the Baltimore and Ohio Railroad; S. M. Felton, of the Philadelphia, Wilmington and Baltimore Railroad; and William H. Gatzmer, of the Camden and Amboy Railroad. Provision has also been made for ticketing and checking passengers and baggage through. The details of these arragements will be looked after by R. F. Morley and Thomas H. Canfield, the Government managers of the military roads.

Heavy Freight Business.

The pressure of freight to the seaboard is so enormous at present that the Erie and Central companies are compelled to refuse large quantities at even advanced rates.

The Pennsylvania Central Railroad notifies its Western connections that it does not desire any more western freight for New York, Boston, or Baltimore, until further notice. The local business of the line, with what it gets from the Pittsburg, Fort Wayne and Chicago Railroad, and Government transportation, exhausts all its facilities.

The Detroit *Advertiser* of 30th ult. says: "The Michigan Central Railroad freight business the past week has been heavier than ever before known. It even surpasses that done in the busy years of 1855 and 1856. The freights arriving at the depot in this city are so large that all the propellers in commission are unequal to the work of carrying them away, working to their utmost capacity.

The Michigan Southern Railroad is bringing in large quantities of live stock. On Saturday one way bill contained five hundred head of beef cattle."

Galena and Chicago Railroad.

The managers of this company have issued the annexed circular to the first mortgage bondholders:

OFFICE OF THE GALENA AND CHICAGO UNION R. R. Co., CHICAGO, Sept. 20, 1861.

Notice to the holders of first mortgage bonds due February 1, 1862—The holders of $262,000 of the bonds of this company (Nos. 1 to 262, on blue paper), which were issued for the construction of the "Third Division" of the road, and become due on the 1st day of February next, are hereby notified that the company are prepared to extend said bonds to 20 years to February 1, 1882, at par, by attaching new sheets of interest warrants, and taking a receipt from the holder.

Applications are to be made prior to the 15th December next, with the bonds at the office of Messrs. Carpenter & Vermilye, No. 44 Wall street, New York, where all necessary information on the subject can be obtained.

Holders who do not avail themselves of this privilege, will be paid at the maturity of the bonds.

An ample sinking fund has been provided for the redemption of the whole issue, covered by the 1st mortgage, by the 1st of February, 1882.

Holders of any or all of the remaining issue of the 1st mortgage bonds can have the same extended in the same manner, on applying, with the bonds, at the same place, until further notice.

W. M. LARRABEE, Secretary.

New York, Providence and Boston R. R.

At the meeting of the stockholders of this company, held in Providence, on the 24th ult., the following gentlemen were elected Directors for the ensuing year: James I. Day, Thomas Tileston, M. Morgan, H. F. Carey, S. D. Babcock, Samuel Sloan, H. Blydenburg, Daniel Drew and A. F. Dixon, and at a meeting of the Directors, held the 27th, JAMES I. DAY was re-elected President.

Journal of Railroad Law.

RUNNING ENGINES THROUGH CITIES AND VILLAGES: EXTRA CARE DEMANDED OF THE COMPANY: RIGHTS OF PROPERTY OWNERS ADJOINING THE TRACK.

The case of Fero *vs.* the Buffalo and State Line Rail-oad Company was recently decided by the Court of Appeals of the State of New York. The determination of the court was based upon the following facts elicited at the trial of the cause before a jury.

The plaintiff was the owner and in the occupation of a hotel at Dunkirk, fronting upon the defendant's track, about thirty feet distant therefrom. An addition to the hotel was in the course of erection, and in the hands of the carpenters and masons at the time of the accident. On that day a freight train arrived at its usual time, and as it had arrived for several months before. It stopped upon the track opposite to the plaintiff's house, towards which the wind was blowing, and sparks from the smoke-pipe or cinders from the ash pan of the locomotive were driven by the wind through the open door of a room in the unfurnished building, which was then temporarily used as a shop by the joiners employed in the building. The shavings upon the floor were ignited, and the building consumed. There was evidence that a mason employed in plastering some other part of the building passed through this room shortly before the accident; saw that the door was open, and that the sparks were blowing towards it, but went about his business without closing the door. The smoke pipe, ash pan, etc., of defendant's locomotive were of the most approved construction then in use, with respect to precautions against the escape of fire and sparks.

The jury found a verdict for the plaintiff, and the defendant then appealed, alleging that the judge erred in his charge. The following is, in substance, the opinion of the court, affirming the judgment below, and maintaining that railroad companies are required to exercise a higher degree of care in running their locomotives, or trains, through populous districts than in the open country; and that in this case the question whether the plaintiff was chargeable with concurrent negligence so as to prevent his recovery of damages was properly left, as a fact to be determined by the jury.

Bacon, J.—The two questions which are presented by this case, pertain, firstly, to the degree of negligence imputed to and chargeable upon the defendants: and, secondly, whether there was negligence on the part of the plaintiff, which concurred in producing the result. The jury have found upon both points submitted to them in favor of the plaintiff, and the inquiry now is whether there was any error of law in the manner in which these questions were left to the jury.

The substantial facts of the case without entering much into the detail showed very clearly that the fire by which the premises of the plaintiff were consumed, was communicated by sparks from the defendants' locomotive, standing still upon the side track of the defendants, at a point nearly opposite the house of the plaintiff, and distant only about thirty feet from it, and with a strong wind blowing directly from the engine toward the house. During the time the engine thus stood upon the track, coals and sparks were emitted in large quantities, and were driven by the wind in the direction of the house, and no watch appears to have been kept over them, nor in fact any attention whatever on the part of any one in the defendants' employment paid to the matter. The nearness of the plaintiff's property to the engine, the constant emission of combustible matter, and the direction and force of the wind, were all circumstances calculated to admonish those having charge of the locomotive, of the imminent danger of remaining in that position without exercising a prudent circumspection of the surroundings.

On the subject of the care, which, under the circumstances, the defendants were called upon to exercise, the judge instructed the jury that less care is required of a railroad company while running their trains in the county where there is no property near their track exposed to fire, than in a village (as was the case in this instance) where buildings constructed of wood are situated so near to their road as to be exposed to fire from the locomotive, and at a time when the wind is blowing in a direction from the engine toward the buildings. Under such circumstances they are bound to use the utmost care; and if for the want of such care, fire is communicated to such buildings, and they are consumed, the defendants are liable for the damages sustained thereby, unless the negligence of the owners of the buildings in guarding and protecting their property concurred in producing the result. To this charge the defendants' counsel excepted, and asked the court to charge that if the engine was in good order, and of proper construction, and used with ordinary care, the plaintiff could not recover. This instruction was refused by the judge, and the defendants' counsel excepted.

Taken as a whole, I think this charge, and refusal to charge as requested, were right. Some of the English cases have gone the length of holding that the very fact that buildings in proximity to a railroad have been fired by sparks from a locomotive, is sufficient to warrant a jury in inferring and presuming negligence without further proof. But I think we have not carried the rule in this country to that extent, and certainly not in this State. The reason given is that the use of fire to create the motive power of a railroad engine is not only lawful but necessary, and sparks may escape notwithstanding the safeguards which science and skill have employed to limit their range. There must be, therefore, some proof of negligence to create a liability arising from the exercise of a conceded right in an improper or unreasonable manner. It is quite obvious too, that what under certain circumstances would not be even *prima facie* proof of want of care, would, under a different state of facts, be the highest evidence of negligence; and I think the discrimination made by the judge in this case is one founded in good sense and obvious justice; although not sustained by any direct authority, the principle on which it proceeds may be gathered from several cases decided in this court.

The case of Rood *vs.* New York and Erie Railroad Company brings into view the rule upon which a railroad company may be exempted from liability for a casualty similar to the one in this case. There the woods of the plaintiff were claimed to have been fired by sparks from the defendants' locomotive. The train was running at the usual rate of speed in the open country, and it was shown that the engine was of the most approved construction; the spark arresters of the best pattern; and that a suitable police had been provided upon the road for the purpose of following trains and looking after fires. These circumstances were held sufficient to discharge the defendants from liability for the damages which were supposed to have been occasioned by flying sparks from the engine. But a much higher degree of care, both in respect to the rate of speed and the watchfulness to prevent casualties, should manifestly be required when trains are passing through, or remaining stationary in the streets of a city, or densely populated village: and I think it is not stretching the rule unduly in such a case to say that, under such circumstances, the railroad company is bound to use the utmost care to guard against the dangers which obviously attend such a condition. The substance of the charge, without criticising its terms with too great nicety, is that the care must be proportioned to the danger of accidents, and that where there is great danger, there must be a corresponding degree of care. * * * * *

The remaining portion of the charge is, in my judgment, wholly unexceptionable. It presented the legal principle which prevails in such cases clearly to the jury, and in a manner entirely favorable to the defendant, and left as it should, the question of fact to them, upon the evidence. It surely was not the duty of the court to rule, as matter of law, that there was actual negligence on the part of the plaintiff, to such a degree as to bar his recovery. It is difficult to maintain the proposition that one can be guilty of negligence while in the lawful use of his own property upon his own premises. The principle contended for by the defendants' counsel, if carried to its logical conclusions, would forbid the erection of any buildings whatever upon premises in such proximity to a railroad track as would expose them to the possibility of danger from that quarter, the rights of persons to the use and enjoyment of their property are held by no such tenure as this. On the contrary, where one in the lawful use of his own property exposes it to accidental injury from the acts of others, he does not thereby lose his remedy for an injury occasioned by the culpable negligence of such other parties. * * *

Upon the whole, I think the case was fairly submitted to the jury, under proper instructions in regard to the principles of law presented by the evidence, and that the verdict should not be disturbed. Judgment affirmed.

The Pittsburg Bond Question.

We understand that two propositions have passed between the Philadelphia Bondholders' Committee, now in Pittsburg, and the Comptroller and the gentlemen acting with him for Alleghany County. The first came from the former, and was to remit all claims for interest up to January next, and take new bonds for the full amount bearing five per cent. interest. This was rejected, and the Western Committee then submitted a proposition to issue new bonds for the whole amount at fifty cents on the dollar. No answer has yet been given by the Philadelphians, but the action had will not, in any case, be final, as the basis of settlement must be submitted to the bondholders and tax-payers for ratification before any new bonds are issued.

Observations on the Niagara Bridge.*

By PETER W. BARLOW, Esq., C. E., F. R. S., F. G. S., &c., &c.

As remarked by Mr. Rœbling in his very able report to the President and Directors of the Bridge Company in 1855, "one single observation of the passage of a train will convince the most sceptical that the practicability of suspended railway bridges, so much doubted heretofere, has been successfully demonstrated."

On my first arrival there several trains passed over. I placed my eye on a level with the platform, standing off the bridge, but neither wave nor vibration were perceptible to the naked eye. I then stood on the road platform of the bridge, and found no more vibration or undulation (although the road, from the wear of the rails, is out of condition) than is felt in an ordinary suspension bridge from a horse walking over.

If the advocates or admirers of girders or tubes imagine that their mode of construction is free from vibration, they are presuming on a fact of which they will discover the error by standing on a tube or girder while a train passes over it. A train passing even on solid ground over a bad road will cause a sensible vibration in a house at 50 or even 100 yards from a railway.

The idea of a structure free from vibration is therefore imaginary, and inconsistant with the constitution of matter. The question for the practical man alone is the avoidance of such a degree of momentum by vibration or undulation as will produce a strain beyond the limit of the elasticity of the material.

This simple and evident proposition has been generally disregarded by the constructors of suspension bridges, as the platforms have been made, as before observed, without any regard to vertical stiffening; the result of which, in a gale of wind, is a degree of undulation by which strains are produced (judging from the depth of the reported undulations in some cases) equal to five or six times that due to the simple weight of the bridge. No kind of structure is proof against such treatment; and it is more a matter of surprise that they should last so long, than that they should frequently fail.

On my second visit to the Niagara Bridge, I observed the deflection, by means of a level, from the passage of an ordinary passenger train, to be .41 of a foot, which of course includes the amount of wave plus the deflection from the elongation of the cable. The train, which consisted of two American cars, 50 feet long, besides the van and locomotive, I estimated to weigh 80 tons, and the deflection from the actual elongation of the cable to be .182 of a foot. It is clear, therefore, that the amount of wave, or distortion of the cable from its original figure, does not amount to three inches in a length of 821 feet; a change of figure which, occurring gradually during the progress of a train, does not approach an amount of disturbance sufficient to produce momentum. And it is evident to me that no suspension bridge has failed from any undulation produced by a passing load, but either from actual insufficiency of section of metal in the cables, or from undulation produced by the action of a hurricane.

The papers published in Vol. III of the "Transactions of the Institute of Civil Engineers," by General Pasley, R. E., on the Montrose Bridge after a hurricane in October, 1838, and by John Provis, Esq., C. E., on the injury to the Menai Bridge in 1839, give valuable information on the effect of wind on suspension bridges.

Mr. Provis and General Pasley both agree in the opinion that the injurious action principally arises from the undulation of the platform, and not from the vibration or oscillation of the chains; and the remedy applied by Mr. Provis was an increase given in the longitudinal stiffness of the platform, which, although not to such extent as my calculations would deem necessary, has been found sufficient to cure the evil, as no further damage has occurred since 1839.

Mr. Provis states in his report that the amount of wave of a previous gale of wind in 1836 was observed by the bridge-keeper to be 16 feet, and there is no doubt the wave of the gale of 1839, which caused the principal damage (which was most severe in the night) was much greater. It therefore might reasonably have been expected that the cables which sustained the succession of blows arising from the momentum of a platform (the total weight of which was 400 tons) falling 16 feet would have sustained injury, and these not being injured, is a proof that this bridge, with a properly constructed metal girder and platform, could be used safely for railway traffic, as the heaviest train on a good road would create less momentum than that produced by the undulation described.

In the Niagara Bridge the injurious action of the wind is amply guarded against. The undulatory action on the platform at the highest calculation will not exceed the weight of a heavy goods train, and as the timber trussing (which is 18 feet deep) is proved to have such girder resistance, that a train will not produce a wave exceeding 3 or 4 inches, there is no fear of an injury from the effect of a hurricane, but to be doubly sure, Mr. Rœbling has added 56 wire-rope stays, attached to the lower floor, which are firmly anchored to the solid rock.

These rope stays have been treated in the arguments used against the success of the Niagara Bridge, as forming part of the structure, and as adding to the rigidity; but this is clearly not the case, at all events in the hot season, because the platform of the bridge is lowered about two feet by the expansion, and as the stays will be at the same time lengthened, they will be so loosened as to be inoperative at the period when the greatest traffic occurs. The experiment made by me was in the commencement of August, when the temperature was unusually high even for America, and when they could by no possibility have had any influence on the rigidity.

It is also frequently argued as a proof of the instability of the Niagara Bridge, that its weakness is tacitly acknowleged by the regulations of the engineer, which limit the speed of trains to five miles an hour.

It has been a debated question whether greater deflection in a girder arises from increased speed, and this subject was particularly investigated by the commissioners appointed, in 1849, to inquire into the application of iron to railway structures, and some experiments were made by me at their desire, on the Godstone Bridge of the South-Eastern Railway, of which I was at that time the resident engineer. A scaffold was erected which rested on the road, and was, therefore, unaffected by the motion of the bridge, and a pencil was fixed to the underside of one of the girders of the bridge, so that when the latter was effected by the weight of the engine or train, either placed at rest or passing over it, the pencil traced the extent of the deflection on a drawing board attached to the scaffold. The commissioners report "that the deflection was slightly but decidedly increased when the engine was made to pass over the bridge, and at a velocity of abont 50 miles per hour an increase of one-seventh was observed. As it is known that the strain upon a girder is nearly proportional to the deflection, it must be inferred that in this case the velocity of the load enabled it to exercise the same pressure as if it bad been increased by one-seventh, and placed at rest upon the centre of the bridge."

Assuming such result to arise from increased speed, there is no reason for not running at 50 miles an hour over the Niagara Bridge, as the heaviest train that can be placed on it does not produce, with the weight of the bridge, a strain equal to $\frac{1}{3}$-th per cent. of the ultimate strength of the cables.

Being of course present at these experiments, and having recorded some of the observations referred to, I formed the opinion, which was concurred with at the time by other engineers, that the increased deflection principally arose from imperfection of the joints, the engine falling through a certain space at each bad joint, and thus producing a blow.

And I have little doubt, if the stability of the structure was the only question, that, if a good fished permanent way was laid over the Niagara Bridge, no more vibration and deflection would be produced at a speed of 50 miles per hour, than now occurs on the present road, which, although perfectly safe, is much worn by the heavy traffic.

But the speed which may be safely adoped in passing a bridge is not a simple question depending alone on the rigidity and strength of the structure. A train may run off the road at a high speed, either from the state of the permanent way or the fracture of an axle or any part of the rolling stock, and every description of girder in such a case would fail. No person who has witnessed a railway accident, and the effect of a collision, will doubt that, under such circumstances, the sides of a tube or lattice girder (on which the stability, as well as on the top and bottom, depend) would be carried away.

And here it may be remarked that a misunderstanding frequently exists as to the momentum of a train in relation to the speed. The mechanical definition of momentum is weight multiplied into velocity, from which it may be supposed that a train at double speed would exert only double the force on any object it came in contact with; but this is not so. It would require four times the amount of brake power, and would tear away four times the extent of the sides of a lattice or tube girder, to bring it to a state of rest, and therefore the danger from such an accident increases in a rapid ratio in relation to the speed.

As a general rule, such an accident on a suspension bridge would be less fatal, because it is dependent on the sides of the girder for stiffness only, and not for its actual strength. It appears to me, however, that no bridge, whatever its construction, is safe if a train leaves the road at 50 miles an hour, and that in a bridge situated as at Niagara over a chasm 240 feet deep, it is a wise precaution to travel slowly, particularly as little can be gained by increased speed, there being a station immediately on each side of the river, at which every train stops.

In concluding my remarks on the reason of the engineer for adopting an unusually slow speed on the Niagara Bridge, and how far it is to be considered as an acknowledgment on his part of deficiency of strength in the structure, it should be mentioned that it is the customary practice in the United States (inconsistent as it may appear to their supposed disregard of life) not to permit even a single horse to go beyond a walking pace over their road bridges, whatever may be their construction, and a penalty of five dollars is rigidly enforced for any disregard of the rule. I passed over girder, arched, as well as suspension bridges, and found no exception in the rule; and a notice-board is generally put up, as at Niagara, to warn the drivers of the penalty.

Such being the custom of the country, it is imperative on Mr. Rœbling to adopt it in a bridge situated as at Niagara; but it cannot be supposed (as between forty and fifty engines cross the bridge every day, and a train of 350 tons with two engines has passed over) that the engineer is afraid to trot a horse over it, and adopts this rule from a fear of the safety of his bridge. And it is, no doubt, under similar circumstances that he adopts the slow speed over his rails as well as over his road.

It appears, therefore, that any impression as to the insecurity of the Niagara Bridge, induced from the caution used by Mr. Rœbling in a railway bridge of such extent and in such a situation, is a very unfair one, as the same rules would have been adopted by every American engineer if the bridge had been of half the extent, with no difficulty or novelty in the construction.

(To be continued.)

* And on the practicability of connecting Liverpool and Birkenhead, and New York and Brooklyn, by wire suspension bridges of one span; also, remarks on street railways and the application of the suspension principle to correct the inconveniences of the London street traffic; and a suggestion for a viaduct across the Holborn valley, and across the Mersey at Runcorn.

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of three dollars per share, payable October 1. New York stockholders will receive their money at the Union Bank.

The interest on the bonds of the Brooklyn Central and Jamaica Railroad Co. due Oct. 1, will be paid at the office of the company, 2 Atlantic St., Brooklyn, on and after that day.

The interest due on the mortgage bonds of the New York and New Haven Railroad Company Oct. 1, 1861, will be paid on presentation of the coupons at the office of the company, cor. of 4th Av. and 27th St., or at the Bank of the Republic.

The Philadelphia, Wilmington and Baltimore Railroad Company, have declared a dividend of 3½ per cent. ($1 75 per share).

The Gold Fields of Nova Scotia.

Hon. Jos. Howe, Financial Secretary of Nova Scotia, has presented a report to the Earl of Mulgrave, Lieutenant Governor of the colony, on the above subject, which has already attracted considerable attention in the United States. We reproduce the main points of the paper. The Secretary says:—The existence of auriferous deposits in Nova Scotia was unsuspected till 1860. In March, this year, a man, stooping to drink at a brook, found a piece of gold shining among the pebbles over which the stream flowed. He picked it up, and searching, found more. This was about half a mile to the river, a stream of no great magnitude, taking its rise not very far from the sources of the Musquodoboit, flowing through a chain of lakes which drain, for many miles on either side, rugged and wilderness country, and falling into the Atlantic about forty miles to the eastward of Halifax. Your Excellency visited the mines in May, and your attention was arrested by the fact that two men from one of the agricultural districts had taken from a pit, dug four feet wide by five feet deep, seventy-five dollars worth of gold, three days prior to your visit. As six dollars would have paid the men for their labor, it was apparent they had made a profit of sixty-nine dollars in three days. This profit was not derived from the chance discovery of a nugget, but from crushing the quartz, veins of which, there was reason to believe, ran for miles along the sea coast, or from washing the crumbling rock and soil by which they were surrounded. The Tangier mines have been visited during the summer by your Excellency, by Rear Admiral Milne, by Prince Napoleon and the Princess Clotilde. They were visited last week by the Hon. Mr. Tilley, Provincial Secretary of New Brunswick. The lowest depth yet reached is forty-five feet, and the largest nugget found is valued at $300. The gold is got in quartz veins, running through slate or earth, resting upon granite, in the form of scales, jagged and torn bits, like shot or bullets fired against a wall. It is sometimes globular, but seldom completely round. The veins run east and west. It is found in the soil immediately around the veins, but placer washing has not been very profitable at Tangier, or perhaps has not been attempted on a scale sufficiently extensive to command a fair return. The quartz veins run in all directions through the promontory, and are visible to the naked eye without labor. These and the circumjacent soil were discovered to be auriferous in June, and a great number of persons rushed in and began to stake off claims. Though single lots were taken up by a good many, it was evident that the experience gathered at Tangier had taught the value of combination. Companies were formed, and larger acres applied for. The shore washings have proved very rich. Mr. Campbell having associated himself with Wm. Cunard Esq. and Mr. R. G. Fraser, proceeded to work the four shore claims, which formed the frontage of some seventy upland lots taken by this company in the rear. Though no accurate return has been given by these gentlemen, there is every reason to believe that a very large sum has been taken from these shore claims within a month, and the rights of those three gentlemen have since been sold to a larger company for £1,200, they retaining all that had been obtained up to the day of sale. At Tangier, Lunenburg, Lawrencetown, and Lake Thomas, the facts collected are indisputable; and the interest taken in those mines by capitalists at home and abroad, and by a very large number of the industrious classes, warrant your Excellency in assuming, and so reporting to the Secretary of State, that gold mining in those localities, whatever may occur elsewhere, will be permanently established as a new branch of industry, tempting to the capitalist and attractive to the immigrant.—*Montreal Gazette.*

Trade of Lower Canada.

The trade returns for the first half of the present year show the following results:

IMPORTS.

	Value.	Duty.
1860	$14,349,839	$2,124,368
1861	18,645,270	2,505,570
Increase in 1861	$3,295,431	$381,202

EXPORTS.

	Value.
1860	$11,826,015
1861	13,000,000
Increase in 1861	$1,173,985

The details of the imports for the first seven months of the year are also known. The following are the figures, showing the duties paid on the six principal articles of import, comparing 1860 with 1861:—

	1860.	1861.
Cottons	$636,834	$714,792
Woollens	283,574	377.819
Sugars	205,791	201,480
Hardware	135,774	145,048
Tea	82,213	155.745
Silks and velvets	96,709	114,474

In all these there is a noticeable increase. The imports of free goods have also swelled from £4,000,000 in the seven months of 1860 to £8,000,000 in those of 1861.

New York Central Railroad.

This Company have already become consumers of coal to a considerable amount annually, and are now altering locomotives to burn this fuel. They have purchased coal from Pennsylvania, brought by the way of Erie so far, but this costs rather more than the company are disposed to pay.

At a late meeting of the Directors a proposition was made by parties interested in the coal fields of Potter County, Pa., with a view of having the company get their supplies from that quarter at the head of navigation of the Genesee Valley Canal and the Allegheny river. Messrs. Gould and Underwood were appointed a Committee of the Board to go to the coal fields and make an examination. They did so and made a report to the Board. We have not seen the report, but understand that the Committee found coal was abundant, and that it might be brought to the slack water navigation of the Alleghany, by a railroad some 22 miles in length, yet to be constructed. Of the practicability of constructing such a railroad there is no question—the route being an easy one. As to the quality of the coal for locomotives, that remains to be tested.

The Genesee Valley Extension from Olean to Millgrove Pond has been completed, so that canal boats from this city can reach by slack water on the Alleghany the highest point requisite to take coal. The construction of the railway for 22 miles alone remains to be done to ensure production of a large quantity of coal at this point at reasonable rates. What the Central Company intend to do in case the coal proves to be such as they require, we are not advised, but we suspect that they will assist in the construction of the proposed railway, and receive coal in return for the aid they may render.—*Rochester Union.*

Western Maryland Railroad.

Messrs. Irwin & Taylor, operators of this road, have recently procured a first class passenger engine and placed it upon the road. They are also prosecuting the work to the west of Westminster, in the direction of New Windsor, and that flourishing and fertile section of country will soon be united to Baltimore with iron bands. We believe this is the only railroad, with probably one exception, that is now in course of construction in the United States, the exception being the Sunbury and Erie Railroad in Northwestern Pennsylvania.—*Baltimore American.*

☞ The Canada *Gazette* contains a notice that application will be made at the next session of the Provincial Parliament for a charter to construct a railroad from some point on the Grand Trunk Railway, between Lennoxville and Compton Centre, to the "Benson Place," in Stanstead, and thence to the province line. To the notice are appended the signatures of Messrs. A. O. Kellum, J. S. Sanborn, B. Pomroy, Morrill, and other gentlemen.

THE RENSSELAER
Polytechnic Institute,
TROY, N. Y.

THE thirty-eighth Annual Session of this School for thorough instruction in the Natural Sciences and Civil Engineering, will begin September 18th, 1861.

A department for instruction in Military Science and Art has been instituted.

Inquiries may be addressed to Prof. Chas. Drowne, Director of Rens. Pol. Institute, Troy, N. Y.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.

Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches, etc., for same.

Gas Works Castings, etc., etc.

PHILADELPHIA.

Stephen Morris, Hy G. Morris, Chas. Wheeler, Thos. T. Tasker, Jr., Stephen P. M. Tasker.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

American Railroad Journal.

New York, Saturday, October 12, 1861.

Toledo and Wabash Railroad.

At the annual meeting of the stockholders of this company, held at Toledo on the 2d inst., the following gentlemen were unanimously elected directors for the ensuing year: Azariah Boody, Joseph B. Varnum, New York; James Spears, Lafayette; Geo. D. Morgan, Isaac H. Knox, New York; Robert Brackinridge, Fort Wayne; Francis W. Tracy, Buffalo; Hector Morrison, Henry A. Kent, New York; George Cecil, Logansport; William Baket, Toledo; James T. Souter, John G. Richardson, New York; Warren Colburn, Toledo; William Kent, Williamsport.

The new board convened immediately after the election and elected the following as officers of the Company: Azariah Boody, President; Warren Colburn, Vice President and General Superintendent; John N. Drummond, Secretary and Treasurer; Charles H. Pierce, Transfer Agent, New York. The reports and exhibits presented at the meeting disclosing the present financial position of the Company were regarded by all present as being highly encouraging, and as affording flattering and substantial evidences of future success and prosperity. The revenues of the road for the past fiscal year, were about $990,000, presenting a favorable increase of $140,900 over those of the preceding year, and are largely in excess of any single year's earnings in the history of the road. Among the more prominent commodities of the transportation of the road is that of grain, flour and cattle, which affords a large and permanent source of daily income. Exclusive of the grain handled between intermediate stations, upon the road during the year, there have been brought to Toledo over 5,000,000 bushels, and the amount of grain, now offering for transport along the line of the route is fully equal if not beyond the capacity of the Company to provide for.

Cleveland and Toledo Railroad.

The present company was formed by a consolidation, on the 1st of Sept., 1853, of the Junction, and the Toledo, Norwalk and Cleveland Railroad Companies; the line of the former extending from Grafton, on the Cleveland, Columbus and Cincinnati Railroad, to Toledo, a distance of 87¼ miles; and that of the latter from Cleveland to Toledo, a distance of 107¾ miles. The portions of this line from Sandusky, west, 38 miles long; and from Berea, east, 12 miles, have been discontinued, so that the company are now operating only 145 miles of road. The Cleveland, Columbus and Cincinnati Railroad is used for both divisions into Cleveland, for which $66,000 is annually paid. Berea is 12 miles, and Grafton 25 miles west from Cleveland.

This road was formerly esteemed as one of the most valuable in the country. It is a connecting line of first rate importance, and its earnings have always been large. The total for 8 years have been $6,777,416. The current expenses in the same time have been $3,249,075; net earnings, exclusive of interest, $3,528,941; with interest and all charges $1,356,015. The amount of dividends paid have been $916,969, leaving a balance of $439,036. For the first year (9 months) 5 per cent. was paid; for the second, 10 per cent.; for the third and fourth, 8 per cent., then came the disastrous reverse of 1857–8, which was followed by a great reduction in earnings, the falling off from 1857 to 1859 being $257,755. It is worthy of note, however, that while the falling off in the earnings of other leading railroads in the West, from 1857 to 1859, was equal to 50 per cent., those of the Cleveland and Toledo fell off less than 25 per cent. This road, consequently, did not suffer one half so much from the reverses of the period named as those of Michigan, Illinois, and Wisconsin, for the reason that more than one half of its receipts have been from passengers, who pay as high rates now as they did in 1857, while charges in freight have been greatly reduced. The net earnings for the past four years have been applied to the payment of the floating liabilities of the company. The net earnings the past year were $128,634, equal to 4 per cent. on its share capital. The road has been maintained with great economy—the current expenditures averaging, for the 8 years, only 48 per cent. of the gross earnings. The rate has been uniform, showing that an increase in gross may be expected to be followed by a similar increase in net earnings.

The following is a statement of the cost, gross and net earnings of the road, and dividends paid by the company since its formation.

Comparative Statement of Prices at the Stock Exchange.

We give below a comparative statement of the prices on the 5th of October each year, for four years, of the securities most largely dealt in at the Stock Exchange. It shows extraordinary fluctuations, and a range of present prices far below those for 1860. The fall in Border State stocks has been the result of the rebellion. The value of those of the Seceding States is purely problematical, as the government of the United States could hardly compel the refractory States to meet their engagements, should they be reduced to submission. All of them must be greatly reduced by the war. With regard to our railroads, they are probably more valuable, and have a better prospect before them than they had in 1860. Their shares are much lower than they were in April last.

Lehigh Coal and Navigation Company.

This company was organized May 1, 1861, being a consolidation of the Lehigh Coal Company and the Lehigh Navigation Company. As early as 1793, a company was incorporated for the purpose of working the Lehigh Coal Fields. Purchases of land were made, and £10 appropriated to open the necessary outlet to the Lehigh river and to a market. The cost of transportation was so great that the objects of the company were for the time abandoned, and the property was leased to other parties. In 1818, the lessees formed a new company with a capital of $55,000 for the improvement of the navigation of the Lehigh river, so as to allow the passage of boats laden with coal. The amount sent to market that year, which may be regarded as the commencement of the anthracite coal trade, was 365 tons. The coal was floated down in rude boats or arks, which were broken up on reaching Philadelphia. In 1823, the stock of the company was increased to $500,000, and the river rendered navigable 16 miles above Mauch Chunk. This improvement was mainly for the purpose of reaching valuable forests of pine. In 1827, the Mauch Chunk (Gravity) railroad, the second railroad in the United States, was opened. The same year, the State having determined upon the construction of the Delaware division of the Pennsylvania Canal, the company determined to commence the construction of slack water navigation, which was completed in 1829, with an available depth of 5 feet. In 1831, the Gravity road to the Room Run mines, and in 1835, the extension of the works of the company to the Beaver Meadow region was commenced, and completed in 1838. The Lehigh and Susquehannah railroad was commenced in 1837, and completed in 1840. Up to 1841, the company was prosperous, paying dividends annually. In that year its works were greatly injured by freshets. The cost of repairing them, and of enlarging the canal to a depth of six feet, involved the company in embarrassments, which resulted, in 1842, in placing the property in trust for the benefit of the creditors. The mortgage provided that no dividends should be paid so long as the principal or interest of any of the loans of the company were due and unpaid, and in no case to exceed six per cent.—the balance to be held as a sinking fund for the redemption of the loans not due. No dividends were paid from January 1, 1840, to Jnly 1, 1852 a period of 12 years. In that year 6 per cent. was paid, and at that rate and for each year since that time. The following is a description of the canal and river improvements:

LENGTH OF NAVIGATION—Stoddardsville to Easton ..... 84.57 miles.
Divided into sections with lockage, dams, etc.—(according to the latest published statement of the Company)—as follows:—

Kinds of Navigation.	Length in miles.	No. of Locks.	No. of Dams.	Size of Canals.	Size of Locks.	Lift of Locks.	Height of Dams.	Total Rise.
Slackwater—from 10.00 pools. the Delaware R. to Manch Chunk	12.58 canals. 1.64 locks.	46	8	60 to 65 ft. top. 45 ft. bottom. 5 ft. deep.	22 ft. by 100 ft.	6 ft. to 13 ft.	8 ft. to 19½ ft.	360.87 ft.
Slackwater—from Manch Chunk to Wright's Creek.	4.67 canals. 0.85 locks.	29	20	60 ft. top. 40 ft. bottom. 5 ft. deep.	20 ft. by 100 ft.	10 ft. to 30 ft.	16 ft. to 68 ft.	599.83 ft.
Channels-descending navigation Wright's C'k to Stoddardsville.	12.30.	3	3	18 in. deep.	22 ft. by 100 ft.	3 ft. to 4 ft.	6 ft. to 13 ft.	336.00 ft.
Total.....	84.57	78	31					1,296.70 ft.

LENGTH OF RAILROAD—Whitehaven, on the Lehigh, to Wilkesbarre, on the Susquehanna, (double track)..... 19.71 miles.
LENGTH OF MINE RAILROAD—*Main Line*, Mauch Chunk to Summit Hill ..... 6.25 "
Branch Lines to the various mines ..... 20.00 "

The cost of the road, canal, coal lands, etc., of this company has been as follows:

Canal and river improvements	$4,455,000
Lehigh and Susquehanna Railroad	1,380,000
Real estate, mine roads, coal lands, wharves, etc.	1,452,364
	$7,287,364

The following statement will show the cost of the works, mileage of road and canal, earnings, expenses, etc., from 1845 to 1860 inclusive:

Year.	Cost of road, canal, coal lands, etc.	Miles of road & canal.	Tolls, less cost of collection.	Profit of coal and rent of mines.	Water and ground rents, etc.	Total earnings.	Repairs and Renewals.	Earnings less Expenses.	Dividends.— $ mil.	p. c. mil.
1845	$6,628,891	93	$176,050	$161,889	$35,057	$373,996	$39,488	$334,408	nil.	"

* Including sale of Willow st. property, Philadelphia.

The gross earnings for sixteen years have been $10,856,053; the net earnings, $8,723,595. The dividends paid in the meantime have been $1,250,162. The balance, after the payment of interest, has been carried to profit and loss account, and is held by the contingent fund. At the date of the company's last report, May 1, 1861, this fund amounted to $1,095,000—a reduction since January 1st, of $366,853 16.

The following is a summary of the assets and liabilities of the company for the year 1852 to 1860, inclusive:

Liabilities—	1852.	1853.	1854.	1855.	1856.	1857.	1858.	1859.	1860.

There are chargeable against the balance standing to the credit of profit and loss, scrip for additional shares of stock, issued as recommended by resolution passed at the meeting of the stockholders held May 1, 1855, as follows, viz.

1855 scrip for	9,905	shares.
1856 "	11,882	"
1857 "	14,273	"
Making a total of	36,060	shares,

—which when converted into stock, will add to the capital account $1,803,000. The several issues were 20, 25 and 30 per cent. on the present share capital, and were made prospectively as extra dividends. At a meeting of the stockholders held on the 7th of May ult., a resolution was passed recommending the conversion at an early day of these scrip shares into shares of stock, to be entitled to dividends thereon.

There was no increase during the year 1860 in the capital stock of the company. During the same period the funded debt was reduced $202,382 67. The floating debt shows an increase of $38,104 23. The general indebtedness of the company was reduced $168,068 82. At the close of the year the liabilities of the company, including capital stock, funded debt, and pecuniary obligations of every kind, and including also their own loans amounting to $345,853 16 held in trust, subject to the orders of the board, were $6,257,229 03; deducting these, the sum total of the company's liabilities was $5,911,375 87.

Since the close of the year the whole of the mortgage loan, due March 1, 1861, except $2,055 44 not called for, has been extinguished.

The regular semi-annual dividends of 3 per cent. each, were declared as usual.

The common loan stated above, amounting to $2,790,081 92, becomes due March 1, 1870—except $13,356 51, due at earlier dates.

For the year, 1860, the shipments of coal were as follows, and from the following sources of supply:

From the company's mines at Manch Chunk	474,085 tons.
From East Manch Chunk	163,498 "
From Penn Haven	248,823 "
From Rockport	104,349 "
From White Haven	100,277 "
Total shipments of coal	1,091,032 tons,

—showing an increase of 40,373 tons over the shipments of the previous year. In addition to which there were taken from the companys mines at Tamaqua 43,072 tons. The distribution of the coal was as follows:

Consumed on the line of the Lehigh Canal	174,626 tons.
Passed into the Morris Canal at Easton	277,083 "
Went into the Delaware Division Canal	639,323 "

Of the coal that entered the Delaware Division Canal, 260,733 tons reached Bristol; 341,816 tons passed by the outlet lock at Wells' Falls, into the navigable feeder of the Delaware and Raritan Canal, leaving 36,774 tons as the quantity consumed on the line of the Delaware Canal.

The following is a statement of the amount of coal transported on the Lehigh Navigation from the commencement of operations in 1820 to the present time:

Year.	Tons.	Year.	Tons.
1820	365	1840	225,318
1821	1,073	1841	143,037
1822	2,240	1842	272,546
1823	5,823	1843	267,793
1824	9,541	1844	377,002
1825	28,393	1845	429,453
1826	31,280	1846	517,116
1827	32,074	1847	633,507
1828	30,232	1848	670,321
1829	25,110	1849	781,656
1830	41,750	1850	690,456
1831	40,966	1851	964,224
1832	70,000	1852	1,072,136
1833	123,000	1853	1,054,309
1834	106,244	1854	1,207,186
1835	131,250	1855	1,275,050
1836	148,211	1856	1,186,230
1837	223,902	1857	900,462
1838	213,615	1858	909,464
1839	221,025	1859	1,050,659
		1860	1,091,032

The aggregate amount of coal transported in these 41 years exceeds 17,000,000 tons, or a yearly average of more than 400,000 tons.

The shipments of lumber for the season were 45,525,564 feet, showing an increase over those for the year 1859 of 2,591,909 feet.

The freight of all kinds carried on the company's canal during the year 1860 amounted to 1,338,375; in 1859 it amounted to 1,307,118—increase, 31,277 tons.

The aggregate receipts from all sources during the year were $753,318 63, against $672,683 20—showing a gross increase of $80,635 43. After paying State tax, interest, repairs, improvements and expenses, the net earnings were $528,601 19, against $415,641 88 for the preceding year—being equal to an interest of over 21 per cent. upon the capital stock, and exhibiting an improvement over the year 1859 of $112,959 31.

The office of the company is at Philadelphia, Pa. The officers and managers for 1861-62 are as follows:

President—James Cox, Philadelphia.

Managers—Erkine Hazard, John Farnum, Henry J. Boller, Richard Richardson, Alexander Fullerton, Andrew Manderson, James S. Cox, Jacob P. Jones, Francis C. Yarnall, Samuel E. Stokes.

Treasurer—Edwin Walter, Philadelphia.

Sup't and Eng.—J. Leisenring, Mauch Chunk.

Journal of Railroad Law.

JOINT USE OF TRACKS BY DIFFERENT COMPANIES: THOSE WHO MANAGE THE CARS RESPONSIBLE FOR INJURIES, NOT THE OWNERS: COLLATERAL EVIDENCE.

An action was brought by one Isaac Fletcher against the Boston and Maine Railroad Company to recover damages for injuries received by him while engaged in loading a car which was standing upon the Methuen Branch Railroad in Lawrence; the branch road being owned by the defendants.

It appears that the terminus of the Essex Railroad was about two miles from the defendants' depot in Lawrence; and that the Essex Railroad cars were permitted to run into Lawrence over the defendants' track, and the plaintiff having occasion to send some freight over the Essex Railroad, applied to the agent of that company in Lawrence to transport the same, and was informed that the company had but one car which he could have which was then in the plaintiff's yard, at the north end of the station ground where it had been carried upon a track known as the "east side track." Application was made by the agent of the Essex Company at the defendants' freight office to see if some other cars then standing upon the "east side track," could be removed to allow the car to be taken over this track to the depot; the car was placed on this track, and while there being loaded by the plaintiff who was inside of it and out of sight (the car being a close car) of any person upon the approaching train, a train was backed upon the track and came into collision with the car which the plaintiff was loading, and thereby caused the injury. It did not appear that there was any particular provision made by either the plaintiff or the Essex Company to guard against accidents.

The defendants maintained that the accident was caused by a train of cars which did not belong to them and over which they had no control, and which was rightfully passing upon the track which was leased to the Concord Railroad Company; and they introduced in evidence a contract between said company and themselves leasing the track to the Concord Railroad Company by which it was provided that the Concord Company should "deliver its down freight at Lawrence on side tracks," and that the defendants should "receive such freight, do the necessary shifting and arranging cars, whether the same contain joint or local freight, or freight for connecting roads, etc." There was evidence tending to show that the collision was made by a train of the Concord Railroad Company which was switched off and backed upon the "east side track," under the charge of

the engineer and conductor until the collision, and that the defendants never assumed any authority over such trains until they were deposited upon the side tracks by their conductors.

The defendants objected that the plaintiff could not recover upon his declaration charging that the injury was done by the cars and engine of the defendants, there being no evidence that the defendants owned either the cars or engine which came into collision with the car in which the plaintiff was when the accident occurred, but the objection was overruled.

The case was tried in the Supreme Court of the State of Massachusetts, and at the trial a verdict and judgment were rendered in favor of the plaintiff, from which the defendant appealed, and asked a new trial on the ground of error in the admission of evidence, and in the charge of the judge. The following is the opinion of the court.

CHAPMAN, J.—In this action the plaintiff alleges that while he was loading a certain freight car standing on the defendants' track in Lawrence, under the authority and by the direction of the defendants, he was injured by reason of a freight train being violently driven against the car. Daniel Hardy, the station agent, was called by the defendants as a witness; and, on his cross-examination, testified that he never asked the plaintiff, or Gowan, the plaintiff's partner, for a bill of the damage done to the plaintiff; that he never obtained of the plaintiff or his partner more than one bill; that he never said that Clark, who was a clerk in defendants' freight office and was on the train that caused the collision, was going away and he wanted a bill of the damage as he wished to take the amount of it out of his wages, or make him pay it; that he had no recollection of more than one bill, or that he said to Gowan he would send a second bill to Boston; or that he said Clark was very careless. All this cross-examination related to matters not admissable in evidence or pertinent to the case. There was no evidence tending to show that he had authority to ask for a bill of the damage, or to call on Clark for payment, or to make admissions as to Clark's carelessness. And if he had been an agent, with authority to manage this business, his admissions not connected with his acts as agent would be inadmissible.

It is well settled that when a witness is cross-examined as to collateral matters, his answers are conclusive and he cannot be contradicted. The authorities are numerous; and it is sufficient to refer to Commonwealth *vs.* Cain, and the authorities there cited, Gowan's deposition was admitted to discredit Hardy. He deposed that Hardy did request him to make out a bill of the damage and hand it in, and he would send it to Boston to see if it would be allowed; also that he said Clark was very careless in the matter; also that he said Gowan had better go to Boston and see the parties there, and gave Gowan their names; also that Hardy afterwards called on him for another bill of the damages, as Clark was going away and he wanted him to pay it. This testimony which we understand was admitted with much hesitation and doubt, appears on careful consideration to be inadmissible, for the reason above stated; it could not fail to influence the jury, and therefore the verdict must be set aside and a new trial granted. As a new trial must be had, it is proper to express an opinion upon some other points that have been argued.

First, the defendants contend that the court erred in ruling that it was immaterial to whom the train belonged. But taking the whole ruling together, it is clearly right. The ruling is that "if the train by which the injury was caused was in the care of the defendants' servants, subject to their exclusive direction and control at the time of the accident," then it is immaterial who in fact were the owners of the engine and cars constituting the train. This must be so; for if a wrong was done, it was by those who had the exclusive direction and control of the train at the time and by no others.

Second, the fourth instruction to the jury, as to the use of ordinary care, is objected to. It is contended that the plaintiff, being in a dangerous situation, should have used extraordinary care, and that the jury should have been instructed upon the evidence as matter of law that he did not use due care. But the court are of opinion that the instruction was correct. Ordinary care is a term that has a relation to the situation of parties and the business in which they are engaged. It is used here as synonymous with the term "reasonable care" as used by the courts in England. "Care and diligence should vary according to the exigencies which require vigilance and attention, conforming in amount and degree to particular circumstances under which they are to be exerted," Holley *vs.* Boston Gas Light Company. There are cases where, there being no facts in dispute, ordinary care becomes a question of law, but this does not seem to be such a case. If the track where the plaintiff was loading his marble, was one that was exclusively used for loading cars, then no care would seem to be required on his part to avoid collisions; but if it was one on which trains were deposited on their arrival, or used for shifting cars and making up trains, and if in doing such business it is customary and prudent to run a train against a car that happens to be standing on the track and push it out of the way, then ordinary care would require a person who should go into such a car thus exposed to be moved, and who should there engage in a business that would place him in danger if the care were moved, to make some reasonable provision for his safety, such as would be adapted to the circumstances. So far as the report states the case, it tends to show that the plaintiff exposed himself to danger without using any precaution. But the evidence is not fully reported. Enough appears, however, to show that the question of ordinary care depends upon many facts of a complicated character, and that the question should be left to the jury under instructions. The court are of opinion that each of the four instructions given to the jury was correct.

Steel-Making in Montreal.

It was but a few months since that we read a lengthened account of Higgins and Co.'s extensive manufactory for axes, scythes, etc., and we were somewhat startled from our propriety, not dreaming that Canada had or could have superseded England in manufacturing such indispensable tools to Canada. We have now to record Mr. Higgins' indefatigable enterprise by the fact of witnessing his new erections for manufacturing steel,—we have seen the first ingots he produced, and have no hesitation in stating his attempt a perfect success. This is another instance of his claim to the thanks of the Canadian public, and we hope for him a more substantial recompense, seeing that but for experiment, or what is tantamount to it, steel-making has never before been attempted in Canada.—*Canadian Railway Guide.*

Interest and Dividends.

The following dividends and interest are payable in Boston in October:

RAILROAD DIVIDENDS.

	Capital, Oct., '61.	Dividends. Apr.	Oct.	Amount. of Oct. Divi'ds.
Phila., Wilm. & Balt.	$5,600,000	3	3½	$196,000

No Tax upon American Securities of any kind held by Foreigners Residing Abroad.

We re-publish for information abroad the annexed correspondence:

NEW YORK, Sept. 27, 1861.

SIR: We beg the favor of your informing us whether any United States income or other tax will be charged on coupons, or interet to become due, on American Securities (Government or otherwise) owned by Europeans resident abroad.

We propound this query that we may be enabled to satisfy various foreign correspondents who now hold or may purchase United States bonds, &c., and have written to us inquiring as to this point. Your answer, we believe, will be in the negative, judging from the law recently passed, and if so,—it being authoritative—its publication would immediately remove all fear of such taxation from the minds of European capitalists.

We have the honor to be, Sir, your most obedient servants, (Signed)

BARCLAY & LIVINGSTON.

Hon. SALMON P. CHASE, Sec'y of the Treasury.

TREASURY DEPARTMENT, Oct. 1, 1861.

GENTLEMEN—In reply to your inquiry of the 27th ultimo, I beg leave to say that the existing laws of the United States do not impose any tax upon securities of any kind, held by foreigners residing abroad.

Very respectfully, your obedient servant,

(Signed) S. P. CHASE,

Secretary of the Treasury.

Messrs. BARCLAY & LIVINGSTON, New York.

American Railroad Journal.

Saturday, October 12, 1861.

Share and Money Market.

The Share Market the past week has been very buoyant, with an advance of three and four per cent. in Railway shares, and an improvement of the whole list. Governments are steadily better. The prices of these are the best index of public feeling. They have recovered some ten per cent. from the lowest per cent. they touched in April last. The advance in railroad shares is a systematic one, as they are still far below their usual prices, and as the roads have a prospect of an excellent winter business. Produce is moving forward very rapidly, and business of all kinds is improving. Money remains very easy at the previous low rates. In reference to the general condition of the country, we make the following extracts from a late Circular of Samuel Hallett & Co.

THE EFFECT OF THE EXPENDITURES OF GOVERNMENT UPON PRODUCTION AND TRADE.

In the lack of experience in this country, the result only can solve many of the great questions involved in the war. In a time of peace the annual expenditures of government have averaged less than $200,000 per day. For the prosecution of the war, they are $1,000,000 daily. This extraordinary expenditure has been going on, say for 90 days, in which $90,000,000 have been advanced from the capital of the country, without any appreciable effect upon the rates charged for money, without any embarrassments to the foreign or domestic trade, but, in fact, with a decided advantage to the latter. So far all fears of a stringency, or of the inability of the country to sustain the burden, have proved utterly groundless. The only question now raised is whether we can infer the future from the past, and whether we can prosecute the war *ad libitum*, to use the phrase, or till we increase our national debt to $500,000,000 or $1,000,000,000, without interfering injuriously with the industries of our people, or with their commerce and trade.

Without extending our inquiries as to the ultimate consequences of the creation of a large national debt for military purposes, there is no doubt that this debt, represented by the bonds and the promissory notes of government, has an effect similar to the addition of capital equal to their nominal value, either suddenly created, or imported from abroad. The government securities are capital to the person holding them, as much as gold and silver. They pay his debts, or may be the basis of any business enterprise. The creation of this debt only keeps pace with the sales made by the people to the government of food, clothing, munitions of war, and the time of the soldiers. It is to be issued, consequently, mainly against the *future* earnings of the country, and not against its past accumulations. Should the government advertise for tenders for the delivery of such articles, and of personal service, there is no doubt that the offers would exceed five times the whole present wants of government, or $500,000,000 instead of $100,000,000. This illustration states the case. So long, therefore, as our industries are unembarrassed, the debt created is a stimulus to them, rather than a burden. There seems to be no cause of apprehension that their freedom will be interfered with. Exchanges are so decidedly in our favor that the influx of specie must continue. The expenditures are all among ourselves, and the money returns by natural attraction to the great centres. Notwithstanding the amounts already paid by the banks, they are as able to lend to their customers as ever, while the rates were never lower. While the war has apparently no effect to absorb or exhaust capital to an injurious extent, the expenditures going on have already given a very decided impulse to our manufacturing industries and to trade. Everywhere are establishments being put in motion, while trade of all kinds is resuming something like its wonted volume. Our people have pretty well got over the shock caused by the outbreak of the rebellion, which of course, for a time, arrested nearly every business movement. But the great interest of the country, agriculture, was never more prosperous. The farmer was never better able to buy, and with the existence of all the means for an active trade, it can not long remain in abeyance.

The apprehension now expressed by our more conservative bankers is not on account of a stagnation from scarcity of capital, but of an injurious expansion of the currency, with its usual accompaniments, speculation and overtrading. Such fear we believe to be, for the present, at least, without sufficient foundation.

FOREIGN EXPORTS AND IMPORTS.

One of the most favorable features in our present emergency is the condition of our foreign commerce. We have exported from the port of New York, for the first 9 months of the present year, domestic produce to the amount of $98,571,819, against $72,503,258 for 1860. We have imported $42,306,000 of gold and silver against $951,000 for 1860, and exported $3,279,000 against $31,043,000 for

1860. The change in specie in our favor has been equal to $71,014,000. We have, in the meantime, received from California $27,208,000, increasing, with importations, our specie reserve equal to $66,713,000 over the amount in the country at the same time last year. We are still taking gold from abroad in payment for our exports, having reduced our imports for dry goods $50,000,000, and the total imports in this port from $186,848,360 in 1860, to $101,372,730 in 1861, showing a decrease equal to $85,520,639. The decrease for the year will be at least 50 per cent. Hence the great change in the direction of the current of the precious metals.

THE FOREIGN DEMAND FOR BREADSTUFF.

The best authorities in England and France put down the deficit in their respective crops to be such, that the former must import 64,000,000, and the latter 80,000,000 bushels of grain, to have a supply equal to ordinary consumption. This is at the rate of nearly 3,000,000 bushels weekly up to the year ending August 31, 1862. The United States is looked to, to make up the greater part of the deficit. Their crops would enable them to do much toward this, were not the movement of these soon to be checked by the closing of navigation on the great canal and the lakes. Enormous amounts, however, will come forward before winter sets in, while the railroads will be actively employed for the whole season. The ability to supply the demand is really only a matter of price. With rates sufficiently remunerating, almost the entire crop may be moved during the winter, even with the lakes closed by ice and the Mississippi by the blockade. We shall discuss this interesting subject more at length in another issue.

Hartford and New Haven Railroad.

This company was chartered in Connecticut in May, 1833, with authority to construct a road from Hartford to New Haven, 36¼ miles. About one-half of the road between these points was opened for public use in 1838—the balance in 1839. On the 5th of April, 1839, a company was chartered in Massachusetts, under the title of the Hartford and Springfield Railroad Company, for the purpose of constructing the continuation of this road from the Connecticut State line to Springfield, Mass., a distance of 5.87 miles. This company was organized Oct. 6, 1841. In 1843, a contract was entered into between the Massachusetts and Connecticut Companies, whereby the latter agreed to construct the portion of the road lying in Massachusetts—the latter to own and control the same. Under this agreement its construction was immediately commenced, and early in December, 1844, the road was opened for public use. In 1847 the companies were consolidated under the authority contained in their respective charters. The organization in Massachusetts is only a matter of form for the preservation of its chartered privileges. Its original capital was $300,000. The branch to Middletown, 9.75 miles, was chartered in 1844, and opened in March, 1850. In 1860, it was extended to the Connecticut river, about 1 mile.

The length of the main line, from New Haven, Ct., to Springfield, Mass., is ..... 61.38 miles.
Middletown Branch ..... 10.75 "
Junction to Hartford City ..... 0.87 "

Total, main line and branches ... 73.00 "

Length of second track, 55 miles; sidings, etc., about 10 miles.

The total cost of road and equipment at the date of the last report, August 31, 1861, was $3,398,967 97. The capital stock authorized was $2,350,000, all of which has been paid in. The bonded indebtedness of the company consists of $927,000 first mortgage 6 per cent. coupon bonds, dated January 1, 1853, and payable January 1, 1883, interest payable semi-annually, Feb. 1, and Aug. 1, in New York.

The income account of the company for the years ending August 31, 1859, 1860 and 1861, is as follows:

RECEIPTS.

'57..	3,329,601	72.01	769,065	396,258	235,000	10
'58..	3,320,668	72.01	628,245	389,791	235,000	10
'59..	3,362,019	72.01	723,460	381,267	235,000	10
'60..	3,272,446	73.00	790,537	401,805	235,000	10
'61..	3,398,968	73.00	712,876	354,136	329,000	14

The above statement is for 23 years. The aggregate earnings during that time have been $10,197,766, averaging $442,512 per annum The expenses during the same time, exclusive of interest, have been $4,704,569, averaging $204,546. And the net earnings $5,495,196, averaging $238,921. The dividends declared have amounted to $3,837,925, equal to 185 per cent.—averaging $166,866, or 8 per cent. per annum, on an average share capital of $2,085,825. The average mileage during the same time has been 60.66, and the average cost of road and appurtenances $2,337,818.

The following from the Ledger, presents a general statement of the affairs of the company September 1,

	1859.	1860.	1861.
Capital stock...	$2,350,000	$2,350,000	$2,250,000
Bonds.....	964,000	936,000	927,000

	$3,932,432	$4,013,510	$3,075,087

The miles run by engines has been as follows:

	1859.	1860.	1861.
By passenger trains...	209,500	218,814	234,654
" freight trains	92,563	100,844	86,484
" other trains	12,700	6,285	2,253
Total	314,763	325,950	323,491
Passengers carried....	486,772	544,975	499,888

The bond indebtedness of the company is being gradually reduced. The original issue was 964, ($964,000); of these, 28 were purchased in 1860, and 9 during the past year, leaving the number now outstanding 927. A dividend of 5 per cent. was paid Oct. 1, 1860, since then, quarterly dividends of 3 per cent. have been paid, making the total dividends declared and paid within the fiscal year ending Aug. 31, 1861, 14 per cent. A quarterly dividend of 3 per cent. has also been declared payable Oct. 1, 1861. Whether this rate of dividends shall be continued will of course depend upon the future receipts of the road.

The office of the company is at Hartford, Ct., the officers are:

President—CHARLES F. POND.

Directors—Charles F. Pond, Julius Catlin, Cornelius Vanderbilt, Henry Coit, Ezra C. Read, Chester W. Chapin, James S. Brooks, A. G. Hazard, Samuel H. Parsons.

Superintendent—E. M. REED.

Secretary—S. P. CONNER.

Railroads in Tennessee.

Below we give a statement accompanying the last report made by the Railroad Commissioners, showing the cost of the roads of this State, with the amount of aid granted to each road. The bonds issued constitute a first lien on the roads. The several companies, with one or two inconsiderable exceptions, were able from their earnings to pay the interest on their bonds, relieving the State of all burden. No one had a better system before the rebellion.

In addition to the contingent debt for railroads, the State owes $3,844,606, contracted many years since for Banks and other purposes. The total bonds now outstanding are about $16,600,000.

Roads Finished.	Cost of road.	Cost of Equipment.	Capital Stock—Subscr'd.	Capital Stock—Paid in.	Funded Debt.	Floating Debt.	Receipts.	Expenditures.	Net Earnings.	State aid Granted, To Road's. * For two years.

In addition to the list of roads given, the State has made appropriations to four others as follows:

	Length.	Aid Granted—to road bed.	Aid Granted—to bridges.	Total.
Southwestern	60	$600,000	$200,000	$800,000
Knoxv. & Ken.	63	630,000	100,000	730.000
Knoxv. & Char.	55	550,000	300,000	850,000
C.,C.G. & Charl.	94	940,000	20,000	1,140,000
	272	2,720,000	800,000	3,520,000

None of these roads are yet sufficiently advanced to entitle their companies to any part of the State loan. The Knoxville and Kentucky Company have a share capital subscribed of $128,119, and $171,398 paid in. The whole amount provided for by the State has been $19,549,000, of which $12,712,000 has been issued. There remains due to roads which have partly drawn their appropriations, $3,319,000. The latter amount will be the only sums that will probably be called for under any circumstances.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. BRANDT, Broker, No. 39 Exchange-place, for the steamer of 9th inst., were as follows:

London—60 days' sight	107¼ per cent.
London—3 days' sight	108¼ "
Paris—60 days' sight, per dollar	5f. 37½c.
Paris—3 days' sight, per dollar	5f. 32½c.
Amsterdam—60 days' sight, per guilder	40c.
Hamburg—60 days' sight, per marc banco	35¼c.
Frankfort—60 days' sight, per florin	40½c.
Bremen—60 days' sight, per rix dollar	77c.

Nesquehoning Valley Railroad.

We learn that most of the work of locating this road has been accomplished by the engineers. Among other things, the company will drive a tunnel through the mountain from Panther Creek Valley into the Nesquehoning, at Breaker No. 7, which will make an outlet from Panther Creek to the Lehigh at Mauch Chunk by a descending grade all the way, and dispense with the stupendous machinery of the four inclined planes over the summit. The tunnel will be about 4,000 feet long, of which about one-third is already made, but requires enlargement. The chutes at Mauch Chunk will also be dispensed with, and pockets erected somewhere between the Northern Liberties and the landing. We believe it is yet undecided whether a bridge will be erected at Northern Liberties, or whether the road will be located on this side of the river, to connect with the Lehigh Valley below the bridge down in the Narrows.—*Mauch Chunk Gazette, Sept.* 26.

The Cotton Crops of the United States.

The New York *Shipping and Commercial List* has published in circular form its annual statement of the Cotton crop of the United States for the year ending Aug. 1. Annexed is a synopsis:

	1861. Bales.	1860. Bales.	1859. Bales.
Louisiana	1,751,599	2,139,425	1,669,274
Alabama	546,794	843,012	804,406
Texas	144,447	252,424	192 043
Florida	121,172	192,724	173,484
Georgia	477,584	525,219	475,788
South Carolina	336,339	510,109	480,653
North Carolina	56,295	41,194	37,482
Virginia	78,132	56,987	33,011
Tennessee, &c.	143,424	108,676	85,321
Total crop U. S.	3,656,086	4,669,770	3,851,481

	Bales.
Decrease from crop of 1860	1,013,684
" " " 1859	195,395
Increase over " 1858	542,124
" " " 1857	716,567

The crop for the last eighteen years was as follows:

	Bales.		Bales.
1860–61	3,656,086	1851–52	3,015,029
1859–60	4,669,770	1850–51	2,355,257
1858–59	3,851,481	1849–50	2,096,706
1857–58	3,113,962	1848–49	2,723,596
1856–57	2,939,519	1847–48	2,347,634
1855–56	3,527,845	1846–47	1,778,651
1854–55	2,847,339	1845–46	2,100,537
1853–54	2,930,027	1844–45	2,394,503
1852–53	3,262,882	1843–44	2,030,409

The exports to foreign ports for the past two years compare as follows:

	1861. Bales.	1860. Bales.	Dec. Bales.
To Great Britain	2,175,225	2,669,432	494,207
To France	578,063	589,587	11,524
To N. of Europe	216,250	295,072	.....
To other ports	158,030	220,082	62,052
Total	3,127,568	3,774,173	646,605

The consumption was as follows:

	Bales.
Total crop of the U. S., as before stated	3,656,086
Add—	
Stocks on hand at the commencement of the year, 1st Sep. '60:	
In the Southern ports	142,613
In the Northern ports	85,095
	227,708
Making a supply of	3,883,794
Deduct therefrom—	
The export from foreign ports	3,127,568
Legs, foreign inclu'd.	701
	3,126,867
Stocks on hand 1st September, 1861:	
In the South'n ports.	37,579
In the North'n ports.	45,612
	83,187
Burnt at N. Orleans, St. Marks, Charleston and Phila.	4,390
Manufactured in Virginia and Mobile	18,893
	23,863
	3,233,437
Total for home use North of Virginia	650,357
Taken for home use in Virginia and South and West of Virginia	198,383
Total consumed in the U. S. (including burnt at the ports), 1860-61	843,740

The estimate of the consumption of the States south and west of Virginia, and not included in the receipts of the ports, for the last four years, is as follows:

	1858. Bales.	1859. Bales.	1860. Bales.	1861. Bales.
North Carolina	26,000	29,000	30,000	33,000
South Carolina	18,000	20,000	21,000	24,000
Georgia	24,000	26,000	28,000	32,000
Alabama	8,000	10,000	11,000	12,000
Tennessee	10,000	13,000	15,000	17,000
On the Ohio, &c.	39,000	45,000	49,000	52,000
Total	125,000	143,000	154,000	170,000

To which, if we add (for the past year), the stock in the interior towns 1st September (say 6,200 bales), the quantity detained in the interior (say 25,000 bales), and that lost on its way to market (9,000 bales), to the crop as given above, received at the shipping ports, the aggregate will show, as near as may be, the amount raised in the United States the past season—say, in round numbers, 3,866,000 bales (after deducting 300 bales new crop received this year to 1st ult.), against:

Bales.	Bales.	Bales.
1860. 4,805,800	1857. 3,014,000	1854. 3,000,000
1859. 4,017,000	1856. 3,335,000	1853. 3,360,000
1858. 3,247,000	1855. 3,186,000	1852. 3,100,000

The quantity of new cotton received at the shipping ports to 1st September, was, in

	Bales.		Bales.
1861	300	1858	8,031
1860	51,600	1857	100
1859	12,339	1856	1,800

The preceding statement of the crop, is that of the United States, as a whole, and does not purport to be the crops of the States, though the shipments, stocks, &c., are necessarily arranged under the different leading shipping ports or States, as the case may be.

AMERICAN RAILROAD BOND LIST.

Observations on the Niagara Bridge.

By Peter W. Barlow, Esq., C. E., F. R. S., F. G. S., &c., &c.

(Concluded from p. 711.)

On the Strength of the Niagara Bridge.

The bridge is supported by four cables, each containing 60.40 square inches, the two upper of which have a deflection of 54 feet, and the lower pair 64 feet. The strain at the points of support, in relation to the weight, will be obtained as follows:

Let d represent the deflection,
w the weight,
s the half span,
and T the tension.

$$T = \frac{w}{4d}\sqrt{4 \times d^2 + S^2}, \text{ or,}$$

The cables having different deflections, the strain with a given weight will vary in each pair of cables, which is undoubtedly a defect in the bridge; because in the summer the lower pair will do the principal duty, and in winter the upper pair. There is, however, such an abundance of strength, that no strain can ever arise on either cable that approaches the limit of elasticity, that the mean deflection of 59 feet will fairly represent the average strain on the cables. Therefore

$$T = \frac{w}{4 \times 59}\sqrt{4 \times 59^2 + 410.66^2} = 1.81.$$

The total weight between the towers is estimated by Mr. Rœbling at 1,000 tons, and therefore the strain on the cables from the bridge alone will be 1810 tons. The ultimate strength of the four cables is estimated from actual tests of each wire at 11,904 tons.* The ratio of strength to the ordinary strain will, therefore, be as 6.5 to 1, and the strain per square inch of iron wire, 7.5 tons.

The strength of the iron, being 100,000 lbs. per square inch, as estimated by the engineer, is unusually high; but it is arrived at by actual test, and the metal was of the best quality, as will be seen by reference to the specification.† The capability of manufacturing iron to resist tensile strains, of such superior quality to that used for girders, produces one of the practical advantages of the suspension principle, by reducing the weight of the structure, which in large spans causes the principal strain they have to contend with.

As the weight of the bridge is limited by regulation to 300 tons, the greatest strain on the cables, including the weight of the bridge itself, will not exceed 2,350 tons, or under one-fifth of the ultimate strength of the cables, and therefore it is fully of the strength required by the officers of the Board of Trade of this country for railway bridges.

On the Durability of the Niagara Suspension Bridge.

This, like every railway bridge in England has been subjected to the test of a load exceeding what it can be subjected to in practice; there is, therefore, a margin in every bridge for deterioration of a determined amount, being the difference between the actual test of the bridge and the greatest load it will afterwards receive.

But this is not the only security as to durability. In addition to the margin obtained by actual experiment, there is a much greater intended margin, the security of which as an actual test of strength depends on calculation; that is to say, the ultimate strength of the structure is intended to be much greater than the test applied; and in the case of the Niagara, is estimated to be equal to endure a strain of five times the test applied, including the weight of the bridge itself.

In comparing the durability of railway structures, the certainty of the calculation on which this depends is an important element in the question.

With regard to the actual deterioration from oxidation, the progress is so slow that its operation in a suspension bridge, where every part can be got at and painted, will not be an appreciable amount. Tube bridges, or any structures composed of thin plates, and cells difficult to be got at, will be more liable to loss of strength from this cause.

Another supposed cause of decay in the strength of iron structures, is the alteration in the mechanical conditions of the fibres of the metal from continual vibration. There is no doubt that violent and continuous vibration of iron will effect its tensile strength after a length of time, but it is clear that it must be of a very severe character to produce any injurious result, because the parts of machinery of various kinds, and none more so than a marine steam engine, have to endure an amount of constant vibration which would soon exhibit itself if iron was readily affected. That steel wire will bear violent vibration without injury is proved by the durability of musical instruments, and the existence of suspension bridges constructed without girders for so many years, in which the most severe vibration occurs in every gale of wind (as is so forcibly described in the report of General Pasley and Mr. Provis), satisfies me that, in a structure like the Niagara Bridge, where the cables are subjected to a moderate tension, and may be said to be free from vibration, their durability will not be less than the masonry of which the towers are built.

In large girders, which are admitted to be of necessity much heavier, and of their own weight to create a larger constant strain on the metal, the destruction will be more rapid. But the feature in girder constructions which to my mind renders their durability doubtful, is the fact that they depend for their strength and safety on the compressive, as well as the tensile resistance of iron, and consequently the estimated margin of strength is more doubtful, because the power of a bar to resist compression is not always correctly measured, as in a tension bar, by the section of metal. As long as a compression bar or tube maintains its figure, its power of resistance is in proportion to the section; but when you have large girders to deal with, and serious compressive strains, no calculation derived from model experiments is to be depended on; an engineer cannot be certain that a few tons in excess of his actual test will not cause buckling and the destruction of the bridge, and therefore there does not exist in girders or arches that certainty of durability that exists in a properly constructed suspension bridge.

Before concluding my observations on the Niagara Bridge, it is necessary to say a few words on its imperfections as well as its good qualities. I have before referred to the two cables having a different amount of deflection, which it appears has arisen from its having been designed in the first instance for road traffic alone. The effect of this is, that the deflection from expansion will be different in the two cables; and thus the principal work is done in the winter by the upper cable, and in the summer by the lower cable. This difference, which amounts to about 2 inches, is not sufficient to bring any serious strain on the cables, but it is calculated to cause an irregularity in the weight on the suspension rods, which may possibly lead to a little inconvenience.

A second objection is, the use of timber for the longitudinal trussing and flooring. It is objectionable from presenting more surface to the action of the wind, but more particularly from much greater weight of material being required to gain a given longitudinal stiffness. Fir timber of a given weight will extend or compress 2.5 times the amount of a similar weight of good wrought iron, although the specific gravity is as 1 to 10; and the parts of an iron truss or girder admit of being secured together so as to retain a larger proportion of the action of the fibres than is the case with wood.

A suspension bridge should have the platform or roadway also of iron, so as to act as a horizontal girder and resist the action of the wind. By the use of iron in the platform and girders, a weight of 400 tons in the place of 600 tons of timber would have reduced the deflection of the wave to one-third, and would have rendered unnecessary any anchorage to prevent the action of the wind.*

A third and final objection applies to nearly all suspension bridges, hitherto constructed, viz., the cables are supported on carriages on rollers, instead of being attached to the towers.

An engineer, when he constructs an arch, would not expect to have a rigid structure if he placed the abutment on rollers, and how can he expect in a suspension bridge to have rigidity if he adopts a similar expedient?

We are apt to follow what has been previously adopted without reflection, and desire to avoid the responsibility of a change of an adopted system; but there is no difficulty in attaching the cables to the towers if they are of iron, and constructed so as to act as vertical girders, to resist the inequality of the weight which may arise on the different spans of a bridge. In fact, you cannot expect perfect rigidity in a suspension bridge as they are now constructed; but there is no reason why they should not be treated like an arch reversed; and if they were so treated there is nothing in the suspension principle to render them less rigid.

There is, however, no intention to imply, by these observations, that the Niagara Bridge is less durable from these omissions to any appreciable extent. I believe, provided the timber and masonry are kept in repair, it will last for hundreds of years, and that a certain degree of motion in a bridge does not effect its strength or durability, provided no strain in any part exceeding the elasticity is produced; at the same time, by the means pointed out, the undulation and vibration, small as it is, would be considerably reduced.†

(To be continued.)

* The wire was manufactured by Messrs. Johnsons, of Manchester, England.

† See report of Mr. Rœbling, C. E., 1856, in "Public Works, British and American," published by John Weale, 59 High Holborn.

Halifax and Quebec Railway.

The Quebec *Mercury* gives the following as the result of the deliberations of the convention:—

"The Governments of the three Provinces—while leaving the choice of route to the Imperial Government—have unanimously determined to recommend to their respective legislatures the renewal of the offer made in 1858, whereby Canada, New Brunswick, and Nova Scotia granted to Her Majesty £60,000 per annum and all the granted lands within ten miles on either side of the line, and a free right of way through all private property, providing Her Majesty's Government by themselves, or through the instrumentality of a private company, complete the railway.

Her Majesty's Government are asked to give a sum of £60,000 per annum for the carriage of the mails, military stores, and troops between Halifax and Quebec, and with that and the provincial grant guaranteed for a series of years, by the Imperial Government, the necessary capital it is thought can be raised to complete the railway.

Against the foregoing sum of £60,000 the Governments of Canada, New Brunswick, and Nova Scotia estimate a saving to the Imperial Treasury of £70,000 per annum, exclusive of the great saving the railway would effect in the Imperial Military expenditure, which amounts at present to about £420,000 a year.

The length of line remaining to be constructed is 360 miles, which can be fully completed and equipped for £3,000,000 sterling.

By completing the construction of the railway from Truro to Riviere du Loup, a direct railway communication will be established through British territory between Halifax, Quebec and Lake Huron, a distance of 1,400 miles, from whence it is intended to open a direct communication with the British Columbia, Vancouver's Island, and the Pacific. There can be little doubt that the immedi-

* The towers should also be of iron, in order that the expansion may correspond with that of the suspension rods. The suspension rods should be at right angles to the cables, and fewer in number, by which the tremor as well as the undulation will be reduced.

† See the report of Mr. Rœbling, C. E., in the *Engineer*, September 21, 1860, and *Jour. Frank. Inst.*, vol. xl., December, 1860, p. 361.

ate completion of the line of railway from Halifax to Quebec is essential to the preservation and integrity of the British Empire in North America. In addition to its adding to the security and permanence of these British possessions, accelerating the communication with the mother country, reviving that identity of interest with her which has been too long engrossed by the United States, the railway would also effect a saving to the Imperial Treasury far exceeding any assistance that may be required for its completion."

Railroad Earnings--Monthly.

The earnings of the Chicago and Rock Island Railroad for September, 1861, were $145,897
Do., 1860 130,579

Increase $15,318

The earnings of the Hudson River Railroad for September, 1860, were. $180,000 14
" 1861 ..... 146,424 39

Decrease $33,575 75

The Illinois Central Railroad earned in September, 1860 .....$259,643 04
Do. 1861 ..... 243,677 75

Decrease $15,965 29

The business of the Cleveland and Mahoning Railroad for September was as follows:

Passengers	$5,616 11
Freight	8,023 14
Ore	1,199 75
Coal	25,364 73
Mail	418 75
Gross earnings	$40,622 48
Expenses	13,253 87
Net earnings	$27,368 61

For 9 months ending September 30, the comparison with last year is as follows:

	1860.	1861.
Gross earnings	$270,775 25	$280,853 21
Expenses	93,455 31	105,919 78
Net earnings	$177,319 94	$174,933 43

The receipts of the New York and Harlem Railroad for September, 1860, were..$105,587 27
1861 ..... 89,345 65

Decrease $16,241 62

The receipts of this road for the fiscal year ending September 30, 1860, were. $1,142,850 87
Do. 1861 ..... 1,144,980 26

Increase. $2,129 39

The earnings of the Toledo and Wabash Railroad for September, 1861, were $142,537 50
Do., 1860. ..... 106,109 32

Increase $36,437 18

The earnings of the Michigan Central Railroad for September, 1861, were.. .....$236,845 97
Do., 1860 ..... 251,423 00

Decrease $14,577 03

Railroad Earnings--Weekly.

The receipts of the Morris Canal for the week and season, compared with those of 1860, have been:

Total to Sept. 22, 1860		$247,662 63
Week ending Sept. 29, 1860		10,742 31
		$258,404 94
Total to Sept. 21, 1861	$188,234 12	
Week ending Sept. 28, '61	7,802 91	
		196,097 03
Decrease		$62,367 91

The receipts of the Grand Trunk Railway of Canada for the week ending Sept. 21, were $64,491 07
Corresponding week, 1860 ..... 79,094 17

Decrease in 1861 ..... $14,603 10
Total traffic from July 1st, 1861. .....$688,667 99
Corresponding period previous year. 721,662 59

Decrease $32,994 60

The receipts of the Chicago and Northwestern Railroad for the 3rd week in September, 1861, were $22,934 24
Do. 1860 ..... 17,912 51

Increase. $5,021 73

The earnings of the Galena and Chicago Railroad the 4th week in Sept., 1861, were. $60,341
Do. September, 1860 52,782

Increase $7,559

The earnings of the Chicago and Rock Island road, the 4th week in Sept., '61, were $37,700
Do. 1860 30,411

Increase. $7,289

The following are the earnings of the Great Western Railway of Canada for the week ending September 27, 1861:

Passengers	$36,628 02
Freight and live stock	25,120 67
Mails and sundries	1,365 54
Total	$63,114 23
Corresponding week of last year	61,207 00
Increase	$1,907 22

The earnings of the Cleveland and Toledo Railroad the 4th week in Sept., 1861, were ...$27,324
Fourth week in Sept., 1860..... 23,060

Increase.. .....$4,264

The earnings of the St. Louis, Alton and Chicago Railroad for the 4th week in Sept., 1861, were $20,777 36
Do. 1860 ..... 18,902 66

Increase in 1861 .....$1,874 70
Total since 1st September, 1861 .....$119,560 25
Do. 1860 ..... 94,927 82

Increase $24,632 43
Total since 1st January, 1861 .....$754,605 63
Do., 1860 ..... 692,194 74

Increase $62,410 89

The earnings of the Michigan Central Railroad, for nine days ending September 30th, 1861, were... .....$89,508 93
Do. 1860 ..... 72,975 64

Increase $16,533 29

The following is a statement of the tolls collected on all the New York Canals for the month of September, and from the opening of navigation to the 1st inst.:

September, 1861	$574,072 88
" 1860	469,515 50
Increase	$104,057 38
From opening of canals to Oct. 1, '61.	$2,495,210 00
Do. do. do. '60.	2,033,411 92
Increase	$461,798 17

The earnings of the Milwaukee and Prairie du Chien Railroad, for Sept., 1861, were. $134,729 00
Do., 1860 ..... 139,761 43

Decrease $5,032 43

Boston Bank Dividends.

The following table presents the capital of each Bank together with the last two semi-annual dividends, and the amount payable October 7th.

	Capital.	Dividends, 1861, April.	Oct.	Am't, October, 1861.
Atlantic	$500,000	3	0	.....
Atlas	1,000,000	4	3	$30,000

Webster	1,500,000	3½	3	45,000

* The dividend of the Massachusetts Bank is 3.2 per cent. (par $250) equal to $8 per share.

† The Mount Vernon Bank, which commenced operations in November, 1860, pays its first dividend of 3 per cent.

Of the forty-four Banks in the table, the dividends average 3.16 per cent. Two Banks divide 4½ per cent., five 4, nine 3½, twenty-three 3, one (the Massachusetts) 3.2 or $8 per share, one 2½, and two 2 per cent. The Atlantic passes, which is the first time any Bank in Boston has passed its dividend since 1844. Twenty-one Banks pay the same as in April last, twenty-two reduce their dividends, and the Mount Vernon pays 3 per cent. for the first ten months of its operation.—The Continental pays 3 per cent., against 2 in April, but the latter was for the first four months only of its operation.

Minnesota and Pacific Railroad.

The contractors for completing this road to St. Anthony have arrived, bringing with them a locomotive, tender, three platform cars and one passenger car. This rolling stock arrived yesterday morning upon a barge towed by the steamer "Alhambra," and created quite a sensation at the levee. The locomotive and cars were already on a track, placed lengthwise of the barge; and during the forenoon the barge was dropped down to the point near Dayton's Bluff where the railroad, now ready for the superstructure, intersects the

river. Here the bow of the barge was run square against the shore and anchored. A temporary track will be laid from the barge to the roadbed, and the train thus placed in position for track laying. The iron for the completion of this portion of the road is now arriving by every boat from La Crosse. Quite an extensive pile is already on the levee.—*St. Paul Press.*

Railways in France.

The return issued from the French Ministry of Agricultural, Commerce, and Public Works shows that in the half year ending June 30, 1861, the receipts on the *ancien reseau* were, as compared with the corresponding six months of 1860, as follows :

	1861.	1860.
Northern	29,132,213f.	28,381,047f.
Eastern	22,654,950	20,914,887
Western	22,422,927	21,879,631
Orleans	34,058,229	30,688,965
Paris—Mediterrean	55,459,323	45,361,367
Lyons and Geneva	3 278,397	2,857,735
Southern	13,098,143	10.399,966
Vic. Em. (Rhone sec.)	626,854	624,193
Ceinture (Paris)	974,383	844,684
Graissessac—Beziers	231,309	133,419
Besseges—Alais	696,846	504,405
Anzin—Somain	214,473	185,803
Chauny & St. Gobain	9,367	—
Carmaux—Albi	131,755	106,362

It should be observed that the per-centage of increase is reckoned on the average number of kilometres (a kilometre is 0.62 of a mile English) worked, which exhibited no variation in the case of the Northern, Western, Lyons and Geneva, Victor Emmanuel (Rhone section), Ceinture, Graissessac and Beziers, Besseges and Alais, Anzin —Somain, and Carmaux—Albi; although there was an advance of 4 kilometres on the Eastern, 2 kilometres on the Orleans, 3 kilometres on the Paris and Mediterranean, and 2 kilometres on the Southern. The return prepared for the same periods of the receipts on the *nouveau reseau* exhibit the following results :—

	1861.	1860.
Northern	97,700f.	7,074f.
Eastern	9,693,258	8,479,904
Ardennes	1,813,608	1,659,637
Western	2,083,631	1,935,535
Orleans	2,722,891	2,024,463
Paris & Mediterranean	9,237,749	8,164,094
Dauphin	1,375,080	1,173.589
Southern	317,542	269,950

The average number of kilometres worked on the Northern was 32 as compared with 2 in 1860; on the Eastern, 739 as compared with 721; on the Ardennes, 164 in both years; on the Western 312 as compared with 300; on the Orleans, 460 as compared with 359; on the Paris and Mediterranean, 526 as compared with 464; on the Dauphine, 135 as compared with 129; and on the Southern, 99 as compared with 90. There was, therefore, a decrease of 13.81 per cent. per kilometre on the Northern and 0.19 per cent. on the Paris and Mediterranean; but an increase of 11.53 per cent. per kilometre on the Eastern, 10.37 per cent. on the Ardennes, 3.50 per cent. on the Western. 4.97 per cent. on the Orleans, 11.96 per cent. on the Dauphine, and 17.60 per cent. on the Southern. The average length of line worked on the old *reseau* was 6,984 kilometres as compared with 6,958 kilometres; and the earnings were 182,986,169f. as compared with 169,882,464f., showing an increase of 11.93 per cent. kilometre. The average kilometrage in operation on the new *reseau* was 2,467 kilometres as compared with 2,238 kilometres; and the earnings were 27,341,-368f. as compared with 23,714,253f., showing an increase of 4.60 per cent. per kilometre. The new lines opened are therefore making a comparatively less rapid progress than the old trunks, to which, of course, they to some extent act as feeders. The total length of line opened on 30th June in France was 9,460 kilometres, against 9,266 kilometres on 30th June, 1860, being an increase at the rate of 2.31 per cent. for the year. The total receipts to 30th June this year, reduced to pounds sterling, were 8,413,105*l.*, as compared with 7,463,869*l.* in the first half of 1860, being an increase of 946,236*l.* The new lines opened during the year embraced between 1st July, 1860, and 30th June, 1861, were, on the old *reseau*, as follows:—Eastern, Strasburg to Kehl (May 11), 8 kilometres; Orleans, terminal extension at Bordeaux, 2 kilometres; Southern ditto, 2 kilomtres. New *reseau*—Northern, Lens to Ostricourt (Oct. 6), 17 kilometres; Eastern, Gretz to Martcerf (Feb. 2), 16 kilometres; Orleans, Perigueux to Brive (Sept. 17), 72 kilometres; St. Christophe to Rodez (Nov. 5), 29 kilometres; Paris and Mediterranean, Pontarlier to the Swiss frontier (July 24), 11 kilometres; Moret to Montargis (Aug. 14), 51 kilometres; Dauphine, Iseaux to Grand-Lemps (Jan. 2), 6 kilometres. Altogether it must be admitted that the return exhibits a highly satisfactory progress.

A line from Perigueux to Limoges was opened for traffic Aug. 26th. The station at Limoges is situated at the northern extremity of the Champde- Juillet. The line passed under the town by a tunnel of 1,019 metres (about three-fourths of a mile English), and then goes through the territory of the communes of Limoges and Iste, traversing the Vienne by a viaduct of five arches. It also crosses the Briance by a viaduct of eight arches. There are several other tunnels and bridges on the line, which is altogether 96 kilometres or 59 miles in length. The general council of the department of Marne have had under consideration a project of a direct line from Rheims to Rouen by Beauvais. At present the distance between the two towns is *via* Paris 312 kilometres, but by the projected line the distance would be reduced to 271 kilometres. The general council of the department of Gers has unanimously expressed a wish for the execution of a line from Toulouse to Bayonne by Auch. The Paris, Lyons, and Mediterranean has commenced two new sections from Firminy to Confolens, and from Confolens to Puy; the same company has just opened a section from Pontarlier to Verrieres, about 12 kilometres in length. The Northern is about to open the section from Sevran Livry to Villiers-Cotterets. The little suburban line at Lyons to the Croix-Rousse will be opened early next month. In the frightful social conflicts of which Lyons has been the scene, the Croix-Rousse obtained a melancholy prominence. An important line along the valley of the Dordogne through the south-west of France to the port of Bordeaux is under consideration, and several influential landed proprietors of the Dordogne and the Gironde, besides Bordeaux bankers, have had a meeting on the subject. It is proposed to aim in the first instance at the establishment of a line from Libourne to Bergerac.

Railroad Reports.

RAILROAD COMPANIES will oblige us by sending us copies of their Reports as soon as they are published.

To Railroad Companies.

THE advertiser is desirous of an engagement with a first-class Railroad Company as purchasing agent—has been familiar with railroad business during the last twelve years—six, in the position indicated—is a machinist and engineer, and from his extensive acquaintance with manufacturers and dealers in Railroad materials, is confident his services will be valuable to any company desiring such—would be willing to make himself generally useful as Assistant Superintendent or otherwise.

Unexceptionable references as to character, capacity, etc.

Address Box 1487,

HEAD QUARTERS, WESTERN DEPARTMENT,
St. Louis, Mo., August 23, 1861.

To Presidents and Superintendents of Railroads, Western Department, United States Army.

THE following is the basis established by the Government for the transportation of troops and supplies for the army :—

Per Passenger per mile (2) two cents for distances moved.

Equipments, munitions and supplies accompanying regiments, first class local rates, which will average about as follows :

30 miles or less				10	cents per 100 pounds.
50	"	"		15	" "
100	"	"		25	" "
150	"	"		40	" "
200	"	"		50	" "
300	"	"		75	" "
350 to 400 miles not exceeding				90	" "

For transportation of Horses in small lots, the following are the usual estimated weights of Railroad Companies :

Single animals				3,000	pounds.
2 animals				4,000	"
3	"			5,0.0	"
4 horses				6.5C0	"
5	"			8,000	"
6	"			9,000	"
7	"			10,000	"
8	"			11,001	"
9	"			12,000	"

Full car loads, 13 or 14 horses, usually charged 18,000 lbs. All other supplies forwarded by Freight Trains are charged local rates, according to classification of property which will usually average, on provisions and heavy freight, two to three cents per ton of 2,000 lbs. per mile.

Fast freights, immediate transportation, and precedence given to the Government in all cases.

All despatches required by the Government, to be furnished at the actual running cost.

E. H. CASTLE,
Supervisor Railroads, Western Department.

PASCAL IRON WORKS,

ESTABLISHED 1821.

MORRIS, TASKER & CO.,

MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ¼ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas or Water purposes, and fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—designed especially for Water purposes, being superior to lead pipe.

Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches, etc., for same.

Gas Works Castings, etc., etc.

PHILADELPHIA.

STEPHEN MORRIS, HY G. MORRIS, CHAS. WHEELER,
THOS. T. TASKER, JR., STEPHEN P. M. TASKER.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

Government Finances--The Part Performed by the Banks.

The first condition to military success are well ordered finances, which provide the means for carrying on hostilities, and render tolerable the burden they necessarily impose. Other things being equal, the former is always in ratio to the latter. By this test we have a right to infer the success of the government in putting down the rebellion. In the contest it has 22,000,000 whites against 5,000,000, with resources, in time of peace, thrice greater than in ratio to their population. But those of the North remain unimpaired by the war, which at the South has annihilated commerce and trade, rendered their industry almost wholly unproductive, forced all the banks to suspend payment, and destroyed the credit both of the Confederate and State governments. The first penalty paid by the rebels was the ruin of all their material interests. Property is based upon law, and when one is violated, the other is destroyed. We can form a correct estimate of their condition by imagining what that of the North would be in like circumstances. Were we to change places, we should give up the contest without striking a blow.

Labor and capital were never more free than now, in the North, to pursue their ordinary avocations. This freedom enables our people to create ample means for carrying on the war as it proceeds. Harmony of action, consequently, between the capital of the country and the government, was the only thing wanting to complete success. This harmony was effected through the action of the Banks of New York, Boston and Philadelphia, acting in behalf of themselves and of the total banking and available capital of the loyal States. Their action was a pledge of this capital to the support of government, and secured to its obligations a credit which has caused them to be sought for by every person having money to lend, or time or property to sell. Such a credit once established, the banks were immediately relieved of such portion of the government loans as they may not wish to assume. Their course, although dictated by a sentiment of patriotism which is one of the brightest features of the contest, was equally dictated by a wise regard to their own interests. The first condition of property is a stable government. The evidence of its stability, in public opinion, is the market value of its promises to pay. Those of governments believed to be permanent, command a price that yields the very lowest rate of interest. English consols at 90 yield an interest of 3.30. At the average price of United States 6s for the last 10 years, they have produced only about 4½ per cent. to their holders. The rebellion, which carried off one-third of the States, and which was an untried experience, brought down the price of these bonds to 83, at which rate they would realize their holder something over 8½ per cent., or double the ordinary rate. No interest in the country could afford to allow the bonds of government to sink below these figures, or even remain long at them, as such prices would raise a doubt as to its permanency, or, rather, perhaps, ability to protect industry and enterprize in the future, which would necessarily languish and die out. As the assets of banks were in bills receivable, which must, in a great measure, be paid out of the future earnings or productions of the people, a state of things that would interfere with, or discourage their industries, would strike a fatal blow at these institutions. Those of the South are bankrupt precisely for the reasons indicated. Those of the North saved themselves by strengthening the arms of government. This gave a guarantee for the future, assuring the producer that he should be protected in his industries, and that he would find customers for his products, whose industries had been protected as well as his own. The value of their bills receivable depended upon the course they took. If government went down, everything would go with it. If it was sustained in all its functions, it would not be long before our people would make up their losses, and, adapting themselves, with the flexibility of character which is their distinguishing feature, to the new position of affairs, would soon exhibit all the evidence of their former prosperity. Such has been the result. The banks were never in a stronger position than they are to-day, notwithstanding the advances made to government. For all the losses incident to the rebellion, which has withdrawn from us an immense trade, and led to repudiation of debts due to the North of hundreds of millions of dollars, a sum equal to 10 per cent. on their share capital is undoubtedly a sufficient guarantee. With abundant means, and with the natural decline in the line of their discounts, nothing could be really more opportune than to have government come in, as a large borrower, at a high rate of interest.

The financial question of the war has been solved with an ease which is an agreeable surprise to ourselves. We had overlooked the preparation made for it by the action of the banks in November last, in view of political difficulties then impending. It was a part of the plan of the conspirators to break down the government by undermining its credit, and to destroy the power of the North by precipitating a financial crisis. The *role* that Mr. Cobb, then Secretary of the Treasury, performed in

this city, is familiar to all. The Banks, in self-defence, virtually consolidated their capitals, by combining for mutual protection and defence. This combination, which henceforward secured unity of purpose and harmony of action, prepared them for the present crisis. Provisions for taking the loan were fully made nine months before it was offered or even thought of. It was a happy inspiration, or necessity, that laid so deep and broad the foundations. Those who did it, had little idea of the part they were performing in the grand drama. It rendered the success of the rebellion impossible before it unfurled the standard of revolt. It secured to the North that financial independence of all the world, which is as gratifying to ourselves as it is incomprehensible to foreigners. They can not help witnessing the phenomena, but they have not yet penetrated the cause. To most of them, particularly Englishmen, our commercial and political downfall was a matter of course.

The first instalment of the loan apportioned to the banks of the city of New York, $35,000,000, was taken August 19. Their condition at that date, compared with their present one was as follows:

	Loans.	Specie.
August 19	$108,717,434	$49,733,991
October 12	121,318,914	41,139,606
Increase	$12,601,480	Dec. $8,594,385
	Circulation.	Deposits.
August 19	$8,521,426	$92,046,308
October 12	8,733,090	94,188,487
Increase	$211,664	$2,142,179

The increase in their assets, adding specie and loans, has been $3,907,105; increase of liabilities, $2,353,843—gain, $1,553,262. In the loans are included government securities to the amount of $22,802,500. The government is also credited as depositor to the amount undrawn of the first instalment of the loan, or $8,400,000. The following statement will show the condition of the banks with and without the government loan:

WITH THE LOAN.

Loans.	Specie.	Deposits.
$121,318,914	$41,139,606	$94,188,487

WITHOUT THE LOAN.

$98,516,414	$41,139,606	$85,788,487

This statement shows that the ability of the banks to accommodate their regular customers is unimpaired. In fact, the demands upon them from this source are far below their ability to meet.

Of the amount of the first instalment taken by the banks, $12,197,500 has been reimbursed by outside sales, reducing the amount actually paid out by them, to the present time, to $14,402,500. The condition of the first instalment, as far as the banks of this city are concerned, is as follows:

Amount called for	$35,000,000
Paid by Banks	$14,402,500
" " Individuals	12,197,500
Held by Banks to the credit of government	8,400,000
	$35,000,000

The second instalment apportioned to the banks of this city shows in their statement, of October 12, which is as follows:

Loan.	Specie.	Circulation.	Deposits.
$156,318,914	$41,139,606	$8,733,090	$129,188,487

Deducting $35,000,000 from the loans and deposits, and the result will be the same as that already given, and shows the actual condition of the banks, as no portion of the second instalment has been called for.

The position of the banks in reference to individual borrowers and depositors, on the 19th of August and 12th of October, was as follows:

	Loans.	Deposits.
August 19	$108,717,434	$92,046,308
October 12	98,516,414	85,788,487
Decrease	$10,201,020	Decrease $6,257,821

The following is an abstract of the weekly statements of the banks from the date of taking the first instalment to October 12:

	Loans.	Specie.	Deposits.
August 17	$108,717,434	$49,733,990	$92,046,308
August 24	137,663,938	47,119,481	118,456,307
August 31	141 081,474	45,098,113	120,436,010
September 7	139,158,230	41,887,230	114,091,061
September 14	136,565,624	37,529,412	106,760,876
September 21	130,192,258	36,805,177	99,316,831
October 5	149,316,488	39,809,901	120,607,549
October 12	156,318,914	41,139,606	129,188,487

In the last statement the whole of the second instalment is included, and a portion of it in that of October 5.

The variation in the specie column shows the working of the loan, and, in fact, the influence of the expenditures of government upon the financial condition of the country. Upon the negotiation of the loan the government immediately began to draw specie. At one time had reduced the amount to $35,000,000—the reduction being nearly $15,000,000. The lowest average amount for any one week was $36,805,177. The return current has now set in. The amount now held by the banks is only $8,594,384 less than the highest specie point ever reached, and shows already a gain of nearly $7,000,000. The amount of specie in the banks and in the government treasury in the city is $51,768,704, against $54,514,229 on the 19th of August. The tendency is to still greater accumulations. It is not specie that is wanted to carry on the war, but food, clothing, ships, means of transportation, and munitions of war. There is no more reason why these should be paid for in specie in time of war than in a time of peace. It is enough that the government can at all times command all it wants. As a general rule, creditors of governments prefer a check on a bank, to specie, in payment of their claims. They want the money to pay their own debts, due, perhaps, to the banks. Government is, in fact, distinguished in no manner from any other borrower. All its expenditures return immediately into the hands of the people. Its action, consequently, is not calculated to tighten up the market, but by its immense expenditures to make business active, and money plenty.

Chesapeake and Ohio Canal.

This work is in excellent order. Water is abundant, and no interruption has recently been encountered. Since the opening of the season 84,578 tons of coal have been shipped over it from Cumberland.

Chicago, Burlington and Quincy Railroad.

This company is a consolidation of a company of the same name, and the "Central Military Tract Railroad Company." The *old* "Chicago, Burlington and Quincy Railroad Company" was chartered under the name of the "Chicago and Aurora Railroad Company" and constructed a road from the Junction, (30 miles west of Chicago,) to Aurora, 13 miles, in 1849-'50, and an extension thence to Mendota, 45 miles, in 1852-'3. By a contract dated December 13, 1851, it acquired the right to use the Galena and Chicago Union Railroad between the Junction and Chicago, for which it paid 50 per cent. of the gross earnings thereon; and for station service and fuel an additional 20 per cent. In 1845, the title of the company was changed. The earnings of this road for the year 1855, and for the six months ending July 1, 1856, was as follows:

	1855.	1856.
From passengers	$199,419	$111,479
" freight	517,361	216,466
" mails, etc.	5,800	3,487
	$722,580	$331,432
Operating expenses	342,759	185,666
Net earnings	$379,821	$145,766

In 1856, a dividend of 5 per cent. was paid, amounting to $98,352. The financial condition of the company in 1855, and at the time of the consolidation in 1856, was as follows:

	1855.	1856.
Capital stock	$1,475,300	$1,639,100
Bonded debt	1,240,000	1,240,000
Bills payable	270,695	444,736
Other liabilities	202,019	71,633
	$3,288,014	$3,395,469
Cost of road	$2,206,811	$2,278,595
Equipment	554,618	606,027
Bills receivable	71,019	180,313
Other assets	455,566	330,534
	$3,288,014	$3,395,469

The Central Military Tract Railroad Company was chartered for the purpose of constructing a railroad between Galesburg and Mendota, a distance of 79 miles. The road was completed and opened for traffic in December, 1854—having been finished and brought into use by sections within that year. The following is a statement of the earnings and expenses of this road from May 1, 1855, to June 30, 1856:

From passengers	$239,181
" freight	305,175
" mails and miscellaneous	9,083
	$553,439
Expenses	313,991
	$239,448

A dividend of 3 per cent. was declared in 1856, amounting to $38,175. The financial condition of the company in 1856 was as follows:

Capital stock	$1,262,500
Bonded debt	1,854,000
Bills payable	279,050
Other liabilities	55,988
	$3,451,538
Cost of road	$2,603,967
Equipment	316,274
Bills receivable	101,111
Other assets	430,186
	$3,451,538

The business connection between these companies commenced on the completion of the Central Military Tract railroad. The Peoria and Oquawka railroad, between Galesburg and East Burlington, opened in March, 1855, was leased by the companies conjointly at a rent of $45,000 per annum, and the three, in connection with the Galena and Chicago Union railroad, operated from that date as one line, under the title of the "Chicago and Burlington Railroad Line." On the 9th of July, 1856, the Chicago, Burlington and Quincy, and the Central Military Tract companies were consolidated under the title of the former; but in relation to matters of account, it was agreed that the consolidation should date from the first of the same month. On the 28th of June, 1856, the contract with the Galena and Chicago Union Railroad Company was so modified that this company was to pay for the use of the track between the Junction and Chicago 27 per cent. of the earnings instead of 50 per cent. and for station service and fuel 25 per cent. instead of 20 per cent.—the latter provision to cease on the 1st May, 1857. This agreement was to terminate in five years and might at any time be terminated by either party giving two years' notice to that effect. In 1860, the contract was extended for a further term of five years commencing on the 1st May, 1861. The Chicago, Burlington and Quincy Railroad Company has the right under its charter to construct a separate line from Aurora to Chicago and has already provided for such under the general mortgage executed 1st January, 1858. The company has continued to occupy and operate that part of the Peoria and Oquawka Railroad between Galesburg and Burlington under the contract and lease with that company: this company accounting for the earnings over and above paying the operating expenses of the same. Moss, Harding & Co., the contractors and lessees of that part of the road between Galesburg and Peoria, continued to occupy the portion between Galesburg and Burlington for their trains up to October last, which resulted in an active competition for the business, and largely reduced the earnings on and from that road. At that time an agreement was entered into with these gentlemen, whereby these two interests are no longer hostile to each other. In pursuance of this agreement this company has advanced to them a considerable sum of money, for the safety of which their claim upon the road in the hands of a trustee stands as security. The interest of these gentlemen in the road arises from a construction contract to build 36 miles of road from Galesburg, east towards Peoria, and equip the road from Peoria west, under which contract they hold the road from Peoria to Burlington, subject to the lease of this company, until their debt is fully paid. The amount claimed by them is $1,700,000.

The Chicago and Burlington Line is composed of the following roads:

Galena and Chicago Union, from Chicago to Junction	30 miles.
Chicago, Burlington and Quincy, from Junction to Galesburg	138 "
Peoria and Oquawka, from Galesburg to Burlington	42 "
Total length	212 miles.

The aggregate earnings of this line for the fiscal year ending April 30th, have been as follows:

	Freight.	Pass'gers.	Mails, etc.	Total.
1856..	$1,051,703	$543,856	$17,660	$1,613,219
1857..	1,367,369	628,058	28,054	2,023,481
1858..	1,072,025	552,951	25,363	1,850,339
1859..	843,157	420,358	25,379	1,288,894
1860..	933,456	392,214	58,257	1,383,957
1861..	1,288,919	399,643	43,522	1,732,084
	$6,556,629	$2,937,110	$198,235	$9,891,974

The following relates solely to the Chicago, Burlington and Quincy Railroad Company:

The amount of capital stock authorized was $6,000,000, of which $4,689,340 has been paid.

Funded Debt—$5,124,515 62, described as follows:

1st mortgage (Chic. & Aur.) 7 per cent. inconvertible bonds, $274,000—issued 1st July, 1852, and payable, principal 1st July, 1867, and coupons semi-annually in New York.

2d mortgage (Chi. & Aur.) 7 per cent. inconvertible sinking fund bonds, $303,000—issued 1st October, 1854, and payable, principal 1st October, 1869, and coupons semi-annually in New York. Whole issue authorized $600,000. Of these bonds $207,000 are held by the Trustees of the sinking fund, leaving the outstanding balance $96,000.

1st mortgage (Cen. Mil. Tract) 7 per cent. inconvertible bonds—$320,000—issued 1st July, 1854, and payable, principal 1st July, 1864, and coupons semi-annually in New York. Whole issue authorized $800,000.

2d mortgage (Cent. Mil. Tract) 8 per cent. convertible bonds, $216,000—issued 1st May, 1856, and payable, principal 1st May, 1868 and coupons semi-annually in New York. Whole issue authorized $700,000.

Convertible (Cent. Mil. Tract) 8 per cent. bonds, $48,000—issued 1st March, 1856, and payable, principal 1st March, 1876, and interest semi-annually in Chicago. The original issue was $350,000.

1st mortgage (consol.) 8 per cent. sinking fund bonds (inconvertible) $2,172,000. Also—

1st mort. (consol.) 8 per cent. sinking fund bonds (convertible), $291,000—issued 1st January, 1858, and payable principal 1st January, 1883, and coupons semi-annually in New York. Whole amount authorized $5,000,000, including $1,000,000 appropriated to the construction of an extension of the road from Aurora to Chicago and $1,000,000 for the future wants of the company. The issue (at present limited to $3,000,000) is secured by a mortgage on the whole road and equipment. All the issues of the old companies are exchangeable into these bonds, which have been made convertible or inconvertible to meet the character of the bonds outstanding. A sinking fund, to which is paid 1 per cent. per annum, is provided for their redemption, and to date $103,000 have been purchased by the trustees.

Chicago, Burlington and Quincy 2d mortgage inconvertible 4 and 4½ per cent. sinking fund bonds, $813,000, payable July 1, 1890.

Scrip issued for Northern Cross 2d mortgage bonds, $687,515.62, payable in 32 semi-annual instalments, commencing Jan. 1, 1861, without interest.

An agreement was entered into on the 4th o June, 1860, between this company and a large majority of the 1st and 2d mortgage bondholders of the Northern Cross (now Quincy and Chicago) Railroad Company, which provides that this company shall purchase the bonds of the 1st mortgage bondholders, parties thereto, by an exchange of a like amount of the mortgage bonds of this company, having 30 years to run with interest payable semi-annually at the rate of 4½ per cent. per annum for the first 15 years and 4 per cent. per annum for the last 15 years. Also, that they shall purchase the bonds of the second mortgage bondholders, parties to said agreement, by an exchange of the scrip of the company, payable in equal semi-annual payments, extending over 16 years, without interest. All the past due unpaid coupons of both classes of bonds are included in the purchase of the bonds, while the bonds and scrip of this company issued in exchange, are only for an amount equal to the principal of the bonds purchased. There were $1,200,000 of 1st mortgage bonds issued by that company—$813,000 of which have been exchanged. There were $811,000 of the 2d mortgage bonds of that company outstanding, besides the $189,000 owned by this company, at the time the agreement was entered into—$692,000 of which have been exchanged for a like amount of scrip. The whole amount now held by this company is therefore $881,000. In making arrangements for the foreclosure of one or both of these mortgages, it has been found expedient for this company to pay and assume the advances made by the trustees in payment of interest on the bonds of that company, and for services and expenses of the trustees, amounting to about $108,480, which will be a first lien on the income of the road. Also to assume and pay the amount advanced by them for depot grounds and buildings for that company, amounting to about $61,525, rents for which are a first charge upon the income of the road.

Locomotive Performances on the Illinois Central Railroad for August, 1861.

We are indebted to SAMUEL J. HAYES, Esq., Superintendent of Machinery, for a copy of his statement of the Performance of Locomotives on the Illinois Central railroad for August, 1861, from which the following is compiled:

American Railroad Journal.

Saturday, October 19, 1861.

Share and Money Market.

The Share Market the past week has been very excited, with violent fluctuations of prices. The greater portion of the recent advance has been well maintained. It was natural that an advance in many cases of five and six per cent. should be followed by a vigorous relapse. Governments however continue firm. These have risen in a comparatively short time from 83 to 95½, and have only kept pace with the improved condition of public affairs, and the feeling of confidence which prevails. Railroads are doing well under the very heavy traffic in breadstuffs. Money is more active, but very plenty; the expenditures of government tending to increase the abundance. A very marked improvement has taken place in all departments of business and trade. We give elsewhere a comprehensive review of the financial condition of the government and country from Hallett's American Circular of 16th inst.

Holders of the first mortgage bonds of the Chicago and North-western Railroad Company are informed that the bonds to be given in exchange for the first six coupons from each of said bonds, pursuant to the vote of the bondholders at their meeting July 18, are now ready, and they are requested to present said coupons for exchange without delay, at the Agency of the Company, No. 12 Wall-st.

The holders of the first mortgage bonds of the Madison and Indianapolis Railroad are notified that two-thirds in amount having been assented to the agreement for re-organization, proceedings have been instituted for the foreclosure of the mortgage. Mr. John Ferguson, No. 35 Pine-st., will receive the bonds required to be surrendered, and issue certificates drawing interest therefor.

The Oregon War loan is now called at the Stock Board. On part of the issue the interest is payable annually. These are the Government Sixes of 1881, issued to the State of Oregon in reimbursement of war expenses, the principal being payable in August, 1881, instead of the 1st of January, 1882, as the rest of that issue is.

The Central Railroad Company of New Jersey has declared a quarterly dividend of 3½ per cent. payable on the 16th inst.

The 1st mortgage bondholders of the Dayton and Michigan Railroad Company are requested to call at the office of Winslow, Lanier & Co., 52 Wall-st., and complete the arrangement contemplated in the late circular of the company, viz: To pay the coupons due 1st January, 1861, and fund six coupons thereafter.

The Cincinnati and Dayton Railroad Company have declared a dividend of 3½ per cent. out of the net earnings of the company, for six months ending Sept. 30, payable on and after Nov. 1, in a check on New York, remitted by mail or otherwise as stockholders may direct. The interest warrants on the second mortgage bonds of the company, due Nov. 1, will be paid at the Bank of America, New York.

The receiver of the Erie Railway Company has applied to the Supreme Court for an order to pay the interest on the fourth mortgage bonds, which matured October 1.

The holders of the bonds of the Dayton and Michigan Railroad Company numbered 857 to 860 inclusive, are notified that the Cincinnati, Hamilton and Dayton Railroad Company will purchase said bonds at eighty cents on the dollar, according to the contract between said companies, dated Feb. 8. 1859, if presented at the office of E. R. Bebb, Esq., No. 10 Barclay-st., New York, on or before the 10th of December next.

The Dubuque and Sioux City Railroad Company are taking subscriptions for the construction of a telegraph line to Cedar Falls. If the requisit means are raised, the line is to be completed by the first of January next.

The iron works of Messrs. Harlan & Hollingsworth & Co., at Wilmington, Del., employ at present over 400 men, those of Messrs. Harvey & Hollingsworth, over 100 men, and Messrs. Pusey & Jones over 100 men. Added to these, many are at work in the shipyards, upon a Government gun-boat and other vessels. An establishment is at work upon a large contract for leather, knapsacks, and harness for the Government, and also for tents and clothing. A quantity of army wagons and ambulances have recently been made in Wilmington, but work upon them has now ceased. Two paper mills of Messrs. Jessup & Moore are constantly at work, as is also Dupont's great powder mill.

At a recent meeting of the Directors, of the Rensselaer and Saratoga Railroad, George H. Cramer, of Troy, was elected President, vice Col. Edmund Schriver, resigned.

The Detroit *Free Press* says: "Under new arrangements made by the management of the Detroit and Milwaukee Company, our fellow-citizen Charles C. Trowbridge, Esq., will to a great extent be relieved of the highly onerous duties which have heretofore devolved upon him. As Secretary and Treasurer he will be succeeded by William C Stephens, Esq., late of Hamilton, now of Detroit. We congratulate the public that while Mr. Trowbridge is relieved from some of the duties which were beyond the ability of any one man to perform, his connection with the road does not cease. Under the title of Resident Director, the road and the traveling public will still enjoy the benefit of his counsel and experience."

The Philadelphia *Press* says: No less than eight firms in and around the city are now making cavalry swords. Horstman & Bro., receive the sword blades in their rough state, polish and temper

them and provide handles and scabbards. Henry Disston has modified the machinery of his extensive saw factory in Laurel street, and his entire force are now making swords, bridle-bits, and horse-shoes. Sheble & Fisher, whose factory is at Frankfort, have changed their fork and rake mill to an armory for swords and sabre bayonets. C. A. Vandyke & Co., also near Frankfort, employ 300 men upon cavalry spurs, belt plates, and sword and scabbard mountings. Lambert & Mast are mounting German sword blades. There are as many more firms engaged upon the same species of war implements. THOMAS J. JEFFRIES, Esq., of Philadelphia, paid a visit to Washington last week, at the request of the War Department, to make arrangements for organizing a huge blacksmith shop for the department.

New York City Railroads.

From the report of the Inspector of City Railroads, we learn that the Second avenue has eight miles of road, with seventy-three double cars and fifteen single cars; the Third avenue, eight miles of road, with ninety-six double cars and no single cars; the Fourth avenue, two and three-quarter miles of road, with thirty double cars and no single cars; the Sixth avenue, four miles of road, with forty double cars and twenty single cars; the Eighth avenue, five miles of road, with fifty double cars and eighteen single cars; the Ninth avenue, four miles of road, with six double cars and thirty single cars.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. BRANDT, Broker, No. 39 Exchange-place, for the steamer of 16th inst., were as follows:

London—60 days' sight	107⅜ per cent.
London—3 days' sight	108¼ "
Paris—60 days' sight, per dollar	5f. 33¾c.
Paris—3 days' sight, per dollar	5f. 28⅜c.
Amsterdam—60 days' sight, per guilder	40⅛c.
Hamburg—60 days' sight, per marc banco	35¼c.
Frankfort—60 days' sight, per florin	40¼c.
Bremen—60 days' sight, per rix dollar	77¼c.

Eaton, Hamilton and Richmond Railroad.

The business of this road for the six months ending July 1, was as follows:

	Receipts.	Expenses.
January	$15,823 12	$6,771 08
February	12,522 16	7,011 73
March	13,091 93	7,765 50
April	9,990 77	7,343 37
May	7,412 08	8,857 25
June	7,398 04	9,042 09
Total	$66,232 99	$46,791 02
Showing net earnings of		$19,441 97

Which have been disposed of as follows:

Paid Receiver of Indiana portion of the road	$2,841 27
Paid on engine No. 7	3,325 00
Paid interest on second mortgage six months, due Dec. 31, 1860	10,500 00
Paid interest on third mortgage, six months, due Dec. 31, 1860	2,590 00
Total	$19,256 27
Balance in Treasury	$185 70

Tyrone and Clearfield Railroad.

This road is progressing rapidly towards completion as far as Phillipsburg. The rails have been laid for a distance of seven miles. An "iron horse" is busily engaged in hauling out the rails, and the men are at work putting down the ties and rails as fast as possible. It is stated to us that the road will be ready for use, as far as Phillipsburg, some time in November or December. We hope this may be the case, as it will facilitate trade and travel between this place and the East.—*Clearfield Journal.*

Taxable Property of New York for the Current Year.

The following is a statement showing the aggregate valuation of property in each county in the State for 1861, as fixed by the Board of Eqalization of Taxes, under Chapter 312, Laws of 1859; also, showing the amount of tax to be levied in each county, for State purposes, being 3⅞ mills on each dollar valuation:

Counties.	1861. Valuation.	Tax for 1861. 3⅞ Mills.
Albany	$39,444,737	$152,848 36
Allegany	8,035,120	31,136 09
Broome	8,391,423	32,516 76

Wyoming	7,750,822	30,034 44
Yates	7,293,708	28,263 12
Total	$1,441,767,430	$5,586,848 79

The proceeds will be applied as follows, viz:

For Schools	¾ of a mill.
For Canals	¼ "
For Canals	½ "
For general purposes	⅞ "
For Volunteer Militia	1½ "

The aggregate valuation in 1860 was $1,419,297,520, and the tax was 3⅞ miles, amounting in the aggregate to $5,440,640 49.

Effects of the War upon English Exports to the United States.

The official accounts of the trade and navigation of the United Kingdom for the months ending Aug. 31, 1860 and 1861, issued by the Board of Trade on the 28th ult., show an increase from 117 to 171 vessels, and from 98,363 to 112,981 tons of shipping, entered at British ports from the United States during that month, as compared with the corresponding period of last year; whilst the departures for American ports decreased from 185 to 109, and the tonnage from 173,238 to 105,743 tons. Taking the eight months ended on the same day of the two years, the difference is much less, showing that the irregularity of trade has been increasing as the year has rolled on. The shipping arrived at British ports from the United States amounted, during the larger period, to 1,592,459 tons, against, 1,217,951 tons in the first eight months of last year; whilst the shipping cleared for American ports was only 918,617 tons, against 1,033,951 tons. The details of the trade accounts correspond with those of the shipping. Britain imported, during these eight months, 1,790,212 qrs. of wheat, and 3,078,484 cwts. of flour, the produce of the United States, against 387,367 qrs. of wheat, and 887,479 cwts. of flour in the corresponding period of last year. The only other article, the origin of which is distinguished in the Board of Trade tables, is cotton, of which there was imported into England from the United States, during the eight months, 7,162,560 cwts., against 8,556,291 cwts. in the corresponding period of 1860. There was an equal falling off in the imports from Brazil and Egypt, but the receipts from India show a considerable increase. The August account shows an increase from all parts except the United States, the supply from which diminished from 669,274 cwts. to 448,061 cwts., as compared with last year. The imports of Indian cotton, on the contrary, were double the average monthly receipts of the year, and nearly three times as much as was imported in the corresponding months of 1860. The enhanced value of the article is shown by the fact that, though the imports of American cotton declined in quantity, the value is computed at £23,989,450 for the eight months, against £23,579,504 last year.

The difference between the tonnage of the ships entered at and cleared from British ports, from and to ports in the United States, is accounted for by the following table, showing the exports from England to this country, so far as regards the principal articles, during the eight months ended Aug. 31, in each of the undermentioned years.

	1859.	1860.	1861.
Beer and ale	£66,670	£68,506	£24,778
Coal and culm	127,399	134,016	179,162
Cottons	2,454,211	2,472,641	1,051,235
Earthenw. & porcel.	401,000	443,899	183,245
Haberd. & Millin'y.	1,132,633	1,004,360	520,993
Hardw. & cutlery	771,367	664,637	402,789
Linens	1,317,760	1,147,942	451,761
Metals—pig iron	186,099	137,035	78,706
Bar and rod iron	594,149	466,217	142,176
Railway iron	659,489	579,090	164,919
Cast iron	14,863	15,801	9,040
Wrought iron	326,828	314,680	118,074
Steel	335,068	384,489	201,734
Cop'r sheets & nails	96,448	38,901	8,188
Lead	49,867	58,955	1,451
Tin plates	847,251	734,295	255,865
Seed oil	118,530	68,597	1,620
Silks	309,956	180,367	101,061
Woolens	3,163,636	2,657,390	1,180,740

The contrast with last year is much greater if limited to the month of August, in which the exports fell off moro seriously than before, as compared with the corresponding month of last year; Cottons from 26,431,563 yards to 2,252,196 yards: earthenware and porcelain from £79,318 value to £16,514; haberdashery and millinery from £138,-720 to £33,659 value; hardware and cutlery from 18,092 cwts. to 7,736 cwts.; linens from 7,176,914 yards to 1,265,318 yards; pig iron from 16,696 tons to 4,760 tons; bar and rod iron from 10,338 tons to 980 tons; railway iron from 13,464 tons to 2,100 tons; cast iron from 184 tons to 3 tons; wrought iron from 4,561 tons to 486 tons; steel from 2,445 tons to 482 tons; copper and yellow metal sheets and nails from 2,092 cwts. to 154 cwts.; tin plates from £112,964 to £18,602 value; spirits from 86,485 gallons to 4,233 gallons; and woolens and worsted stuffs from 102,786 pieces to 40,047 pieces. How England has paid, under these circumstances, for her enormous importation of breadstuffs, is shown by the bullion and specie account, England having remitted to the United States, chiefly in gold, £7,004,847 during the eight months, against £8,364 in the corresponding period of last year; while she has received from this side, in specie and bullion, only £54,053, against £4,001,908 in the same eight months of 1860.

The Cotton Trade of the United States.

We give below a valuable statement of the amount of cotton raised in the United States for 41 years; the amount consumed in this country; the amount exported, in pounds, each year; the total value of the same, with the average price per pound each year. The amount exported, with the value of the same, is from Custom House returns. The amount raised in the United States for the period given has been 77,720,528 bales, or 34,343,361,365 pounds, estimating the bale at 456 pounds, which has been the average Custom House weight for the past six years. The total amount exported has been 26,573,928,328 pounds, valued at $2,752,984,291. We have also added a table showing the receipts at the several ports for the past 10 years; the exports to foreign countries, with the amount on hand at each on the 31st of August for each year.

The withholding the present crop from market, after a regularity of supply, and a rate of increase which has been unexampled in the history of any other crop, is one of the most curious anomalies or phenonena in commercial affairs. Having really no power but what the production of this staple bestowed, the rebels are determined to prevent its coming forward with the two fold purpose of bringing foreign governments to their aid, and of breaking down the financial strength of the North. In their present condition, they guard, with Japanese jealously, its export, and do not allow a bale to be brought in sight of a port. The Governor of Louisiana and the Mayor of the city of New Orleans have issued proclamations prohibiting the delivery of any in that city. They probably regard the speedy capture of this, as well as all Southern ports, inevitable, in which event all the cotton found in them would fall a prey to the victors. Planters are all advised to retain it on their plantations. A large portion of the crop could not be forwarded, if desired, for the want of bale rope and bagging. As every day adds to the efficiency of the blockade, and the power of the government, we can now clearly see that the defeating of the rebellion is the only thing that can bring the staple forward, and give it to the world. Unfortunately not a newspaper reaches this country from England, the nation most interested in the question, that does not assure the rebels that they cannot be subdued. It is clearly for the interest of the people of that country to hold a very different language, and it will not be long before they will see that a different course was not only the wiser, but more correct one. Their tone will be changed we presume, when they better understand the subject. Prejudices will give way to convictions of interest. The capture of the Southern cities will release a small amount, but not the whole The moment the rebels see that their cause is hopeless, they will be as anxious as ever to buy and sell. In the mean time European nations must put up the best they can, not only with a short supply, but with a loss of one half of their trade with the States. The recognition by them of the rebels as belligerents, has turned out a very poor speculation, and the extravagant estimates of their power a very costly error of judgment. On the other side of the question are immensely decreased imports, which at the port of New York have already fallen off since January nearly 50 per cent. At the end of the year, the falling off will have been in still greater ratio. The imports into the whole country, for 1861, will be considerably less than one-half what they were in 1860.

Year	Crop. Bales.	Total consumed in U. S.	Total pounds exported.	Value exported. dollars.	Av. value per po'd. cents.
1820-1	430,000	.....	124,893,405	20,157,484	16.2

Observations on the Niagara Bridge.

By PETER W. BARLOW, Esq., C. E., F. R. S., F. G. S., &c., &c.

(Continued from p. 726.)

On the Mechanism of Bridge Construction.

In the following table is given the weight of metal, deflection, and ratio of ultimate strength to strain by weight of bridge, in the Niagara Bridge, and in those of the longest girders:

Name of Bridge.	Depth.	Span.	Weight.	Deflection.	Ratio of Strength to Strain by Weight of Bridge
	ft.	ft.	tons.	tons.	
Niagara	59	820	{ cables, 400 / wood, 600 }	0.82 ft. with 326	6.5 to 1
Britannia	30	460	1,550 tons.	2 in. with 248	3.4 to 1
Conway	24	400	1,150 "	0.69 in. with 100	3.8 to 1
Saltash	54	450	1,100 "	1.17 in. with 384	5.0 to 1

My object is now to endeavor to explain why these differences are consisteat with understood mechanical laws, and the peculiar properties of the material employed.

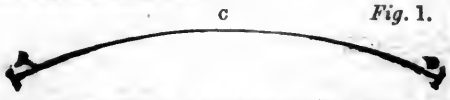

Fig. 1.

Let ABC, Fig. 1, represent an arch supported on abutments, A and B; and let the deflection produced by a given weight, loaded equally, be represented by unity.

Now, let us consider the effect of making this arch into a self-supporting structure, or bow-string girder, by removing the abutments and substituting a tie, AB, Fig. 2.

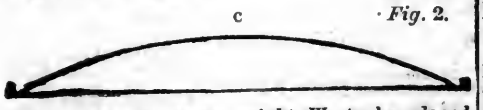

Fig. 2.

Assuming the same weight, W, to be placed equally all over, the deflection will be 2, the poins A and B being no longer rigid, because the tie AB, will extend as much as the arch, ACB, will compress. Therefore, to prodnce the same rigidity in a bow-string girder, four times the metal is required as compared with an arch.

The same result arises in a cable, ACB, suspended from two fixed points, A and B, Fig. 3.

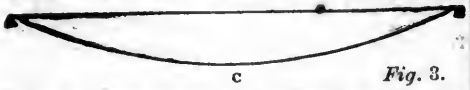

Fig. 3.

If the back chains are removed, and a compression-tube, AB, substituted, the metal is doubled, and you have a structure with only half the rigidity. The Chepstow Bridge, on the South Wales Railway, is an example of this arrangement.

The mechanical combination in the Saltash Bridge is represented by substituting the arch, ADB, for the tie, AB, Fig. 4, forming a combination of a suspension chain and an arch.

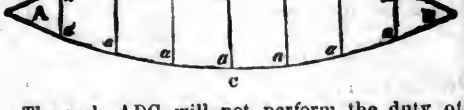

Fig. 4.

The arch, ADC, will not perform the duty of compression unless it is connected with the chains by the ties, *aa*, *aa*. When thus connected, both the cables and the arch assist in supporting the weight of the load.

The points A and B now become fixed points, and as both the arch and the chains assist in supporting the weight, the deflection will only be half that of the simple suspension cable, with double the weight of metal.

It therefore appears—1st, To convert an arch, supported on fixed abutments, into a bow-string girder, four times the metal is required to support the same weight with the same deflection.

2d, To convert a cable, suspended from two fixed points, into a Chepstow girder, four times the metal is also required to support the same weight with the same deflection.

3d, To convert the same cable into a Saltash combination, (which consists of a bow-string and Chepstow girders combined, so that their horizontal tie in one case neutralizes the compression-tube in the other, by which they are both avoided,) the deflection is reduced one-half, with double the weight of material, or the same weight of metal will produce the same deflection with the same load, as in the case of the simple arch or cable. But this is obtained at the expense of double the depth; and if the arch or suspension-cable was of the same depth as the Saltash, only one-quarter of the metal would produce the same stiffness.

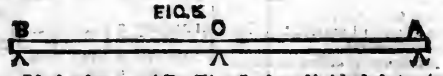
In the preceding illustration the bow-string and Saltash girders are referred to: parallel girders are more commonly used, but they present no economy over the simple bow-string; and, however perfect their arrangement and proportions, they will still require not less than four times the metal of a simple cable of the same depth and span to produce the same deflection.

Theoretically the same saving will be produced by an arch, but practically it does not hold good in large spans, because of the difficulty previously referred to of dealing with severe compression, and which difficulty applies also to deep girders. You are never certain of the section of metal required on a large scale, as by no calculation can the point be arrived at with certainty when distortion will commence, and thus the section of metal adopted is greater than would be required if the simple compression resistance had alone to be contended with.

The same objection does not apply to the suspension bridge, and as the resistance to tension alone has to be contended with, it may be known precisely what will be the ultimate strength of your structure; and hence arises another source of economy on this principle, in excess of the saving of one fourth above described.

There is a third source of economy in suspension bridges which has to be noticed, namely, that iron intended for tensile strains admits of a process of manufacture by which a much greater power of resistance per square inch may be given to it than can be accomplished in iron intended for compression, which is proved by all experiments on iron wire, which exhibits a tensile resistance double of any metal used for compression strains.

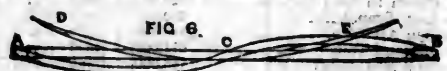
These practical reasons, in addition to the mechanical laws previously described, when examined in detail, fully demonstrate the reason of the degree of strength obtained in suspension bridges with a weight of metal so small as compared with that of parallel girders of less span; and the only question of doubt, with reference to the advisability of this construction, is the possibility of curing the undulation and vibration which have generally been observed; and it is to this subject that my experiments, laid before the British Association, were directed.



On the Cure of the Undulation of Suspension Bridges.

A suspension cable or chain has so evidently no power to resist a transverse strain, and a large wave or undulation is so readily produced by a vertical force, in bridges of small span and weight, that it is surprising that a suspension bridge was ever designed without giving longitudinal stiffness to the platform of the roadway.

It has been assumed that the degree of longitudinal strength, or girder power, to cure the wave from railway traffic, would require to be so great that the girder would carry the traffic without the cable, and thus the failure of the Niagara Bridge was predicted; but a brief consideration of the subject satisfied me that such an assumption was far from the truth.



The formula $\frac{l^3\ w}{b d^3\ D} =$ a constant quantity, D denoting the deflection, and l, b, d, the length, breadth, and depth of a beam is fully established; or, in othe words, the deflection of a beam with a given weight diminishing as the cube of the length.

FIG. 5.

If the beam, AB, Fig. 5, be divided into two beams by being supported at C, the two half beams, AC and BC, will deflect one-eighth of the amount of the entire beam, AB, with the same weight. Let us assume this to be a girder attached to a chain, and a load placed at D, the effect will be to distort it into the shape shown in Fig. 6.

FIG 6.

The deflection by the weight at D will cause a corresponding elevation at the point E, and the girder will assume the shape represented by dotted lines in the figure, to produce which a force equal to double that for a given deflection on half the beam is required, from which it is evident that the wave produced by a given weight at D, will only amount to one-sixteenth of the deflection the same weight will produce on the entire beam resting on its two ends.

In the above proposition it is assumed that the beam is supported at its centre point only; in practice, when attached to a suspension cable, it is supported at various points of its length; the difference between the wave of a supported girder, will therefore be greater than one-sixteenth.

In order to arrive at the result by experiment, I had a model of the proposed Londonderry Bridge, on a scale of $\frac{1}{33}$ of the actual span, the length being 13 feet 6 inches between the bearings, a length exceeding that of the average of the models used by the Iron Commissioners in their experiments, and is amply sufficient, due allowance being made for the scale, to determine the accuracy of the deflections on the actual girder.

The principal object of these experiments was to ascertain the deflection of the wave of a girder attached to a chain, as compared with the deflection of the same girder detached, which being obtained, it is perfectly easy to arrive at the deflection of the wave of any required suspension girder, because we have sufficient experiments on actual girders of various dimensions, to obtain the deflection from a given load on the same girder not attached to the chain.

These experiments gave a mean result of $\frac{1}{25}$, so that, it being first determined what amount of deflection is to be the limit with a given load in a given bridge, you have only to arrive by calculation at the sections of metal of a girder of the same depth which would deflect twenty-five times that amount.

To illustrate the mode of proceeding in the intended Londonderry Bridge. It was decided by Sir W. Cubitt that the depth of girder should be 16 ft. 6 ins., and that no wave or deflection should exceed 1.32 in. with 100 tons. I obtained by deduction from the deflection of the Boyne Viaduct, Newark Dyke Bridge, Britannia Tube, etc., that a girder of 3,700 tons, of the depth of 16 ft. 6 ins., would be deflected 1.32 ins. with a weight of 100 tons; one-twenty-fifth, or 150 tons, is therefore the weight of girder required for the Londonderry Bridge.

The reduction of the deflection of a girder when attached to a chain may appear so great as to lead to doubt of the accuracy of the experiments; but it is not more than is fully explained by the law $\frac{l^3\ w}{b\ d^3\ D}$ and is consistent with such results as have been obtained in actual suspension bridges.

The Inverness Bridge, built by Mr. Rendell, had an iron parapet only 3 ft. 6 ins. deep, and yet

the wave is so reduced as reported by Mr. Rendell, as to be imperceptible to the eye when a locomotive passed over it on a truck. In the Keif Suspension Bridge, in Russia, which has a wooden trussing of about 6 ft. deep, and the Menai* and all other bridges, when any attempt, however small, has been made to give longitudinal strength to the platform, the wave has been so reduced as to be unexceptionable.

In the Niagara Bridge, which is the only bridge used for railway traffic, the longitudinal stiffness is given by timber trussing 18 ft. in depth. According to my rule, a girder of 370 tons would be required, so that no wave shall exceed 2 ins. The actual girder power of this timber trussing I estimate to be no more than could be obtained by 100 tons of good iron well arranged; so that the actual wave observed (about 4 or 5 inches) evidently does not exceed what my calculation would give, and fully bears out the result of my experiments.

(To be continued.)

* The means used to give longitudinal strength to the Menai Bridge consists only of two beams about 12 inches square under, and 4 over, the platform; the girder power of which is much less than, according to my experiments, should be given; and should this or many other bridges now existing suffer injury in a severe hurricane, it will in no way be inconsistent with the views here expressed.

Journal of Law.

LIABILITY OF CORPORATIONS FOR THE ACTS OF THEIR OFFICERS: POWER OF TREASURERS TO DRAW NOTES AND ACCEPT DRAFTS: WHEN THE COMPANY IS BOUND.

The case of Lester *vs.* Webb was recently decided by the Massachusetts Supreme Court; and it throws some light in regard to the law of Massachusetts, on the power of the treasurer of corporations to bind the company by accepting drafts, or drawing notes in its name as treasurer. The case decides that if the directors of a corporation by vote authorize their treasurer to endorse notes of a corporation to a third person, or if such treasurer is suffered to draw and accept drafts, to indorse notes payable to the corporation, and to do other similar acts whereby he is held out to the public as having the general authority implied from his official name and character, an indorsement made in pursuance of such express or implied authority passes a valid title to the indorsee; and in a suit by an indorsee of a note so indorsed, against the maker, in which there is evidence tending to prove the above facts, the omission to state these rules of law to the jury, in compliance with the request of the plaintiff, is sufficient ground for a new trial.

The suit was upon three promisory notes signed by the defendant, payable to the order of the National Insurance Company of the State of New York, and purporting to be indorsed to the plaintiff by said company, acting by T. Lafford, its treasurer. The defence was that Lafford had no authority to make the indorsement.

At the trial in the Superior Court, evidence was introduced tending to show that Lafford was the treasurer of the company in 1854 and 1855; that he was in the habit of indorsing notes and drafts drawn to the order of the company; that he signed all the checks and drafts of the company as its treasurer; that he kept the bank account of the company as its treasurer; that he accepted drafts for the company; that he did these things in the presence of officers of the company, and that this duty was imposed upon him by the directors; that the name on the back of the notes was in his hand writing, and that he had since died; that the notes were in the possession of the plaintiff, indorsed as above stated before they fell due, and were by him left for collection with the cashier of a bank in New York. One Walbridge was also introduced as witness for the plaintiff, and testified, that at a meeting of the board of directors of the company, in the Spring of 1855, the question of transferring the notes in suit to the plaintiff was brought up, and, according to his recollection Lafford was directed to transfer them to the plaintiff; that he the witness kept minutes of the action of the board as its clerk, but that the minutes were never recorded at length, and were now lost. Answers by the plaintiff to interrogations propounded by the defendant were also put into the case, containing statements of his negotiations with the directors of the company respecting the transfer to him of some of their premium notes, and of their final agreement to make such transfers, and of the subsequent action of Lafford in transferring the notes in suit.

The plaintiff asked the Court to instruct the jury that the facts testified to, if believed, showed a legal and valid transfer of the notes before their maturity by the company to the plaintiff, and gave him a good title to them. But the Court instructed the jury that, upon the question of the authority of Lafford to transfer the notes, the burden of proof was upon the plaintiff; that the jury must consider all the evidence offered to them, and must determine whether, in the whole, they were reasonably satisfied, upon a preponderance of proof that he had such authority; and in commenting upon the evidence, he stated to them that it would be proper for them to take into consideration, among other things, the absence of any record of any note of the company authorizing or directing the transfer as a fact bearing upon the question.

A verdict and judgment was rendered in favor of the defendant; and the plaintiff appealed. The following is the opinion of the Supreme Court:

BIGELOW, C. J. The plaintiff rested his title to the notes declared on, upon two grounds, either of which was sufficient to enable him to maintain his action. One was that the notes were transferred to him by the indorsement of the treasurer of the corporation in pursuance of a direct authority conferred on him at a meeting of the directors. There was evidence at the trial which tended strongly to sustain this ground. If such a transfer was made, the plaintiff held the notes by a title clearly legal and valid. The management and control of the prudential affairs of a corporation are by law vested in the directors, who are empowered to make disposition of its property and assets in the usual and ordinary course of its business. In the aspect of the case which was presented by the proof that the indorsements by the treasurer was in pursuance of a direct authority from the directors, we think the plaintiff was entitled to the instruction for which he asked, and that the jury should have been told that if they believed the evidence on this point, the plaintiff held the notes by a title which was in law valid and sufficient.

The other ground on which the plaintiff claimed to recover was that the notes were indorsed to him by the treasurer of the corporation; and if he had no authority to make the transfer by any direct vote or action of the directors, he was nevertheless empowered to make the indorsement by virtue of his being the general agent of the corporation for the management of its fiscal concerns, and as having been held out to the world as authorized to make and indorse negotiable paper on behalf of the corporation. Upon this point also there was evidence which tended to support the plaintiff's case. If the jury believed this evidence it would be their duty to return a verdict for the plaintiff. The rule is well settled, that if a corporation permit their treasurer to act as their general fiscal agent, and hold him out to the public as having the general authority implied from his official name and character, and by their silence and acquiescence suffer him to draw and accept drafts, and to indorse notes payable to the corporation, they are bound by his acts done within the scope of such implied authority. On the facts proved at the trial, the plaintiff might well claim, if the jury believed the evidence, that the treasurer had authority to indorse the notes in suit, derived not from any express directions, but from the course of conduct and dealing of the treasurer with the knowledge and implied assent of the directors of the corporation.

The error at the trial consisted, not in leaving the question of the authority of the treasurer to indorse the notes declared on to the jury, but in omitting to state, in answer to the plaintiff's prayer for instruction, what would in law constitute sufficient proof of such authority. The case was left to the jury without any statement of the rules of law applicable to the facts in evidence. On this ground, the plaintiff is entitled to a new trial. New trial granted.

Hudson River Bridge Company.

The following are the Directors of the Hudson River Bridge Company:

Erastus Corning, Albany; Dean Richmond, Buffalo; Samuel Sloan, New York; Chester W. Chapin, Springfield; Wm. H. Swift, Boston; Edmund H. Miller, New York; Sidney T. Fairchild, Cazenovia; Henry H. Martin, Albany; John V. L. Pruyn, Albany.

New Tunnel on the Pennsylvania Railroad.

Most travelers to Pittsburg will remember the long deep cut, made for the passage of trains, through the high hills at Carpenter's station, some twenty miles from that city. This entire gap has been beautifully tunnelled by the scientific skill of the engineer, J. S. Love, Esq. The tunnel has 6,000 yards of masonry, and 800,000 brick were used in building it. It is 550 feet in length, twenty-two feet high and twenty-four feet wide. The abutments are all of rock range work. One hundred men were employed for four months on its construction, at a cost of $25,000. This improvement is a praiseworthy work, and it is to be hoped will be followed up until this road shall be a perfect model for all railroads.—*Harrisburg Patriot and Union.*

Western Maryland Railroad.

Messrs. Irwin & Taylor, operators of this road, have recently procured a first-class passenger engine and placed it upon the road. They are also prosecuting the work to the west of Westminister, in the direction of New Windsor, and that flourishing and fertile section of country will soon be united to Baltimore with iron bands. We believe this is the only railroad, with probably one exception, that is now in course of construction in the United States, the exception being the Sunbury and Erie Railroad in Northwestern Pennsylvania.—*Baltimore American.*

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending Sept. 28, were $79,589 07
Corresponding week, 1860 ..... 80,963 08

Decrease in 1861 ..... $1,374 01
Total traffic from July 1st, 1861..... $768,257 06
Corresponding period previous year. 802,625 67

Decrease $34,368 61

The earnings of the Great Western Railway of Canada for the week ending October 4th, were $54,135 33
Corresponding week of last year..... 63,768 34

Decrease $9,632 96

The earnings of the Galena and Chicago Railroad the 1st week in Oct., 1861, were $47,258
Do., 1860 70,136

Increase $22,878

The earnings of the Chicago and Rock Island road, the 1st week in Oct., '61, were $36,919
Do. 1860 39,350

Decrease $2,431

The earnings of the St. Louis, Alton and Chicago Railroad for the 1st week in Oct., 1861, were $21,560 99
Do. 1860 ..... 29,849 48

Decrease $7,288 49

The earnings of the Michigan Central Railroad, for the 1st week in Oct., 1861, were .. $63,115 35
Do. 1860 ..... 64,447 86

Decrease $1,332 50

The earnings of the Cleveland and Toledo Railroad the 1st week in Oct., 1861, were $19,266
Do., 1860 20,817

Decrease $1,551

The earnings of the Toledo, Wabash and Western Railroad the 1st week in October, 1861, were $35,798 61
Do. 1860 ..... 25,928 86

Increase $9,869 75

The receipts of the Chicago and Northwestern Railroad for the 1st week in October, 1861, were $20,473 48
Do. 1860 ..... 19,456 96

Increase $1,016 52

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 1st week in October, 1861, were $34,610 06
Do., 1860 ..... 36,945 37

Decrease $2,335 31

Railroad Earnings--Monthly.

The earnings of the Panama Railroad for seven months ending July 31, 1861. were as follows:

	1860.	1861.
January	$164,520	$107,599
February	163,558	111,132
March	159,315	109,787
April	132,953	126,097
May	127,381	112,864
June	113,134	117,419
July	115,681	112,666
Total	$976,542	$797,559
Decrease		$178,983

The earnings of the Norwich and Worcester Railroad for September were:

	Passengers.	Freight.	Total.
1860	$12,471 30	$22,712 25	$35,183 55
1861	13,348 28	13,620 40	31,968 68
Decrease			$3,214 87

The earnings of the Chicago and Northwestern Railroad in September, 1861, were:

Passengers	$31,888 86
Freight	53,536 55
Express	807 03
Mail	1,695 83
Total	$87,928 27
September, 1860	81,229 06
Increase	$6,699 21

The following is an approximate statement of the earnings of the Pittsburg, Fort Wayne and Chicago Railroad Company during the month of September, compared with the same period of last year, viz:

	1861.	1860.
From Freight	$153,017 95	$142,012 56
" Passengers	94,741 47	85,867 05
" Express	2,500 00	2,500 00
" Mails	7,825 00	7,825 00
" Rent of road	7,083 33	7,083 33
" Miscellaneous	250 00	650 00
Total	$265,417 75	$245,937 94
Increase		$19,479 81
Earnings from Jan. 1, to Sep. 30,	'61. $2,070,761 93	
Do. do. do.	'60. 1,626,119 02	
Increase		$444,642 91

The statement of the Illinois Central Railroad for September is as follows:

Land Department.

Acres Construction Lands sold	4,735.68 for	$67,438 34
Acres Interest Fund L'ds sold	247.62 "	2,593 30
Acres Free Lands sold	1,886.30 "	24,998 24
Total sales during the month	6,869.20 for	$95,029 88
To which add Town Lot sales		690 00
Total of all		$95,719 88
Acres land sold since Jan'y 1, 1861	78,229.86 for	$1,192,553 95
Acres sold prev'sly (net sales)	1,260,273.46 for	16,147,983 91
Total	1,338,503.32 for	17,340,537 86

Construction bonds canceled previous to September 30	$1,900,000 00
Collections in September on Construction bond account	48,000 00
Collection in August for free land and interest account	62,188 86
Total collections to Sept. 30, 1861	4,744,002 98

Traffic Department.

Receipts from Passengers	$55,075 75
" Freight	172,602 00
" Mails	6,358 33

HEAD QUARTERS, WESTERN DEPARTMENT,
St. Louis, Mo., August 23, 1861.

To Presidents and Superintendents of Railroads, Western Department, United States Army.

THE following is the basis established by the Government for the transportation of troops and supplies for the army:—

Per Passenger per mile (2) two cents for distances moved.

Equipments, munitions and supplies accompanying regiments, first class local rates, which will average about as follows:

30 miles or less	10	cents	per 100 pounds.
50 " "	15	"	"
100 " "	25	"	"
150 " "	40	"	"
200 " "	50	"	"
300 " "	75	"	"
350 to 400 miles not exceeding	90	"	"

For transportation of Horses in small lots, the following are the usual estimated weights of Railroad Companies:

Single animals	3,000 pounds.
2 animals	4,000 "
3 "	5,000 "
4 horses	6,500 "
5 "	8,000 "
6 "	9,000 "
7 "	10,000 "
8 "	11,001 "
9 "	12,000 "

Full car loads, 13 or 14 horses, usually charged 18,000 lbs. All other supplies forwarded by Freight Trains are charged local rates, according to classification of property which will usually average, on provisions and heavy freight, two to three cents per ton of 2,000 lbs. per mile.

Fast freights, immediate transportation, and precedence given to the Government in all cases.

All despatches required by the Government, to be furnished at the actual running cost.

E. H. CASTLE,
Supervisor Railroads, Western Department.

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

New York, Saturday, October 26. 1861.

Foreign Commerce and Exchanges of the Country.

We give, below, tabular statements of the commerce of the port of New York for the first three quarters of the present calendar year, from which we can infer, with considerable accuracy, the total imports into, and exports from, the whole country for the entire year, ending December 31, 1861.

The value of imports, exclusive of bullion, into this port for the fiscal year of 1860, was $229,408,130, and into the whole country $353,313,942. We assume them to be the same for the calendar as for the fiscal year, ending June, 1860. That the amounts were very nearly equal, is shown by the fact that the imports into this port for the last half of 1860 were very nearly the same in value as those for the last half of 1859, which went to make up the fiscal year of 1860; the value in the latter case being $112,377,136, and in the former $114,310,110. The imports had not begun to decline till after the commencement of the present year, although the return current of specie set in in the latter part of 1860. It will, therefore, be entirely safe to estimate the value of the imports into the country for the year ending December 31, 1860, to be the same as they were for the year ending June, 1860.

The value of imports into this port of foreign merchandize, exclusive of bullion, for the first six months of the present year was $77,949,000, against $117,031,000 for 1860, showing a falling off of $39,082,000, a rate equal to 33⅓ per cent. The value of imports for the three months already elapsed of the last half of the year have been $21,852,000, against $66,620,000 for a corresponding period of 1860; showing a falling off of $44,768,000, a rate equal to 66 per cent. At a similar rate of decline, which will probably be maintained for the last quarter of the year, the falling off for the last half of the year will be equal to $74,918,092, which, added to the decline for the first half of the year, will make a total reduction of $114,000,000, or almost exactly one half of the value of imports for 1860.

The falling off of imports at other ports will be in still greater ratio. We cannot compare the imports into these for the year so far, with those for 1860, as monthly returns are made and published only from the port of New York. We are safe in supposing that the decline at those not closed by the blockade has been fully as great as at the great centre of the foreign commerce of the country, with the exception of the ports through which the trade with the British North American Provinces are carried on, which has not, probably, materially diminished in amount. On the other hand, as all the ports south of Baltimore are closed by the blockade, and have been since April, we may safely estimate the falling off of imports at these to equal two thirds the entire imports for 1860. This would give us the following result for 1861:

	1860.	1861.
Imports into the port of New York,	$229,408,000	$114,704,065
" " other Northern ports.	93,109,283	46,554,641
" " South'n do..	30,768,511	7,699,628
	$353,313,924	$168,958,934
Add imports of specie..	8,852,330	45,000,000
	$362,176,254	$213,958,934

The falling off of imports of foreign merchandize, according to the above estimate, will be equal to $184,354,990, and the total falling off, including specie, $148,217,320. The imports of specie for the first 9 months of the year have been $35,145,934. The estimate for the year is $45,000,000.

The export trade of the domestic produce of the country for the year presents a still more remarkable change, showing, so far, a rate of increase, exclusive of bullion, almost equal to the rate of decline in imports, and which still brings the balance of trade with foreign countries in our favor, notwithstanding the almost instantaneous disappearance of the entire Southern trade. The value of exports of domestic produce from the port of New York for the past 9 months of the year, exclusive of bullion, has been $90,061,000, against $63,528,000 for 1860, showing an increase equal to $26,433,000, or a rate equal to 42 per cent. The total exports from the United States for 1860 were $400,122,290, of which $215,280,401 were Southern products, made up of the following articles: cotton, $191,806,555; tobacco, $15,906,547; rice, $2,567,399; naval stores, etc., $5,000,000. The exportation for the present, of all the above articles, with the exception of tobacco, will be wholly prevented by the blockade. It may be safely calculated that one half of the crop of tobacco, or that grown in the states of Maryland, Kentucky, and Missouri will come forward. These would leave for exports from the Northern merchandize to the amount of $192,795,562. From this should be deducted foreign merchandize exported to the amount of $26,933,022, reducing the amount to $165,862,140. Assuming the same rate of increase from other ports, as for the port of New York, and that the rate of increase here is to be maintained to December 31, the aggregate exports of domestic produce for the year will be $235,524,240; add exports of specie for the year, $3.280,000, and the total exports will be $238,804,240, against imports, including specie, estimated at $213,958,934; showing a balance in our favor of $24,845,306.

But we have a right to assume that, with the decrease of foreign importations, the re-exportation of foreign merchandize for 1861 will be much less than for 1860. We have, however, made no deduction on this account.

Such is an approximately correct statement of the foreign commerce of the United States for the present calendar year. In the calculation, the Seceding States virtually disappear. The result is the same as if they were blotted out of existence. Under the circumstances, the exhibit is a most extraordinary and encouraging one for our people. It shows that they still retain all the attributes of a nation. That they can part with the South, and still keep all other nations their debtors. The result is still more extraordinary, as the catastrophe of the rebellion was not only not provided against, but was never foreseen till it was precipitated upon the nation. The ship of state was caught in the storm with every yard of canvass flying. That it did not go down, was due to its imperial strength; and though a part of the cargo may be lost, enough is preserved to maintain our commercial independence unimpaired, bring every other nation into our debt, and leave us ample means for the prosecution of the war on a colossal scale. History does not furnish a parallel of a nation undergoing a similar crisis, and coming out of it more independent, stronger, and more resolute than ever.

Whether the war goes on or not, the statement for 1862 will probably be still more strongly in our favor. If it goes on, the economy of the consumption of luxuries will be greatly reduced, while the demand for textile fabrics of all kinds, except silks, for iron and its manufactures, will be mainly supplied by our domestic manufactures. Money, for the future, is likely to rate very nearly as low here as in Europe. A high tariff will probably be continued for the present. The combination of these will keep foreign articles that we have been accustomed to import very largely out of the market. Since July we have been importing into the port of New York only at the rate of $75,000,000, instead of $240,000,000 as formerly. Should the rebellion be so far crushed as to bring out the cotton crop, commencing with the first of the year, our exports of domestic produce for 1862 will exceed our imports of foreign merchandize by at least $150,000,000, to be paid for in gold! Upon the drama that is being enacted here, the eyes of all the world are turned. Should the crop fail to come forward, we can scarcely estimate the loss and suffering that would be caused in foreign countries, or the political or social consequences to which it might lead. If the crop should be relieved, the enormous amount of gold that would be required to pay for the crop, would probably create a disturbance in commercial circles abroad fully equal to the disturbing cause, which has a magnitude unequalled in commercial experience. We have passed through the crisis in this country, and have emerged on firm ground. Whichever alternative may happen, we shall be ready for it, and to profit by it.

IMPORT OF FOREIGN GOODS AT NEW YORK.

	1861. From Jan. 1.	vs. From Jan. 1.	1860.
January	$19,565,000		$21,528,000

NEW YORK, Oct. 21, 1861.

Editors of the Railroad Journal:

In your issue of the 19th inst., I notice a statement giving the performance of locomotives on the Illinois Central Railroad for August, 1861, in which the total distance run by freight trains is stated to have been 102,429 miles, at an average cost of 17.58 cents per mile run.

I am at a loss to discover the object in making this statement unless it be to show that the Master Machinist has caused the engines to be run a very great distance, at a very low figure, which in itself, is by no means an evidence that the road, so far as his branch of business is concerned, has been managed economically. As it is the number of tons hauled, or the *cost per ton per mile*, and not the distance run which is the true test of economy, in working any line of railroad, without this such an exhibit is not only worthless, but positively injurious, for the less the tonnage hauled by the engineer, the less will be the cost per mile, and the credit thus awarded, is simply a premium for the least amount of *useful* service rendered.

Had Mr. Hayes, instead of publishing what he has, handed his monthly returns to the proper officer, who has in his possession the necessary data, such a statement might have been made, as would enable the public and the stockholders to judge more correctly in regard to the economy of his operations.

LOCOMOTIVE.

Chicago and Northwestern Railroad.

The earnings of this road for the six months ending October 1, 1860 and 1861, have been as follows:

	1860.	1861.
From passengers	$121,034 54	$156,152 79
From freight	191,628 69	279,881 48
From express, mail, etc.	14,523 59	17,086 99
Total	$327,186 83	$453,121 26
Operating expenses for six months ending Oct. 1, 1861	$211,365 62	
Interest on Flagg Trust bonds	9,800 00	
Interest on pref. 1st mortgage bonds	43,491 00	
Interest on Appleton extension bonds	6,440 00	
Interest on debt	5,351 64	
Exchange	3,322 24	
Discount on currency	8,211 00	
Insurance	2,537 85	
Sundries	2,552 28	
		293,071 63
Leaving a surplus of		$160,049 63

—a sum exceeding the semi-annual interest on the 1st mortgage bonds of the company by $34,049 63. The increase of gross earnings over the corresponding period of the previous year is $125,934 43—equal to the semi-annual interest on the whole general 1st mortgage bonds. The earnings of the company for this period have been applied to the extinguishment of the unfunded debt, and to the general purposes for which the first mortgage bondholders agreed to fund their coupons in July last.

The unfunded debt of the company Oct. 1, 1861, was $301,774 18

Less securities on hand	$31,125 00	
Material on hand	51,257 85	
Other assets on hand	169,004 88	
		251,887 73
Balance		$50,386 40

The equipment of the road consists of 32 first

class and 4 second class locomotives; 19 first class and 2 second class passenger cars; 8 baggage, 424 box, 206 platform, and 9 caboose cars.

Under date of July 20, 1861, the directors of this company submitted as their second annual report, the Circular of the Executive Committee, of January 21st ult., to the stock and bondholders, with a statement of accounts, and the report and estimates of the superintendent thereto annexed. Also, the statement of the directors made to the bondholders on the 11th of April last, with reference to the condition and wants of the road, with their estimates of future earnings and expenditures. Also the report of the committee appointed by the bondholders at their meeting on the 11th of April, to visit the line of the road, and inquire into its condition, accounts, management, wants and prospects, and into all matters connected with its re-organization that might in their judgment be of interest to the bondholders. Also, the secretary's statement, from the books of the company, showing the operations of the road during the fiscal year ending April 1, 1861, and the condition of the company's affairs at that date. Also the proceedings of the bondholders at their meeting on the 11th and 18th of July, in reference to said report, including the resolutions dopted at said meetings, giving the assent of the rst mortgage bondholders to the funding of six upons from their bonds. These documents and statements, which have been supplied to us in pamphlet form, furnish the most complete and authentic information that the board could present to the stock and bondholders, and such as they trust will prove ample and satisfactory. In our issue of 7th ult., we gave the income account of this company for two years ending with June 1, 1861—during which time the gross earnings were $1,250,675 15: and the expenses, including interest, taxes, etc., $868,112 40—leaving a balance to credit of income account of $382,563 75. It appears, however, that the earnings since April 1st, have been used in retiring the floating debt of the company—the balance to credit of income account therefore remains the same as at that date, viz: $323,580 64. We also gave some extracts from the circular of the Executive Committee, omitting, however, for want of space a large portion of it containing exceedingly valuable information; this we subjoin, excepting such portions of it as have been previously quoted. After stating that the company would pay interest on the 1st of February on its preferred first mortgage sinking fund bonds, but not upon its general first mortgage bonds, although the earnings of the road had been equal to the payment of the interest upon both; and that this had been the result of large additions to the rolling stock of the road, without which no such earnings could have been realized, and to pay for which, other structures and necessary improvements in part these earnings had been used, the committee say:

Notwithstanding the evil times we have fallen upon, and the fact that those dealing in the bonds of the company must have long since anticipated this result, as is evident from the reduced prices at which they bought and sold these bonds, still, as the announcement of the non-payment of interest on the general first mortgage bonds of the company may give rise to more or less of disappointment, and occasion some inconvenience with holders of these bonds needing their income, it is considered due to all to set forth, briefly as may be, the causes and necessities which led to and justified this action and result.

The plan for the re-organization and completion of the Chicago, St. Paul and Fond du Lac Railroad, (now the Chicago and North Western Railway Company,) adopted in 1859, by the bond and stockholders and creditors of that road in joint meeting, has been literally carried out, and with unusual success. Indeed, more has been accomplished than it proposed.

That plan provided a fund of $600,000 to pay for the right of way, for iron and for the construction and completion of sixty-three miles of railway, (including six miles of side-track,) with all its depot buildings, water stations, &c., &c.—about $9,000 per mile. A part of the line, however, had been been previously graded, and some few rights of way had been obtained.

These sixty-three miles of road, with its depot buildings and water stations, were built, paid for and put in successful operation at a cost less than $550,000—more than $50,000 less than the means provided or the lowest estimate made—a less cost, perhaps, than any first-class road has ever been built for in this country—the result of very favoring circumstances, in part; but mainly the result of watchfulness, care, economy and skill on the part of those in constant supervision of the work.

The entire line, from Chicago to Oshkosh, 194 miles, was but barely completed and put in operation, when its increasing business brought increasing wants and created the necessity of further accommodations—clearly showing that a million of dollars, in addition to the $600,000 provided, would scarcely have been adequate to provide the equipments, machinery, buildings, storehouses and other accommodations absolutely necessary to the successful operation of the road, with that capacity, economy and profit requisite to make it an interest paying road to its owners.

Some of the members of the joint committee of bond and stockholders and creditors, appointed by the general meeting called in February, 1859, to prepare the plan of re-organization adopted, (Mr. G. M. Bartholemew being of that number,) apprehensive of the very condition of things which has arisen, urged in committee that more coupons be funded, and for a longer period of time in advance, in order that more time for earnings, with which to equip and complete the road in all its appointments, might meanwhile be afforded.

It is to be regretted that this course was not adopted. It probably would have been, but for the hope of others that what was proposed might prove adequate, and was, at any rate, all that could at that time be obtained, and that to ask more then would result in failure to accomplish the good ends which have already been attained, and which, with reasonable additional allowance of time to earn and pay for the full completion and equipment of the entire line of road, will yet result in all that was then counted upon with any degree of certainty. * * * * * *

The extension of the company's road from Oshkosh to Appleton was a necessity, in order to prevent a loss of our land grant, and permanently to secure the business of that region over the entire line of the road to Chicago, and prevent its diversion elsewhere. A like extension from Appleton to Green Bay, some twenty-six miles, is scarcely less important. Its construction would secure to the company, for years to come, the main travel to and from Lake Superior, furnishing the shortest route by days, and would also secure much of the traffic with that growing region.

In the plan of re-organization creating the present company the condition upon which land grant (now second mortgage) bondholders subscribed their ten per cent., and gave up one-third of their bonds for land scrip, was that the present company should complete the road some three miles beyond Oshkosh, to meet the requisitions of the law of Congress, and enable them to obtain the lands which their scrip called for.

The bondholders, at their meeting in New York, in August last, when authorizing the extension of the road from Oshkosh to Appleton—and an issue of bonds ($8,000 to the mile) in aid of its construction—at the same time, in the fulfilment of their obligation to the second mortgage bond and land scrip holders, authorized not exceeding $30,000 of the earnings of the present road to be applied in aid of such extension—the same being considered as an equivalent for and discharge of their obligations to build the three miles north of Oshkosh.

This extension of road is all graded and the track laid nearly to Appleton, and the road in use to Neenah, twelve miles from Oshkosh.

The bonds issued in aid of this extension were chiefly sold at eighty per cent., in payment for iron or for cash, in October last, and except for some failures to fulfil, owing to the sudden depression of the money market in November, would have furnished the means to complete the road, so far as to put it in running order to Appleton.

As it is, not more than about the sum of the earnings authorized will for the present be used in aid of such extension, and the company still have in hand to dispose of some $34,000 of bonds, including some town bonds of Neenah and of Appleton, the sale of part of which town bonds also failed to be carried out because of the revulsion alluded to.

This extension of the line of road from Oshkosh to Appleton is at present connected with the previously existing line at Oshkosh by a large steam ferry boat, which the company have been able to obtain the use of at small cost. But the inconvenience and delay in transporting loaded cars over this ferry daily, especially in winter, when the largest business is obtained from that quarter, shows the necessity of a bridge at that point, the construction of which, at a cost of from $12,000 to $15,000, during the next spring and summer, would seem to be indispensable.

The advantages of this extension are already marked, especially in the increased amounts of flour, &c., transported over our road; the towns of Neenah, Menasha and Appleton, having together sixteen large flour mills, the products of which seek a market almost entirely by our road in winter. * * * * * * * *

A most important and interesting feature, which is annually developing itself more and more upon the Chicago and North Western Railway, is its superior advantages for winter business. During the season of navigation it has to contend with sharper navigation, perhaps, from the roads reaching the lake towns in Wisconsin at shorter distance, than any other road out of Chicago. But in winter, while navigation is closed, nearly all produce north of Chicago and west of Lake Michigan, seeking a southern, and all seeking an eastern market, is obliged to be moved first to Chicago; hence the large and growing winter earnings of our road.

Another very advantageous result has been recently obtained in a railway track through the city of Chicago, connecting the Chicago and North Western Railway with all eastern and southern and southwestern roads, and at moderate cost. A few months will, we trust, perfect these connections, with much advantage to all parties.

The expense of this connection could not be avoided or delayed, without defeat, which was inadmissible.

We give in this connection the General Statement from the books of the company, April 1, 1861, by which it will be seen that interest and $126,034 61 of the principal of the Winslow trust debt had been paid within the year, chiefly from the proceeds of preferred sinking fund bonds sold, and which were held for the protection of that debt, leaving a balance unpaid, due Aug. 1, 1861, of $48,000; and that the miscellaneous small debts owing on depot grounds and for back taxes at the time of re-organization, have been reduced from $38,815 46 to $8,493 05 besides interest paid thereon meanwhile.

The total expenditure in building the new road between Janesville and Minnesota Junction up to April 1, 1860, and for which the $600,000 was

contributed by the bondholders was $537,177 37; and the amount expended in the same time on old or previously existing road, principally for bridges, fences and telegraph line, was $37,448 06; add amount expended from April 1, 1860 to April 1, 1861, on entire line from Chicago to Oshkosh, on account of new buildings and side-tracks, fences, ballasting, and large canal and wharves at Oshkosh, and connecting roads in city of Chicago, etc., mainly called for to accommodate increased business, $90,850 37—making the total amount expended on old and new construction account, exclusive of Appleton extension, since re-organization, $665,475 80.

The total expenditures for new equipment and machinery from date of re-organization to April 1, 1860, was $188,779 15; add amount of equipment and machinery purchased from April 1, 1860 to April 1, 1861, $251,605 21—making the total amount of equipment and machinery purchased from the date of re-organization to April 1, 1861, $440,384 36.

The total debt of the company of every nature, other than its funded debt, on the 1st of April last was $26,961 15.

The assets of the company at that date amounted to $84,699 73. Value of wood and materials on hand $61,691 36. Add to this the amount of preferred sinking fund and Appleton extension bonds of this company, and Appleton City and town of Neenah bonds, at par, $31,125—making the total of assets $177,516 09; and the excess of debt over assets, $149,445 06. To which something should be added to cover the discount from par value of some of the bonds included among the assets.

At least $100,000 of assets must be considered as a working capital to cover and provide for balances due from other roads, uncollected freight balances, wood and materials on hand, etc., and this will be materially increased as the business of the road increases, and can never be counted upon as vailable for any other purpose.

CONDENSED BALANCE SHEET.

Capital stock issued up to this date	$2,893,756 81
Preferred first mortgage sinking fund bonds, coupons due Feb. and Aug. 1st, 7 per cent	1,250,000 00
General first mortgage bonds, first coupon due Feb. 1, 1861, 7 per ct.	3,600,000 00
Second mortgage bonds, first coupon due May 1, 1861, 6 per cent	2,000,000 00
Appleton extension first mortgage sinking fund bonds, first coupon due Aug. 1, 1861, 7 per cent	184,000 00
A. C. Flagg trust bonds, secured by mort. on Chicago depot grounds, interest due January and July 1, 8 per cent	245,000 00
Balance due Winslow, Lanier & Co., Aug. 1, 1861, secured by trust deed to R. H. Winslow on part of Chicago depot grounds	48,000 00
Contracts and mortgages outstanding unpaid on Chicago depot grounds, being for part of the original purchase money	8,493 05
Contracts and notes outstanding	142,896 14
Sundry unpaid bills and accounts	127,571 96
Balance to credit of income account being excess of earnings over operating expenses, and interest paid on bonds from June 1, 1859, to April 1, 1861, as per statement attached	323,580 64
	$10,823,298 60

To cost of the Chicago, St. Paul and Fond du Lac Railroad to this company, in accordance with the plan of re-organization, adopted at the meeting of bondholders, stockholders and creditors, February 22d, 1859, and with their respective agreements of date March 16th, 1859, to wit:		
Amount of first mortgage bonds and coupons of the C., St. P. & F. du L. R. R. Co., exchanged for bonds of this company	$3,762,158 89	
Amount of second mortgage bonds of this Company issued to the holders of the land grant bonds of the C., St. P. & F. du L. R. R. Co., for two-thirds of the principal of their bonds, (the remaining one-third of the principal and the coupons having been exchanged for land scrip	2,000,000 00	
Amount of bonds of the C., St. P. & F. du L. R. R. Co., secured by trust deed to A. C. Flagg, on Chicago depot grounds, assumed by this Company	245,000 00	
Amount of claims against the C., St. P. & F. du L. R. R. Co., secured by trust deed to R. H. Winslow, on Chicago depot grounds, paid and assumed by this company	174,034 61	
Sundry mortgages and unpaid contracts, and back taxes, on Chicago depot grounds, paid and assumed by this company	38,815 46	
Amount of back interest paid on A. C. Flagg's and R. H. Winslow's trust	16,542 45	
Amount of builders' and tax liens upon locomotives and cars of the C., St. P. & F. du L. R. R. Co., paid by this company	91,453 58	
Amount paid for re-organization expenses	38,479 18	
Amount paid to the trustees of the C., St. P. & F. du L. R.R. Co. to pay their debts incurred while the road was in their possession, and for their services and for the services of their attorneys, less the value of wood and material on hand when this company received the road from the trustees	41,818 00	
Amount of stock of this company issued up to this date, in exchange for stock of the C., St. P. & F. du L. R.R. Co., and in settlement of claims against said company	2,863,756 81	
Discount on preferred first mortgage bonds of this company, sold since April 1st, 1860, to pay claims secured by R. H. Winslow trust	40,689 75	
Total cost of C., St. P. & F. du L. R.R. Co. up to this date	$9,312,748 73	
Amount expended from June 1, 1859, date of re-organization, to April 1, 1860, on old road from Chicago to Janesville, and from La Crosse Junction to Oshkosh	37,448 06	
Amount expended on new road from Janesville to La Crosse Junction, for which the $600,000 was advanced by bondholders	537,177 37	
Add for strap rail on hand April 1, 1860	7,600 00	
Add amount expended on account of construction, between April 1st, 1860, and April 1st, 1861, on whole road from Chicago to Oshkosh	90,850 37	
Amount expended on account of Green Bay ext'n, for surveys, etc.	969 64	
Cost of Appleton extension	218,603 98	
New equipment account	440,384 36	
Securities on hand	31,125 00	
Material on hand	61,691 36	
Other assets	84,699 73	
	$10,823,298 60	

The following is a list of the directors and officers elected June 6th, 1861:

President—WILLIAM B. OGDEN.

Vice-President—P. H. SMITH.

Directors—William B. Ogden, George Smith, Illinois; P. H. Smith, M. C. Darling, A. L. Pritchard, J. J. R. Pease, Wisconsin; William A. Booth, Lowell Holbrook, David Dows, C. S. Seyton, H. H. Boody, Austin Baldwin, New York; George M. Bartholomew, Conn.

Superintendent—GEORGE L. DUNLAP.

Treasurer—GEORGE P. LEE.

Secretary—JAMES R. YOUNG.

Transfer Agent in New York—H. H. BOODY.

Machine-Cut Files.

We had the pleasure yesterday of examining some of the files of the Whipple File Co., manufactured by machinery. This method of manufacturing them has been tried before, but without success, because all machines for this purpose heretofore invented, have imitated the process of hand cutting, with a hammer and chisel. The Whipple Company, on the contrary, adopt an entirely different principle; they use a revolving cutter, to which a number of file forms can be presented at once. Besides the gain of time, this process has the advantage of not weakening the structure of the steel by the sharp blow of hand-cutting, which so often causes a file to break along the line of one of the teeth. The rows of teeth of their round and half-round files, instead of running straight along the lengths of the tool, wind around them like a screw with a long pitch, and the ends of the teeth, where the indentation is less deep, overlap each other, thus getting rid of the lines on the hand cut tool, where one tooth leaves off and the other begins while the file is perfectly smooth.

The facility of manufacturing these instruments will make them the cheapest in the market; for while a good workman can cut by hand only two and a-half dozen a day, the machine, with a man to tend it, can cut twenty-two dozen. The files of the Whipple Company are recommended by the superintendents of our best machine shops, among others, those of the Novelty Works, New York, and are found to do 25 per cent. more work than the hand-cut article.—*Boston Advertiser.*

St. Paul and Pacific Railroad.

The first section of this road, from St. Paul to St. Anthony, will be completed and the cars running in a few weeks. On the 28th ult., 700 bars of iron were landed at the docks of the Milwaukee and Minnesota Railroad, being a part of a shipment of 1,000 tons for the St. Paul and Pacific Railroad.

Ebensburg and Cresson, Pa., Railroad.

The work of laying the track on this road is progressing rapidly, under the supervision of PHILLIP COLLINS, Esq., the contractor for the same, some three or four miles being already completed and in running order. Mr. Collins was also the contractor for the grading of the road. In six weeks, or two months more, weather permitting, the track will be completed to the "Mountain Village."

Coal Oil Trade of the Philadelphia and Erie Railroad.

The number of barrels of coal oil carried over this road during the nine months ending September 30th was as follows:

January	15,092	June	7,685
February	9,621	July	11,896
March	4,383	August	17,197
April	5,521	September	18,375
May	7,228		

Total barrels carried in nine months .. 96,998

For the year the oil trade of the road will almost reach one hundred and fifty thousand barrels.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances. A *dash* —) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, October 26, 1861.

Share and Money Market.

The Share Market the past week has been a very fluctuating one, with a general decline of prices, for no other apparent cause than rumors of military reverses, and of disturbances in our foreign relations, none of which probably have any foundation. It is natural that the share market should be unquiet in view of the great movements now on foot. Every day, however, really improves the condition of the country, both in a military and commercial point of view, as every day is adding strength to the government, while the enormous exports of breadstuffs is a guarantee against commercial disturbance. Every interest in the country is steadily improving. Money continues abundant, the loans to government having apparently no other effect than to make it plenty. The exports of produce the past week from this port were nearly $4,000,000, vastly exceeding those of any former period. The anamolous, and at the same time satisfactory condition of the country in reference to its foreign trade is well stated in the extract which we give elsewhere from the Financial Circular of Messrs. Samuel Hallett & Co., to which we invite attention.

We understand that the New York Central Railroad Company has raised its rate on flour from Rochester to New York 20 cents, now making the charge 90 cents per barrel. The Pennsylvania Central is so overwhelmed with business that it has been forced to adopt an arbitrary rate from Pittsburg eastward, in order to keep freight back.

Pursuant to an order of the Supreme Court the interest on the fourth mortgage bonds of the New York and Erie Railroad Company which became due on the first of October inst., will be paid on presentation of the conpons at the office of the Receiver, in Erie Place, on and after the first day of November next.

All the past due coupons of the 1st mortgage bonds of the Milwaukee and Watertown Railroad Company will be paid on presentation at the office of G. S. Robbins & Son, No. 54 William-st., at the rate of $35 for each coupon, being at the rate of 7 per cent. per annum on the face of said bonds.

The Pennsylvania Railroad Company have declared their usual semi-annual dividend of 3 per cent. clear of State tax, payable to stockholders on and after November 15th, 1861.

An important case was argued on Saturday last before Judge Drummond, in the Circuit Court of the U. S., now in session at Chicago, Ills., wherein James T. Soutter and David Hoadley are the plaintiffs, and the Peoria and Oquawka Railroad Company and Moss, Harding and others are defendants. The suit was brought to foreclose the first mortgage bonds of the company, involving an amount of three millions of dollars. This was a final hearing, and came up on motion of the defendants' counsel to dismiss a cross bill filed by the Railroad Company and Moss and Bradley. The arguments in the case were made by Hon. James F. Foy, of Detroit, for plaintiffs; J. L. Jernigan, Esq., of New York City, for defendants. The Court has the case under advisement.

The September earnings of the Philadelphia, Wilmington and Baltimore Railroad show an increase of $43,000 over those of September, 1860, while in the first two weeks of October the increase is still greater, being $28,000 for the two weeks.

Information has been received that the commissioners, appointed by Judge Miller, at Milwaukee, Wis., have reported in the matter of the second mortgage bondholders against the La Crosse and Milwaukee Railroad Company, and that they report that said bondholders are entitled to $500,000, one-half of their claim, and $25,000 interest. This would seem to put a foreclosure of this mortgage entirely out of the question, which will be very gratifying to the holders of the third mortgage bonds and other creditors.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. Brandt, Broker, No. 39 Exchange-place, for the steamer of 23rd inst., were as follows:

London—60 days' sight	107⅝ per cent.
London—3 days' sight	108½ "
Paris—60 days' sight, per dollar	5f. 33¾c.
Paris—3 days' sight, per dollar	5f. 28¾c.
Amsterdam—60 days' sight, per guilder	40⅛c.
Hamburg—60 days' sight, per marc banco	35⅜c.
Frankfort—60 days' sight, per florin	40⅜c.
Bremen—60 days' sight, per rix dollar	77⅜c.

Pittsburg and Connellsville Railroad.

The eleven miles of new road between Port Perry and Pittsburg having been completed, trains commenced running over the same on the 17th inst. Hitherto the trains of this company have entered Pittsburg over the track of the Pennsylvania Railroad from Brinton's, 12 miles below Pittsburg. The whole distance from Pittsburg to Connellsville is now 59 miles, and between these points no portion of the Pennsylvania road is used. The work upon the continuation of the road to Cumberland, 91 miles, work was suspended in October, 1857, and has not since been resumed. Thirty-three miles west of Cumberland is the Sand Patch tunnel 4,650 feet long, on which $200,000 have been expended in driving the tunnel-heading, which is within 250 feet of completion. From Bridgeport at the mouth of Little Wills' Creek, on the Pittsburg and Connellsville Railroad, 12 miles from Cumberland, a road will

doubtless be made to Bedford, which is only 22 miles distant from Bridgeport. The distance from the Pennsylvania Railroad at Huntingdon to the Pittsburg and Connellsville Railroad at Bridgeport, is 78 miles; from Huntingdon to Cumberland, via Bedford and Bridgeport, the distance is 85 miles.

Coin and Bullion.

EXPORTS OF COIN AND BULLION FROM THE UNITED STATES.

Statement exhibiting the amount of Coin and Bullion imported and exported annually from 1821 to 1860, inclusive.

	Imported.	Exported.	Excess of exportation over importation.

Cleveland and Toledo Railroad.

In relation to the Cleveland and Toledo Road, the Cincinnati *Gazette* says:

In 1857, like all the other Northern and Western railroads, the Cleveland and Toledo got into difficulties. To meet its interests payments, it was compelled to sell income bonds at a heavy discount, and its earnings fell off so heavily that dividends were suspended, and the company was left with a small but embarrassing floating debt. Ever since then, the net earnings of the road have been applied to the liquidation of this debt, and fifteen months ago it was reduced to something like $250,000. The condition of the property was then so promising, and its traffic so good, that some wealthy and sagacious capitalists of New York undertook to dispose of the floating debt by funding it, at, we believe, 95 per cent. The negotiation fell through in consequence of the distrust created by the first menace of Disunion. It is now probable that it will be revived, and if it is carried through, the resumption of dividends on this stock will follow as a matter of course. Last year, the Cleveland and Toledo earned 4 per cent. on its stock, after paying interest, expenses, &c. This year it will do better, in consequence of the increased activity of the breadstuffs movement.

The New York Banks.

Below we give the quotations at the New York Stock Exchange for the shares of the leading Banks in the City of New York, as they were on the 19th of October, 1860 and 1861. It will be seen that the range of present prices is on an average fully 20 per cent. below that for 1860. The real value of the Bank stocks in this city cannot, we are confident, be more than 10 per cent. less than in 1860. It is the opinion of those having the best opportunities for knowing, that 10 per cent. is an ample guarantee for all the losses sustained by the recent crisis. If so, the prices of shares are excessively depreciated. The Banks are now in a very prosperous condition, and in the government loan, have all the paper they need, at a very high rate of interest. The aid they have extended to government is calculated to greatly strengthen their customers, and the public generally. Attention has only to be turned toward these institutions to cause a large advance in their shares.

Croton Aqueduct Department.

The third quarterly report of this department states that the total receipts of the department from water rents, from July 1, 1861, to September 30, 1861, were $595,619 51; for penalties, $5,-224 02; for taps in water pipes, $2,073 25; for permits to connect with sower, $13,058; for constructing vaults, $6,915 25; petty cash, $456 28; total, $623,363 31. Warrants have been drawn from the Comptroller, during the same period, for $881,861 02 for the various expenses of the department. Certificates for payments of the street improvement fund have been as follows: for sewers, $161,670; receiving basins, $548 25; trap-block pavement, $91,022 67; cross walks, $7,-668 15; wells and pumps, $327 75; inspection, $15,422.

Philadelphia and Erie Railroad.

The terms and conditions of a lease of the Philadelphia and Erie Railroad, by the Pennsylvania Railroad Company, have been passed upon and concurrently agreed to by the respective Boards of Directors of the two companies; and, according to these terms and conditions a contract is being prepared, jointly by the solicitors of the two companies in negotiation, under the supervision of their respective Presidents; when framed and duly signed, the contract will be submitted to the stockholders interested in its provisions, for their final ratification.

The matter of the lease, therefore, has passed out of the deliberations of the two Boards of Directors, and has only to receive the formal approval of stockholders, to become invested with the force and effect of law.

The decisive step in the negotiation was taken by the Board of Directors of the Pennsylvania Railroad Company on Saturday last, when a proposition, understood to embody, substantially, the ultimatum of the other company, by whom it was tendered, was agreed to by a large majority vote, in a shape which, on Monday last, was formally approved by the unanimous vote of the Board of Directors of the Philadelphia and Erie Railroad Company.

When signed by the Presidents of the two Companies, the specific terms and conditions of the lease will of course be made public, for the information of stockholders; meantime it is said that the lease stipulates that:—the Pennsylvania Railroad Company are to guarantee the interest and principal of $5,000,000 of bonds secured by a first mortgage on the Philadelphia and Erie Railroad, of which bonds $3,800,000 are to be reserved by the Pennsylvania Railroad Company for construction uses, under contracts hereafter to be made; that the remaining $1,200,000 of said bonds are to be appropriated to the Philadelphia and Erie Railroad Company, to be used in funding contractors scrip, by compromise, and in extinguishing all other unfunded indebtedness, which bonds, added to other available assets, are said to be ample for that purpose; that for equipments now the property of the Philadelphia and Erie Railroad Company the Pennsylvania Railroad Company are to pay in cash $150,000; that all contracts for work or materials chargeable to *construction* or capital account, executed or allotted bp the Philadelphia and Erie Railroad Company, are abrogated and annulled; and that the Pennsylvania Railroad Company are to equip and operate the Philadelphia and Erie Railroad for seventy per cent. of the gross receipts, which leaves to the Philadelphia and Erie Railroad Company, for the use of their roadway, thirty per cent. of the gross receipts, with which to pay interest, expenses of organization, and dividends.

The terms agreed upon are the result of long, patient and frank negotiation, and are believed to combine the utmost that the Pennsylvania Railroad Company would give, and the utmost that the Philadelphia and Erie Railroad Company would offer or agree to, the first-named company having its own credit to protect, and the last-named company having to trust to that credit for means to complete their own unfinished road.

From all Pennsylvania stand-points this lease is a rosy omen and a gladdening fact. By it Philadelphia, the seaport of the State, will enjoy as friendly communication with Erie the lakeport of the State, as with Pittsburg the Ohio riverport of the State. And thus between the seaboard, the Mississippi Valley, and the basin of the lakes, *all upon Pennsylvania soil*, an iron trunk with two forking iron limbs, operated by a single organization, will compass grand results to the people of the State, and achieve important ends to the parties to the compact, which could not have been secured by competition; now creditors and stockholders of both Co.'s are insured against ruinous opposition, for, under the lease, their interests are identical and their unity unquestionable.

Philadelphia will now indeed have an iron arm outstretched to Erie City, a portal of the lake basin, the fellow and counterpart of her iron arm

to Pittsburg, the eastern gate of the Misaissippi Valley.—*U. S. R. R. and Mining Register.*

Journal of Railroad Law.

TAXATION OF RAILROADS BY COUNTY AUTHORITIES: WHEN EXEMPT FROM SUCH TAXATION IN MASSACHUSETTS: WHAT IS A SUFFICIENT TAX LIST.

By the laws of Massachusetts a railroad company having its road built in accordance with law and the power conferred upon it, in its charter, is exempt from taxation to the extent of five rods in width of its road. By the provisions of the statutes of 1855, ch. 240, the Fitchburg Railroad Company were authorized, in order to correct any irregularity or insufficiency in the location of their road, to file with the County commissioners of the Counties of Worcester and Middlesex a new location of the road, which should be in conformity with its actual construction, and when so filed was to become and be valid and sufficient in law. The company accordingly, in pursuance of this privilege granted them, filed a new location of that portion of their road lying within the limits of the City of Charlestown. But in the assessment of taxes made by the City of Charlestown for the year 1859, the property of the Fitchburg Railroad Company was included, and the company taxed notwithstanding the laws exempting them from taxation, when they had filed a proper location of their road; the company in this instance, having, as already stated, filed a new location in pursuance of the privilege granted in the statute of 1855.

Previous to the assessment the company presented the following petition to Charlestown authorities:

"*To the Assessors of the City of Charlestown:*

The Fitchburg Railroad Company submit and bring in the following list of all the estate of the said company in said Charlestown, subject to taxation, bring all the real estate of said company, in said Charlestown, except that embraced and contained in the location of said company's railroad, made and filed according to law, that is to say, three hundred and forty-eight thousand and three hundred and ten square feet of land and wharf with the buildings thereon—the same lying between Prison Point, so called, and Warren Avenue, valued at $330,000."

Fitchburg Railroad Company,
By M. D. Benson, Treasurer.

Charlestown, May 2, 1859.

"June 7, 1859. Then personally appeared M. D. Benson, Treasurer, and made oath that the above statement by him subscribed was true."

Thomas Greenlief, Assessor.

The company for the purpose of having the assessment upon them reduced applied to the assessors; but they refused to take any action: application was then made to the county commissioners, who ordered a reduction of the amount assessed against the company; the city authorities still refused to make the reduction, and petitioned the Supreme Court for a *certiorari* directing the county commissioners to produce their records in the matter of the application of the Fitchburg Railroad Company for an abatement of taxes assessed upon said company by the City of Charlestown for the year 1859. The following is the opinion of the Court, rendered at the decision of the case, and denying the writ.

Merrick, J. By the provisions of st. 1855, the Fitchburg Railroad Company were authorized, in order to correct any irregularity or insufficiency in the location of their road, to file with the county commissioners of the counties of Worcester and Middlesex a new location of it, in conformity with its actual construction, as it was then already built; which, when duly filed, was to become and be "valid and sufficient in law to all intents and purposes." In pursuance of the authority thus conferred, the corporation afterwards made, and filed with the commissioners of the county of Middlesex a new location of a part of their road upon and over land belonging to them situate within the limits of the city of Charlestown. It was suggested at the argument, in behalf of the petitioners, that this did not correspond with, but was an enlargement of the original location, although no such fact appears from the statements in the report, or in any of the papers accompanying it. But this is quite immaterial, since, by the positive terms of the statute, the new location made in conformity to its actual construction upon being duly filed, is made valid and effectual for all purposes whatever.

One of the rights to which a railroad corporation becomes by law entitled, under a lawful location of their road, is an exemption from taxation of land included within its limits not exceeding five rods in width, necessary for use in the transportation of persons or property, or for buildings required in the transaction of their business. The Fitchburg Railroad Company, therefore, having lawfully made a location of their road, five rods in width, over land of their own in the city of Charlestown, and it not being denied that this was essential to the convenient conduct and management of their affairs, they were not liable to be assessed for the value of any part of the land over which the location extended.

Before any assessment of taxes in the city of Charlestown for the year 1859 was made, the Fitchburg Railroad Company, by their proper officer, presented to the assessors of the city a paper, to the truth of the contents of which the treasurer of the corporation made oath before one of the board. This, it is contended in their behalf, was a proper list of all their taxable estate in the city, and was duly sworn to, according to the requirements of law. Their land lying within the limits of their location having been subsequently included in the general valuation of property and estates liable to taxation within the city, and the corporation having been assessed therefor, application was made to the assessors to abate so much of the tax against the corporation as was assessed to them on account of this land. But they refused to make any abatement, and therefore application was made to the county commissioners for the same purpose, who, after having given due notice to the petitioners, and having heard the parties, determined that the tax assessed against the corporation for the land included within the limits of their location was erroneous, and ordered an abatement of a proportional part of the tax accordingly. The petitioners deny the validity of this order and determination upon the ground, first, that no proper or sufficient test of their taxable estate was filed by the corporation with the assessors, and, secondly, that the paper which was in fact filed with them was not sworn to according to the requirements of the statute. And, therefore, they deny that the corporation had a right to apply to the commissioners for any abatement, or that the latter could lawfully take cognizance of their petition or afford the relief which they sought for by it.

But neither of these objections is warrented by the facts. The paper presented to and filed with the assessors purported in its statements to be a description of all the estate belonging to the corporation subject to taxation in the city of Charlestown. It is in direct terms, called by them a list of all their estate. The description of the real estate mentioned in it is so clear and distinct, that the land referred to could not be mistaken by any person seeking to find it. It is bounded on one side by Prison Point and on an other by Warren Avenue, both well known objects to serve as monuments, and occupied in fact by them under the location of their road. The whole estate being accurately described, and the part exempt from taxation being indicated by a distinct reference to the public record of their location, filed with the county commissioners, it gave to the assessors all the information which could be of any use to them in the discharge of their duty in the assessment of the city tax. This was, therefore, a sufficient list. The statute requires that the person presenting such list shall make oath that it is, according to his best knowledge and belief, a full, true and accurate list of all his taxable estate. In this case the treasurer of the corporation presented to the assessors the list signed by himself, containing in clear and distinct terms a statement that the estate described in it was all the estate belonging to the corporation situate in the city of Charlestown, which was subject to taxation therein. And he made oath that that statement was true. This is a real and substantial compliance with the requirements of the statute, and was equally as effectual as if the oath had been administered in the very words in which it is expressed. The conclusion therefore is, that the assessment upon that portion of the land of the Fitchburg Railroad Company, included within the limits of their location, was erroneous; that they had a right to apply, upon the refusal of the assessors to make any abatement, to the county commissioners; and that their order and determination upon the subject was correct. The petition was therefore dismissed.

We copy the following statement of the exports of breadstuffs from this port for the past year from the *Merchants' Magazine.*

Observations on the Niagara Bridge.

By Peter W. Barlow, Esq., C. E., F. R. S., F. G. S., &c., &c.

(Continued from p. 743.)

Concluding Observations and Deductions.

The preceding investigation leads to the inevitable conclusion, viz: that the Niagara Bridge, notwithstanding the defects which have been pointed out, is the safest and most durable railway bridge of large span which has been constructed. First, because it is less liable to deterioration; and, secondly, because the greatest strain to which it can be subjected is a less proportion of the ultimate strength of the supporting material.*

This stability is accomplished in a span of 820 feet by 400 tons of iron, and 600 tons of timber trussing and platform. Had wrought iron been used for trussing, from its superior rigidity the total weight of material would not have exceeded 800 tons, the deflection of the wave reduced to 2 ins., and the strain on the cables to one-eighth of their ultimate strength.

It is clear, therefore, that 820 feet is not the limit of the opening that can be crossed by this principle; it will readily be seen that spans as high as 3,000 or 5,000 feet can be carried out for railways, without exceeding the safe limit of strain on the wire cables, and at a cost which would render remunerative connexions and communications which are now considered impracticable.

Navigable rivers may thus be crossed which at present depend for their communication upon ferries; as an instance of which, Liverpool and Birkenhead, and New York and Brooklyn, may be mentioned; and even in London, the sum expended on the Thames Tunnel would have made a useful public communication by this system; and the difficult question of over-crowded streets may be solved, as explained in my recent paper to the British Association, by viaducts of large span, which would interfere very little with the property on the surface.

The dimensions of a bridge to connect Liverpool and Birkenhead will be as follows:

Span	3,000 feet.
Deflection	300 "
Height of piers	450 "
Section of cables	1,000 inches.
Weight of cables between the piers	5,085 tons.
Weight of suspension rod	300 "
Weight of platform and girders	2,000 "
Breaking weight of cable	48,000 "
Strain at the point of suspension by weight of the bridge	11,077 "
With a load of 1,000 tons	12,577 "
Weight of wrought iron in towers	6,000 "
Estimated cost†	£1,000,000.

The proposal to build a bridge of these dimensions may be somewhat startling, but let it not be condemned without a fair consideration. It must be remembered that the views here advanced are consistent with the opinions expressed by Telford; and such a proposition as is now submitted would have been received with less scepticism in the year 1814, when he projected the Runcorn Bridge, than it is at the present time, simply because the public have been taught (I believe erroneously) that girders and tubes are the correct principle of bridge construction.

The reasons why any structure is impracticable may be thus classified:—First, that they will not possess sufficient strength and durability when constructed; and, secondly, that it is impracticable to construct them.

The first question, of the strength and durability, is dependent upon the tensile resistance of the material employed. The wire used in the Niagara Bridge was tested by being strained over an opening of 400 feet, until the deflection was reduced to 9 ins.; this is equivalent to straining the same wire over a space of four miles, until the deflection is similar to that ratio proposed for the Liverpool Bridge.

If the wire will support its own weight over an opening of four miles, it will evidently have a great excess of strength in three-quarters of a mile; in fact, it will be seen that, in the space proposed, the cables will support four times their own weight plus the greatest load on the bridge; and it would be made a condition of the contract that such strength of the cable should be tested *in situ* (by diminishing the deflection) to three times the strain to which it would be subjected. It will be found that the greatest strain on the metal of the towers, suspension rods, and stiffening girder will be 2½ tons per inch, or ⅛th of the ultimate strength. If these calculations (which may be checked by any person with a moderate mechanical knowledge) are correct, there can be no doubt of the direct strength of the bridge.

It may be supposed that a bridge of such large dimensions will oscillate with the wind, but it does not appear that oscillation (if by oscillation is meant swinging like a pendulum) is a complaint to which suspension bridges are liable; and if it was, this bridge, from having so much greater weight in proportion to the surface exposed to the wind, would be less liable to this evil, even if constructed with a timber platform in the ordinary way.

It is not generally known that several suspension aqueducts have been constructed with success in America, which, if liable to oscillation could not long be maintained in condition.

The motion that is observed derives its origin from the undulations of the platform, produced by the agitation, unequal pressure, and change of the direction of the air in a hurricane, and it may be compared to the effect of the platform resting on the surface of water agitated by waves. If the platform has no longitudinal strength, it will undulate in every direction, and necessarily put the chains in a state of vibration, which may be mistaken for oscillation; but I have never detected that oscillation or swinging has occurred in a gale of wind, nor can I see how it is likely to occur. If the wind blew alternately in opposite directions at intervals corresponding with the time of vibration due to the suspension bridge, it would undoubtedly produce serious oscillation; but it does not act in this way. It is variable in some degree in force and direction, but still the general current over a large space will be in one direction, disposing the suspension chains to deviate to some extent from the perpendicular, but not to oscillate.

The observations of General Pasley and Mr. Provis confirm this view; and it is further confirmed by the fact, that no oscillation has been observed in the Menai Bridge (the chains of which being four in depth present a great resistance to the wind), since the longitudinal stiffening, small as it is, has been given to the platform. I will add nothing further to meet an objection that may not be raised, there is no difficulty in showing that, if a bridge weighing 7500 tons is liable to be influenced by the wind, such a bridge as the Fribourg, with a timber platform, which weighs under 400 tons, in a span of 870 feet, would have been destroyed long before the year 1860.

There does not seem to me any other doubt or difficulty that can be suggested with reference to strength and durability, and I will now consider the second question, whether there is any impracticability in constructing such a bridge.

The first step is to prepare foundations on each side of the river to carry 30,000 tons, a weight which has been much exceeded in masonry, and cannot be a difficulty.

The second step is to construct wrought iron towers 450 feet high. Masonry and brickwork having been carried nearly that height, it never can be argued that there is a difficulty in a tower of wrought iron 450 feet, with a section of metal allowing only 2½ tons per inch compressure. If it was necessary, and the capital to execute the work, there is no difficulty in building an iron tower 4,500 feet high.

We come to the fixing of the cables, which would be a question of some difficulty if chains were employed, but with wire cables the process is perfectly simple, and there is little more difficulty in 3,000 feet span than in 800—except that more powerful machinery is required; and the same may be said of the anchorage, which is a mere question of providing weight in proportion to the strain to be contended with.

The necessity of constructing the platform at such an elevation as to prevent the largest class of ships to pass under (for which 150 feet, or 50 feet more than the Menai Bridge has been allowed) is, no doubt, a great drawback to the usefulness of the proposed structure; but much less so than would appear at first sight. One-sixth of the steam power now used at a single ferry, would raise all passengers with ease, and comfort, and safety, to the level of the bridge, and the inconvenience would be small compared with that of the uncertainty from gales, fogs as well as danger of collision, which must alwas exist in a ferry situated as at Liverpool.

There is little doubt, in spite of the disadvantage, that the work would be of great public utility, and highly remunerative, as it would form a communication not only for passengers, but for road carriage, and by a street tramway would connect the railways on each side of the river.

I have only to add, (should it appear that preconceived notions are not so deeply rooted, that there is a hope of the subject being fairly considered,) that I am prepared, at my own cost, to make experiment on such a scale as will determine, not only that the direct strength is more certain than any previous structure, as every cable will be tested *in situ* to three times its strength, and nothing left for calculation: that the use of wire in the cables and wrought iron in the towers enables the work to be erected with facility and certainty, and moreover that the weight of the structure is so great in proportion to the moving load or force of the wind, the platform being of iron with a stiffening girder, that it is equally certain that the undulation observed in light suspension bridges will be avoided.

The span of the suspension bridge to connect New York and Brooklyn would not require to exceed 2,000 feet. Having, therefore, investigated a larger span, it is not necessary to refer to the practicability of a bridge of less dimensions.

The utility of the suspension system girder to relieve the pressure of street traffic in London, will readily be comprehended. There are only three modes of curing an evil (which is becoming beyond endurance, if the business of the city is to be concentrated in the present small area). 1st, To widen the streets and build higher houses; 2d, To make roads or railways under the surface; and, 3d, To make suspension girders, of large span, over the surface. A fourth has been suggested being street railways.

During my tour in the United States I traveled over between 40 and 50 miles of these railways in New York, Boston, St. Louis, and Cincinnati, and am of opinion that great public benefit will be derived from their introduction in England. A smooth iron road would be substituted for paving-stones, the cars are less liable to concussions, and may be constructed much larger without greater weight of material, with height to stand upright, and space to walk with facility from end to end when the seats are occupied. There results in consequence a degree of smoothness and comfort in traveling, which it is difficult to be understood by those who have only experienced a London omnibus. Cabs are unknown even in New York: if this system was carried out in the approaches to London very great benefit would be derived.

Still the pressure in the City, where the traffic is concentrated and the street narrow, would re-

---

* The Fribourg Bridge, as appears from Weale's work on Bridges, has only one-quarter of the section and weight of cable in 870 feet span without any adequate means of preventing undulation, and has stood for 30 years. The durability of the Fribourg Bridge may therefore be doubtful, but it proves beyond question the stability of the Niagara Bridge.

† With piers in the river, a bridge of less cost could be constructed.

main the same, and here the best way of dealing with the difficulty is, in my opinion, to carry the traffic on an upper level by suspension girder viaduct. Two lines of communication, one from east to west, and the other from north to south, would go far towards effecting the object, one commencing at the junction of the Tottenham Court road and Oxford street, passing at the back of the Bank to Whitechapel, and the other commencing at the Elephant and Castle, where the Kent, Newington, and Walworth roads unite, to a poiat near the Shoreditch station of the Eastern Counties Railway. The cost of a wire suspension girder viaduct with a span of 1,000 feet would not exceed for a double line of street omnibus traffic (in connexion with the expected street railwhich will converge at the above described terminal point) £150,000 per mile, to meet fully the requirements of the Board of trade.

The only land required will be for the wrought iron towers, as a wire bridge may be erected without the least interference with the intermediate property. Allowing £100,000 (the average cost of the terminus of the South Eastern Railway) for the land required, or £50,000 per mile, the whole scheme may be carried out for a little above one million.

Two other applications: wire suspension bridges still occur to me, where bridges have been long projected and abandoned from their cost and interference with property, as hitherto proposed, viz: to connect Holborn and Newgate street by a level bridge, and thus avoid Holborn hill. A wire suspension bridge with towers of wrought iron, constructed like a vertical lattice beam, would offer little obstruction to the light, and would not exceed in cost the sum of £75,000.

The second is a bridge to cross the Mersey at Runcorn, where Telford projected a chain suspension bridge in the year 1814, having a centre span of 1,000 feet, with two side spans of 500 feet.

The construction of a chain bridge of these dimensions at that period was as much at variance with previous notions, and presented as much apparent difficulty as a wire bridge now presents of 3,000 feet span, from the superiority of wires over chains, which is so manifest not only from its greater tenacity, but from the facility of erection, that large chain bridges will probably never again be executed.

The cost of a bridge at Runcorn, either for road or railway, with a section of metal such that the strain produced by the greatest weight will not exceed one-fifth of the ultimate strength of every part of the bridge, will not exceed £100,000, and responsible contractors will be found to execute the work for that sum, and probably much less.

APPENDIX.

Cornwall Railway—Saltash Bridge.

Extract from Col. Yolland's Report, dated 25th April, 1859, previous to the opening of the line for traffic.

"I have been favored by Mr. Brereton, who has been acting as chief engineer in Mr. Brunel's absence, with certain particulars, that show the nature and strength of the structure, which are important and may be interesting.

By the specification under which they were constructed, it is stipulated that the strain per square inch of section, with a load of 1¼ tons per foot lineal should not exceed 4 tons; and with a load of 2¾ tons per foot lineal, it was not to exceed 5.5 tons per square inch.

The west or first tube was accordingly severely tested by the engineers before it was floated to its proper position between the piers, preparatory to its being lifted to the required height by hydraulic pressure. The results were as follow:

When the tube had to carry itself, and its portion of the bridge being, with the floor, about 1,100 tons, the deflection observed at the centre was under 2¼ ins. on the east side, and 2½ ins. on the west side, with a load of 1¼ tons per foot lineal uniformly laid on the roadway; the deflections were respectively 5.1 ins. east, and 5.25 ins. west, with the load increased to 2¾ tons per foot lineal, or 1,200 tons; the deflections were 7½ ins. east side, and 7¾ ins. west side; but it was noted that during the last two experiments the supports on which the tube rested had sunk about half an inch, which quantity must therefore be deducted from the preceding deflections observed with the load on. After the load of 2¾ tons per foot had been taken off, a permanent set of 1.2 ins. on the east side and 1.25 ins. on the west side was observed, beyond that resulting from its own weight, and caused by the heavy weights that had been applied on the roadway.

On the 20th instant, the day being exceedingly favorable, with a spirit level placed under the roadway, and resting on the iron stays at the central pier, I observed the deflections at these large openings produced by a load made up of two heavy engines near the centre, and a number of trucks having their springs packed up, loaded with ballast, iron, etc., making up an aggregate weight of 384 tons, or as large a weight as can possibly be brought on the viaduct, unless the train is made up of a larger number of locomotive engines. The staffs observed were placed at the centres of each opening, and midway between the rails, and thus the deflections observed were the sum of all the deflections, including that of the cross girders carrying the roadway.

With the above load, the east tube, etc. (not previously tested), deflected 1.14 ins. With the above load, the west tube (test already referred to) 1.20 ins.; and when the weight was taken off there was not the least indication of a permanent set. I then tried to register the deflection caused by passing the whole of this load over the bridge at a speed estimated at 30 miles an hour; but the spirit-level did not remain sufficiently steady to allow of the staff being read, but vibrated as might be expected, as the train passed. I regard these results as highly satisfactory, and, so far as my knowledge goes, I believe them to be greatly superior to anything of the kind that has been attained elsewhere, and accomplished at less expenditure of money and materials.

With a load of 1 ton per foot run, and not deducting for any portion of the ends of the tubes immediately resting on the piers, I estimate the amount of the strain on the trussed tubes at about 4.2 tons per square inch of section, and allowing 170 tons as the amount of this superincumbent weight not in any way trying the tube, the strain would be reduced to about 3.8 tons per square inch.

The strain per square inch of section for the girders over the land openings is also in all cases less than 4 tons."—*London Engineer.*

Railroad Earnings--Weekly.

The following are the earnings of the Great Western Railway of Canada for the week ending October 11, 1861:

Passengers	$22,235 62
Freight and live stock	30,521 64
Mails and sundries	1,374 38
Total	$54,131 65
Corresponding week of last year	56,080 09
Increase	$1,948 44

The earnings of the Cleveland and Toledo Railroad for the 2d week of Oct., 1861, were $20,858
1860 20,190

Increase $668

The earnings of the Chicago and Rock Island road, the 2d week in Oct., '61, were $32,215
Do. 1860 34,056

Decrease $1,841

The earnings of the Toledo, Wabash and Western Railroad the 2d week in October, 1861, were $35,133 99
Do. 1860 27,120 00

Increase $8,013 99

The earnings of the St. Louis, Alton and Chicago Railroad for the week ending Oct. 15, 1861, were $24,978 99
Do. 1860 30,041 64

Decrease $5,062 65

Total since 1st October, 1861 $46,539 98
Do. 1860 59,891 12

Decrease $13,351 14

Total since 1st January, 1861 $801,145 61
Do., 1860 752,085 86

Increase $49,059 75

The receipts of the Grand Trunk Railway of Canada for the week ending October 5th, 1861, were $86,088 10
Corresponding week, 1860 80,523 47

Increase $5,564 63

Tot. traffic from July 1, 1861, to date $854,345 16
Corresponding period, 1860 383,149 14

The earnings of the Galena and Chicago Railroad the 2d week in Oct., 1861, were $52,521 14
Do., 1860 58,705 67

Decrease $6,184 53

The La Crosse and Milwaukee Railroad earned the 2d week in October, 1861 $38,993 37
Do., 1860. 36,945 37

Increase $2,048 00

The receipts of the Chicago and Northwestern Railroad for the 2d week in October, 1861, were $25,106 72
Do. 1860 23,957 38

Increase $1,149 54

The earnings of the Michigan Central Railroad, for the 2d week in Oct., 1861, were $68,186 44
Do. 1860 65,633 91

Increase $2,552 53

The traffic of the Great Western Railway of Canada for the week ending Oct. 18, 1861, was as follows:

Passenger	$22,628 74
Freight and live stock	35,662 06
Mails and sundries	1,822 98
Total	$60,113 78
Corresponding week of last year	54,022 49
Increase	$6,091 29

The receipts of the Grand Trunk Railway of Canada for the week ending Oct. 12, were $82,717 23
Corresponding week, 1860 80,914 75

Increase in 1861 $1,802 48

Total traffic from July 1st, 1861 $937,062 39
Corresponding period previous year 964,063 89

Decrease $27,001 50

Railroad Earnings--Monthly.

The following is a statement of the earnings of the Chicago and Northwestern Railroad in Sept., 1860 and 1861:

	1861.	1860.
Passengers	$30,713 48	$26,566 83
Freight	53,579 29	51,755 86
Express	807 03	731 25
Mail	1,695 83	1,612 50
Miscellaneous	49 50	153 11
Mileage of cars	321 79	.....
Total	$87,166 91	$80,819 55
Total increase		$6,347 36

The earnings of the Chicago, Burlington and Quincy Railroad Line in September were:

	1860.	1861.
Freight	$132,182 84	$126,844 83
Passengers	31,886 22	28,461 98
Mails and miscellan's.	2,678 88	2,980 85
Total	$166,747 94	$158,287 66

Between Chicago and Burlington—210 miles:

	1860.	1861.
Freight	$146,537 79	$147,071 58
Passengers	37,151 38	33,484 68
Mails and miscellan's.	3,048 31	3,347 15
Total	$186,737 48	$183,903 41

Between Galesburg and Quincy—100 miles:

	1860.	1861.
Freight	$24,310 13	$16,165 42
Passengers	11,658 86	5,917 17
Mails and miscellan's.	4,290 06	851 51
Total	$40,259 05	$22,934 10
Aggreg. for 310 miles.	$226,996 53	$206,837 51

The earnings of the Erie Railroad for the month of September, 1861, were.... $519,579 17
Do. 1860 ..... 598,341 36
Decrease $78,762 19

The earnings of the La Crosse and Milwaukee Railroad for July, August and September, 1861, compared with the earnings for the same months in 1860, are as follows:

1861.	1860.	Increase.
July	$84,286 87	$35,426 05	$48,360 82
August	76,318 64	52,670 34	23,748 30
Sept.	112,484 82	89,847 12	22,637 70

The earnings for the first nine months of each of the years above stated are as follows:

1861.	1860.	Increase.
$713,556 63	$462,601 73	$250,954 90

The following statement shows the business of the Philadelphia and Reading Railroad Company for the month of September, 1861, compared with that of 1860:

	1861.	1860.

Railroad Supply Store
FOR SALE.

ONE of the oldest and best established Railroad Supply Stores, may be had very low, the present proprietors having other business requiring their whole attention. Address Wm. Kemlo, 34 Hawley st., Boston, or Box 1487, New York Post Office. 2t*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 42 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.

Boston, Nov. 24, 1860. tf

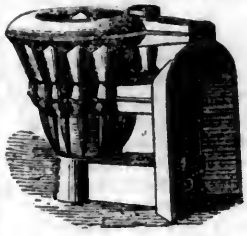
SANFORD'S
MAMMOTH
OR
GLOBE
HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.



This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

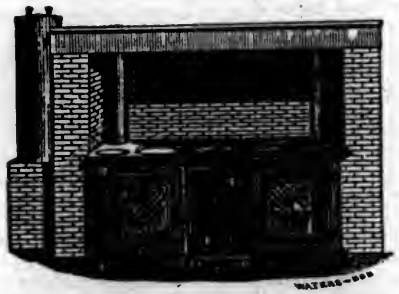
The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,



Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a small, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight
KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL**, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler-holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y.

HEAD QUARTERS, WESTERN DEPARTMENT,
St. Louis, Mo., August 23, 1861.

To Presidents and Superintendents of Railroads, Western Department, United States Army.

THE following is the basis established by the Government for the transportation of troops and supplies for the army:—

Per Passenger per mile (2) two cents for distances moved.

Equipments, munitions and supplies accompanying regiments, first class local rates, which will average about as follows:

30 miles or less	10 cents per 100 pounds.
50 " "	15 " "
100 " "	25 " "
150 " "	40 " "
200 " "	50 " "
300 " "	75 " "
350 to 400 miles not exceeding	90 " "

For transportation of Horses in small lots, the following are the usual estimated weights of Railroad Companies:

Single animals	3,000 pounds.
2 animals	4,000 "
3 "	5,0 0 "
4 horses	6.500 "
5 "	8,000 "
6 "	9,000 "
7 "	10,000 "
8 "	11,001 "
9 "	12,000 "

Full car loads, 13 or 14 horses, usually charged 18,000 lbs. All other supplies forwarded by Freight Trains are charged local rates, according to classification of property which will usually average, on provisions and heavy freight, two to three cents per ton of 2,000 lbs. per mile.

Fast freights, immediate transportation, and precedence given to the Government in all cases.

All despatches required by the Government, to be furnished at the actual running cost.

E. H. CASTLE,
Supervisor Railroads, Western Department.

American Railroad Journal.

New York, Saturday, November 2, 1861.

Central Railroad of New Jersey.

The following is a comparison of the receipts expenses and net earnings of the Central Railroad of New Jersey for the nine months ending Sept. 30, 1861, with the same months of 1860:

	1861.	1860.
Receipts in nine months.	$871,866 61	$891,667 45
Expenses	377,459 50	350,021 19
Net earnings	$494,407 11	$541,646 26

The following disposition has been made of the net earnings $494,407 11

Interest for nine months.	$104,262 22
Quarterly dividends 7½ per cent. for nine mos.	272,250 00
	376,512 22
Surplus of net earnings	$117,894 89
Decrease in receipts	$19,800 84
Increase in expenses	27,348 31
Decrease in net receipts	$47,239 15

The decrease in receipts has been much less than was anticipated, and the falling off in coal and merchandise has been partly balanced by an increase in passengers. The increase in expenses is mainly in repairs of track. Both the road and equipment are in thorough repair. The surplus of net earnings over interest and dividends is $117,894 89, against 112,872 57 for the same period last year, the interest account having been much larger last year than the present.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. BRANDT, Broker, No. 39 Exchange-place, for the steamer of November 2, were as follows:

London—60 days' sight	107⅜ per cent.
London—3 days' sight	108¼ "
Paris—60 days' sight, per dollar	5f. 32½c.
Paris—3 days' sight, per dollar	5f. 27½c.
Amsterdam—60 days' sight, per guilder	40⅛c.
Hamburg—60 days' sight, per marc banco	35⅜c.
Frankfort—60 days' sight, per florin	40¼c.
Bremen—60 days' sight, per rix dollar	77⅜c.

Chicago and Rock Island Railroad.

This company was chartered under the title of the Rock Island and La Salle Railroad Company, February 27th, 1847, with authority to construct a railroad from Rock Island City, on the Mississippi river to La Salle, at the southwestern terminus of the Illinois and Michigan Canal, and to raise by shares a capital of $1,000,000. By a supplemental act passed Feb. 7, 1851, the title of the company was changed, and authority obtained to continue the road eastward, via Ottowa and Joliet, to Chicago, and to increase the share capital by $3,000,000. The company was re-organized under this charter, April 8, 1852.

The surveys for the road were commenced in December, 1850, and completed between Rock Island and Peru, in April, 1851, and between Peru and Chicago in the following August. On the 6th of September, 1851, a contract was concluded for the construction and equipment (except cost of right of way, station grounds, fencing and incidental expenses) of the whole line for the gross sum of $3,987,688, payable $2,000,000 in 7 per cent. first mortgage bonds, $500,000 in cash, and $1,487,688 in certificates bearing 10 per cent. interest, the same to be exchanged into stock at par on the completion of the work. The contractors further obligated themselves to operate the road as far as opened for use until the whole was completed, and receive as full compensation for their services the earnings therefrom. They also agreed to pay the semi-annual interest on the bonds during construction.

The construction of the road was commenced October 1, 1851, and the whole line completed and accepted by the company July 10, 1854, having been opened by sections as follows: from Chicago to a junction with the Northern Indiana railroad, 6 miles, in December, 1851; to Joliet, 40 miles, in October, 1852; to Ottowa, 84 miles, in February, 1853; to La Salle, 98 miles, in March, 1853; to Geneseo, 158 miles, in November, 1853; and to Rock Island, 182.8 miles, February 22, 1854. Between this last date and the delivery, the contractors were engaged in ballasting and otherwise finishing up the work and supplying equipment, and ultimately completed the road about 18 months earlier than the period named in the contract.

At the annual meeting in 1854, the contractors were authorized to lease the Peoria and Bureau Valley Railroad, which they did for the rental of $125,000 per annum, and commenced operating the same July 1, 1855. The bridge over the Mississippi river, between Rock Island City and Davenport, was completed and opened for traffic, April 1, 1856. This bridge was constructed by a separate company, representing conjointly the Chicago and Rock Island and the Mississippi and Missouri railroad companies, which furnished the capital therefor.

On the 27th of September, 1858, an agreement was entered into with the Illinois River railroad company, providing that the Chicago and Rock Island railroad company should furnish the said road with rolling stock, and be paid therefor 10 per cent. on its cost annually, and also for the next 20 years operate the road at the expense of the Illinois River railroad company. On the completion of this road in 1859, this agreement was carried into effect, and the line is now being operated on the terms set forth.

The length of the Chicago and Rock Island railroad is 181.8 miles; of the Peoria and Bureau Valley railroad 46.5 miles—total 228.3 miles.

The amount of capital stock authorized was $7,000,000 of which $5,603,000 has been paid in. There has been no increase of capital stock since 1857.

The bonded indebtedness of the company remains the same as in 1858, viz: $1,397,000 first mortgage 7 per cent. conpon bonds—issued January 10, 1852, and payable principal in twenty

years, and coupons semi-annually, July 10th, and January 10th, in New York.

The aggregate cost of road and equipment is $6,987,710—the details of which are not given.

The gross earnings of the road from all sources for the fiscal year ending June 30, 1860 and 1861, were as follows:

	1860.	1861.
From passengers	$248,092 80	$338,112 08
" freight	705,791 31	784,022 94
" mails, etc	40,049 65	44,883 19
Total	$1,093,933 77	$1,164,018 21
Operating and maintaining the Chicago and Rock Island Railroad	$708,054 56	
Rent of Peoria and Bureau Valley R.R.	125,000 00	
Taxes	32,615 40	
Loss on currency	40,350 40	
Cost of new works	53,868 07	
	959,888 43	
	$204,129 78	
Interest on bonds	97,510 00	
Balance	$106,619 78	
The increase of gross earnings over those of the previous year was	$70,084 44	
The increase of expenses	175,522 21	
Decrease of net earnings	$105,437 77	

The amount expended for new works, such as ballasting, sidetrack, earthwork, masonry, water-tanks, land, etc., has amounted to $68,529 30—of which $14,661 23 is included in the ordinary expenses of the road.

There has also been included in the expenses of operating the road an item of extraordinary repairs, which ordinarily would be considered a proper charge to construction, viz:

Bridge over Canal Feeder at Blue Island, 125 feet span	$1,280 00
Bridge over Des Plains river in Joliet, 290 feet long in 3 spans	3,974 47
Bridge over Rock River, 40 feet span	385 08
" " 8 spans, 1,253 ft.	27,162 57
" Ausable River, 2 spans, 165 ft.	1,945 10
" Vermilion River at La Salle, 4 spans, 210 feet	2,267 91
	$36,915 04

The estimates of similar works to be built the present year, to supply the place of the original wooden structures is estimated at $34,921. Both the items for construction and extraordinary repairs have been increased the past year in consequence of the destruction, by a tornado, of the Bridge over Rock River.

There has also been an unusual amount of extraordinary repairs upon locomotives ($14,088). Forty of the first locomotives used on the road have been thoroughly overhauled, and all the defective work replaced with new material, consisting principally of 52 new Low Moor tyre, 18 chilled tyre, 13 flue sheets, 5 new pilots, and 7 new driving wheels. The company have 59 locomotives. The rolling stock is about as follows: 33 first class, and 8 second class passenger cars; 5 mail and express, 11 baggage, 492 box freight, 105 cattle, 305 platform, 10 gravel and 48 hand cars.

The following is a statement of disbursements for operating and maintaining the road, including taxes and interest on bonds, for the years ending June 30:

	1857.	1858.	1859.	1860.	1861.
Repairs of roadway and track	$118,803 49	$99,372 17	$87,129 77	$105,224 16	$117,676 99

Foreign Commerce of the Port of New York.

The value of Imports of foreign merchandize, exclusive of bullion, into the port of New York, from January 1st up to the 4th week of

October, has been	$106,642,846
Same time in 1860	197,709,227
Decreased imports	$91,066,381

Export of domestic produce and foreign merchandize, exclusive of bullion, for the same

period	$108,324,678
Same time in 1860	80,185,896
Increased exports	$28,138,782

Adding decreased imports and increased exports, the change in favor of this port for the year so far is $119,205,163. For the first time in the history of the commerce of this port, its exports of domestic produce and foreign merchandize exceed its imports of foreign merchandize. The following statements will give the relative amounts of these, with the imports, exclusive of bullion, for the first ten months of three previous years:

	1858.	1859.
Value of exports	$51,400,462	$54,734,613
Value of imports	126,720,295	198,897,700
	1860.	1861.
Value of exports	$80,185,896	$108,324,678
Value of imports	197,709,227	106,642,846

The exports of domestic produce, exclusive of foreign merchandize exported, has been as follows:

1858.	1859.	1860.	1861.
$46,767,981	$48,223,748	$73,594,650	*$100,000,000

* Estimated.

The value of exports from this port, exclusive of bullion, for the first four weeks of October, were $12,136,678, against $10,439,624 for 1860.

The additions to the specie reserves of the country received at this port for the year have been as follows:

Imports of foreign gold over exports	$39,790,000
Received from California	29,240,000
	$69,030,000
To this amount should be added at least $11,000,000 received from other sources, and from California, not manifested	11,000,000
	$80,000,000

The two months remaining will probably n crease the amount to $100,000,000.

The exports from this port the past year over imports were $33,339,241. The United States, though a gold producing country, will take the present year a large part of the gold production of other countries, and retain all the domestic production, which may be estimated at $65,000,000 annually.

Absorption of the Government Loan.

The topic of chief interest in financial circles is, of course, the influence of the expenditures of government upon the money market. Thus far it has not been unfavorable, though we may not have got far enough along with the payments on account of the great loan to determine their full effect. These can only be ascertained by experience, although they may be inferred with a good deal of accuracy from a general view of the condition of the country, and of its foreign and internal commerce.

Of the first $50,000,000 instalment of the loan taken by the banks, the public absorbed just one half up to the date of taking the second instalment. Up to that time, however, the machinery provided by government for appealing to the people had only partially been put in motion. Only a comparatively small number of offices had been opened for popular subscription to the loan. We presume that the banks had made no effort to dispose of the amounts taken by them, as the high rate of interest paid made the loan a most desirable security to hold in the falling off in the ordinary line of discounts. They could easily hold the whole amounts, and accommodate at the same time their customers. No embarrassment whatever was created; on the contrary, the condition of the banks was greatly strengthened by the impulse which their course gave to the business of the country. The experience they have already gained shows that their specie reserves are not affected; that the expenditures of government, like those of any other borrower, come round again in due time into their vaults. The specie held in deposit in this city after the disbursement of the first $50,000,000 had been fully completed, is only a trifle below the highest point ever reached. The specie line of the banks of Boston and Philadelphia, which are parties to the loan, has suffered no reduction. In the meantime there is a constant influx from abroad and from California, which must relieve all apprehension of disturbance on account of the disappearance of the precious metals, so common in all wars. The additions to the coin of the country from the sources named can not be less, the present year, than $100,000,000.

The experience gained so far, is most encouraging. No disturbance whatever has been created in commercial circles. The next question is the extent of the means of the people upon which the government is drawing. There can be no doubt of their ability to pay, by the system of taxation in use in all the countries of Europe, annually into the public treasury, a sum very nearly as large as they are likely to be called upon for in the shape of loans. Labor is certainly far more productive in this country, than in Europe, as is shown by the fact that wages here, are from one-third, to a half higher. No people in the world have such resources and facilities for the creation of wealth. Our system of public works in the North, which embraces 22,500 miles of railroad, and 5,000 miles of canal, gives every producer a market at his own door. Those of Europe are supplied with their breadstuffs from fields in the interior of our continent, 1,500 miles distant from the port of their shipment. We have but few of the local burdens that press so heavily upon the people of the Old World. Certainly our people can pay taxes fully as large as those borne by those of Great Britain. The average sum annually paid by the people of that country for the maintenance of government alone, is equal to $13 a head. Taxes levied at the same rate in the loyal States would produce very nearly $300,000,000 annually. England did not permanently increase its public debt on account of the Crimean War, although her expenditures, for nearly two years, were on a scale quite as imposing as those of our government at the present time. In fact, a limit can be hardly set to the ability of a people to pay, if their industries are both free and productive.

We see no cause of apprehension that we shall not be able to meet any expenditure likely to be incurred. The great thermometer of public sentiment, the prices at the stock exchange, is most significant of the confidence and ability of our people. Government 6s have steadily risen, by slow degrees, 12 per cent. from the lowest point they touched in the first shock of civil war. Their upward tendency has only kept pace with the growing conviction of the strength, and final success, of the government. We can point to no more triumphant test. It includes all others. So long as the

public confidence can be maintained, all burdens are really light; and what at other times would be great sacrifices and burdens, becomes sources of the highest satisfaction.

Journal of Railroad Law.

RIGHT OF RAILROAD COMPANIES TO USE HIGHWAYS IN MASSACHUSETTS: LIABILITY OF FOR NEGLIGENT USE: PLAINTIFF MUST PROVE HIMSELF FREE FROM NEGLIGENCE IN ORDER TO RECOVER DAMAGES FOR INJURIES RECEIVED.

The plaintiff's intestate received injuries, from which he died, while passing along a highway in Cambridge, Mass. The highway was used by the Boston and Lowell Railroad Company, and the plaintiff alleged that the company were negligent in the use of it, and by reason of their negligence the intestate was crushed while passing between their cars. At the trial one of the grounds upon which the plaintiff relied was, that the defendants were using the public highway as a freight yard, in which to make up their freight trains and to shift their cars from one part of their yard to another, and that this was habitually and commonly done, to the detention and obstruction of the public travel. To prove this issue, the plaintiff called witnesses, and asked whether the defendants caused their freight trains to stand across the highway any length of time, and how long each day, and whether they were accustomed to move their freight trains backward and forward across the highway for any space of time each day. This was objected to, and the testimony ruled out of the court.

Another ground relied upon by the plaintiff was, that the flagman at the crossing was a careless and intemperate person, and for that cause unsuitable to be employed in that capacity, and it appeared that he had since been in the house of correction as a common drunkard. The defendants denied that the flagman was an intemperate person, and for the purpose of showing that he was not so while in their employ, asked different witnesses, against the objection of the plaintiff, whether during a series of years, when they had often been at the crossing, the flagman was attending to his duty, and whether they ever saw any indication of intemperance in his conduct, and if he appeared to be a man competent to his place. These questions were asked witnesses not as experts, or having any peculiar skill.

The court instructed the jury that the defendants had a right to use the tracks where it crosses the public highway, to make up their trains in or to shift their cars, in the usual manner of their business, provided it was done in a reasonable manner, and they did not delay the public thereby for any reasonable length of time; that the sole question for them, in relation to this part of the case, was, whether they delayed the plaintiff's intestate unreasonably or unnecessarily, in this instance; and the jury could not, upon this question, regard the habit of the defendants at any other time or occasion in making up their trains and unnecessarily obstructing the highway.

The court also instructed the jury that if the defendants did not on this occasion conduct the train with due care, and did thereby unreasonably obstruct the highway, still to enable the plaintiff to recover, she most show that her intestate himself used due care, that is such care, as a man of ordinary prudence and discretion ought to use in such circumstances, not such care as men of ordinary prudence and discretion might sometimes use under like circumstances, to avoid the obstructions of the highway, because such persons sometimes do or may act carelessly; that, no matter how long the defendants obstructed the highway, if the plaintiff's intestate attempted to cross over the train between two freight cars shackled together, while it was in motion from the force of the engine attached thereto, as a matter of law, this was not the use of due care and the plaintiff could not recover for any injury received by him while so attempting to cross over the train.

A verdict and judgment was rendered in favor of the defendants, from which the plaintiff appealed, alleging error in the exclusion of evidence and in the charge to the jury. The following is the opinion of the Supreme Court—sustaining the judgment below.

HOAR, J. The exceptions show that a principal issue in the cause was upon the unreasonable or negligent conduct of the defendants in the use of the highway, at the time the plaintiff's intestate received the injury for which she asks to recover compensation. We think their habits at other times had no legitimate bearing upon this issue, and that evidence respecting such habits was properly excluded. If their use of the highway at that time was reasonable and lawful, the plaintiff could have no greater rights because on other occasions they had been guilty of misconduct. They could not have shown their general carefulness as an excuse for their conduct at the time in question. The cases cited by the plaintiff depend upon a different principal, where the acts proved might fairly be regarded as designed to be a preparation for, or commencement of, the principal fact to be established.

The plaintiff's evidence was not as to the conduct or condition of the flagman at the time of the accident, but was offered to prove that the defendants were negligent in employing an intemperate and incompetent person. This raised directly the question as to his general habits and behavior, and it was therefore right to allow the defendants to show that he was careful, attentive and temperate. This was a fact which could be proved by witnesses who had seen his conduct, and could testify to the facts which they had observed. It did not require that they should be experts.

It was undoubtedly true that the defendants could not lawfully use the highway as a part of their freight yard; that is to say, they had no right to make the exclusive use of it which they own convenience required, which they could make of their own property. But they could pass and repose upon the highway for any lawful purpose, provided they used it only to a reasonable extent, and in a reasonable manner, without encroaching upon the rights of others who had an equal right to use it. The question of the mode and reasonableness of this use was rightly submitted to the jury.

The question whether the plaintiff's intestate exercised due care, or by his own carelessness contributed to the injury which he received, was a question of fact for the jury, if there were any facts in dispute, or if there were any evidence upon which it was competent for the jury to find that he used ordinary care. But it has long been settled in this commonwealth that it is incumbent upon the plaintiff to show, by affirmative evidence, that he was in the use of due care; and upon this point he has the burden of proof. When, therefore, a plaintiff offers no evidence that he was in the exercise of care, but, on the contrary, the whole evidence on which his case rests shows that he was careless, we have held that the court may rightfully instruct the jury as a matter of law that the action cannot be maintained.

We are of opinion that the conduct of the plaintiff's intestate, as reported, brings his case clearly within this rule; no reason, whatever, appearing to justify him in attempting to pass between cars in motion, propelled by an engine. The plaintiff's counsel argues, that, to sustain the ruling at the trial, it must appear to the court that, under no possible combination of circumstances, it could have been possible for him to make the attempt without negligence. But we do not so understand the effect of the exceptions. The ruling of the presiding judge at the trial was upon the case presented. If the evidence which the plaintiff offered was simply of such conduct on the part of the person injured as is described in the hypothetical case put to the jury in the instructions of the judge, we can have no doubt that it did not, as a matter of law, tend to show ordinary care on his part. If there were any other facts or circumstances in evidence tending to qualify or control the effect of this, they should have been stated in the bill of exceptions. Judgment for defendants.

Movement of Breadstuffs.

The receipts of breadstuffs at Chicago from January 1, 1861, to October 21, compared with the two preceding years, have been as follows:

	1861.	1860.	1859.
Flour, bbls.	1,173,283	464,242	515,047
Wheat, bush.	14,525,911	11,728,707	6,415,205
Corn, bush.	23,494,201	14,773,351	4,182,496
Oats, bush.	1,184,960	1,413,901	1,100,065
Rye, bush.	338,798	238,055	184,215
Barley, bush.	437,070	435,589	397,118

The deliveries at tide-water, through the Erie Canal, for the same periods were as follows:

	1861.	1860.	1859.
Canal opened	May 1.	April 25.	April 15.
Flour, bbls.	942,604	794,712	444,648
Wheat, bush.	19,530,303	10,620,161	2,025,303
Corn, bush.	17,609,242	12,692,971	2,310,423
Oats, bush.	3,927,324	5,062,160	3,720,549
Rye, bush.	527,321	238,976	212,481
Barley, bush.	828,020	1,340,775	941,248

Reducing the flour to bushels, the total number of bushels delivered at tide-water the past three years, to October 21, have been as follows:

	1861.	1860.	1859.
Bushels	47,135,230	33,918,605	11,433,344

The deliveries for the year by the Erie Canal and the Erie and Central Railroads, will probably equal 100,000,000 bushels. The foreign demand is very active, and produce is being crowded forward in view of the closing of the navigation on the canal and lakes.

Cincinnati and Chicago Air Line Railroad.

This new route between Chicago and Cincinnati is in perfect order, and cars run through without change from city to city in twelve hours' time. The track is in excellent condition, and time is made with the utmost regularity.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

American Railroad Journal.

Saturday, November 2, 1861.

Share and Money Market.

The Share Market for the week has been quiet, with an improved tone at the close. The greatest advance has been in Erie and New York Central. Erie Preferred has advanced to 54, with a very active demand and upward tendency. The common Stock is at 34½. The improved condition of this company is attracting much attention, it was never before in so favorable position, as it will have no floating debt but the assessment scrip, and over due coupons in the hands of the trustees. The road is in the best possible position for traffic, which is now very large. The earnings for October will probably exceed those of any previous month since its opening. All these favorable circumstances have influenced the demand for the stock. The Central is also doing well. Both roads never had a better prospect for a winter's business. The closing of the Mississippi River by the blockade, must add largely to their traffic. The whole market is firm with an upward tendency. Money is more active, but is sufficiently abundant, for the wants of the trade, as well as for those of government. The earnings of railroads for October will show much better than for September. There is more freight moving west. The receipts thus far for this year have been almost entirely from produce coming east. With the usual returns of freight, the earnings of the road would have been greater for 1861 than for any previous year.

The interest coupons on the first mortgage bonds and bonds of 1867, of the New York and Harlem Railroad Company, will be paid on and after Nov. 1, at the Treasurer's office cor. of 26th St. and 4th Avenue.

The coupons of the Evansville and Crawfordsville Railroad Company, due on the 1st November, will be paid at the office of the Farmers' Loan and Trust Company, New York.

The coupons of the 1st mortgage bonds, Eastern Division, La Crosse and Milwaukee Railroad, will be paid on presentation at the office of the Receiver in Milwaukee, with exchange on New York.

The coupons, due 1st of November, 1861, on the seven per cent. mortgage bonds of the Long Island Railroad Company, will be paid at the Bank of the State of New York, N. Y., on and after that date.

School coupons No. 16, of the City of San Francisco, due November 1st, will be paid on and after that date, by Wm. T. Coleman & Co. Coupons not presented within six months from 1st November must be sent to the Treasurer of city of San Francisco for payment.

The Concord Railroad has declared a dividend of 3 per cent., payable November 1 to stockholders of the 23d inst. The May dividend was 4 per cent.

The Nashua and Lowell Railroad Company has declared a dividend of $4 per share, payable November 1 to stockholders of the 22d October.

The Michigan Southern and Northern Indiana Railroad Company pays the interest due Nov. 1, on the Michigan Southern sinking fund bonds, and on its first and second mortgage bonds.

The coupons due Nov. 1 on the extension bonds of the New Haven, New London and Stoniugton Railroad Company, will be paid at the office of M. Morgan & Son, No. 37 William-st.

The holders of the first mortgage bonds of the Madison and Indianapolis Railroad, who have assented to the agreement for re-organization and surrendered their bonds, can receive six months' interest on presentation of their certificates at the office of Winslow, Lanier & Co.

The coupons on bonds given by the City of Rock Island to the C. & R. I. R. R. Co., due 1st November, will be paid on presentation at the office of the City Treasurer, at the Rock Island Bank, in said city.

The coupons of the 2d mortgage bonds of the Central Railroad of New Jersey maturing Nov. 1, will be paid on presentation at the office of the Treasurer, 69 Wall-st.

We learn that the Terre Haute and Alton Railroad Company contemplate resuming interest payment on the first mortgage bonds in a week or so. The earnings of the line for the present month promise an increase some $25,000 to $30,000 on October of last year.

The Illinois Central Road has received for lands this month $125,000, and has canceled $55,000 bonds. Of the $125,000 there is devoted to interest $75,000.

The Missouri State Convention, just adjourned, has authorized an issue of bonds to the amount of $1,000,000, carrying 7 per cent. and payable in ten years—the interest to be provided for by setting aside specially for its payment $70,000 from the State revenue yearly. It has also authorized the creation of Auditor's warrants to the amount of $1,000,000, in sums of $5, $10, $20, $50, $500 and $1,000. These warrants are payable for military services or supplies, and are made receivable for taxes to the State. The State stock in the banks is pledged for the re-payment of so much of it as shall remain out after next year. The bonds of this scrip are issued to provide means to defend the State.

The survey of the railroad between Madison and Portage, Wis., has been finished. There are 14 miles of the road ready for the ties, equal to two-fifths of the whole line, 35½ miles.

The Rockport (extension) Railroad is now completed from Gloucester to Rockport. The cars will begin their regular trips about the first of November.

Pittsburg, Fort Wayne and Chicago Railroad.

This road was sold at Cleveland, on the 24th ult, by order of the court, pursuant to a plan for the re-organization of the company, upon the following terms: Three different mortgages are to be created—the first for $5,250,000, for the bonds secured by which, the first mortgage bondholders of the original companies agree to exchange their bonds, with their coupons, at their nominal value; the new bonds to bear interest from January 1, 1862, at the rate of 7 per cent. payable semi-annually, in six classes—one class on the first of each month. The principal redeemable July 1st 1911, and after July 1, 1866, at the option of the company. These bonds may be converted into 6 per cent. bonds, irredeemable except by the operation of a sinking fund of 1 per cent., till $2,500,000 are redeemed. The holders of these bonds are entitled to vote at meetings of stockholders at the rate of one vote for $200 par value of said bonds.

2nd Mortgage bonds, $5,100,000. These bonds are to bear interest after April 1st, 1862, and contain the same provisions as the first mortgage bonds in reference to the rate of interest, to their redemption and conversion into irredeemable bonds, and also in reference to voting at the meeting of the stockholders. A further clause provides that in case of sale of the road under this mortgage, bonds to the amount of $400,000 shall have preference as to payment. For this class of bonds are to be exchanged the second mortgage bonds and income bonds of the Ohio and Pennsylvania Company; the second and third mortgage bonds of the Ohio and Indiana, and the construction bonds of the Pittsburg, Ft. Wayne and Chicago Company, that matured previous to Oct. 1, 1859, with unpaid interest accruing before Oct. 1, 1859. The interest accruing after this date to be converted into 3rd mortgage bonds.

The holders of the *second* mortgage bonds of the Ohio and Indiana Railroad Company are to be entitled to receive for their bonds, that class of the second mortgage bonds having preference of payment as aforesaid, for the reason that the lien created by the two mortgages on this section of the road does not much exceed, per mile, the first mortgage on other portions of it.

3d Mortgage bonds $2,000,000. These bonds entitle the holder to interest at the rate of 7 per cent. after the first day of April, 1862, out of such balance of net earnings as may remain after paying the interest and sinking funds previously provided, and maintaining the road The holders are entitled to cast one vote for every hundred dollars held by them.

The real estate bonds of the Fort Wayne and Chicago, and the Pittsburg, Fort Wayne and Chicago Railroad to be exchanged with this company at their par value into the 3d mortgage bonds. All debts not included in the foregoing classes, are to be exchanged for an equal amount of 3d mortgage bonds.

Share Capital. The share capital of the new company is limited to $6,500,000, for which the stock in the old company may be exchanged at its par value. The dividends on the stock are limited to 6 per cent.—the surplus remaining to be paid to the sinking fund for the redemption of the first mortgage bonds.

Erie Railway.

This company is making steady progress in placing its affairs upon firm ground. No arrears of interest remain upon the 1st, 2d or 3d mortgage. The interest on the 4th is advertised to be paid on the 1st proximo. That on the 5th will undoubtedly be paid on the first of December, when it falls due. The affairs of the old company are to be wound up during the year, and the new company commence its actual existence with the beginning of the new one, without any liabilities but its funded debt, which will stand as follows:

1st mortgage	$3,000,000
2nd mortgage	4,000,000
3d mortgage	6,000,000
4th mortgage	4,900,000
5th mortgage	1,792,500
Total	$19,692,500

The accruing interest on this sum will be $1,378,485. The net earnings for 1860 exceeded this sum by $448,921—the gross earnings being $5,180,316—net $1,827,406. The ratio of net to gross earnings was 35.4 per cent. We have the gross earnings for the present year, but not the net—the accounts of the company not being yet made up. The former, by months, have been as follows:

	1860-61.		1859-60.
October	$587,242	October	$473,774
November	561,448	November	499,426
December	412,722	December	409,131
January	407,949	January	336,390
February	391,100	February	303,279
March	454,237	March	426,470
April	544,511	April	462,815
May	507,480	May	419,991
June	429,757	June	401,560
July	377,907	July	371,256
August	418,674	August	477,883
September	519,579	September	598,341
Total	$5,612,606	Total	$5,180,316
Increase	$432,290		

Assuming a similar ratio for expenses for 1861, as for 1860, the net for the former year will be $1,986,862. Deducting from this sum the accruing interest, there would be left $608,377, for the preferred shares. These cannot exceed $8,000,000, and call for $560,000 annually. This statement is correct in all but the estimates for expenses for 1861, which are assumed to have been at the same rate as for 1860. This estimate cannot be far out of the way. It shows that the net earnings for the year have exceeded by $44,377, the interest on the debt of the company and a sum equal to dividends at the rate of 7 per cent. on the preferred stock. The company will enter the new year with greatly increased facilities for business, and with the prospect of much larger earnings for 1862 than for 1861.

One cause of the previous embarrassments of the company was the construction of the Long Dock, the greater portion of which is owned by it. This is a very valuable property as is shown by the fact that 104 is offered for the stock of this company held by individuals; the par value being 100. This property has an extensive front on the North River, and a large area of land in Jersey City, opposite New York. The site occupied then is the best possible for the traffic of the company, having great depth of water, and never obstructed by ice.

Erie and North-East and Buffalo and State Line Railroads.

The Erie and North-East railroad is 19.50 miles in length, extending from Erie, Pa., to the New York State line. The company was chartered April 22, 1842. The work of construction was commenced in 1849, and completed January 19, 1852. It was built with a gauge of 6 feet in expectation that the Buffalo and State Line railroad company would adopt a similar one. That company adopted the Ohio gauge of 4 feet 10 inches. To remedy the inconvenience of a break of gauge, the two companies agreed to make it uniform from Buffalo, adopting the Ohio gauge, and to run both roads as one line, and to pay the same rate of dividends to the stockholders of each—in effect to consolidate the two roads. It was the carrying out of this agreement that led to the Erie riots, in which a portion of the track of this road was destroyed, and the running of the road for a time interrupted. The matter was finally compromised by a subscription on the part of this company of $400,000 to the capital stock of the Erie and Pittsburg railroad; and by the subscription on the part of the Cleveland and Erie railroad company of $500,000 to the capital stock of the Sunbury (now Philadelphia) and Erie railroad—the Legislature of Pennsylvania confirming upon these conditions, the rights of the two companies to the chartered privileges claimed by them. In 1857, an act was passed by the Legislature of New York, authorizing the Buffalo and State Line railroad company to lease or purchase the Erie and North-East railroad by exchange of stock or lands. Under this act, nearly all the capital stock of the latter has been exchanged for that of the former. Bonds have also been exchanged to the amount of $149,000.

The capital stock authorized and paid in was $600,000. The funded debt consists of $400,000 first mortgage 7 per cent. coupon bonds, dated June 1, 1857, and payable, principal June 1, 1870, and coupons semi annually in New York. Cost of road and equipment, $700,000.

Its earnings and expenses are embraced in those of the Buffalo and State Line railroad. The same dividends have been paid by the two companies.

The Buffalo and State Line railroad is 68.34 miles in length, extending from the New York State Line to Buffalo. The company was organized under the General Railroad Law, and filed articles of association October 13, 1849. The work of construction was commenced in July, 1850, and completed February 22, 1852.

The capital stock authorized is $2,000,000, of which $1,950,950 has been paid in. The funded debt of the company amounts to $1,049,000, viz: $500,000 first mortgage 7 per cent. coupon bonds, dated October 1, 1851, and payable October 1, 1866; $200,000 Income 7 per cent. bonds, dated April 1, 1852, and payable one-half April 1, 1859,

and one half April 1, 1862; $200,000 unsecured 7 per cent. bonds, dated October 1, 1852, and payable July 1, 1864; $80,000 E. & N. E. Exchange 7 per cent. bonds, dated January 1, 1857, and payable June 1, 1870; $69,000 E. & N. E. Exchange 7 per cent. bonds, dated January 1, 1858, and payable January 1, 1861. The coupons and interest on all the bonds are payable semi-annually in New York.

The floating debt of the company amounts to $27,545 71. The total cost of road and equipment has been $2,788,384 06. The income account for the year ending November 30, 1860, is as follows:

Receipts from passengers		$396,553 57
" freight		500,666 30
" mails		13,800 00
" rents		5,252 97
" other sources		781 78
		$917,054 62
Paid transportation expenses	$412 972 78	
" interest	100 834 96	
" dividends, two of 5 per cent. each	216,000 00	
Balance	187,246 88	
		$917,054 12

The equipment of the road consists of 25 locomotives; 22 first class, 12 second class and emigrant, 8 baggage, mail and express, and 307 freight cars.

The length of road operated is 87.84 miles. The number of miles run by passenger trains has been 157,251, by freight trains, 160,599. Number of passengers carried in the cars, 255,209; number carried one mile, 15,648,972. Tons of freight carried, 343,761; tons carried one mile, 16,577,071.

The following is a statement of the cost, length, earnings, and dividends paid, from the opening of the road to the present time.

Year.	Cost.	Length.	Gross earnings.	Expenses.	Net earnings.	* Dividends.	* Per cent.
1852	$1,921,270						
1853	2,220,591	68.34	$134,306	$66,319	$67,987	$134,805	12
1854	2,343,849	87.84	395,439	154,045	241,394		
1855	2,491,364	87.84	507,618	242,764	264,854	120,000	10
1856	2,589,787	87.84	679,750	323,987	355,763	130,000	10
1857	2,739,936	87.84	800,115	474,171	325,944	130,000	10
1858	2,772,987	87.84	850,408	640,106	210,302	143,000	11
1859	2,779,994	87.84	840,116	480,507	359,609	108,000	6
1860	2,788,384	87.84	848,242	429,939	418,304	216,000	10
			911,019	412,973	498,046	216,000	10

* Included in dividends of 1853.

The company publish no reports other than those made to the Legislature of the State. The surplus earnings over dividends have been expended in perfecting the road.

The above statement is for nine years; during which time the gross earnings have amounted to $5,967,013, or an average of $663,001 per annum. The aggregate expenses have been $3,225,811, or an average of $358,423. The net earnings, $2,742,203, or an average of $304,689. The dividends declared have amounted to 79 per cent., an average of 8.8 per cent. The amount disbursed in dividends has been $1,197,805, a yearly average of $133,089. The average length of road operated has been 83½ miles, and the average cost $2,516,907.

New York, Providence & Boston Railroad.

The receipts of this Company for the year ending 31st August, 1861, have been as follows:

Through passage		$86,505 84
Local do.		62,966 18
		$149,472 02
Receipts from New Haven, New London, and Stonington Extension Railroad		27,693 48
Through freight	$61,090 65	
Local do.	27,179 31	
		88,269 96
Mail service	$7,621 66	
Balance due last year	3,548 44	
	$11,170 10	
Less amount due by P. O. Department	1,347 14	
		9,812 96
		$275,248 42
Interest on deposits		865 04
From sale of real sstate		400 00
Balance, August 31, 1860		38,959 56
		$315,473 02

The expenditures have been:

General expenses, salaries, wages, oil, etc.		$72,958 28
Fuel		21,040 56
Repairs of road		48,530 45
" cars		9,833 06
" repairs of engines		15,357 54
" bridges and depots		5,121 69
New cars		5,602 06
New engines		17,411 88
New machine shop		4,203 07
Paid unclaimed interest on bonds		615 00
Paid interest on 6 per cent. bonds		16,290 00
Dividends, November, 1860, and July, 1861	$67,846 14	
Dividends unclaimed	323 34	
		67,522 80
Paid unclaimed dividends		572 50
New Haven, New London, and Stonington Extension Railroad		2,941 40
Newport Connection		506 96
Balance in cash		26,965 77
		$315,473 02

The number of passengers carried over the road during the past two years, is as follows:

	1860.	1861.	Decrease.
Through passengers	117,213	109,151	8,062
Local do.	100,713	93,822	6,891

The amount of freight transported over the road the past two years is as follows:

	1860.	1861.	Decrease.
Through freight.	75,874,000	66,105,000	9,769,000
Local do.	21,376,000	16,230,000	5,146,000

The receipts of the year were		$275,248 42
Am't due for transportation of troops		5,000 00
Am't due by Post Office Department.		1,357 14
		$281,605 56
Expenditures—		
Expenses 61 per cent.	$172,841 58	
New engines and cars	23,113 94	
New machine shop at Providence	4,203 07	
		200,158 59
Net earnings		$81,446 97

The receipts of last year were		$317,166 72
Expenditures—		
Expenses of last year	$172,319 79	
New equipments	15,209 44	
		187,529 23
		$129,637 49

The indebtedness of the Company on the 31st of August last was as follows:

Six per cent. bonds	$276,400 00
Amount due but not presented	300 00
	$276,700 00

The total earnings of the Extension Railroad for the year was $31,398 00.

On the 17th September last the steamboat terminus of the road was removed to Groton, where the improved facilities for landing of boats and passengers, and for the receipt and discharge of freight, must result in improving the business of the road. The connection of the road with the N. H., N. L. & Ston. R. R., by means of the extension to Groton, proves to be quite as advantageous as was anticipated, and as it becomes more generally known will become a favorite day route to Boston.

On the first of August, 1860, the Post Office Department adjudicated to the Shore Line the night through mail to Boston, which is deemed of much future value to the road.

The road has received extensive repairs. Twelve miles of track have been relaid with additional ties, and nine miles graveled, with six to ten inches of gravel.

There have been 23,849 new ties laid down, 8,911 rails repaired at the Company's shop, 365 tons new rails laid, and 35 tons laid in lengthening and making turn outs. The old car house taken down at Stonington and rebuilt at Groton; an engine house built at Greenwich; also, a commodious brick machine and repair shop built at Providence, and stocked with the necessary tools for repairing engines.

Two new first-class locomotives, coal burners, have been purchased. Another has been entirely rebuilt and altered to a coal burner, and is made fully equal to a new engine. A third has been repaired and altered, making eight coal burners in all, five of which may be called new.

Five new eight wheel freight cars have been purchased, and one eight wheel baggage and smoking car built.

The machinery and rolling stock is therefore very complete, requiring no very important additions or repairs.

There were 275,000 miles run the past year, being 33,000 miles more than the previous year; of which 65,000 were run with wood, at a cost of 10½ cents, and 210,000 with coal, at a cost of 8 cents per mile—all heavy trains being run with coal.

The Company has no floating debt, or construction account open.

The office of the Company is at Stonington, Ct. The directors and officers are:

President—James I. Day.

Directors—James I. Day, Matthew Morgan, Thomas Tileston, Samuel D. Babcock, Daniel Drew, Hamilton Blydenburgh, William F. Cary Samuel Sloan, Nathan F. Dixon.

Superintendent—A. S. Mathews.

Treasurer—Francis Amy.

Secretary—William R. Palmer.

Civil Engineering.

Bridge over the Theiss, and Tubular Foundations. By M. Cezanne, Engineer des Ponts et Chaussees. Translated by J. Bennett.

(Continued from p. 694.)

A short notice of a Pneumatic Pile Bridge across the Savannah River.

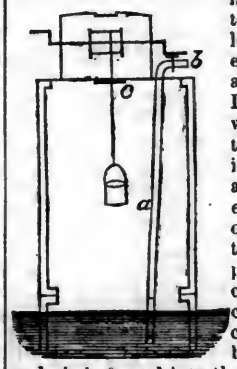
I am indebted to my friend C. C. Martin for the following sketch of his experience in pneumatic pile driving. After the completion of the Brooklyn Water Works, during which Mr. Martin was connected with me in the construction of the dams and preparation of the ponds of that work, he took charge of the pneumatic pile bridge across the Savannah River, where he prosecuted the work successfully, until interrupted by the war of the Rebellion.

The Savannah River Bridge is to be on the line of the Charleston and Savannah Railroad, about 16 miles from the latter city; when completed, it will consist of six fixed spans, and a swing bridge, with an aggregate length of 900 feet.

The two abutments and seven piers are to consist of pneumatic piles; the abutments and four piers to be of two piles each; the piers at the end of the swing bridge to consist of four cylinders each, and the pivot pier of five. The cylinders are cast in sections 9 feet in length, and 6 ft. outside diameter, with 2 inches thickness of metal; the lower section of each column is cast or turned with a bevel edge, as shown,

in order that it may offer the least possible resistance as it descends; the upper end of this section, and both ends of the others, have a flanch on the inside 3″ wide and 2″ thick, through which are forty holes 1 inch in diameter, to admit bolts for joining the sections together. The ends of each section were turned in a lathe, so as to be parallel, and thus insure the straightness of the cylinder, though composed of several sections. The cylinders were cast and fitted up by the Trenton Locomotive and Machine Manufacturing Company, of Trenton, N. J., and are certainly monuments of mechanical skill, and do great credit to the manufacturers.

Apparatus.—The apparatus for sinking these piles consists of a large flat boat, upon which is placed a 16 h. p. steam engine, and two double-acting air-pumps; a hoisting apparatus, consisting of a drum driven by the engine, sheer poles, blocks and falls.



The Savannah River at this point has a velocity of about four miles per hour; the tide rises and falls about three feet. The river bottom is composed of clean river sand for a depth of 20 feet, when a strata of coarse clean gravel is found, about 2 feet thick; below this is a stratum of blue material, composed of sand and clay, very compact. The water in the river is always charged with yellow clay, from the interior, so that it is impossible to see beneath the surface; the depth varies from 2 or 3 feet at the shore to 16 feet at the middle.

Process of Sinking the Cylinders.—Two sections of cylinder were bolted together, the joint being made air-tight with white lead; both were lifted together and suspended while the "Flat" was being hauled into position by watch tackle running in different directions. When the cylinder was thus brought immediately over the place it was to occupy, it was gradually lowered till the bottom rested on the sand. These two sections were held in position by guys,

while another section was lowered upon them and secured. The sections are hoisted by means of a piece of timber with an eye-bolt, as shown in the sketch. The workmen go down in the inside to put in the bolts and secure them, being supported by planks resting on the flanches. A cast iron cap is then secured on the top of the cylinder, and to this is attached a hose connecting with the air-pumps; a large cast iron receiver intervening to receive the water which is pumped out. The pumps being set in motion, the air and a portion of the water in the cylinder is drawn out, and a partial vacuum formed, producing a pressure on the top sufficient to force the cylinder into the sand. In one instance where four sections were bolted together, being in fifteen feet of water, and about four feet in the sand, the cylinder sunk six feet in three minutes on the application of a vacuum. The settlement is generally from one to four feet.

Air-lock.—The next step is to place upon the top of the cylinder an "air-lock," after removing the "vacuum-cap;" this is a section made of boiler iron, arranged with a door in the top and bottom, both opening downward, large enough to admit a man, and closing air-tight. The air-lock is smaller in diameter than the cylinder, and this allows the insertion of "bull eyes" for admitting light; also a butt and stop-cock. Inside of the air-lock is a windlass for hoisting material from inside the cylinder. The hose from the air-pumps is now connected with the butt which opens into the inside of the cylinder; the syphon-pipe, *a*, is secured in place, connecting with a stop-cock on the outside of the cylinder on top, at *b*. The bottom door, *c*, is closed, and air is forced into the cylinder by the pumps. The stop-cock is opened, and the water is pressed down by the air above it in the cylinder, and is forced up the syphon-pipe, through the stop-cock into the open air. As soon as the water is as low as the bottom of the pipe, *a*, men are sent inside to add other sections, and thus lengthen it. The men are admitted as follows: the bottom door being closed, the top one is opened, and men descend into the air-lock, and close the top door; then, by means of a small air-cock in the bottom of the air lock, the pressure is admitted from below into the air-lock. This closes the top door air-tight, and the pressure in the air-lock becomes equalized with that below, and the bottom door falls by its own weight, and the men descend by means of rope-ladders suspended from the under side of the air-lock bottom. In coming out of the cylinder, the men come into the air-lock and close the bottom door; then, by means of a small air-cock in the side of the air-lock, the pressure is allowed to escape, and the top door falls open.

In allowing the pressure from below to enter the air-lock, great caution is necessary, else exceedingly painful sensations are experienced; different persons are differently affected; nearly all experience a painful sensation in the ears, and some oppression of the lungs, bleeding at the nose, headache, dizziness, etc. As soon as the pipe is lengthened, the stop-cock is again opened, and by a repetition of the process, all the water is forced out of the cylinder, and, by a continuation of the same process, the sand is forced up the syphon-pipe with great force in astonishing quantities; by this means, the sand is all excavated from within the cylinder. A phenomenon scarcely to be expected occurs: on the excavation near the bottom, the air escapes under the bottom of the cylinder, rises through the sand, and escapes in bubbles through the water, in some cases over an area of one hundred feet in diameter; this keeps the water entirely out of the cylinder, and enables the workmen to conduct their operations easily.

Having excavated to the bottom, the men come out, first having removed several length of the syphon-pipe, and raised up their ladder, the pressure still continuing. As soon as they are out and all is ready, the stop-cock is opened and the compressed air allowed to escape suddenly; this removes the upward pressure from within, and the cylinder by its own weight forces itself into the sand, being resisted only by the friction against the sand on the outside, and the material immediately under the lower edge of the cylinder; these are both exceedingly small while the compressed air is escaping, for the water rushes in under the bottom, bringing with it great quantities of sand, which must move with the water down the outside of the cylinder. The cylinder, which sunk six feet by a vacuum, sunk nine feet in about two minutes by allowing the pressure to escape. By a repetition of this process of excavation and "blowing off" pressure, the cylinders were sunk from 25 to 30 feet into the bottom of the river, being from 3 to 7 feet in the hard strata of clay and sand. The cylinders are to be brought up to the grade of the road (about fifteen feet above the surface of the water) by sections cast of the requisite length; they are to be connected together by means of wrought iron ties and braces, and are to have cast iron capitals to receive the chords of the wooden superstructure, which is to be a Howe-truss.

Inclination of Cylinders.—It frequently happens in sinking cylinders that, owing to inequalities in the density in the quality of the material which it penetrates, the cylinder becomes inclined, and it is a very difficult and expensive process to bring it again to the upright position. One cylinder took an inclination of about 8 inches from the perpendicular when it was 25 ft. in the sand; the first attempts to straighten it were made upon a very ingenious plan, devised and practised by Capt. William S. Smith, who had charge of the work before I had; it consisted in excavating quite to the bottom of the cylinder, and driving wooden wedges under the lower side, and applying a strain with a tackle purchase. When the pressure was allowed to escape, the cylinder would have a tendency to straighten; these efforts did not succeed, for the cylinder would not move at all.

I then arranged a purchase by which I could exert a strain of at least twelve tons, to pull the cylinder in the direction of perpendicular. The material was excavated to the bottom of the cylinder, and wedges were driven well under the lower side; the excavation was then extended outside of the cylinder on the upper side, so that the air would escape altogether on that side, thus loosening the sand which pressed upon the upper side of the cylinder. In addition to these appliances, I arranged a battering-ram on a small scale, by suspending a stick of timber so that its blows directed against the side near the top of the cylinder should tend to straighten it. Having all things prepared, I took the men out, and allowed the pressure to escape, at the same time "hauling hard" upon the tackle, but the cylinder did not move. I then had the ram brought to bear, and the effect was magical; the thirty tons of metal in the cylinder, under the combined action of the pressure, strain, and ram, yielded readily and was soon brought into position. The slight blows from the ram seemed all that was requisite to loosen the hold of the sand upon the cylinder, and allow it to move.

Incidents and Notes.—The amount of sand that entered the cylinder under the bottom when the pressure was allowed to escape, was astonishing; on one occasion, when the cylinder had penetrated the sand twenty-one feet, and was nearly through the stratum of coarse gravel, the material having been excavated to the bottom, the pressure was allowed to escape: the cylinder sunk less than a foot, and the sand rose inside the cylinder 22 feet. This quantity = nearly 21 cubic yards, was brought in by the in-rushing water in a very few minutes.

During the process of sinking a cylinder 27 feet, there was the incredible amount of 129 feet in depth of sand excavated.

In several instances, 24 feet (in depth) of water was blown out of the cylinder in ten minutes; 38,468 lbs. of water, were raised to an average height of 22 feet in ten minutes; and on one occasion, in one hour, we forced out through the syphon pipe 15 feet in depth of sand, equal nearly 14 cubic yards, raising it on an average 32½ feet; this was done entirely by the pressure of the air.

At another time, the water had been forced out

of the cylinder, and a few feet of sand excavated, so that the men were about 20 feet below the surface of the river, when the force-pipe burst. I was fearful for the effect it might have upon the men, both from the effects of the sudden removal of the pressure, and also the in-rushing of the water consequent upon it. I almost instantly procured a piece of rubber-packing, and, applying it over the rent, bound it fast with a cord, and was thus enabled, by running the pumps very rapidly, to hold a sufficient pressure in the cylinder for keeping the water out till the men were removed.

The men informed me that, as they were at work, they suddenly heard a loud report as of a cannon, and all was dark as night. The report was occasioned by the sudden removal of the pressure from the outside of the ear, the air was condensed; the darkness was occasioned by a rapid condensation of the vapor, held in invisible suspension in the condensed air, forming a dense fog.

Railroad Earnings--Weekly.

The earnings of the Galena and Chicago Railroad the 3d week in Oct., 1861, were $56,106
Do., 1860 57,860

Decrease $1,754

The earnings of the Cleveland and Toledo Railroad for the 3d week of Oct., 1861, were . $20,953
1860 20,825

Increase $128

The earnings of the Chicago and Rock Island road, the 3d week in Oct., '61, were $39,953
Do. 1860 37,238

Increase $2,715

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in October, 1861, were $24,577 26
Do. 1860 ..... 29,416 74

Decrease $4,839 54
Total since 1st October, 1861 ..... $71,117 18
Do. 1860 ..... 89,307 86

Decrease $18,190 68
Total since 1st January, 1861 ..... $825,722 81
Do., 1860 ..... 781,902 60

Increase $43,820 21

The earnings of the Toledo, Wabash and Western Railroad the 3d week in October, 1861, were $34,163 30
Do. 1860 ..... 28,797 22

Increase $5,456 08

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3d week in October, 1861, were $44,892 93
Do., 1860 ..... 36,945 37

Increase $7,946 56

The receipts of the Chicago and Northwestern Railroad for the 3d week in October, 1861, were $28,166 61
Do. 1860 ..... 24,536 69

Increase $3,629 92

The traffic of the Great Western Railway of Canada for the week ending Oct. 25, 1861, was as follows:

Passenger	$18,678 43
Freight and live stock	38,850 60
Mails and sundries	1,406 74

The earnings of the Indianapolis and Cincinnati Road for September were as follows:

Passengers	$13,107
Freight	16,729
Mail, etc.	1,523
Total	$31,280

The earnings of the Connecticut River Railroad in September, 1860, were $30,782
Do., 1861 23,541

Decrease $7,241

The receipts of the Panama Railroad have been:

August	$148,729 91
September	129,746 09
Total two months	$178,476 00

Railroad Earnings for September.

We give below a recapitulation of the monthly earnings of railroads for September as far as received. They correspond very nearly with those of 1860. Last year there was a very active demand for breadstuff at high prices. The rates on freight were higher than those for the present. The traffic of the railroads East is much greater than at any former period. Nothing, comparatively, is going West. The receipts are almost entirely from produce going to market. Usually the inward is nearly as great as the outward traffic.

	1861.	1860.
New York and Erie	519,579	598,762
Hudson River	146,424	180,000
Michigan Central	236,845	251,423

Railroad Supply Store
FOR SALE.

ONE of the oldest and best established Railroad Supply Stores, may be had very low, the present proprietors having other business requiring their whole attention. Address Wm. Kemlo, 34 Hawley st., Boston, or Box 1487, New York Post Office. 2t*

LOCOMOTIVES FOR SALE.

THE Boston and Maine Railroad Company have for sale three second hand Locomotives of the following specification and description.

They all have outside cylinders and connections. Cylinders 15x20, four driving wheels, 4 ft. 6 in. diameter, diameter of boiler, 43 in. No. of tubes, 127; length of tubes, 10 ft.; diameter of do., 1¾ in.; weight of engines, about 24 tons each; capacity of tank on tender, 1,500 gall.

The above Locomotives are all in good working order, and are offered for sale on account of the Company having purchased several locomotives of greater capacity. Parties in want of a good machine can have now an opportunity to purchase at a reasonable rate. Application may be made at the office in Haymarket Square, Boston.

WILLIAM MERRITT Sup't.
Boston, Nov. 24, 1860. tf

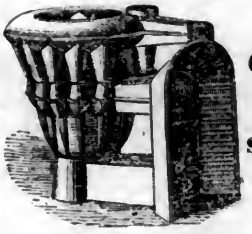
SANFORD'S
MAMMOTH
OR
GLOBE
HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y.



This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

Challenge Air-tight
KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL**, which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

HEAD QUARTERS, WESTERN DEPARTMENT,
St. Louis, Mo., August 23, 1861.

To Presidents and Superintendents of Railroads, Western Department, United States Army.

THE following is the basis established by the Government for the transportation of troops and supplies for the army:—

Per Passenger per mile (2) two cents for distances moved.

Equipments, munitions and supplies accompanying regiments, first class local rates, which will average about as follows:

30 miles or less	10	cents	per	100 pounds.
50 " "	15	"	"	"
100 " "	25	"	"	"
150 " "	40	"	"	"
200 " "	50	"	"	"
300 " "	75	"	"	"
350 to 400 miles not exceeding	90	"	"	"

For transportation of Horses in small lots, the following are the usual estimated weights of Railroad Companies:

Single animals	3,000	pounds.
2 animals	4,000	"
3 "	5,000	"
4 horses	6,500	"
5 "	8,000	"
6 "	9,000	"
7 "	10,000	"
8 "	11,001	"
9 "	12,000	"

Full car loads, 13 or 14 horses, usually charged 18,000 lbs. All other supplies forwarded by Freight Trains are charged local rates, according to classification of property which will usually average, on provisions and heavy freight, two to three cents per ton of 2,000 lbs. per mile.

Fast freights, immediate transportation, and precedence given to the Government in all cases.

All despatches required by the Government, to be furnished at the actual running cost.

E. H. CASTLE,
Supervisor Railroads, Western Department.

American Railroad Journal.

New York, Saturday, November 9, 1861.

Rutland and Burlington Railroad.

This company was chartered November 1, 1853, under the title of the Champlain and Connecticut River railroad company. On the 6th of November, 1847, the name of the company was changed by the passage of a supplementary act. The construction of the road was commenced in May, 1847. The first section of 14 miles from Bellows Falls to Chester was opened in June, 1849, and the whole road to Burlington, 119.54 miles, at the close of the same year. In November, 1853, in consequence of the inability of the company to meet the interest on its mortgage bonds, the road passed into the hands of trustees, where it still remains.

The capital stock of the company is as follows:

Common stock	$1,242,500
Preferred 8 per cent. stock	382,700
" 6 " "	608,176
Total	$2,233,376

The 8 per cent. shares are a part of $600,000 issued in 1850. On these the interest was guarantied by the company and paid up to 1853.

The 6 per cent. shares were created by vote of the stockholders at a special meeting in December, 1851. They were issued for equal amounts of the old stock and 6 per cent. bonds. Dividends were paid up to 1853.

The funded debt of the company amounts to $3,179,498, described as follows, viz:

First mortgage 7 per cent. coupon bonds, $1,800,000, dated February 1, 1851, and payable February 1, 1863, and coupons semi-annually at Boston.

Second mortgage 7 per cent. coupon bonds, $937,500, dated August 1, 1853, and payable February 1, 1863, and coupons semi-annually at Boston.

Third mortgage 7 per cent. coupon bonds, $436,500, dated August 1, 1854, and payable February 1, 1863, and coupons semi-annually at Boston.

Notes convertible into third mortgage bonds, $5,498.

Provision was made in the second and third mortgages for an issue of $1,200,000 under each.

The floating liabilities of the company August 31, 1861, were as follows:

Notes payable	$556,107 34
Six per cent. bonds	290,000 00
Interest bonds	23,300 00
" scrip	17,199 02
Dividend 8 per cent. stock	8,332 00
" 6 " "	728 00
Mortgage bonds coupons	353 50
Sundry accounts	76,499 29
	$972,519 15

The receipts and expenses of the road for the fiscal years ending August 31, 1859, 1860 and 1861, have been as follows:

Receipts:	1859.	1860.	1861.
From passengers	$123,199	$129,212	$118,012
" freight	197,974	177,725	163,733
" mails, etc.	33,115	27,431	29,438
	$354,288	$334,368	$311,183

1861.	6,204,011	120	311,183	272,992	38,191

The above is for eleven years; during which time the gross earnings have been $4,137,668, or an average of $385,242; the expenses during the

same time have been $3,131,160, or an average of $284,651; and the net earnings $1,006,503, averaging $91,500 per annum. The average cost of the road and its appurtenances has been $5,806,994.

The equipment of the road consists of 26 locomotives; 16 first class passenger, 2 second class, 4 baggage, 2 mail, 357 box, 101 platform and 80 cattle cars. The number of miles run by engines with all the trains in 1861, was 410,918, against 396,935 in 1860.

The office of the company is at Rutland, Vt.

The New York Central Railroad Co. have just opened a telegraph office at West Albany, where the most extensive machine shops of the company are located.

Michigan Southern and Northern Indiana Railroad.

This Company is a consolidation of the Michigan Southern and the Northern Indiana Railroad Companies.

The "Michigan Southern Railroad Company" was chartered on the 9th May, 1846, under an act providing for the sale of the Michigan Southern Railroad. By this act the road and its equipment were to be sold for the sum of $500,000, of which $50,000 was to be paid in three months, and the remainder in semi-annual instalments of $25,000, with interest at the rate of six per cent., the payments to be made in cash, or State bonds at specified rates. The construction of the road had been undertaken by the State, as a part of the internal improvements authorized by the act of March, 1837, and at the date of sale had been completed from Monroe to Hillsdale, 69 miles, at a cost of about $1,800,000. The capital of the new company was fixed at $2,000,000, with the right to increase it to $3,000,000. In 1849 and 1850, supplementary acts were passed, authorizing the re-laying of the road with heavy iron, the original track having been constructed of flat bars, laid on longitudinal sills. According to the terms of sale, the main line was to be continued west to Lake Michigan and the Tecumseh Branch completed. The section from Hillsdale to Sturgis was placed under construction in the spring and summer of 1850, and completed and opened for traffic to Jonesville in November, and to Coldwater in December of the same year, and to Sturgis in March, 1851. The remainder of the main line in Michigan was commenced in May, 1851, and completed in the following July. In 1850, the line was extended to the Monroe Pier on Lake Erie.

The "Northern Indiana Railroad Company" was chartered under the name of the Buffalo and Mississippi Railroad Company by an act of the Legislature of Indiana, approved on the 6th February, 1835, and under its present name by an act of the Legislature of Ohio, approved on the 3d March, 1851. By the latter act a consolidation of the portions of the roads in Ohio and Indiana was authorized. The proposed line was extended from Toledo due west through the Northern counties of Ohio and Indiana to Chicago at the head of Lake Michigan; and hence so close to the line of the Michigan Central Railroad as to become a dangerous competitor to that line. Surveys made in 1852 proved that an almost straight and level line was practicable, and in 1853 the construction of the road was undertaken, and the same was completed early in 1857.

The portion of the Michigan Southern within Indiana was built under the charter of the Buffalo and Mississippi Company, and that within Illinois under a separated charter granted by the Legislature of that State approved on the 16th June, 1852.

The several original companies above recited signed articles of consolidation on the 25th April, 1855, and their separate interests were merged into one concern, their share capitals being merged into a common stock, etc.

The Tecumseh Branch of the Michigan Southern was built by the territory of Michigan; and by the terms of the sale of the State road of which it formed a part, the new company was obligated to extend it to Jackson. The extension was completed to Manchester in 1855, and to the required terminus in 1857. A further extension from Jackson to Lansing has been spoken of and will probably be made at some future time.

Beside the Tecumseh, or as it is now called, the Jackson Branch, this company has several other branches which are named in a preceding section. These are the Constantine Branch from White Pidgeon to Constantine, the St. Joseph Valley Railroad from Constantine to Three Rivers (purchased), the Goshen Branch, forming now a section of the Southern line, a branch from Baileytown to Michigan City and the section in Ohio connecting Toledo with the Detroit, Monroe and Toledo Railroad.

The "Erie and Kalamazoo Railroad" is operated by this company under a perpetual lease. The M. S. and N. I. Co., however, own most part of its stock and manage the whole financial operations of the lessors.

The "Detroit, Monroe and Toledo Railroad" is also operated by this company under perpetual lease, which was granted on the condition of this company's assuming the liabilities of the original company from the construction of the road and the payment of eight per cent. dividends upon the full-paid stock from the date of completion. Construction was commenced in the fall of 1856, and the line between Monroe and Detroit completed in December of the same year. The residue of the line southward from Monroe was opened in August, 1857. This road gives both divisions of the company's road full connection with the Great Western and Grand Trunk lines of Canada and secures to the southern lines the same facilities of transportation in connection with those two roads as was formerly monopolized by the Michigan Central Company.

Few roads in the United States are better provided with equipment. Stations, store-houses, wharves, etc., are abundantly supplied, and all that conduces to facilitate the movement of goods and passengers has been scrupulously attended to by those having charge of the works.

The company also owns two splendid steamers which connect the eastern termini with the railroads of New York and the East generally. Lines of propellers also sail between Monroe and Toledo to Cleveland, Buffalo, etc.

That this road has not been financially successful is owing partially to competition, partly to deficiency in several years of the crops, partly from the falling off in the number of immigrants passing westward, but mostly to the adverse condition of the country produced by the revulsion of 1857. Up to February of the last named year and from the time of the completion of the road to Chicago regular semi-annual dividends were made. These commenced with the dividend made in January, 1853, and amounted in all to 59 per cent. on the paid-up capital. Of these dividends 37 per cent. was paid in cash and 22 per cent. in stock.

The numerous and extensive notices of the purely financial affairs of this company (extending from its first organization to the present time) that have been published in the JOURNAL preclude in this connection the necessity of any further details, and to these we refer the interested reader for a full history of the company.

The capital stock* authorized is $12,000,000 in 120,000 $100 shares; of this $9,018,200 on 89,182 shares have been paid in viz:

61,246 shares of common stock	$6,124,600
28,936 " guarantied "	2,893,600
	$9,018,200

The aggregate funded debt of the company is $9,719,704, as follows, viz:

Michigan Southern 1st mortgage, 7 per cent., bonds, $991,000—dated 1st November, 1850, and payable, principal 1st November, 1860, and interest semi-annually, 1st May and 1st November, in New York. Secured by a mortgage on the road within Michigan, extending from Monroe Pier to the Indiana State line, a length of 110 miles. Convertible into sinking fund bonds.

* Stock of the Detroit, Monroe and Toledo Railroad Company owned by M. S. & N. I. Company 2,750 shares and by individuals 1,367 shares—total 4,117 shares at $100 per share.

Michigan Southern, 7 per cent., bonds (unsecured), $67,000—dated 1st March, 1853, and payable, principal 1st March, 1863, and interest semi-annually, 1st March and 1st September, in New York. Convertible into D. M. & Tol. bonds.

Northern Indiana 1st mortgage, 7 per cent., bonds, $985,000—dated 1st August, 1851, and payable, principal 1st August, 1861, and interest semi-annually, 1st February and 1st August, in New York. Secured by a mortgage on the road from Goshen to the Illinois State line. Convertible into sinking fund bonds.

Northern Indiana, 7 per cent., bonds (unsecured) $123,000—dated 1st February, 1853, and payable, principal 1st February, 1863, and interest semi-annually, 1st February and 1st August, in New York. Convertible into Det. Mon. & Tol. bonds.

Erie and Kalamazoo 1st mortgage, 7 per cent., bonds, $300,000—dated 1st March, 1852, and payable, principal 1st March, 1861, and interest semi-annually, 1st March and 1st September, in New York. Secured by a mortgage on the Erie and Kalamazoo Railroad between Toledo and Adrian. Convertible into sinking fund bonds.

Jackson Branch 1st mortgage, 7 per cent. bonds, $130,000—dated 1st August, 1855, and payable, principal, 1st August, 1863, and interest semi-annually, 1st August and 1st February, in New York. Secured by a mortgage on the road between Palmyra and Jackson—about 45 miles. Convertible into sinking fund bonds.

Goshen Line 1st mortgage, 7 per cent. bonds, $1,168,000—dated 1st August, 1853, and payable, principal 1st August, 1868, and interest semi-annually, 1st August and 1st February, in New York. Secured by a mortgage on the road from Toledo to Goshen, 123 miles. Convertible into sinking fund bonds.

Detroit, Monroe and Toledo 1st mortgage 7 per cent. bonds, $611,000—dated 1st February, 1856, and payable, principal 1st February, 1876, and interest semi-annually, 1st February and 1st August, in New York. Secured by a mortgage on the Detroit, Monroe and Toledo Railroad, extending from Detroit to the State Line of Ohio—about 51 miles.

1st general mortgage (sinking fund), 7 per cent. bonds, $2,850,000—dated 1st May, 1855, and payable, principal 1st May, 1885, and interest semi-annually, 1st May and 1st November, in New York. Secured by a mortgage on all the roads and branches, and the equipment and machinery. The mortgage also includes the interest of the company in the leased roads, subject to the mortgage on them. One per cent. on the total provision under this mortgage, viz., $8,000.000, is to be paid annually from theproceeds of business to the Commissioners of the sinking fund, to retire the sinking fund bonds or pay them at maturity. All previous mortgage bonds may be converted into this class.

2d general mortgage 7 per cent. bonds, $2,465,000—dated 1st November, 1857, and payable, principal 1st November, 1877, and interest semi-annually, 1st May and 1st November, in New York. Secured by a mortgage on the same property and rights as the sinking fund bond.

Scrip issued for coupons funded, $29,704.

Floating debt, $437,886.

Kennebec and Portland Railroad.

This company was chartered April 1, 1846. The construction of the road was commenced in 1847, and completed in 1852. That section between the Atlantic and St. Lawrence Railroad, at Yarmouth, and the city of Bath, was opened July 4, 1849; from Brunswick to Gardiner, in December, 1851, and Augusta in the January following. The Yarmouth Extension, between Yarmouth and Portland, 13 miles, was constructed in 1850-'51. The road enters Portland on the west side of the city, and there connects with the Portland, Saco and Portsmouth Railroad, with a similar gauge. The length of the roads is as followa:

Main line, Portland to Augusta	63.00 miles.
Branch line, Brunswick to Bath	9.50 "
Total	72.50 miles.

The capital stock authorized was $1,402,400, of which $1,287,779 has been paid in, viz:

Yarmouth Extension 6 per cent. stock	$202,400
Preferred stock	247,000
New preferred stock	125,600
Common stock	712,779

The Yarmouth Extension stock constitutes a first lien on the Yarmouth section of the road. It was originally a 10 per cent. stock, but was reduced by agreement to 6 per cent. stock. Dividends payable semi-annually 1st April and 1st October. As the road is in the hands of trustees under the mortgages, and as no dividends have ever been paid, except on the Yarmouth stock, a description of the different classes of preferred stock is not regarded as necessary. The funded debt of the company, amounting to $1,280,000, is thus described:

First mortgage 6 per cent. coupon bonds, $800,000, issued in favor of certain cities and towns in exchange and as security for their bonds of like amount and tenor, issued and sold by the railroad company, viz: to the city of Augusta, $200,000; to the city of Bath, $200,000; to the city of Gardiner, $150,000; to the town of Hallowell, $100,000; to the town of Brunswick, $75,000; to the town of Topsham, $30,000. The balance was made to private parties, the towns of Bowdoinham and Richmond declining to make an issue of heir bonds as authorized, to the amount of $45,000. The company undertook to pay the city and town bonds at maturity, with the interest on the same. Both classes are dated November 1, 1850, and are payable in twenty years from date. Interest is due semi-annually in Boston and has been paid by the company.

Second mortgage 6 per cent. coupon bonds, $230,000, dated October 15, 1851, payable in 10 years; interest semi-annually at Augusta. No interest has been paid since Oct. 15, 1855. On the 1st of September, 1857, the trustees under this mortgage took possession of the road, and operated it from that time to the close of the fiscal year, August 31, 1860.

On the first of September, 1860, the trustees (who are the same persons for both classes of bonds,) commeneed running the road on behalf of the first mortgage bondholders.

Third mortgage 6 per cent. coupon bonds $250,000 dated Oct. 15, 1852, payable in 10 years; interest semi-annually at Augusta. No interest has been paid since Oct. 15, 1855.

Sinking fund, $111,581. The act authorizing the issue of the city and town bonds provided for a sinking fund to be created as follows: the company to pay to the same a sum equal to two per cent. on the amount of bonds issued; to pay at the rate of one per cent. on their amount for five years, and thereafter at the rate of one and a-half per cent. The payments to the fund were made as required up to 1855, since which no additions have been made except from the interest on the sum invested, and $2,000 of the per centage due for 1859. The investment of this fund on the 31st of July, 1861, was as follows: In scrip of the cities of Augusta, Gardiner, Hallowell, the towns of Brunswick and Topsham, the State of Maine, and the United States, $79,600; in Yarmouth stock bonds, $31,600; cash in hands of trustees, $331.

At the date of the last Balance sheet published, Sept. 30, 1856, the cost of road, equipment, etc., amounted to $2,871,264—since which time no change has been made except accumulations of interest.

The income account for the years ending Aug. 31, 1859, 1860, and 1861, is as follows:

Receipts:	1859.	1860.	1861.
From passengers..	$85,541	$86,994	$84,783

1859..	2,871,264	72.5	164,516	82,821	81,695
1860..	2,871,264	72.5	169,170	83,288	85,882
1861..	2,871,264	72.5	172,113	80,883	86,231

The above is for eleven years, during which time the gross earnings have been $1,889,731, an average of $171,193. The operating expenses during the same time have been $983,927, an average of $89,449. The balance remaining applicable to interest and dividends has been $900,795, averaging yearly $81,981. The yearly interest upon the 1st mortgage bonds is $48,000; upon the Yarmouth Extension stock, $12,144; upon the 2d mortgage bonds $13,800; and upon the 3d mortgage bonds $15,000—making a total of $88,944.

The office of the company is at Augusta, Me.

The officers are:

President—ALLAN LAMBARD.
Treasurer—J. S. CUSHING.
Superintendent—B. H. CUSHMAN.
Trustees—JOS. MCKEEN, JOHN PATTEN, M. S. HAGAR.

Pittsburg, Fort Wayne and Chicago R. R.

We give below the several notices of the Receiver, Trustees, and General Superintendent, in reference to the sale and transfer of the road and its appurtenances:

PITTSBURG, FORT WAYNE AND CHICAGO RAILROAD CO., CHICAGO, Nov. 1, 1861.

NOTICE.

Whereas, in pursuance of a decree of foreclosure issued by the United States Circuit Court for the Northern district of Ohio, a sale was made of the Pittsburg, Fort Wayne and Chicago Railroad, its franchises, property and effects, on the 24th of October, 1861, to James F. D. Lanier, J. Edgar Thomson, Samuel J. Tilden, Samuel Hanna and Louis H. Meyer, purchasers thereof. Now, therefore, be it known, and notice is hereby given by the undersigned, receiver of said Pittsburg, Fort Wayne and Chicago Railroad Company, to all persons employed on or about said railroad, and to all persons having business or other connections therewith,

That in pursuance of an order of the United States Circuit Court for the Northern district of Ohio aforesaid, I have this day delivered to J. F. D. Lanier and others, purchasers of said railroad as aforesaid, the said railroad, with all its appurtenances, machinery, rolling stock, fuel and material, together with all its property and effects, whether real, personal or mixed.

All persons now or heretofore employed by the undersigned, as receiver aforesaid, in connection with said railroad, are hereby discharged from further service for account of said receiver, except the auditor and treasurer having charge of the unsettled accounts and balances due the receiver, which they will proceed to collect for account of the undersigned. WM. B. OGDEN,

Receiver of the Pittsburg, Fort Wayne and Chicago Railroad Company.

OFFICE OF TRUSTEES PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY COMPANY, PITTSBURG, Nov. 1, 1861.

Having purchased the Pittsburg, Fort Wayne and Chicago Railroad, with all its equipments, materials on hand of every kind, and appurtenances of description, we have this day been placed in possession of the same by the receiver, and will on and from this date operate the same as the Pittsburg, Fort Wayne and Chicago Railway.

J. F. D. LANIER, SAMUEL HANNA, LOUIS H. MEYER, J. EDGAR THOMSON, SAMUEL J. TILDEN, } Trustees.

OFFICE OF TRUSTEES PITTSBURG, FORT WAYNE AND CHICAGO RAILWAY COMPANY, PITTSBURG, Nov. 1, 1861.

The receiver having this day passed the Pittsburg, Fort Wayne and Chicago Railroad into the possession of J. F. D. Lanier, J. Edgar Thomson, Samuel Hanna, Samuel J. Tilden and Louis H. Meyer, trustees, I assume charge of the same on their behalf.

All persons now employed in or about said road, not otherwise notified, will until further notice be retained in their respective positions.

G. W. CASS, General Superintendent,
P., F. W. & C. Railway.

About 500 freight cars are now in course of construction at the Illinois Central shops. These are principally intended for grain transportation

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* —) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, November 9, 1861.

Share and Money Market.

The share market the past week has shown considerable fluctuation, but prices at the close were very nearly the same as at the commencement of the week. The public mind has been occupied in watching political and military events, and in the absence of any startling news, the market has been nervously sensitive without any great change in prices. Favorable intelligence would probably lead to a large improvement. The general aspect of affairs is not unfavorable. Money is mote active, but is still sufficiently abundant for all business wants. The movement of produce still continues on a very large scale. Both railroads and canals are taxed to their utmost capacity. The season thus far has been favorable for Lake navigation. The foreign demand is still very large, at prices that bid fair to give our railroads all they can do through the winter season. The tonnage of our public works at the present time is enormous, and those resting upon tide-water will, probably, show earnings for October greater than for any previous month. The prospect for November is equally fair.

We give elsewhere a statement of the affairs of the Pacific Mail Steamship Company, showing that since 1856, including one bad year of sharp competition, the company have averaged 22 per cent. dividends per annum, which is a remarkable result for a stock which has ranged in market value from 60 to 98. As the business of the company is now very prosperous, and all danger of competition removed, there appears to be no reason to boubt that this average of dividends will be sustained.

The Rockport extension of the Gloucester branch of the Eastern, Mass., Railroad, about 4 miles in length, was formally opened on the 4th inst. The Gloucester Branch, 13 miles in length, leaves the main line at Beverly, 18 miles beyond Boston. The whole length of the branch is therefore about 17 miles, and the distance from Boston to Rockport about 35 miles. The Eastern Railroad Company have taken a lease of the new road for five years. It was begun Oct. 1. 1860, and completed on the 17th ult. Its cost was $83,000, of which sum the town of Rockport appropriated $50,000. To the President of the new road, Newell Giles, Esq., much praise is awarded for the unceasing interest shown by him to the enterprise from the beginning. The road was built by E. Gilmore & Co.

The question having arisen to whether the holders of 7.30 per cent. Treasury notes have the right to demand their conversion into stock, the following correspondence took place, which settles the point:

New York, October 29, 1861.

Hon. S. P. Chase, Secretary of the Treasury:

Sir: Will you have the goodness to inform us whether the holder of 7 3-10 Treasury notes has the privilege of exchanging them for twenty years six per cent. bonds at any time before the maturity of said notes? The supplementary act says the Secretary may issue said bonds, but the question arises as to whether he has the option, or whether the holder of the notes has the right to demand the exchange at any time.

With much respect, your obendient servants,
WILLIAM & JOHN O'BRIEN.

TREASURY DEPARTMENT, Nov. 2, 1861.

Gentlemen: Your letter of the 29th ult. is received. The act of Congress to which you refer does not in express terms give the holders of the three years bonds the right to demand their exchange at any time before their maturity for 6 per cent. bonds running twenty years, but it authorizes the Secretary of the Treasury to make such exchange, and this authority is regarded by this Department as entitling the holders to the option of making such exchange.

Very respectfully, your obedient servant,
GEO. HARRINGTON,
Acting Secretary of the Treasury.

Messrs. Wm. & John O'Brien, New York.

The contractors for the building of the Chesnut Street Bridge, Philadelphia, are pushing forward their work with efficiency. The superstructure of this bridge will be of iron, but without any covering overhead. The arches will extend a long distance on Chesnut street, and the time to be consumed in the construction is estimated at eighteen months.

The Peru and Indianapolis Railroad will be sold in Indianapolis on the 11th of January next, upon the application of holders of the first mortgage bonds.

The Chicago and Northwestern Railroad Company have just completed a bridge across the Fox River, Fond du Lac, 500 ft. long, thus completing a continuous route from Chicago, to Appleton, Wis.

The Three Rivers and Arthabaska Railroad was completed to Acton Station about 19 miles from Three Rivers, several weeks since, and an excursion train passed over it to that point. The remainder of the road to Arthabaska, about 8 miles, is to be finished by the 15th inst.

We learn that the appointment of President and General Superintendent of the Ohio and Mississippi Railroad, has been tendered to Wm. J. McAlpine, a well-known engineer and Railroad Manager.

W. C. Stephens, formerly Secretary of the Great Westery Railway, has been appointed to the same position on the Detroit and Milwaukee Railroad.

Alex. McNab, Esq., of Hamilton, C. W., for many years connected with the Engineer staff of the Great Western Railway, has been appointed, by the Imperial Government, Surveyor of the Public Works in the Island of Grenada, West Indies.

The New York Central Railroad is doing an immense business in the transportation of freight.

The company have found it necessary to largely increase their facilities in the way of cars, locomotives, &c., and Eaton, Gilbert & Co., are filling an order for one hundred freight cars. A signal telegraph has recently been erected by the Superintendent on Green Island, for the guidance of the employees on the road.

Pacific Mail Steamship Company.

The condition of this Company on the 1st of May, 1861, was as follows:

Assets.	
Cash and investments	$1,210,508
Invested in coal	381,953
Outfit and supplies at Panama & S. Francisco	170,822
Twelve steamships	1,618,620
Stock in N. A. St'bt Co.	221,666
Store ship, scows & boats	67,117
Machinery at Benicia	81,000
Real estate.	434,328
Miscellaneous	15,269
	$4,201,283
Liabilities.	
Share capital	$4,000,000
Surplus	201,283
	$4,201,283

The following is a statement of the amount and rate of dividends paid since, and including, 1856. The statement includes the whole period since the management of the company passed out of the hands of Messrs. Howland & Aspinwall.

Date of Payment.	Rate.	Amount.
May 7, 1856	10	$366,100
Nov. 5, "	15	550,150
May 5, 1857	10	366,100
July 15, "	10	366,100
Nov. 11, "	10	366,100
May 12, 1858	10	366,100
Aug. 6, "	6	219,660
Jan. 6, 1859	10	366,100
May 16, 1859	10	366,100
April 30, 1860	10	400,000
Nov. 7, "	10	400,000
May 22, 1861	5	200,000
Aug. 21, "	5	200,000
	121	$4,532,510

The rate of dividends paid have averaged 22 per cent. For the first four and a half years they equalled the entire investment of the company; in five and a half years 121 per cent. Notwithstanding the high rate paid, the excess of net earnings over dividends have enabled the company to accumulate a cash reserve amounting, on the first day of May last, to $1,210,508. The company had other property outside its steamships valued at $1,351,156, which, added to cash on hand, made an aggregate of $2,582,603, against $1,618,620 for steamships. The plant of the company, upon which it depends for its income, now represents only about 40 per cent. of its capital. The estimated value of its steamers on the books of the company is steadily diminishing, with a corresponding increase of the cash reserve. It is the policy of the company to add regularly to this to keep pace with the depreciation of its perishable property, the steamers, and to maintain the capital of the company unimpaired. This is about the first instance we know in which a transportation company has made any considerable progress in charging off the cost, at the same time maintaining in full efficiency its means or machinery for business.

We are unable to give the present condition of the company, but it is believed to be more favorable than at any previous period. Its earnings are very large. The freight offered, going North, is equal to the full capacity of its ships. All opposition has been quieted by a union of the competing interests. The steamers of the North Atlantic Steamship Company, in which the Pacific Mail Company is interested to the amount of four-ninths, the Baltic and Atlantic, are under charter, at remunerating rates, to the United States government. No materials exist for a competing line, should one be proposed. The company, consequently, never had a better prospect before it, and was never on so firm a foundation. The regularity and amounts of its dividends show it to have been an investment scarcely to be excelled. The company will, in a very few days, pay a dividend, having, within the present year, adopted the policy of making them quarterly instead of semi-annually. Its ships are in good condition, and are running with great success. The following is a list of those now owned by it:

Steamer Golden Gate.	Steamer Orizaba.
" Golden Age.	" California.
" Sonora.	" Oregon.
" St. Louis.	" Toboga.
" Uncle Sam.	" Constitution.

In addition the company own four-ninths of the Baltic and Atlantic.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. BRANDT, Broker, No. 39 Exchange-place, for the steamer of November 6, were as follows:

London—60 days' sight	107¼ per cent.
London—3 days' sight	108¼ "
Paris—60 days' sight, per dollar	5f. 33¾c.
Paris—3 days' sight, per dollar	5f. 28¾c.
Amsterdam—60 days' sight, per guilder	40 c.
Hamburg—60 days' sight, per marc banco	35⅜c.
Frankfort—60 days' sight, per florin	40⅜c.
Bremen—60 days' sight, per rix dollar	77⅝c.

Internal Commerce of the Country.

One result of the rebellion, the object of which was to secure the commercial independence of the South, has been not only to annihilate its commerce, but to show that it constituted so inconsiderable proportion of that of the whole country, that its loss will soon hardly be missed. Nearly all the products of the South entered into the channels of commerce, so that their value can be readily estimated. For the whole, $275,000,000 is a liberal estimate, of which cotton may be put down at $200,000,000. This, by itself, is a vast sum, but relatively to the commerce of the whole country, a very small one, as will be seen by a statement of that of the Northern States.

The State of New York is the only one in which freight on its public works is so classified that accurate estimates can be formed of its value. The following is a statement of the number of tons and value of the same moved on the railroads and canals of the state.

RAILROADS. Kinds of Freight.	Tons carried.	Val. p. T.	Total val.
Products of the forest	372,424	$20	$7,468,480
Do. of animals	895,519	200	179,103,800
Vegetable food	1,103,640	50	55,182,000
Other agricultural products	143,219	15	2,145,280
Manufactures	511,916	250	127,979,000
Merchandize	783,811	500	191,905,500
Other articles	930,240	10	9,302,440
Totals	4,741,773	$163	$773,096,500
CANALS.			
Products of the forest	1,509,977	$7	$10,654,710
Do. of animals	19,882	253	5,030,067
Vegetable food	1,659,158	30	49,710,838
Other agricultural products	3,714	29	1,098,072
Manufactures	268,759	30	8,113,177
Merchandize	250,360	337	84,250,428
Other articles	938,364	13	11,989,909
	4,650,214	$37	$170,849,198
Add tonnage of Railroads	4,741,773	163	773,096,500
Totals	9,391,987	$100	$943,945,698

The canal is almost exclusively used for the coarser kinds of freight; the railroad for the more valuable kinds. The value of the freight on railroads is made up from estimates of experienced forwarders. That on the canals from the manifests of shippers.

The number of tons carried on the railroads of Massachusetts for 1860 was 4,094,369, having an aggregate value of $667,382,147, adopting the value per ton estimated for the railroads of New York. The tonnage of the public works of the two States for the year was 13,486,351, having a value of $1,611,327,845. A sum eight times greater than the cotton crop, and six times greater than the products of all the Cotton States. But the commerce of the public works of the two states by no means embraces the whole that is carried on in them. In New York there is a vast commerce on the Hudson River and the lakes. to say nothing of the immense trade carried on in both over ordinary roads.

The length of the railroads of Massachusetts and New York, engaged in the transportation of freight, is 1,317 miles in the former, and 2,569 miles in the latter. The tons carried per mile in the former is 3,108, and in the latter 1,867; the average for the two states is 2,276 tons per mile. There are in the loyal states fully 23,000 miles of railroad in operation. If we estimate the tonnage for the whole to be one half that of the railroads of Massachusetts and New York, the aggregate tons moved on them is 26,174,000. At a valuation of $163 per ton, the aggregate value of their tonnage is $4,266,362,000. The tonnage of the canals probably exceeds 12,000,000, having a value, say of $30 per ton, or $360,000,000. The total tonnage of the public works of the North, consequently, is 38,174,000 tons, having a value of $4,626,362,000. The amount of the tonnage is unquestionably largely underrated. We are confident its value is not over-

stated. In bulk, it is *forty-five* times greater than the whole cotton crop. In value, twenty-three times greater.

Railroad Earnings--Monthly.

The earnings of the Galena and Chicago Railroad for October, 1861, were $220,146
October, 1860 252,108

Decrease $31,962

The earnings of the Chicago and Rock Island Railroad for October, 1861, were $147,168
Do., 1860 141,601

Increase $5,567

The earnings of the Cleveland and Toledo Railroad in October, 1861, were $96,434
Do., 1860 91,583

Increase $4,851

The earnings of the Michigan Central Railroad for October, 1861, were $307,332 80
Do., 1860 ..... 300,474 46

Increase $6,858 34

The earnings of the Hudson River Railroad for October, 1860, were $193,950 63
" 1861. ..... 173,260 89

Decrease $20,689 74

The earnings of the Toledo and Wabash Railroad for October, 1861, were $162,858
Do., 1860. 125,026

Increase $37,821

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending Oct. 26, were $93,941 68
Corresponding week, 1860 ..... 80,102 58

Increase in 1861 ..... $13,839 10
Total traffic from July 1st, 1861 ... $1,127,615 43
Corresponding period previous year. 1,125,289 03

Increase $2,326 40

The traffic of the Great Western Railway of Canada for the week ending Nov. 1, 1861, was as follows:

Passenger $18,557 16
Freight and live stock 37,293 89
Mails and sundries 1,350 49

Total $57,201 54
Corresponding week of last year 55,154 00

Increase $2,047 54

The earnings of the Cleveland and Toledo Railroad for nine days ending October 31, 1861, were $35,357
Do., 1860 31,751

Increase $3,606

The earnings of the Chicago and Rock Island road, the 4th week in Oct., '61, were $36,240
Do. 1860 32,796

Increase $3,444

The earnings of the Galena and Chicago Railroad the 4th week in Oct., 1861, were $64,261
Do., 1860 65,406

Decrease $1,145

The earnings of the Michigan Central Railroad, for the 4th week in Oct., 1861, were. $111,977 07
Do. 1860 ..... 100,881 41

Increase $11,095 66

The earnings of the St. Louis, Alton and Chicago Railroad for the 4th week in October, were:

	1861.	1860.
Passengers	$6,062 48	$7,909 16
Freight	16,666 37	12,151 70
Sundries	680 83	815 34
Total	$23,409 68	$20,876 20
Total this month to date	$94,526 86	$107,758 35
Total since Jan., 1st	849,132 49	799,953 09

Peoria and Oquawka Railroad.

A question of considerable importance in relation to railroad mortgages was decided on the 21st ult, in the United States Circuit Court at Chicago. before Judge Drummond, in a suit upon a mortgage on the Peoria and Oquawka Railroad. The Chicago *Journal* gives this report:

"A bill having been filed to foreclose the second mortgage upon all that part of the railroad of that company lying west of Peoria, and its appurtenances, revenues and income, after filing a cross bill and several amendments thereto, a petition was again filed for leave to file a further amended bill (cross and supplement) by the company, setting forth that the railroad of said company extended across the State to its east line, and was completed through and extending by its eastern connections to the Atlantic cities; and that upon the eastern portion of the road were other mortgages amounting to two million two hundred thousand dollars, which would be ruined and rendered worthless if the road west of Peoria could be sold separately, under the mortgage upon it; while if it could be kept together as one road, it would, as was alleged, earn money enough to pay the interest on all its mortgages and ultimately the principal debt, and also setting forth that the lessees of a part of the road, Moss, Harding & Co., were obligated to lessees to pay the interest upon the mortgage bonds by the terms of the agreement, and that interest had been paid, and that there were fraudulent and collusive arrangements between Moss, Harding & Co., and the Chicago, Burlington and Quincy Railroad Company to procure the sale and separation of the road west of Peoria from that east of that point, etc., etc., and praying a decree so shaped that the road mortgaged should not be sold separately except upon condition to protect the interests of the bondholders on lines east of Peoria in the preservation of the road as an uninterrupted and single line, and Moss & Company's interest should be first sold and the proceeds applied to pay the interest. His Honor Judge Drummond, after a very full discussion by the respective counsel, decided that for the purpose of enabling counsel fairly to raise the question in the Supreme Court, if they desired the allegation that the road was built to the east line of the State, and that it was mortgaged, as alleged, might be incorporated in the pleadings, but stating that the road, when sold, must be sold as mortgaged, and that no condition could, in his judgment, be inserted in the decree for the benefit of the eastern extension or the mortgagees thereof.

That the mortgagees took a mortgage of the road and of the franchises, at least to some extent, and took it, therefore, subject to such rights as the public might have in the operation and and management of the road—that when it should be sold it would be sold charged with the same rights, of course, but that those rights could not be defined by the Court now nor settled by a decree—that if the mortgage sale did not live up to and discharge those duties, whether to the public directly or the rest of the line, the matter would become a subject for the interposition of the proper courts of equity or law, as the case might be at the time when any question of that nature might arise. On these points he stated his judgment to be very firm.

He held also that no proof was admissible to show that the road, if well managed and under one management, would earn money enough to pay the interest or principal of its debts. That was a matter susceptible of no satisfactory proof, and was not pertinent to the merits of the case, and that if in future it could possibly be the case that the road would turn out to be prosperous, it could be no answer to the claim of its creditors now.

He therefore ordered that only so much of the allegations as related to the construction of the road to the east line of the State and the mortgages thereon, and as related to the payment of the interest since the filing of the original cross-bill, and as related to the earlier filing or asking to file the amendment, only to be allowed to go on file, and that all the other allegations be struck out after the proposed amended bill.

This is the first case of a mortgage of a part of a railroad that has ever come before the courts, though it is understood that there may be many such in this State."

Foreign Dry Goods Trade.

The movement at this port still shows a rapid curtailment of imports. The result at the end of the year will probably fully justify the estimates previously made, putting the total importations at one half those for 1860.

Imports of Foreign Dry Goods at New York for October:

	1859.	1860.	1861.
Manufactures of Wool	$1,421,850	$1,482,145	$1,032,389
" of Cotton	774,620	492,349	125,168
" of Silk	1,155,513	1,769,238	315,563
" of Flax	625,838	415,214	207,344
Miscellaneous Dry Goods	241,175	474,404	41,209
Total entered for consump.	$4,218,996	$4,613,350	$1,721,673
